**Subject: Condit Hydroelectric Project (FERC Nos. 2342)
Water Quality Certification Order No. 8049
Submittal of the Post-Reservoir-Dewatering Assessment Report**

Dear Ms. Randall:

Enclosed please find PacifiCorp's Post-Reservoir-Dewatering Assessment Report. This final report is submitted in compliance with PacifiCorp's Condit Dam Decommissioning Project 401 Water Quality Certification Order No. 8049 section 4.3.3 3) issued on October 12, 2010. This report documents sediment movement from the former reservoir area since breach of the dam on October 26, 2011, and identifies a plan to stabilize remaining sediment.

This report builds upon the Preliminary Sediment Behavior Report that was provided to the Washington Department of Ecology (Ecology) for consultation on December 23, 2011 and filed with the Federal Energy Regulatory Commission on January 24, 2012. PacifiCorp did not receive any comments before February 23, 2012, and subsequently is filing this final report with Ecology and the Federal Energy Regulatory Commission (under separate cover).

If you have any questions concerning this document, please contact Tom Hickey at (503) 813-5685 or at thomas.hickey@pacificorp.com.

Sincerely,

Mark A. Sturtevant
Managing Director, Hydro Resources
