### Distribution System Planning Workshop

August 24, 2021

#### Community Engagement Question Brainstorming

- Given the various dispersed communities we serve what form of outreach is most appreciated?
- How frequently do you suggest various communications about DSP?
- How do we need to demonstrate the impact that the feedback has provided?
- What community groups do we need to target? What's on your mind?
- How do we need to convey the goals and effectiveness of any current activities that have a relationship to "equity"?
- How accessible do you wish the evolving plans to be (in other words, they could change dramatically or very little)?
- What specific metrics does this group want us to be thinking about demonstrating in our engagement plan?
