

# PacifiCorp - Stakeholder Feedback Form

## 2023 Integrated Resource Plan

PacifiCorp (the Company) requests that stakeholders provide feedback to the Company upon the conclusion of each public input meeting and/or stakeholder conference calls, as scheduled. PacifiCorp values the input of its active and engaged stakeholder group, and stakeholder feedback is critical to the IRP public input process. PacifiCorp requests that stakeholders provide comments using this form, which will allow the Company to more easily review and summarize comments by topic and to readily identify specific recommendations, if any, being provided. Information collected will be used to better inform issues included in the 2023 IRP, including, but not limited to the process, assumptions, and analysis. In order to maintain open communication and provide the broader Stakeholder community with useful information, the Company will generally post all appropriate feedback on the IRP website unless you request otherwise, below.

Date of Submittal 2023-02-23

\*Name: Joan Entwistle

Title:

\*E-mail: joan.entwistle@gmail.com

Phone: 9785494864

\*Organization: Utah Sierra Club (volunteer)

Address: 8231 Meadowview Ct

City: Park City

State: UT

Zip: 84098

Public Meeting Date comments address: 02-23-2023

Check here if not related to specific meeting

List additional organization attendees at cited meeting:

**\*IRP Topic(s) and/or Agenda Items:** List the specific topics that are being addressed in your comments.

Efficiency bundles

Check here if you do **not** want your Stakeholder feedback and accompanying materials posted to the IRP website.

**\*Respondent Comment:** Please provide your feedback for each IRP topic listed above.

Due to reduced air quality due to wildfires, customers will be increasing their use of air conditioning throughout the season even when temperatures are not high. The added efficiency of heat pumps during these times should be incorporated in the cost benefits.

**Data Support:** If applicable, provide any documents, hyper-links, etc. in support of comments. (i.e. gas forecast is too high - this forecast from EIA is more appropriate). If electronic attachments are provided with your comments, please list those attachment names here.

**Recommendations:** Provide any additional recommendations if not included above - specificity is greatly appreciated.

PacifiCorp Response (4/28/23):

Thank you for providing your stakeholder response. Consistent with the modeling tools available, PacifiCorp has addressed the inherent benefits of heat pumps during inclement weather cycles. While the assessment of changes to future cooling loads is primarily focused on climate change and temperature dependencies, PacifiCorp will work to understand to what extent wildfires may contribute to changes in cooling loads and thus efficiency opportunities. Additionally, we welcome any data that may provide insights into this issue for future modeling.

Please submit your completed Stakeholder Feedback Form via email to [IRP@PacifiCorp.com](mailto:IRP@PacifiCorp.com)
