**PROGRAM ADMINISTRATION****IDAHO***Wattsmart Batteries*

Rocky Mountain Power Wattsmart Battery Program is connecting with customers who want to take the journey to a more sustainable energy grid.

This program uses renewable energy stored in customer-owned battery systems. Participant batteries will be made available to Rocky Mountain Power to help manage energy on the electric grid. At the same time, the battery storage may serve as a back-up to a customer's home or business.

Participants earn upfront enrollment incentives and ongoing bill credits, while keeping electricity prices low.

This program is for Rocky Mountain Customers who purchase and install a qualifying battery storage system. Customers are required to work with their contractor to install a qualifying battery and ensure all equipment is connected and meets program requirements for participation. Qualifying batteries can be found at [RockyMountainPower.net/battery](https://RockyMountainPower.net/battery).

- The Wattsmart battery program is a four-year program in which participants give Rocky Mountain Power permission to use the energy installed in solar batteries installed at their home or business in exchange for upfront and ongoing incentive payments.
- The upfront Wattsmart incentive is equal to \$400 per kW of energy storage installed.
- The ongoing annual participation incentive is equal to \$15 per kW.
- Sonnen and SolarEdge brand batteries are currently the only batteries eligible for the program.

This program is best suited for customers that are early adopters of technology, energy conscious, and want to make a positive impact on the environment and renewable energy.

It is the customers responsibility to maintain the battery for use in the program.<sup>1</sup>
