RE: Condit Hydroelectric Project  
Noxious Weed Survey and Wetland Inspection Report for 2007

Dear Mses. Randall and Harris:

PacifiCorp proposes to decommission the Condit Hydroelectric Project on the White Salmon River. An important step in this preparation is gaining an understanding of the noxious weeds that occur in the area and the potential for them to spread into the newly drained bed of Northwestern Lake and other areas associated with decommissioning activities. During July, 2007, PacifiCorp conducted a noxious weed survey in the project area. Concurrently, PacifiCorp also conducted a wetland inspection to confirm wetland conditions that were initially described in the 2003 wetland delineation and functional assessment report.

The enclosed report includes the results of the 2007 noxious weed survey and wetland inspection. Per your request, enclosed are two hard copies and one electronic copy of the report.

If you have any issues or concerns with the report, please call Mike Ichisaka at (503) 813-6617.

Sincerely,

Todd Olson  
Program Manager  
PacifiCorp Energy
