

JUST THE **FACTS**

PACIFICORP

SERVICE AREA	141,500 square miles
ELECTRIC CUSTOMERS SERVED	2.0 million
NET-OWNED GENERATION CAPACITY	11,668 megawatts
OWNED RENEWABLE AND NONCARBON CAPACITY	3,421 megawatts

STEFAN A. BIRD
President and CEO
Pacific Power

GARY W. HOOGEVEEN
President and CEO
Rocky Mountain Power

PacifiCorp is the largest grid operator in the western United States, serving 2 million customers in six western states. The company comprises two business units that are leaders in generating and delivering safe, reliable and sustainable low-cost power.

- Pacific Power serves customers in Oregon, Washington and California.
- Rocky Mountain Power serves customers in Utah, Wyoming and Idaho.
- PacifiCorp owns 46,000 acres of lands for wildlife habitat, forestry and recreation.

CONNECTING THE WEST

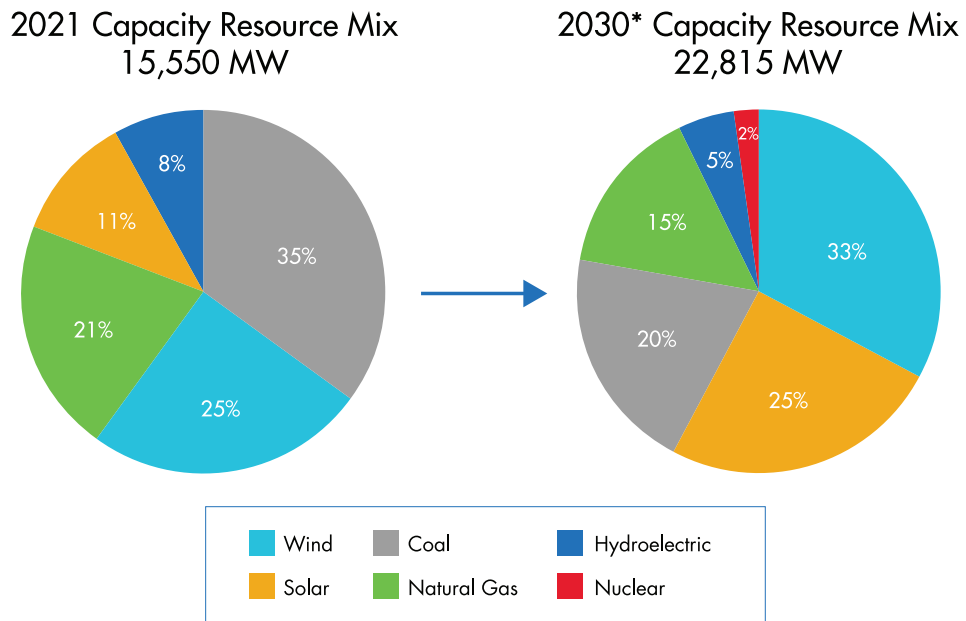

- As a founding partner of the Western U.S. Energy Imbalance Market, since 2014, PacifiCorp has saved customers more than \$390 million and significantly reduced greenhouse gas emissions in the region.
- The company operates 73 generating facilities across the West, including coal, natural gas, hydroelectric, wind, solar and geothermal facilities.
- PacifiCorp has approximately 64,400 miles of distribution lines and approximately 17,000 miles of transmission lines – more than any other single entity in the region.

POWERING A CLEAN FUTURE

- To accelerate PacifiCorp’s affordable and clean energy vision, its 2021 Integrated Resource Plan envisions a 74% reduction of greenhouse gas emissions from 2005 levels by 2030 and 98% reduction by 2050.
- The plan includes investments in expanded and modernized transmission, renewable energy, storage, demand response and advanced nuclear resources.

* Figures represent net capacity and do not include 2,602 MW of storage projected to come online through 2030.

CREATING CUSTOMER SOLUTIONS

- Pacific Power and Rocky Mountain Power offer customers the opportunity to support even more renewable energy by participating in their nationally recognized Blue SkySM renewable energy program.
- Together with customers and communities, PacifiCorp has helped install more than 2,100 new electric vehicle charging ports along rural highways, interstates and at businesses throughout the region.
- PacifiCorp is partnering with communities to leverage solar-plus-storage technology to help meet community energy needs. In Panguitch, Utah, a 1 MW peak capacity, 5 MWh energy storage system anticipates and responds to peak electricity consumption and levels demand on the local grid. This enables the company to employ batteries as an alternative to traditional grid infrastructure.
