

Q: Does PacifiCorp plan on nominating the AECO gas supply by 6am Pacific Time for the physical delivery at next day at Kingsgate?

A: Given recent changes in NAESB standard nomination cycles, PacifiCorp expects that its volume election could be later than 6:00 am Pacific Time; however, please feel free to define that timing in your proposal.

Q: What re-nom provisions does PacifiCorp think they will need? i.e. the ability to call on more gas in later cycles or lower nominations in later cycles, or do you want bidder to suggest re-nom provisions, if any?

A: Please propose any intraday election capability in your response.

Q: Is it possible to get either a historic usage of this pipe service or a forecast of how much PacifiCorp intends to use the pipe over the term of the AMA?

A: The volume in this RFP constitutes less than 50% of PacifiCorp's anticipated daily natural gas requirement for generation tied to this capacity. PacifiCorp's election of supply at Kingsgate may, or may not, be based on anticipated natural gas consumptions at its generating plants.
