

APPENDIX 5D

FISH MOVEMENT IN RELATION TO MEAN DAILY FLOW

Appendix D. Each of the plots shows fish movement in relation to mean daily flow (cfs) recorded at the USGS gauging station in the Klamath River downstream of J.C. Boyle powerhouse. Dashed lines represent the breaks in the Klamath River study area. From top to bottom, the breaks define: J.C. Boyle reservoir, J.C. Boyle bypass reach, upper peaking reach, lower peaking reach, Copco reservoir and Copco bypass.
