MOTION

Pursuant to ORAP 7.35, PacifiCorp and Pacific Power (collectively, "PacifiCorp") move this Court for an order immediately staying the Phase II damages trials currently scheduled or contemplated through March 2028 in the Multnomah County Circuit Court, as outlined in Case Management Order No. 11 (TCF 07/28/2025) ("CMO No. 11"[1]), pending the outcome of this appeal. PacifiCorp also respectfully requests an administrative stay of the CMO No. 11 deadlines pending resolution of the instant Motion.

Plaintiffs-Respondents object to this Motion and intend to file a response.

I. INTRODUCTION

On July 28, 2025, the trial court entered an order (CMO No. 11) that would require the Oregon judicial system to adjudicate claims for billions of dollars in damages against a public utility, PacifiCorp, in 160 jury trials involving over 1,900 plaintiffs in the next two-and-a-half years. PacifiCorp is an electric public utility serving millions of customers in largely rural areas throughout the western United States, including Oregon, Washington, California, Utah, Wyoming and Idaho. CMO No. 11 threatens PacifiCorp's ability to provide power to those customers—all for the purpose of achieving

[1] See Declaration of Brad Daniels in Support of Appellant's Motion to Stay ("Daniels Dec."), Ex. 1.

results that will be rendered moot depending on the outcome of this appeal. If CMO No. 11 is not stayed, and the trial court's unprecedented plan proceeds as outlined, the result will not be forcing PacifiCorp to settle, given the Oregon Department of Forestry's ("ODF") finding that PacifiCorp did not cause the damage in the Santiam Canyon and the unresolved issues at the core of this case; it will be chaos.

CMO No. 11 is truly unprecedented in terms of its scope and impact. It violates PacifiCorp's due process rights, imperils its very existence, and unnecessarily risks PacifiCorp's ability to supply power, thereby disrupting the daily lives of over two million people across six western states. This Court has the authority to stay the proceedings in the trial court and must exercise that authority immediately. In a case of such vast importance, and with so much at stake, the time to act is now.

A. The Unprecedented Nature of This Litigation

Since the Labor Day 2020 wildfires, PacifiCorp has been involved in litigation to address the claims of property owners affected by those fires. While PacifiCorp has resolved approximately 2,600 2020 wildfire claims, and continues to negotiate in good faith, this class action has proven impossible to resolve, primarily as a result of fundamental disagreements over the rulings of the trial court and its interpretation of Oregon law.

In particular, the trial court's first-of-its-kind class certification decision permitted Plaintiffs to combine four fires in four separate areas into a single class action, which included potentially over 1,200 property owners in the Santiam Canyon. Although Plaintiffs continue to seek billions of dollars in potential liability for property damage in the Santiam Canyon, PacifiCorp did not cause that harm. Instead, fueled by gale force winds, a pre-existing, lightning-caused fire—the Beachie Creek Fire—was responsible for that damage. In March 2025, ODF agreed with that conclusion in an exhaustive report issued after a four-plus year investigation—a fact that Plaintiffs have failed to rebut at any stage in this case. (Daniels Dec., Ex. 2.) The ODF Report provides critical context for the nature of Plaintiffs' proof (or lack thereof) in the Santiam Canyon. A wrongly accused party should not be required to continue to endure years of class damages litigation when new evidence, combined with all the errors highlighted in PacifiCorp's appeal, demonstrates that those trials are based on legal flaws and wrong factual assumptions.

In addition, the trial court has allowed every class member to pursue unlimited noneconomic damages related solely to property damage, notwithstanding clear statutory (ORS 477.089) and Oregon common law forbidding such damages, and even though some class members were not even present during the fire and suffered only smoke damage to their property. As a

result of that ruling, Plaintiffs are receiving jury awards of millions of dollars for emotional distress and inconvenience arising from the damage to real property; the loss of personal property such as cars, pets, and family heirlooms; and emotional harm related to their aesthetic experience and memories of their property. To date, each class member has sought $25 million in noneconomic damages, meaning that PacifiCorp faces $250 million in potential liability for noneconomic damages alone in every 10-plaintiff trial.

Appellate review is the only means of resolving the parties' disagreements on those (and other) issues—which impact a fair and reasonable assessment of PacifiCorp's liability and are a current insurmountable hurdle to resolution. A relentless trial schedule under CMO No. 11 will not alter that situation for PacifiCorp and the parties.

B. The Ongoing and Irreparable Harm to PacifiCorp and the Customers and Communities Served by PacifiCorp

Despite those circumstances, the trial court has proceeded to schedule an unprecedented and extensive series of damages trials without regard to its impact on PacifiCorp, its customers, and the judicial system. Under the trial court's approach, PacifiCorp will be in court every available court day throughout 2026 and 2027, week after week, for up to nine trial days per jury trial. (*See* CMO No. 11, Ex. B (outlining trial schedule).) At the same time, the CMO No. 11 deadlines (which begin in August 2025 and continue for the

next two years) will require PacifiCorp simultaneously to investigate, take discovery, and defend against an increasing group of trial plaintiffs on a rolling 180-day clock—at least 10 complaints per week and counting. By this time next year, PacifiCorp will be in court every day in weekly jury trials, while scheduling and taking depositions of hundreds of plaintiffs and third parties, attempting to obtain adequate document discovery, locating and working with experts, filing pretrial and trial motions, and taking all other steps necessary to defend itself against claims totaling over $10 billion in economic and noneconomic damages from hundreds of individual class members across the state.

And those complaints are not cookie-cutter cases either. Each class member's experience and alleged economic and noneconomic damages are unique: some property owners lost their homes, while others suffered only smoke and ash damage or lost only personal property; some property owners are businesses and allege business losses; some property owners allege timber losses; some class members had to evacuate, while other class members were not at home; some class members have preexisting or other conditions affecting their past and current emotional experience, while other class members do not have those issues. The list goes on.

No court has ever forced a defendant to face the unique claims of hundreds of class members per month, with billions of dollars at issue, using

CMO No. 11's crammed and expedited process, which contains express limitations on discovery, motion practice, use of depositions at trial, and other restrictions, and that includes a fire that was determined by a state agency to not have been started by PacifiCorp's assets. PacifiCorp is entitled to defend itself against each claim with the full protections and process provided for by the Oregon Rules of Civil Procedure, with the evidence and theories available to it, and on a timeline and schedule that adequately permits PacifiCorp to employ counsel and experts, and to investigate, test, and dispute the accusations made against it. CMO No. 11 denies PacifiCorp those basic protections.

The irreparable harm to PacifiCorp goes beyond the deprivation of its due process rights. The judgments to date and the ongoing trial process have already resulted in a downgrade of PacifiCorp's credit by rating agencies and threatened PacifiCorp's ability to continue meeting its obligation to provide safe and reliable power to its customers. (See Daniels Dec., Exs. 3 & 4.)

And the potential future impact is even more significant. Assuming four trials per month in 2026 and eight trials per month in 2027, and given Plaintiffs' demands for $25 million in noneconomic damages and past verdicts averaging over $5 million per plaintiff, every month PacifiCorp would be subject to potential liability of over $1,000,000,000 and limited judgments averaging approximately ***$277,100,000 per month***, not to mention the

unrecoverable costs of simply defending that onslaught of trials. The bonding requirement and other impacts associated with those assumed judgments would have accelerating negative impacts on any company. PacifiCorp is no different, except that the risk is more significant—a utility's ability to provide safe and reliable electric service to customers across the West. CMO No. 11 thus threatens PacifiCorp's ability to meet its basic legal obligation to serve hundreds of thousands of Oregonians and two million customers across six western states. The irreparable harm to PacifiCorp and its customers as a result of this process is clear.

CMO No. 11 would also impose incalculable costs on the judiciary. CMO No. 11 would dedicate the resources of the Multnomah County Circuit Court—full-time jury trials every week for two years (and possibly more)—to a single case involving class members from other counties in the state. Those resources are finite, and the trial court's proposed process will impact the court's overall ability to handle its day-to-day business, including civil and criminal matters.

All of the factors above weigh in favor of staying the trial schedule and associated deadlines in CMO No. 11 pending the outcome of this appeal, which should be handled as expeditiously as possible.

II. BACKGROUND

A. Pretrial Proceedings

1. Plaintiffs' Complaint

On September 30, 2020, Plaintiffs filed a putative class action alleging that PacifiCorp caused or contributed to four wildfires in four separate locations in Oregon around Labor Day 2020—the Echo Mountain Fire in Lincoln County, the South Obenchain Fire in Jackson County, the 242 Fire in Klamath County, and the "Santiam Canyon Fire" in Marion and Linn Counties. Plaintiffs sought at least $1.6 billion in damages. In the operative complaint, Plaintiffs defined the class to include real and personal property owners whose property "experienced fire activity" within the boundaries of the "fire areas," with the areas themselves picked by Plaintiffs. Thus, the class is and always has been about damage to property, not personal injuries. And notwithstanding ORS 477.089 and Oregon common law, the vast majority of the damages sought by Plaintiffs are noneconomic damages resulting from the damage to class members' real and personal property.

2. Class Certification

On May 23, 2022, the trial court granted Plaintiffs' motion for an "issues class" certification and certified a single class of property owners—thousands of claimants in four distinct areas located hundreds of miles apart from one another.

The biggest area (and most hotly disputed throughout this case) was the Santiam Canyon area, where most of the class members owned property. The lightning-caused Beachie Creek Fire had been burning in the Opal Creek Wilderness northeast of the canyon in the weeks leading up to Labor Day. All parties agreed that the Beachie Creek Fire had nothing to do with PacifiCorp. Plaintiffs themselves presented evidence that, fueled by high, east-to-west winds, the Beachie Creek Fire swept through the Santiam Canyon on Labor Day. As Plaintiffs were forced to concede, unlike the other three fires, Plaintiffs could not tie any PacifiCorp-caused-ignition within the Santiam Canyon to any specific location or progression. (PacifiCorp Op. Brief at 25-30, 48-58.) And, as the ODF would later conclude, it was the Beachie Creek Fire, not PacifiCorp, that was responsible for the class-wide damage throughout the Santiam Canyon.

The Beachie Creek Fire raised numerous fundamental causation problems that undermined Plaintiffs' case for class certification. When such an obvious alternative cause existed, how could Plaintiffs show by common proof that distinct and distant properties—parcels in the eastern and western edges of the 20-mile-long canyon, including those in the path of and consumed by a different fire—were, in fact, damaged by PacifiCorp's negligence? And even if Plaintiffs could do so for ***one*** property, how could they do so for ***every*** property, using only class-wide proof? How could a single class member

claiming smoke-and-ash damage prove that PacifiCorp, not the Beachie Creek Fire, was responsible for their loss, much less every class member in the same category? Those questions, and a host of others, were glossed over by Plaintiffs and the trial court at the class certification stage. (*See* PacifiCorp Op. Brief at 37-43.)

PacifiCorp sought interlocutory appeal of the trial court's class certification ruling. After the Appellate Commissioner denied PacifiCorp's request, this Court reconsidered that denial but decided, as a matter of discretion, to decline interlocutory review. *James v. PacifiCorp*, 323 Or App 762 (2023).

3. Noneconomic Damages

PacifiCorp also challenged Plaintiffs' entitlement to noneconomic damages on both statutory and common law grounds. The trial court, however, agreed with Plaintiffs that, notwithstanding the text of the statute, ORS 477.089(2) was not the exclusive remedy for damages to injury to property caused by wildfire. The trial court also rejected PacifiCorp's arguments that Oregon common law did not permit the recovery of noneconomic damages arising out of unintentional property destruction. The trial court has never explained the basis for the latter ruling, which is inconsistent with (and, in fact, is directly contradicted by) controlling precedent. (PacifiCorp Op. Brief at 78-90.)

4. Bifurcation

In addition to certifying the class, the trial court bifurcated the proceedings. The court decided to first hold a "Phase I" trial, which would adjudicate class-wide liability and individual damages for the class representatives. That trial would be followed by "Phase II" trials that would adjudicate individual damages for non-class representatives.

B. Phase I Trial and Verdict

The Phase I trial commenced on April 24, 2023. Plaintiffs presented a wide range of theories to support their claim that various pieces of PacifiCorp equipment were somehow responsible for starting numerous different fires in the widely disparate "fire areas" encompassed by the class. Given the sweeping breadth of the class, Plaintiffs could not tie PacifiCorp's equipment to a fire that burned every single property within the class.

As to the Santiam Canyon specifically, the trial court's prediction at the class certification stage about how this case would play out, *Pearson v. Philip Morris, Inc.*, 358 Or 88, 108-10, 361 P3d 3 (2015), was wrong. Contrary to their pretrial representations about fire progression, Plaintiffs did not present common proof that a single, negligently caused PacifiCorp-fire damaged all the properties "below the red line" on their class map, nor did they present evidence that one (or more) PacifiCorp-caused fires merged together or combined with the Beachie Creek Fire at any point. Plaintiffs' proof at trial

consisted of a different expert who, based on eyewitness reports and 911 calls, identified spot fires within the canyon, without analyzing whether or to what degree any fire spread (or if they spread at all). In fact, he expressly declined to offer any opinion on that critical issue. (PacifiCorp Op. Brief at 26-27.)

Plaintiffs' other expert presented an analysis showing that the Beachie Creek Fire damaged class member homes in the Santiam Canyon *before* any fire caused by PacifiCorp's equipment ever could have. (PacifiCorp Op. Brief at 27.) The lack of class-wide evidence was so apparent that Plaintiffs attempted—mid-trial, after their evidence was in—to re-define the class to *remove* the eastern part of the Santiam Canyon from the class. (PacifiCorp Op. Brief at 28-29.) In response to Plaintiffs' failure of common proof, and how the trial actually played out, PacifiCorp sought decertification both during and after trial, which the trial court denied.

On June 12, 2023, the jury returned a verdict in favor of both the individual Plaintiffs *and* the class on five claims for relief. Following the Court's instruction that it could "assume" that any evidence applied to *all* class members, the jury found that PacifiCorp had harmed *every* member of the class, including homeowners in the eastern part of the Canyon. The jury awarded $4,375,186.53 in economic damages and $67.5 million in noneconomic damages to the named class representative Plaintiffs, even though none of the Plaintiffs had suffered bodily injury (and some were not

even present when the fire occurred). The jury also awarded punitive damages to the entire class (even though no damages to the class has been awarded), to be calculated with a .25 multiplier.

C. Phase I Limited Judgment

Although PacifiCorp challenged the trial court's legal rulings and Plaintiffs' proof in directed verdict and post-trial motions, the trial court overruled PacifiCorp's challenges in a brief order, and then awarded judgment to the individual named Plaintiffs after Phase I in the amount of $92.29 million. The trial court signed the Limited Judgment on December 22, 2023, and the judgment was entered on January 4, 2024.

PacifiCorp filed a notice of appeal on January 4, 2024, and again moved for a stay before the trial court on January 4, 2024.[2] The trial court denied PacifiCorp's motion on January 5, 2024. This Court denied PacifiCorp's motion to stay on February 14, 2024. (*See James v. PacifiCorp* (A183140), Order Allowing Reconsideration and Denying Motion for Stay Pending Appeal, February 14, 2024 ("Reconsideration and Stay Order").)

D. The 2025 Phase II Damages Trials

In October 2024 the trial court entered a case management order that scheduled 11 Phase II damages trials for 2025. The trial court rejected

---

[2] PacifiCorp had also moved for stays in the trial court in 2023. The trial court denied those motions as well.

PacifiCorp's proposals for a Phase II process that would have more closely approximated a bellwether trial procedure and adopted a case management order that largely tracked Plaintiffs' proposal with respect to plaintiff selection, trial structure, and other elements. (TCF 12/19/2023 Defendants' Motion to Enter CMO No. 10; TCF 06/26/2024 Plaintiffs' Moton to Enter CMO No. 10; TCF 10/02/2024 Order Re: CMO No. 10.)

Rather than drive the case to resolution, the Phase II process has proven fundamentally flawed for at least two reasons.

1. Noneconomic Damages for Property Damage

After Phase I, Plaintiffs filed hundreds of pro forma "short-form" complaints, each alleging up to $25 million in noneconomic damages. (TCF 04/29/2024 Mass Short-form Complaint #1; TCF 05/16/2024 Mass Short-Form Complaint #2; TCF 05/31/2024 Mass Short-form Complaint #3; TCF 07/31/2024 Mass Short-form Complaint #4; TCF 09/11/2024 (Mass Short-form Complaint #5; TCF 01/15/2025 Mass Short-form Complaint #6; TCF 05/30/25 Mass Short-form Complaint #7.) Plaintiffs have declined to amend their complaints to seek any reduced amounts and have declined to specify any amount that they are seeking until closing argument. To date, Plaintiffs' requests for noneconomic damages at closing arguments have ranged from $25

million to $500,000. Thus, each 10-plaintiff damages trial exposes PacifiCorp to an upper limit of a quarter of a billion dollars.

After denying PacifiCorp's repeated requests to limit the scope of testimony and argument and to bar claims for noneconomic damages based on property loss, the trial court has permitted every class member to present evidence about, and to obtain noneconomic damages based on, their emotional and mental distress associated with the loss of their real and personal property—including household items; family heirlooms and photos; pets and animals; and injury to class members' intangible experience, such as aesthetic value to land and attachment to the lifestyle associated with the property. And future damages trials will be no different. Given the relative differences between economic and noneconomic damages, noneconomic damages will take up the vast majority, if not the entirety, of the pretrial and trial time in any damages trials going forward.

Examples demonstrate the effect of the trial court's legal ruling on noneconomic damages:

- Phase I Plaintiff Shariene Stockton was not at home on Labor Day 2020; she was in Maryland visiting one of her children. She did not return to Oregon until later September 2020. At trial, she presented a box of burned items from her home and testified about how she felt erased as a person because she no longer had family

photographs and other personal property. Stockton's economic damages were $96,522, but her noneconomic damages were $3 million based on her mental distress related to the loss of her real and personal property. That award could only have been based on Stockton's emotional testimony about the impact of losing her personal property in a fire.

- Phase I Plaintiff Kristen Montoya was also not present in her home on Labor Day 2020; she was in Salem at the time. Her home suffered smoke and ash damage, but was not destroyed by fire. Her economic damages were $119,004. Nevertheless, based on her testimony about the damage to her home and the surrounding trees and the loss of her cats, she received noneconomic damages of $3 million as well, in direct contravention of controlling Oregon case law. *Lockett v. Hill*, 182 Or App 377, 380, 51 P3d 5, 6 (2002).
- Phase II Plaintiff Ashley Blachowski presented evidence that she evacuated her rental home with her grandmother, mother, and four dogs, and that, for about five minutes, she witnessed smoke and ash (but no fire) falling as she evacuated. Her economic damages were approximately $9,000. As one basis for noneconomic damages, Blachowski testified that the smoke turned her

childhood teddy bear from white to brown. Plaintiffs refused to state exactly what figure would make Blachowski whole, instead repeatedly telling the jury that it could award up to $25,000,000 for Blachowski's alleged pain and suffering. At closing argument, however, Plaintiffs reduced their demand to $500,000. The April 2025 jury ultimately awarded $125,000 in noneconomic damages.

- Phase II Plaintiffs Mary Morris, Bruce Morris, and Claire White lost a family vacation cabin in the Santiam Canyon. None of the Morris-White group lived at the cabin, which was an older building, uninsulated, and not used as frequently for family gatherings as in the past. Although their economic damages were less than $90,000 per person, the May 2025 verdicts for the Morris-White Plaintiffs were $2 million, $1.25 million, and $500,000 in noneconomic damages, respectively, related to the loss of their family vacation location.
- Phase II Plaintiff Amaya Ramsey was 16 years old at the time of the Labor Day 2020 fires. She evacuated her home without seeing fire. She suffered $24,190 in economic damages based on the personal property that she owned, including the loss of a prom dress and some childhood belongings. Based on testimony that the loss of her property caused symptoms of anxiety and

depression, she received noneconomic damages of $2.5 million from the July 2025 jury.

As those examples demonstrate, the trial court's decision to allow noneconomic damages for emotional distress related solely to property damage has dramatically increased PacifiCorp's exposure, in many instances by a factor of 10 or more. In addition, the focus of pretrial discovery and trial is on class members' past and current emotional and mental state, their recovery trajectory since the fire, and alternative or different causes for their past and current mental condition, all of which complicate and lengthen the discovery and trial proceedings.

In addition to allowing Plaintiffs to seek noneconomic damages, the trial court compounded its error in Phase II jury instructions. While no evidence of PacifiCorp's conduct or the alternative Beachie Creek Fire is allowed, the Phase II damages juries are being instructed as to the Phase I jury's liability verdict, and they are given the legal definitions of gross negligence, recklessness, and willfulness. But the Phase II juries are not being told that the Phase I jury awarded punitive damages already. The impact of those skewed instructions and the acontextual process on the damage awards, which go well beyond any compensatory purpose even for emotional harm, is obvious.

The nine juries to date have awarded class members who have tried their claims to date an average of approximately $3.5 million in noneconomic

damages, or a total across all trials of over $317 million. The total adjudicated liability is approximately $357 million for the economic and noneconomic damages claims of 91 plaintiffs.

2. Causation and Interpretation of the Phase I Verdict

The ODF Report confirms that PacifiCorp was not the cause of all of the harm in the Santiam Canyon. Notwithstanding that fact, however, the Phase II process has not only continued (and included, in each trial, class members from the Santiam Canyon), but has proceeded in a way that ignores the fundamental causation issues and prevents PacifiCorp from even mentioning, much less challenging, causation for any class members' harm.

PacifiCorp is not allowed to introduce any evidence that the Beachie Creek Fire was responsible for any of the damages claimed by Santiam Canyon class members, no matter where a property is located. In addition, the Phase II juries are being instructed that liability and causation to the entire class had already been decided against PacifiCorp, that PacifiCorp was "the" cause of Plaintiffs' injuries, and that the only issue for resolution was the amount of damages owed to individual class members.

Again, specific examples illustrate how those limitations have affected PacifiCorp's ability to defend itself:

- In addition to Phase I Plaintiff Montoya, Phase II Plaintiffs Steve Nielsen, Misti Rooney and Ashley Blachowski all alleged smoke

and ash damage arising out of fire activity in the Santiam Canyon. Although the evidence during Phase I only related to whether properties within the Santiam Canyon class boundary suffered "low soil burn," the trial court has interpreted the Phase I verdict broadly and conclusively. Even though the evidence demonstrated (and the ODF has now concluded) that the Beachie Creek Fire caused the damage within the Canyon, PacifiCorp is not even allowed to mention the Beachie Creek Fire and is not allowed to present any evidence that the Beachie Creek Fire caused of smoke and ash before, during, and after any utility-caused fire.

- Phase II Plaintiff Shannon Shinn sought noneconomic damages related to his evacuation experience in the Santiam Canyon. According to the Phase I trial evidence, however, the earliest alleged PacifiCorp spot fire therefore ignited hours ***after*** Plaintiff Shinn already evacuated from his home in the afternoon or early evening, which means that PacifiCorp could not have caused Plaintiff Shinn's evacuation. The trial court, however, precluded PacifiCorp from challenging causation regarding Plaintiff Shinn's evacuation-related damages and will do so for any other plaintiff who evacuated as a result of the Beachie Creek Fire.

E. The ODF Report and Another Request for a Stay Denied

On March 19, 2025, the ODF issued its Report on the cause of the 193,000-acre fire destruction in the Santiam Canyon. The ODF Report was produced pursuant to its statutory authority to investigate wildfires "to determine origin, cause and responsible party." (Daniels Dec., Ex. 2 at 10.)

The ODF found:

> 6. The power to Gates, OR was completely de-energized at 12:09:35 am on September 8, 2020.
>
> * * * * *
>
> 7. ODF investigators determined seven of the reported ignitions in the Santiam Canyon were caused by powerlines but ***did not contribute to the spread of the fire in the Santiam Canyon***.
>
> * * * * *
>
> 9. ODF investigators found no evidence of powerline ignitions contributing to the spread of the fire in the Santiam Canyon.

(Daniels Dec., Ex. 2 at 16 (emphasis added).)

The ODF Report concludes:

> There were wildland fire starts caused by down powerlines in the Gates and Mill City area. All of these ignitions, which were investigated, were suppressed by local residents and/or local municipal fire departments. ***No evidence was found that these powerline ignitions significantly contributed to the spread of the fire in the Santiam Canyon.*** There were other ignitions in areas where no roads or powerlines were present. The most probable explanation for these ignitions is spot fires from the main Beachie Creek Fire, which was burning upwind

> of the ignitions in the Santiam Canyon. With a megafire fire, such as those that occurred prior to and through Labor Day weekend 2020, the rising heat and gases can create a large convection column that may carry fire brands away from the fire and start spot fires. A spot fire is a fire that is ignited outside the perimeter of the main fire by a fire brand. These fire brands can be carried miles away by strong winds.

(Daniels Dec., Ex. 2 at 18 (emphasis added).)

Critically, the evidence of powerline fires in the Santiam Canyon during the Phase I trial is entirely consistent with the ODF Report's analysis and conclusions. (*See* PacifiCorp's Opening Br. at 54-58.) Like Plaintiffs, ODF found evidence that powerlines caused several spot fires within the Santiam Canyon. (Daniels Dec., Ex. 2 at 16.) But unlike Plaintiffs, ODF ***did*** endeavor to determine whether any utility-caused ignition spread within the Santiam Canyon. And ODF did not find any evidence that those fires progressed to any specific area, were not suppressed, or damaged any specific property within the Santiam Canyon, much less all of it. (*Id*. at 16-18.) ODF found no evidence, and presented no facts in its report, that would justify dividing the Santiam Canyon into two parts—above the "red line" and below that line. As Plaintiffs' own expert was forced to admit, ODF concluded that the wind drove the Beachie Creek Fire down the canyon and caused the destruction within the class area. Thus, the evidence at trial not only fails to contradict the ODF's later conclusions; it confirms them.

PacifiCorp moved for a stay on March 20, 2025, the day after the ODF Report was released. (TCF 03/20/2025 PacifiCorp's Motion to Stay.) Like prior requests for a stay, the trial court denied the motion on April 18, 2025. (TCF 04/18/2025 Order Denying PacifiCorp's Motion to Stay.)

F. CMO No. 11 and the Schedule and Process for the 2026-27 Trials

On May 9, 2025, the parties and the trial court held a status conference to discuss, among other items, scheduling Phase II trials for 2026 and beyond. In advance of that hearing, Plaintiffs submitted a proposal to the trial court that would require the trial court to schedule five trials a month with up to ten plaintiffs per trial starting in 2026 and continue on the same schedule until the more than 1,800 remaining plaintiffs adjudicate their claims. (TCF 04/25/2025 Plaintiffs' Motion to Enter CMO No. 11.) Citing several of the points made in this Motion, PacifiCorp opposed Plaintiffs' proposal and explained its flaws, including how it would impose impossible burdens on PacifiCorp's ability to defend itself. (TCF 05/05/2025 PacifiCorp's Opposition to Plaintiffs' Motion to Enter Case Management Order No. 11 and Motion for Entry of Alternative Case Management Order No. 11.)

1. The Impossible and Open-Ended Trial Schedule

The trial court largely agreed with Plaintiffs' proposal, ordering that the parties have four trials per month (one per week) beginning in February 2026 and two trials per week beginning in January 2027. (CMO No. 11, § 2 &

Ex. B.) Each trial will be comprised of up to six households for a total of at least 10 plaintiffs per trial. (*Id*.) Trials will occur over the course of up to nine trial days, meaning that trials will overlap and PacifiCorp will receive a single trial day. (*Id*. § 5.i.) The first four trials, for example, are scheduled to each occur over up to nine days each respectively—February 2-12, February 9-19, February 17-27, and February 23-March 6, 2026—adjudicating the claims of 11, 11, 15, and 11 plaintiffs over multiple households and fire areas. (*Id*. Ex. B.) A complete chart of the contemplated trials in CMO No. 11 is below:

Trial Dates	Plaintiffs	Average
January 2026	8	42.08
February 2026	48	
March 2026	66	
April 2026	42	
May 2026	46	
June 2026	58	
July 2026	47	
August 2026	51	
September 2026	39	
October 2026	43	
November 2026	36	
December 2026	21	
January 2027	101	94.92
February 2027	94	
March 2027	123	
April 2027	86	
May 2027	92	
June 2027	121	
July 2027	101	
August 2027	117	
September 2027	85	
October 2027	80	
November 2027	89	
December 2027	50	
January 2028	123	85.67
February 2028	95	
March 2028	39	
Total	1901	

Simply stating the dates and numbers does not tell the entire story, however. Cursory reflection demonstrates how prejudicial the proposed trial schedule will be. With overlapping trials occurring virtually every day for months on end, PacifiCorp's trial counsel would be consumed with an onslaught of trials at the same time that future complaints are being filed alleging hundreds of millions of dollars in damages claims. PacifiCorp would

have 180 days counting backwards from the first day of trial to conduct discovery regarding the named plaintiffs and their $25 million claims, along with document gathering and review, third-party discovery, expert consultation, and any motions practice. A new 180-day clock would start every week, triggering a new set of plaintiffs and claims that PacifiCorp would need to investigate and defend against on the accelerated schedule. After the first few weeks of 2026 and continuing through the end of the year, PacifiCorp would be preparing for and taking upwards of 40 depositions at any given time, at the same time as all other trial preparation is occurring. And that is only depositions. It does not include the time necessary to investigate, conduct discovery, manage pretrial filings and procedures, and ultimately conduct the trials.

Even if PacifiCorp could employ sufficient counsel to perform that work, that would not be the end of the matter. With each Plaintiff alleging economic damages and up to $25 million on noneconomic damages, PacifiCorp has a right to, but could not practically, employ sufficient experts—real estate appraisers, timber appraisers, economists if business losses are alleged, and psychological experts—sufficient to perform even a minimal investigation of Plaintiffs' claimed economic and noneconomic damages. The trial court's proposed schedule would put unprecedented demands on PacifiCorp and its counsel.

Furthermore, the trial schedule is open-ended. To date, the trial court has not required Plaintiffs' counsel to submit a definitive class list or set a deadline for doing so. Exhibit B to CMO No. 11 is based on the current information provided by Plaintiffs' counsel, but Plaintiffs have taken the position that the statute of limitations remains tolled and they are not precluded from adding property owners to the class. As a result, the trial schedule could continue into 2029, 2030, or beyond if Plaintiffs' counsel continue to solicit additional class members.

2. Restrictions on Discovery and Pretrial Procedures

Even if the proposed trial schedule did not practically limit PacifiCorp's ability to investigate and defend Plaintiffs' claims, CMO No. 11 itself restricts PacifiCorp's ability to conduct discovery, file motions, and present evidence to the jury. (CMO No. 11, §§ 3-4.)

In any normal case, that level of exposure should allow a defendant to utilize available discovery tools on a case schedule that permits for a reasonable opportunity to do so. But according to the pretrial and trial discovery process established by the trial court, PacifiCorp is restricted as to the time for discovery, the availability of third-party discovery, and trial time. Among other things, PacifiCorp will not be allowed to serve any requests for admissions without prior court approval; PacifiCorp will not be allowed to take more than two third-party witness depositions associated with a plaintiff unless

that plaintiff intends to call more than two witnesses at trial; and PacifiCorp would not be allowed to serve document requests on a third-party witness unless (1) the subject plaintiff identified that witness as a trial witness, and (2) there are deficiencies in the plaintiff's production. (CMO No. 11, § 4.f.) Notwithstanding ORCP 47, no motions for summary judgment are permitted; and notwithstanding ORS 45.250, no depositions (even of opposing parties) are permitted as substantive evidence absent good cause and leave of court.

Juries will continue to be instructed that liability and causation to the entire class had already been decided against PacifiCorp, that PacifiCorp was "the" cause of Plaintiffs' injuries, and that the only issue for resolution is the amount of damages owed to individual class members. PacifiCorp will also continue to be prohibited from introducing any evidence that the Beachie Creek Fire was responsible for any of the damages claimed by Santiam Canyon class members, no matter where a property is located. To give themselves maximum flexibility, Plaintiffs will continue to allege $25 million per plaintiff in noneconomic damages, meaning each trial presents over $250 million in potential noneconomic damages liability. And juries will continue to be told that the Phase I jury found that PacifiCorp was grossly negligent, reckless, and willful, but no evidence of PacifiCorp's conduct will be allowed, and the jury will not be told that the Phase I jury awarded punitive damages.

G. Other Wildfires and Settlements

While this case has proceeded, PacifiCorp has continued to resolve claims asserted by individual plaintiffs related to other wildfires, and claims by other claimants who are represented by other counsel with respect to the Labor Day 2020 fires at issue in this case. In December 2023, PacifiCorp reached settlements totaling approximately $550 million with commercial timber companies and individual plaintiffs related to the 2020 Archie Creek fire in Douglas County, Oregon. (*See* PacifiCorp, SEC Forms 8-K, December 5, 2023 and December 18, 2023.) In June 2024, PacifiCorp reached a $150 million settlement with 378 plaintiffs in the 2020 Slater fire in California. (PacifiCorp, SEC Form 8-K, June 24, 2024.) Also in June 2024, PacifiCorp reached a $178 million settlement with 403 plaintiffs impacted by the 2020 Beachie Creek and Echo Mountain Fires. (PacifiCorp, SEC Form 8-K, June 3, 2024.) In total, PacifiCorp has settled with approximately 2,600 individuals for a total of $871 million or approximately $328,000 per claimant.

III. ARGUMENT

PacifiCorp requests that this Court exercise its authority to stay the trials (and all associated deadlines) scheduled in CMO No. 11 until the issues raised in PacifiCorp's pending appeal are addressed and resolved by this Court. The legal foundation of the Phase II trials is fundamentally wrong; the trial process is procedurally flawed and unfairly prejudicial; and the Phase II process is

serving no larger purpose in bringing this case reasonably closer to a resolution, certainly not at the enormous cost involved. There is a pending appeal that should be expeditiously decided, will resolve important questions of Oregon law, and will undoubtedly impact every judgment entered to date in this case. Indeed, if PacifiCorp prevails on even just some of its arguments on appeal, all damages trials—over 160 of them—could be rendered a nullity.

All of the above would be sufficient to support a stay. In addition to those factors, the trial process will irreparably harm PacifiCorp. Phase II's massive costs will jeopardize PacifiCorp's ability to meet its legal obligation to serve hundreds of thousands of Oregonians and two million customers across six western states. It will also consume significant judicial and public resources, and will not bring the parties closer to a negotiated resolution. The Court should stay the proceedings pending resolution of the pending appeal.

A. All the Relevant Factors Support Granting a Stay

This Court has broad discretion to "'grant a stay of proceedings pending an appeal.'" *State ex rel. Walraven v. Dep't of Corr.*, 358 Or 71, 86, 362 P3d 1163 (2015) (quoting *Helms Groover & Dubber Co. v. Copenhagen*, 93 Or 410, 416, 177 P 935 (1919)). The "primary standard to govern the granting of stays involves a balancing of interests"—including considerations of judicial efficiency and comparative party burdens. *Evans v. Or. State Penitentiary*, 87 Or App 514, 523, 743 P2d 168 (1987).

ORS 19.350(3) outlines a list of non-exclusive factors to be considered when addressing a request for a stay pending appeal:

> "(a) The likelihood of the appellant prevailing on appeal.
>
> "(b) Whether the appeal is taken in good faith and not for the purpose of delay.
>
> "(c) Whether there is any support in fact or in law for the appeal.
>
> "(d) The nature of the harm to the appellant, to other parties, to other persons and to the public that will likely result from the grant or denial of a stay."

ORS 19.350(3). Although addressed to a stay of a judgment rather than a discretionary stay of further trial proceedings, those statutory factors further inform the Court's analysis of whether a stay is appropriate in this case.

Federal authorities outline a similar standard:

> Judicial discretion in exercising a stay is to be guided by the following legal principles, as distilled into a four factor analysis in *Nken*: "(1) whether the stay applicant has made a strong showing that he is likely to succeed on the merits; (2) whether the applicant will be irreparably injured absent a stay; (3) whether issuance of the stay will substantially injure the other parties interested in the proceeding; and (4) where the public interest lies."

Lair v. Bullock, 697 F3d 1200, 1203 (9th Cir 2012) (citing *Nken v. Holder*, 556 US 418, 434, 129 S Ct 1749, 173 L Ed 2d 550 (2009)).

The first two factors—success on the merits and irreparable injury—are the "most critical." *Nken*, 556 US at 434. And the first factor "does not

require the petitioners to show that 'it is more likely than not that they will win on the merits.'" *Lair*, 697 F3d at 1204. A party seeking a stay only "must show that there is a 'substantial case for relief on the merits.'" *Id*. (citation omitted).

1. CMO No. 11 Threatens Irreparable Harm to PacifiCorp and the Customers and Communities It Serves.

Without a stay, PacifiCorp's due process rights will continue to be irreparably eroded; the company will continue to suffer unrecoverable economic losses; and the weekly trial schedule and judgments arising out of that trial threaten the company's ability to meet its obligations as a public utility. The irreparable harm factor clearly supports a stay.

a. CMO No. 11 Infringes on PacifiCorp's Due Process Rights.

The CMO No. 11 process is unfair and prejudicial to PacifiCorp and violates Due Process. *See, e.g.*, *Barcik v. Kubiaczyk*, 321 Or 174, 199, 895 P2d 765 (1995) (noting "loss of First Amendment freedoms, for even minimal periods of time, unquestionably constitutes irreparable injury." (quoting *Elrod v. Burns*, 427 US 347, 373, 96 SCt. 2673, 2689, 49 LEd2d 547 (1976)); *see also BST Holdings, L.L.C. v. Occupational Safety & Health Admin., United States Dep't of Lab.*, 17 F4th 604, 618 (5th Cir 2021) (noting that loss of constitutional protections for even a short period is irreparable injury for stay analysis). Each class member in this case is seeking $25 million in

noneconomic damages alone. Under CMO No. 11, approximately 10-19 class members will try their collective claims on a weekly basis for over $250 million dollars—week after week, month after month through 2028 and possibly beyond. While those claims will be before a jury, PacifiCorp will be forced to investigate hundreds of other class members' claims on a 180-day timeline that begins anew every week for additional class members. And the tools that PacifiCorp will have available to it to test and defend against class members' claims will be limited in ways that they never would be in a case where only one plaintiff was pursuing $25 million in damages. All of this means that, at any given time in 2026, PacifiCorp will be actively investigating, vetting, and trying dozens if not hundreds of $25 million claims, on a timeframe that will be consumed by overlapping deadlines for hundreds of other individualized cases. And through this expedited process, Plaintiffs will continue securing multimillion dollar verdicts plaintiff after plaintiff based on flawed rulings from Phase I that are incorporated into the Phase II trials.

The due process violations inherent in that schedule and procedure are evident. As a practical matter, CMO No. 11 deprives PacifiCorp of its right to select trial counsel. "The right to counsel in civil matters includes the right to choose the lawyer who will provide that representation." *Tx. Catastrophe Prop. Ins. Ass'n v.* Morales, 975 F2d 1178, 1181 (5th Cir 1992) (cleaned up); *see also Richardson-Merrell, Inc. v. Koller*, 472 US 424, 442-43 (1985)

(Stevens, J. dissenting) ("Everyone must agree that the litigant's freedom to choose his own lawyer in a civil case is a fundamental right."). CMO No. 11 "effectively exclude[s] a defendant's first choice of counsel." *Id.* at 156. And it is PacifiCorp's counsel for these cases who holds invaluable institutional knowledge that cannot simply be imparted onto others. Forcing PacifiCorp into giving up either its choice of counsel or its right to jury trials would clearly violate due process. *See Simmons v. United States*, 390 U.S. 377, 394 (1968) ("[W]e find it intolerable that one constitutional right should have to be surrendered in order to assert another.").

Due Process also requires a reasonable opportunity to utilize the tools and procedures necessary to defend against civil liability. An adequate opportunity to defend is essential to due process. *Logan v. Zimmerman Brush Co*., 455 US 422, 433, 102 S Ct 1148, 71 L Ed 2d 265 (1982) (due process guarantees each litigant the "opportunity to present his case and have its merits fairly judged"); *Lindsey v. Normet*, 405 US 56, 66, 92 S Ct 862, 870, 31 L Ed 2d 36 (1972) (due process requires "'an opportunity to present every available defense.'") (quoting American Surety Co. v. Baldwin, 287 US 156, 168 (1932)); *United States v. Armour & Co*., 402 US 673, 682, 91 S Ct 1752, 29 L Ed 2d 256 (1971) (the "right to litigate the issues raised" in a case is "a right guaranteed * * * by the Due Process Clause"). Those due process principles are fully applicable regardless of the number of claimants, the class-action

setting, or the goal of expediency. No less than in individualized, one-on-one adjudication, due process requires that every class member prove each element of his claim and that the defendant receive a full and fair opportunity to mount a defense to those claims.

CMO No. 11 undermines that right, both expressly and practically. CMO No. 11 expressly limits the use of discovery tools afforded to PacifiCorp by the Oregon Rules of Civil Procedure, (see, e.g., CMO No. 11, § 4.f.), and thus threatens PacifiCorp's ability to mount a constitutionally guaranteed defense. *See W. Elec. Co. v. Stern*, 544 F2d 1196, 1199 (3d Cir 1976) (prohibiting defendant from serving requested interrogatories on named plaintiff in class action case would "deny [defendant] the right to present a full defense on the issues [in violation of] due process"); *see also Singh, Matter of Extradition of*, 123 FRD 108, 126 (DNJ 1987) (recognizing that "there may be circumstances under which specific discovery must be afforded as a matter of due process" (internal emphasis omitted)). CMO No. 11 also restricts the amount of time PacifiCorp has to prepare its defense, during which PacifiCorp must gather and review documents, conduct third-party discovery, consult experts, engage in motions practice, and prepare for and complete trial. With a new 180-day clock starting every week for ten or more new plaintiffs, PacifiCorp will not receive the time necessary to protect its right to due process. *See U.S. Fid. & Guar. Co. v. Patriot's Point Dev. Auth*., 772 F Supp

1565, 1574 (DSC 1991) ("Plaintiffs * * * suggest that such discovery can be completed within 60–90 days. In a complex securities action with multiple defendants, a three-month period for discovery is not realistic. * * * Serious due process problems are therefore raised by trying to expedite all merits discovery simply to hold a fairness hearing.").

In other words, not only does CMO No. 11 strip valuable tools from PacifiCorp's toolbox, but it also significantly restricts the amount of time PacifiCorp has to use the tools that remain. Either circumstance on its own seriously threatens PacifiCorp's due process rights. Both combined assuredly violate them.

b. Phase II Will Impose Irreparable Harm on PacifiCorp and Risk Its Ability to Continue Adequate Operations as a Public Utility for the Benefit of Its Customers.

In addition to due process violations, PacifiCorp will incur burdensome expenses necessary to defend itself and to bond judgments as they are entered, all to preserve its rights to appellate review. Most of the expenses will never be recovered, even if PacifiCorp is fully vindicated; yet, that pales in comparison to the irreparable damage that will be done to PacifiCorp, its employees, and its customers if this litigation proceeds as contemplated.

PacifiCorp provides power to hundreds of thousands of individuals, businesses, and governments in Oregon (and millions of customers across the West), and the judgments to date have already impacted its ability to continue

to do so. Rating agencies have downgraded PacifiCorp. Those downgrades and the ongoing trial process impose continuing constraints and negatively impact PacifiCorp's day-to-day operations and business. (Declaration of Nikki Kobliha in Support of PacifiCorp's Motion to Stay Trial Court Proceedings (Under Seal) ("Kobliha Dec.") ¶ 2.)

That is the reality facing PacifiCorp under the ***present*** case management order. It gets much worse in 2026, as PacifiCorp will have to litigate 10-19 class member claims every week for years. Assuming four trials per month in 2026 and eight trials per month in 2027, which results in a total plaintiff count of 815 plaintiffs in 2026 through the first quarter of 2027, and assuming average verdicts totaling $5,100,000 per plaintiff (which is the current average of the June 2023 liability trial and the eight damage trials from January 2024 through July 2025), every month PacifiCorp would be subject to limited judgments averaging approximately ***$277,100,000 per month***. Simply to preserve its rights to appellate review, PacifiCorp is required to bond those judgments as they are entered.[3]

PacifiCorp is a public utility company with the obligation to serve its customers—including customers that provide essential services such as hospitals, first responders, and government facilities—with safe and reliable

[3] Plaintiffs have declined to waive or reduce the supersedeas bond requirement.

power twenty-four hours a day, seven days a week. To do so, PacifiCorp regularly accesses the market to financially support its day-to-day operations, which include, but is not limited to, transmission and generation development, purchasing power in the market, building and upgrading substations, connecting new customers, addressing outages and system resilience. Put simply, the trial court's decision to barrel ahead—notwithstanding the pending appeal and all the issues identified above—threatens PacifiCorp's ability to meet its existing ongoing obligations to provide safe and reliable power to millions of Oregonians and other customers. (Kobliha Dec. ¶¶ 3-7.)

2. The Likelihood of Success on Controlling Legal Issues and Legal and Factual Support for PacifiCorp's Appeal Supports a Stay

As PacifiCorp's Opening Brief demonstrates, this appeal and the continuing damages trials involve controlling legal issues on which PacifiCorp is likely to prevail or, at a minimum, demonstrate a substantial case for relief. Even a partial victory on any key issue would fundamentally alter the entire dynamic of the case, the parties' assessment of the risks, the scope of PacifiCorp's potential liability, and, most critically, the utility of engaging in 160 jury trials over the coming years.

a. The Trial Court's Class Certification Ruling, and Plaintiffs' Failure of Class-Wide Proof

PacifiCorp is likely to succeed on its argument that Plaintiffs have failed to prove PacifiCorp caused damage to *every* homeowner in the class. *See*

Pearson, 358 Or at 110–11. Plaintiffs' burden was to introduce sufficient common evidence that PacifiCorp's conduct caused harm to *all* class members. But Plaintiffs indisputably did not meet this burden. (PacifiCorp's Op. Brief 48-62.) The class—composed of thousands of homeowners, some hundreds of miles apart from one another, who were affected by numerous different fires, with different causes—should have never been certified and should have been decertified. The trial demonstrated what PacifiCorp had explained when opposing certification and moving to decertify: this case could not possibly be "resolved with evidence common to the class," and requires numerous "separate inquiries for the individual class members." *Pearson*, 358 Or at 110. Class certification is only justified when common proof can generate the same answer for all class members. Here, Plaintiffs' "common" proof was not common at all, because every last one of the dozens of fires at issue required individualized analysis of how it began and how it spread, and the claims of every one of the thousands of class members required individualized analysis to determine whether the class member was harmed by an alleged PacifiCorp fire or a fire started by some other means. And the trial court eliminated any possibility for PacifiCorp to respond to Plaintiffs' proof with individualized defenses—including by showing that the Beachie Creek Fire was the sole cause of harm to property owners in the Santiam Canyon.

As the ODF Report underscores, in the Santiam Canyon particularly, the case for class certification and class-wide liability evaporated. Contrary to their pretrial representations, Plaintiffs presented evidence of various powerline spot fires only, but they never presented any evidence of where, how far, when, or over what area those fires spread (if at all). That evidence is inherently individualized: For each fire-damaged property, an individual inquiry was required to determine whether the cause of the damages was (1) the main Beachie Creek Fire; (2) a spot fire ignited by an ember from the Beachie Creek Fire; or (3) a powerline-caused spot fire. And that evidence was never presented at trial.

Plaintiffs will cast this argument as an assault on the jury's findings after a lengthy trial. But the trial record and the ODF Report confirm that there was no evidence, and no permissible inference from the evidence, that PacifiCorp caused damage to every single property in the Santiam Canyon. Structuring the trial as a single class, allowing the jury to ignore the enormous evidentiary gaps in Plaintiffs' class-wide case, and instructing the jury to "assume" that evidence about individual Plaintiffs and individual fires somehow proved the claims of every one of the thousands of class-members, was inconsistent with ORCP 32 and governing law and deprived PacifiCorp of its due process right to present every available defense to liability. *See* PacifiCorp Op. Brief at 63-

69; *Pearson*, 358 Or at 114; *Carrera v. Bayer Corp.*, 727 F3d 300, 307 (3d Cir 2013).

b. Noneconomic Damages Are Not Recoverable

The award of noneconomic damages to Plaintiffs must be reversed—and the class must be barred from seeking such damages in this case—because Plaintiffs cannot obtain noneconomic damages based solely on their property "experiencing" fire-related damage. Under Oregon common law, noneconomic damages are available in only three situations: (1) when the defendant "physically injures the plaintiff"; (2) when the defendant "intentionally causes" distress; or (3) when a special, "legally protected" interest is invaded. *Moody v. Oregon Community Credit Union*, 371 Or 772, 784 (2023). The first two prongs of this test are indisputably not met here. There is no evidence of any bodily injury and no evidence that PacifiCorp intentionally caused distress to anyone.

Plaintiffs also have never pointed to a "legally protected interest" under the third prong. The only basis Plaintiffs have offered for seeking noneconomic damages for their mental distress is the fire damage to their homes. But this Court has squarely held that "property damage to a house" caused by a fire is insufficient to support noneconomic damages for mental distress. *Meyer v. 4-D Insulation Co.*, 60 Or App 70, 75–76, 652 P2d 852 (1982) (rejecting, as a matter of law, non-economic damage claim based on fire

damage to plaintiff's house); *see also* PacifiCorp's Op. Brief at 83-85; Brief of *Amicus Curiae* Oregon Forest Industries Council at 33-35.

In addition, as a separate and independent basis for barring noneconomic damages in this case, ORS 477.089(4) expressly states that economic damages are the "exclusive remedies for damages or injury to property caused by a wildfire." (PacifiCorp's Op. Brief at 91-92; Brief of *Amicus Curiae* Oregon Forest Industries Council at 6-20.) Notwithstanding those authorities, the trial court ruled that noneconomic damages are available to Plaintiffs for their alleged property damages.

3. Given the Unprecedented Impact to PacifiCorp and Its Customers, and the Procedure Involved, the Balance of Interests Supports a Stay.

The balance of interests strongly supports a stay. On the one hand, a stay is warranted given the burdens on the parties and the judicial system, because the outcome of the appeal will directly impact whether and how the damages trials should proceed. If this Court reverses or otherwise modifies Plaintiffs' entitlement to noneconomic damages, then all of the time spent on the damages trials on that issue—which comprises the vast majority of pretrial and trial time—will be wasted.

The effect of even a partial reversal on the issue of noneconomic damages cannot be understated. The parties are fully engaged in discovery and pretrial litigation related to noneconomic damages, including third-party

subpoenas to medical providers and ORCP 44 examinations. The damages trials to date have been primarily, if not exclusively, focused on noneconomic damages. For example, Plaintiffs' trial presentations have focused on plaintiff testimony about their lost property and experiences related to the fire, and the parties have presented experts in trauma and recovery. If the damages trials continue to proceed with this mental distress testimony and this Court ultimately rules in PacifiCorp's favor and rejects Plaintiffs' demands for mental distress damages (as it should) then the erroneous admission of the mental distress evidence will require reversal and retrial. The damages trials should not continue to proceed in the face of the risk that they will be rendered meaningless.

Similarly, if this Court reverses or otherwise modifies the jury's verdict with respect to class-wide liability or causation, or orders decertification of the class either in full or in part, then there can be no damages trials—and any damages trials that have occurred will have been a complete waste of time and resources. *See, e.g.*, *Coinbase, Inc. v. Bielski*, 599 US 736, 743–44 (2023) (explaining that permitting a "case to proceed simultaneously in the [trial court] and the court of appeals creates the possibility that the [trial] court will waste scarce judicial resources—which could be devoted to other pressing criminal or civil matters—on a dispute that will ultimately" be dismissed "in any event"). Permitting parallel litigation in two different courts "represents

the worst possible outcome for parties and courts: litigating a dispute in the [trial] court only for the court of appeals to reverse" and render the ongoing trial litigation nugatory. *Id*.

On the other hand, continuing to proceed with damages trials in the face of those considerations does not benefit the parties or the judicial system. As to the parties, Plaintiffs will emphasize that they should continue to receive their day in court. The unrecoverable costs of continuing the damages trials, however, outweighs that consideration. For PacifiCorp, continuing the status quo threatens the company's very existence, as it must continue to endure legal expenses and appellate bonds to preserve its rights as this Court decides controlling issues on appeal.

Damages trials also require Plaintiffs to spend the time in pretrial discovery and trial, and expend fees and costs, despite the likelihood of a retrial. These costs must be measured against any benefit provided to Plaintiffs by having their claims adjudicated. Even at an accelerated pace, further trials will not result in anything other than more judgments that will need to await resolution on appeal. Meanwhile, after trials conclude, the class members are in essentially the same position that they were before, yet after having expended considerable resources of the parties, the court, and the public to get there. A stay preserves those resources pending this Court's review of the trial court's errors and guidance as to how to proceed.

It is also clear that additional damages trials are not materially advancing this case toward a final resolution. Due to the parties' disagreements about the relevance of the existing verdicts and governing law, the outcomes in the damages trials to date and in the future have not brought the parties closer to a negotiated resolution. And, as a simple mathematical matter, trying 50 claims a month until this appeal is decided is not materially moving the case forward to final resolution, either. While those class members' claims will be adjudicated in the interim, those judgments will stand only if Plaintiffs' claims are affirmed across the board and, even then, there will be hundreds more class members waiting for final resolution before a general judgment can be entered. The minimal benefit of continuing to tax the parties' and judicial resources with further damages trials does not outweigh the burdens to the parties, particularly when the other benefits of a stay are manifest.

4. A Stay Is in the Interest of Justice

A stay is in the interest of justice. PacifiCorp's appeal is well taken and will affect every judgment entered in this case if the Court even just partially agrees with PacifiCorp. That alone supports a stay, where, without one, the parties will continue to expend considerable judicial resources in an unprecedented process litigating claims that will very likely need to be re-litigated in part or in whole. That the process that the trial court has chosen for these trials impermissibly restricts PacifiCorp's ability to defend itself and

threatens PacifiCorp's ability to continue serving Oregonians only further supports a stay. And if those considerations were not enough, ODF's exhaustive investigatory report confirms that PacifiCorp did not cause class-wide damage in the Santiam Canyon and certainly removes any question about whether a stay is justified.

Even if these considerations are not viewed as conclusive, they cast fundamental and irreconcilable doubt on the validity of the judgments below—how this case was structured, tried, and is currently proceeding—and whether Phase II should proceed as if those judgments are iron clad. Continuing to force PacifiCorp to defend against multi-million-dollar damages claims against which it never had an opportunity to defend, and in trials where it is prohibited from raising evidence or individualized defenses based on the Beachie Creek Fire, is fundamentally unfair. Proceeding with Phase II is not in the interest of justice. A stay while this Court decides the controlling issues on appeal is.

B. The Court Has Both Jurisdiction and Discretion To Issue A Stay.

In its previous opinion in this case, the Court expressed doubt about its jurisdiction to stay the damages trials of class members proceeding in the trial court. (*See* Reconsideration and Stay Order at 4-5.) The governing statutes, however, do not deprive this Court of the jurisdiction to exercise its authority to issue a stay of the trial court proceedings.

ORS 19.270(7) provides: "If a limited or supplemental judgment is appealed, the jurisdiction of the appellate court is limited to the matters decided by the limited or supplemental judgment, and the trial court retains jurisdiction over all other matters in the proceeding." Although phrased as a limitation, the text of ORS 19.270(7) is broad. It uses the term "matters" rather than a more limited or specific term such as "claims," and in legal parlance "matter" has a broad scope. *See, e.g. Black's Law Dictionary* 999 (8th ed 2004) (defining "matter" as a "subject under consideration"); *Webster's Third New Int'l Dictionary* 1394 (2002) (defining "matter" as, *inter alia*, "subject of interest or relevance" and "subject of disagreement, strife, or litigation"). In *Voth v. Snake River Corr. Inst*., 171 Or App 392, 399, 15 P3d 629, 633 (2000), for example, the court concluded that "under any reasonable understanding, a motion to waive fees is, at the least, a legal 'matter.'" As demonstrated in PacifiCorp's Opening Brief, the "matters decided" in the Limited Judgments entered and appealed to date—Case Nos. A183140, A187954, and A188268—encompass the entire liability phase and the first four damages trials, including rulings on issues that the trial court continues to apply in the current and future damages trials and that form the basis for the contemplated Phase II process.

This Court's case law is not to the contrary. In *White v. Vogt*, 258 Or App 130, 139-40, 308 P3d 356, 362 (2013), the court determined that it did not have jurisdiction to consider the plaintiffs' assignment of error related to the

trial court's denial of plaintiffs' motion for summary judgment. The court grounded its holding in the fact that the challenged decision was the subject of an earlier limited judgment from which the plaintiffs had ***not*** appealed. *Id*. at 140. Thus, the court swiftly concluded that it did not have jurisdiction to consider "matters" resolved by an un-appealed limited judgment.

The Court recently reiterated that understanding in *Laack as Tr. of Laack Family Tr. v. Botello*, 338 Or App 333 (2025). As in *White*, in *Laack* the defendant sought to challenge the prevailing party designation in a general judgment, but the defendant had only appealed from the supplemental judgment entered after that general judgment. *Id*. at 335. Concluding that it did not have jurisdiction to consider the prevailing party issue, the court explained: "In applying ORS 19.270(7), we have concluded that, when jurisdiction is vested by an appeal of a limited or supplemental judgment, ***we lack jurisdiction to decide specific issues memorialized in other judgments that were not appealed***." *Id*. at 337 (emphasis added); *see also Clackamas County Oregon v. Clackamas River Water*, 280 Or App 366, 369, 382 P3d 598 (2016), *rev den*, 360 Or 752, 388 P3d 723 (2017) (holding that court could not address the appellant's challenge to the trial court's grant of a motion to intervene that was the subject of general judgment, because appellant only appealed the supplemental judgment awarding fees).

This case is different. PacifiCorp has appealed from each and every Limited Judgment entered in this case—the limited judgment arising out of Phase I and the limited judgments arising out of the first four damages trials in Phase II. Unlike *White*, *Laack*, and other cases, there is not a separate claim or issue resolved in a different judgment that the Court can identify as being decided at an earlier phase of the case (and from which there was no appeal). And, of course, none of those cases involved a limited judgment that included determinations of class certification, class proof, or other issues involved in the liability phase of a class action.

The legislative history of ORS 19.270 is also consistent with PacifiCorp's position. Subsection (7) of that section was part of the 2005 "clean-up" bill that followed the comprehensive amendments to the statutes involving judgments that was passed in 2003. *See* HB 2359 (2005). Although not part of the original bill, ORS 19.270(7) was apparently added after the Special Counsel for the OJD Office of the State Court Administrator noted issues with the "2005 Judgment Clean-Up Bill" as introduced. (*See* Written Testimony of Bradd Swank, Special Counsel, Government Relations, Oregon Judicial Department Office of State Court Administrator (HB 2359A, Senate Judiciary Committee, June 2, 2005, Ex. D.) Swank noted as a "problem":

> ORS 19.270 limits the authority of a trial court to take further action in a case when a notice of appeal is filed. Now that there are limited and supplemental

> judgments, maybe this statute should be amended to make clear that appeal of limited judgment (and possibly a supplemental judgment) deprives court only of authority over the subject of the limited or supplemental judgment.

Id.

That legislative history demonstrates that the intent of ORS 19.270(7) was not to unduly restrict the appellate court's jurisdiction. Rather, similar to the carve outs in ORS 19.270(1)(a)-(e), subsection (7) was designed to ensure that a notice of appeal would not deprive the trial court of continuing jurisdiction to address "other matters" that were independent of a limited or supplemental judgment.

That understanding makes logical sense as well. Of course, the Court should not hear matters that were resolved by an earlier judgment from which there was no appeal and should be cognizant of the trial court's continuing jurisdiction to address claims or issues that may have nothing to do with the issues on appeal. Going further and interpreting ORS 19.270(7) to limit this Court's inherent authority to issue a stay in this case, where the liability and other issues on appeal are inseparable from the issues being considered in the damages trials, would deprive this Court of an important discretionary tool to employ in the appropriate case.

For those reasons, the premise of the Court's skepticism—that the trial court proceedings in this case "pertain[] to ***matters unrelated to those resolved***

by the limited judgment" (Reconsideration and Stay Order at 5 (emphasis added))—is incorrect. The Limited Judgments do not involve separate and divisible claims or issues. Instead, the "matters decided" in those judgments involve the whole sweep of legal issues that continue to dictate how the Phase II damages trials are proceeding, including how those juries are being instructed and what evidence and argument is being heard. It slices the jurisdictional onion too thinly to suggest that ORS 19.270 eliminates the Court's authority to issue a stay of trial court proceedings, when those proceedings are intimately intertwined with—and, in fact, are entirely premised on—the matters decided in the earlier judgments and that are the subject of the current appeal.

C. Additional Requests to the Trial Court Would Be Futile.

The trial court has already denied PacifiCorp's multiple requests to stay this case, including three requests to stay the Phase II damages proceedings pending the outcome of the appeal. The trial court issued CMO No. 11 after over two months of consideration, including after being presented with PacifiCorp's arguments in opposition to the trial schedule and other deadlines. The trial court has also repeatedly expressed its intent and desire to complete Phase II by 2028 if possible. Put simply, the trial court is fully and irreversibly committed to proceeding with CMO No. 11 as outlined. If CMO No. 11 is to

be stayed, and all harms and issues outlined above are to be avoided, this Court will have to act—and act promptly.

IV. CONCLUSION

For the above reasons, PacifiCorp's Motion to Stay should be granted.

Attorneys for Defendants-Appellants

IN THE COURT OF APPEALS OF THE STATE OF OREGON

JEANYNE JAMES, ROBIN COLBERT, JANE DREVO, SAM DREVO, BROOKE EDGE AND BILL EDGE, SR., LORI FOWLER, IRIS HAMPTON, JAMES HOLLAND, RACHELLE MCMASTER, KRISTINA MONTOYA, NORTHWEST RIVER GUIDES, LLC, SHARIENE STOCKTON AND KEVIN STOCKTON, VICTOR PALFREYMAN, PALFREYMAN FAMILY TRUST, and DUANE BRUNN, individually and on behalf of all others similarly situated,

Plaintiffs-Respondents,

v.

PACIFICORP, an Oregon corporation; and PACIFIC POWER, an Oregon registered electric utility and assumed business name of PACIFICORP,

Defendants-Appellants.

CA No. A183140

Multnomah County Circuit Court Case No. 20CV33885

DECLARATION OF BRAD S. DANIELS IN SUPPORT OF APPELLANTS' MOTION TO STAY TRIAL COURT PROCEEDINGS

I, Brad S. Daniels, hereby declare and state as follows:

1. I am an attorney at Stoel Rives LLP and one of the attorneys representing Appellants PacifiCorp and Pacific Power in the above referenced case. I make this declaration based on personal knowledge and in support of Appellants' Motion to Stay Trial Court Proceedings.

2. Attached as **Exhibit 1** is a true and correct copy of the trial court's Case Management Order No. 11, entered on July 28, 2025.

3. Attached as **Exhibit 2** is a true and correct copy of an excerpt from the Oregon Department of Forestry's Incident Investigation Report concerning the Santiam Canyon Wildfire Event on September 7 and 8, 2020, published on March 19, 2025.

4. Attached as **Exhibit 3** is a true and correct copy of Moody's Investor Service, Inc.'s July 9, 2025, publication "Rating Action: Moody's Ratings downgrades PacifiCorp to Baa2; outlook stable."

5. Attached as **Exhibit 4** is a true and correct copy of S&P Global Ratings' July 28, 2025, publication "Research Update: PacifiCorp Downgraded to 'BBB' From 'BBB+' On Waker Expected Financial Measures, Outlook Negative; Debt Ratings Lowered."

I HEREBY DECLARE THAT THE ABOVE STATEMENT IS TRUE TO THE BEST OF MY KNOWLEDGE AND BELIEF, AND THAT I UNDERSTAND IT IS MADE FOR USE AS EVIDENCE IN COURT AND IS SUBJECT TO PENALTY FOR PERJURY.

Dated this 8th day of August, 2025, in Portland, Oregon.

s/ Brad S. Daniels

The Court adopts the Case Management Order 11 attached to this Order. If any deadlines or due dates are on days in which the court is closed in observance of legal holidays, then the deadline or due date will be the preceding business day. The following status conference dates are ordered in this case for ongoing administration of Phase II damages trials, case management and tracking, and resolution of disputes: January 8, 2026 at 8:30 a.m. for the initial status conference under CMO 11; one status conference thereafter on the first Friday of every quarter-year period at 8:30 a.m. The court further orders that the damages trial for the business claims alleged in *Freres Timber, Inc. v. PacifiCorp,* case no.: 22CV29694 is scheduled for 4 business days. It will commence on Monday, January 5, 2026, and continue through Thursday, January 8, 2026 and be governed under this case management order no. 11, absent consent of the parties or leave of court.

Steffan Alexander

Circuit Court Judge Steffan Alexander

7/28/2025 9:48:26 AM

Case Management Order No. 11

The Court adopts the following Case Management Order No. 11 to govern the process for completing the Phase II Damages Trials, pursuant to ORS 1.010(3) and (5), ORS 1.171(2)-(4), ORS 1.175(2), ORCP 1 B, ORCP 32 E, ORCP 36 B and C, ORCP 46 B, UTCR 7.020(5), UTCR 7.030(4), the Court's inherent authority, and the Oregon and United States Constitutions. The Court finds that the Phase II damages trials shall follow the procedures in CMO 11 to protect the rights of the parties and ensure the efficient and just administration of this case.

1. **Purpose and Scope**: The purpose of this Case Management Order ("Order") is to create a process for administering and adjudicating the individual claims of Class Members in *James, et al. v. PacifiCorp, et al.* (20cv33885) who seek to have their damages determined during the bifurcated second phase of this action (referred to herein as "absent Class Members") arising from the Labor Day 2020 fires. This Order supersedes and replaces all prior case management orders to the extent its provisions are inconsistent with or overlap in whole or in part with a prior case management order, except that any trial scheduled for, or already conducted in 2025, shall continue to be controlled by CMO 10. Any deadline in this Order may be extended upon good cause shown and with the Court's consent.[i]

2. **Trials Selection Process for Absent Class Members**:

   a. **Consolidated Damages Trials: Beginning in February 2026**, the Court shall set four consolidated jury trials—depending upon judicial resources and availability—to take place per month, commencing one per week, every month. **Beginning in January 2027**, the Court shall set eight consolidated jury trials—depending upon judicial resources and availability—to take place per month, commencing two per week, every month, until all Phase II trials are complete in March 2028. Pursuant to SLR 7.055, six weeks in advance of the first day of each trial, Plaintiff's counsel must send or deliver a letter to the Calendaring Secretary, c/o the Presiding Judge, requesting early assignment of a trial judge, containing the other information provided in the local rule and identifying the list of trial attorneys that will litigate that particular trial slate.

   b. **Number of Absent Class Members Selected Per Trial**: The remaining Phase II Damages Trials shall each include three to eight Households per trial, so as to approximate at least ten absent Class Members per trial. To facilitate the foregoing, the Court may make adjustments to the final trial slates after all households have been randomly selected in the order of their selection. "Household," as used in this order, means all members of the same nuclear family, living in the same dwelling as of September 7, 2020, and who have filed Short-Form Complaints in this case. An absent Class Member who did not live in the same dwelling as of September 7, 2020 with any person who has filed a Short-Form Complaint in this case is counted as a single Household.

c. **Identification of Remaining Absent Class Members:** The Court shall randomly select at least five Households for each trial from the list of all remaining Households provided by Plaintiffs. The randomly selected trial slates for all remaining Households and absent Class Members are listed by trial date in Exhibit B ("Trial Slates").

d. **Priority Plaintiffs' Households**: For trials assigned to their respective clients, Lead Counsel and other Plaintiffs' counsel may file a motion to select a priority Household of absent Class Members to participate in an earlier trial slate. The priority absent Class Members shall be selected by counsel on the basis of need using the following criteria: (i) an absent Class Member in the household is of advanced age, specifically 70 years of age or older; or (ii) an absent Class Member in the Household is suffering from sickness or illness that may impede their ability to participate in a later trial.

e. **Trials Selection Process for Absent Class Members Not Represented by Lead Counsel**: Each consolidated trial slate shall include only households represented by the same counsel. Households not represented by Lead Counsel, but represented by other Plaintiffs' counsel, shall receive two trial slates per quarter (*i.e.*, substantially equivalent to their pro rata share of represented households) in 2026 and four trial slates per quarter in 2027. Lead Counsel will not assist or participate in these Damages Trials absent their consent.

3. **Pleadings and Amendments:**

a. **Plaintiff Short-Form Complaints**: Plaintiffs in a Household selected for trial shall file an amended Short-Form Complaint consistent with the Court's rulings on PacifiCorp's Motion to Make More Definite and Certain, within **180 days** before the first day of trial in a new case file with a new case number. Plaintiff's counsel may seek waiver of the filing fee for initiation of new cases for all Class Members in an Omnibus hearing.

b. **Short-Form Answers**: Defendants will submit answers to each Plaintiff's amended damages complaint **170 days** before the first day of trial.

c. **Amended Pleadings**: Parties may amend a pleading without leave of court within **20 days** after it is served. Any response to an amended pleading is due within **10 days** of service of the amended pleading. Other than the deadlines expressly set forth in the foregoing, nothing in this paragraph modifies the application of ORCP 23 and Oregon rules governing pleadings.

4. **Discovery Process**: Each discovery cycle shall last **180 days**, counting backwards from the first day of trial. The below discovery schedule shall apply to each trial.

a. **Disclosure of Witnesses**: Within **150 days** before the first day of trial, parties will disclose the names and, if known, addresses and telephone numbers of all

persons, other than expert witnesses, likely to have knowledge, that the party may use to support their claims or defenses, unless the use would be solely for impeachment. *See, e.g.*, UTCR 5.150 (3)(a)(i).

b. **Document Discovery**: Defendant's First Set of Requests for Production to All Individual Plaintiffs (September 13, 2024), and Plaintiffs' responses and objections shall be applicable to each absent Class Member who participates in a Damages Trial. The Court's orders relating to discovery in Phase II, Trials 1-11, shall apply to all individual plaintiffs, including any identified in future complaints. Absent Class Members selected for a trial shall make complete document productions in response to Defendants' First Set of Requests for Production to All Individual Plaintiffs (September 13, 2024) by **150 days** prior to their trial. Similarly, Plaintiffs' First Set of Requests for Production to PacifiCorp, and PacifiCorp's responses and objections thereto, shall be applicable to PacifiCorp for each Damages Trial. PacifiCorp shall make a complete document production in response to Plaintiffs' Requests by **150 days** prior to a given set of Plaintiffs' trial. The parties may submit new document requests, without leave of court, up until **100 days** prior to the first day of trial, and between **100 days to 60 days** prior to the first day of trial only by written consent or by leave of court.

c. **Deficiencies in Document Productions**: Defendants shall identify in writing any deficiencies or gaps in Plaintiffs' document production. Plaintiffs must supplement the document productions, if warranted, within **30 days**, subject to the Oregon rules governing production of documents.

d. **Requests for Admission**: There shall be no Requests for Admissions served without leave of Court. No parties objected to this provision.

e. **Plaintiff Depositions**: Depositions of trial Plaintiffs shall occur no later than **60 days** prior to the first day of trial. Depositions are limited to **seven hours** on the record. Extensions of time may be requested for good cause on a case-by-case basis. Any perpetuation deposition of an absent Class Member must be completed **40 days** before the first day of the absent Class Member's trial, unless good cause is shown. All depositions shall be completed at least **30 days** before the first day of trial.

f. **Third Party Depositions and Document Requests**: Defendants may take no more than **two** depositions of a third-party witness associated with a particular Plaintiff in connection with each trial absent leave of court, unless plaintiffs identify an intent to call more than two third-party witnesses to support a given Plaintiff's claims—in which case PacifiCorp shall be entitled to depose each such witness. Third-party depositions will be limited as set forth in the parties' relevant stipulation for Phase II, Trial 3. There shall be no depositions of anyone younger than 18 absent leave of court. The party taking a deposition will provide the other party with the transcript and any deposition exhibits (and video or other recording, if obtained by the party taking the deposition) within

24 hours of when the transcript is provided to the party taking the deposition. Depositions will continue to be conducted by remote means, unless the parties agree otherwise. The Court's April 3, 2025 Order Regarding the Scope and Duration of Third-Party Depositions shall apply. Requests for document production should not be served on third parties before their deposition unless Plaintiffs have (1) identified the third party as a trial witness; and (2) there are deficiencies identified in a trial Plaintiff's document production. Absent leave of Court, any third-party document requests are limited to the scope of production in the Court's February 12, 2025 Order Granting, In Part, Defendants' Motion for Subpoena Duces Tecum on Third-Party Witnesses.

g. **ORCP 44 Medical Examinations**: Defendants must request any medical examinations for absent class members under ORCP 44 A no later than **90 days** prior to the first day of trial. Examinations must occur no later than **45 days** prior to the first day of trial. Each party will produce medical examination reports within **30 days** of the completion of the medical examination or no later than **14 days** prior to the first day of trial, whichever is earlier. Other than the timing provisions in this paragraph, the same parameters laid out in the Court's March 7, 2023 Order shall apply. There will be no ORCP 44A examinations of anyone younger than 18 absent leave of court.

h. **Property Inspections**: Defendants must request real property inspections no later than **90 days** prior to the first day of trial. Property inspections shall be governed by ORCP 43 and the Court's November 11, 2024 Order. Property inspections shall occur no later than **45 days** prior to the first day of trial.

i. **Discovery Disputes**: Any disputes that arise during the discovery process shall be resolved in summary fashion. The parties shall first meet and confer to resolve their disagreement. If they are unable to resolve their disagreement, they shall jointly approach the Court for relief within **3 days** after the completion of the conferral. The parties shall jointly submit a statement of their respective positions, not to exceed three double-spaced pages per side. There shall be no responses or replies unless ordered by the Court.

j. **Discovery Deadline**: All discovery shall be completed at least **30 days** before the first day of trial. All discovery deadlines may be extended for good cause. *See* fn 1. An absent Class Member's failure to timely comply with a discovery obligation may result in removal from their assigned trial slate rather than postponement of an entire trial slate.

k. **Motions for Summary Judgment**: There will be no new motions for summary judgment without leave of Court. If granted leave to file a new motion for summary judgment, the motion must be filed no later than **43 days** prior to the first day of trial. The Court's summary judgment rulings from Phase II, Trials 1-11 shall apply to every other trial. Response briefs will be due **33 days** before the first day of trial. There will be no reply briefs.

l. **No Preservation Motions**: The parties shall not file any motion, brief, or other document solely or primarily to preserve their prior arguments and objections.

m. **Offset Information and Motions**: Plaintiffs shall request full insurance claims files from their insurers and produce those insurance documents to PacifiCorp no later than **120 days** prior to the first day of trial. PacifiCorp shall file a motion to offset economic damages **14 days** prior to the first day of trial. The response to the motion is due **7 days** after the verdict is received. The reply is due **5 days** later. This timeline is dependent on PacifiCorp receiving timely and complete insurance documentation from Plaintiffs. The motion and response shall not exceed five pages. The reply shall not exceed three pages. The parties' prior arguments and objections in connection with offset in Phase I and Phase II, Trials 1-11, are restated in each remaining Phase II trial.

n. **Economic Damages Stipulations**: To facilitate stipulations regarding economic damages, the Court orders the following, with the Plaintiffs' consent. Plaintiffs shall disclose the economic damages determined by each economic damages expert who will testify regarding such damages at least **45 days** before the start of each trial, along with a proposed stipulation on economic damages for that trial and supporting appraisals and personal property inventories. Defendants shall send Plaintiffs their response or alternative proposed stipulation on economic damages and supporting appraisals at least **30 days** before the start of each trial. Stipulations regarding economic damages, if any, should be filed **20 days** before the start of each trial. All other stipulations must be filed **10 days** prior to the first day of trial.

5. **Trial Process**:

a. **Neutral Statement of the Case, Jury Instructions, and Verdict Form**: The parties will use the same neutral statement, jury instructions and verdict form that were used in Phase II, Trial 8, (if the parties have stipulated to economic damages) or Phase II, Trial 6, (if the parties have not stipulated to economic damages) subject to modifications to account for the specific plaintiffs, fires, and damages at issue. The neutral statement, jury instructions and verdict form will be due no later than **14 days** prior to the first day of trial.

b. **Motions *In Limine***: Motions *in limine* are due **30 days** prior to the first day of trial. Oppositions to motions *in limine* are due **15 days** prior to the first day of trial. Motions *in limine* must be limited to specific evidentiary issues not previously raised and resolved by the Court's prior rulings on Omnibus Motions *in Limine* for Phase I and Phase II, Trials 1 through 11. The parties shall confer on their respective motions and submit a list to the assigned trial judge identifying the Motions *in limine* that are (i) resolved by stipulation, (ii) moot, or (iii) still at issue, due **7 days** prior to the first day of trial.

c. **Deposition Designations**: There shall be no depositions played during trial as

substantive evidence absent good cause shown and leave of Court by motion filed **30 days** prior to the first day of trial and *identifying the basis for admissibility of the deposition designations as substantive evidence*. The foregoing order does not apply to depositions played during trial for impeachment. The parties must exchange any deposition designations no later than **30 days** prior to the first day of trial. Parties must exchange objections and counter-designations to deposition designations no later than **21 days** prior to the first day of trial. Parties must exchange responses or rebuttal designations no later than **14 days** before the first day of trial. Parties must file deposition designations **10 days** before the first day of trial.

d. **Trial Exhibits**: The parties must exchange trial exhibit lists and stamped copies of all trial exhibits no later than **21 days** prior to the first day of trial. Objections to exhibits must be exchanged **14 days** prior to the first day of trial. Exhibit lists must be filed **10 days** prior to the first day of trial. If no objection is specified to a proffered exhibit, the exhibit shall be preadmitted if offered into evidence and received by the Court. Exhibit lists may be amended after the pre-trial conference only for good cause shown. The foregoing does not include expert witness materials and exhibits that may be offered for impeachment purposes only.

e. **Witness List**: The parties will file their respective witness lists (other than expert witnesses) **10 days** before the first day of trial.

f. **Testifying Expert Materials**: Subject to the conditions set forth regarding Economic Damages Stipulations above, the parties shall disclose any such testifying experts by 5:00 p.m. on the Friday before each trial. The file of a testifying expert must be turned over to the opposing party by **5:00 p.m. 2 days** before the expert is expected to testify. The file should include (1) the expert's current curriculum vitae; (2) materials the expert considered or relied upon in forming the expert's opinion; and (3) any demonstrative the expert intends to use during their testimony, with the expert's opinions or conclusions redacted. Parties must also provide an unredacted version of any demonstrative or exhibit that includes the expert's opinions or conclusions by **8:30 a.m.** on the morning of the day the expert is expected to testify.

g. **Pretrial Conference**: The assigned trial judge may hold a pretrial conference the Friday before the start of trial or subject to the court's availability based on other trial assignments. Consistent with SLR 5.015 (4), Plaintiffs' counsel must coordinate scheduling of a pretrial conference hearing, if any, with the dates of availability for the parties and the assigned trial judge.

h. **12-Person Jury**: Each trial shall be presented before a 12-person jury, unless the parties stipulate to a bench trial with a written waiver of jury trial.

///

i. **Trial Time Allocation**: The schedule for each trial shall be:

- Day 1: Jury Selection and Opening Statements
- Day 2: Opening Statements (if not completed) and Plaintiffs' Case
- Day 3: Plaintiffs' Case
- Day 4: Plaintiffs' Case
- Day 5: Defense Case
- Day 6: Plaintiff's Rebuttal Case (.5 days) and Closing Arguments
- Day 7: Jury Deliberations
- Day 8: Jury Deliberations
- ***(Day 9) – Add up to one additional day if there is no stipulation to economic damages and additional expert testimony is required.

6. **Jurisdiction and Dispute Resolution Procedure:** Judge Alexander shall retain jurisdiction and preside over all pre-trial motions and discovery disputes. Subject to judicial resources and availability, certain pre-trial motions and disputes may be re-assigned by the Presiding Judge or Chief Civil Judge.

7. **Conferral**: The parties shall confer on all motions, oppositions, and objections. Failure to confer may result in denial of a motion, opposition, or objection or forestall consideration of the same. "Conferring" means to talk in person or on the phone. *See* UTCR 5.010; *see* Multnomah County Motion Panel Statement, Sec IV (explaining that "[g]enerally, sending a text message or email is not considered conferring.").

8. **Sealing:** The parties shall not designate entire deposition transcripts "Confidential" or "Attorneys' Eyes Only." Rather, the parties shall treat documents and/or testimony containing records of insurance payments, social security numbers, financial information, billing information, driver's license numbers, IME reports, medical records, criminal charges, convictions, and proceedings, physical abuse, emotional abuse, and medical diagnoses (including mental health diagnoses) as Confidential material required to be sealed from the public record pursuant to the parties' Stipulated Protective Order. The parties may designate other information—including specific portions of deposition transcripts—as "Confidential" only in a good faith, individualized basis consistent with Oregon law. The parties shall not be required to confer about motions to file under seal unless one party intends to contest a "Confidential" or "Attorneys' Eyes Only" designation applied by the other party.

9. **Mandatory Post-Trial Global Mediation**: The parties are required to engage in a global mediation once every other month with the objective of resolving the claims of the remaining absent Class Members, until the completion of the Phase II damages process, beginning in **October 2025**. Within **7 days** after each global mediation, the parties must file a Certificate of Participation in Alternative Dispute Resolution, consistent with SLR 7.016. Lead Counsel and each Plaintiff Group do not need to participate in the same global mediation. Lead Counsel, each Plaintiff Group and each defendant trial attorney and party or representative of a corporation or insurance

company who has full authority to settle and compromise the litigation shall appear in-person at the mediation. However, the court may permit telephone or video appearances for good cause. *See* SLR 6.012(3).

---

[i] *See ORCP 36 C* (*stating that "[o]*n motion by a party or by the person from whom discovery is sought, and for good cause shown, the court in which the action is pending may make any order that justice requires to protect a party or person from annoyance, embarrassment, oppression, or undue burden or expense, including one or more of the following: that the discovery not be had; that the discovery may be had only on specified terms and conditions")*; see also Bala v. Oregon Health & Sci. Univ.*, 2023 WL 3561449, at *1–2 (D. Or. May 14, 2023) (explaining that once the district court issues a scheduling order under Rule 16, the case "schedule may be modified only for good cause and with the judge's consent." * * * [d]istrict courts consider the following six factors when ruling on a motion to amend a Rule 16 scheduling order to reopen discovery: (1) whether trial is imminent, (2) whether the request is opposed, (3) whether the non-moving party would be prejudiced, (4) whether the moving party was diligent in obtaining discovery within the guidelines established by the court, (5) the foreseeability of the need for additional discovery in light of the time allowed for discovery by the district court, and (6) the likelihood that the discovery will lead to relevant evidence."); *see also District of Oregon, Local Rules of Civil Practice* ("LR") 16.3(a) (providing that a party seeking to amend any court-imposed deadline must: (1) show good cause why the deadlines should be modified, (2) show effective prior use of time, (3) recommend a new date for the deadline in question, and (4) show the impact of the proposed extension on other existing deadlines, settings, or schedules.

Report Narrative

Incident Investigation Report

For all STATISTICAL INCIDENTS that MEET OR EXCEED $10,000 in *estimated* suppression cost, have reportable injuries or fatalities, or potential claims against the agency.

The Oregon Department of Forestry reserves the right to revise this report if additional information or facts are brought to the attention of investigators.

Incident Synopsis

The Santiam Canyon, located within the protection boundaries of the North Cascade District of the Oregon Department of Forestry (ODF), was impacted by fire on September 7 and 8, 2020. On these dates there was an extreme wind event affecting the Santiam Canyon. **(Section B, Pg. B3 Protection Boundary Map)**

The Beachie Creek Fire was discovered on August 16, 2020, at 11:18 AM burning in the Willamette National Forest, Detroit Ranger District, Marion County, Oregon. This location is within the Opal Creek Wilderness. The size was estimated at 10 acres. **(Section F, Pg. F54 Incident Status Summary (ICS209) 08/21/2020)** ODF did not investigate the Beachie Creek Fire because the United States Forest Service (USFS) was the authority having jurisdiction (AHJ).

ODF investigators did not conduct any investigations in the Santiam Canyon until September 14, 2020. While onsite at the Gates Incident Command Post (ICP), investigators were informed of reports of other ignitions throughout the canyon. The reported ignitions were within ODF protection boundaries. **(Section B, Pg. B3 Protection Boundary Map)** At that time they were unaware of the information in the Northwest Incident Management Team 13 (NWIMT13) press release (below):

> "…Originally named the Beachie Creek fire, it has been renamed the Santiam Fire acknowledging that the Beachie Creek Fire no longer was the main cause of rapid fire growth and was instead fed by a series of small fires largely caused by downed power lines and other ignition sources throughout the area". **(Section F, Pg. F59 USFS press release 09/09/2020**)

Part of the ODF investigation was to determine where fires started, and the cause of ignition associated with those fires. Multiple fires were suppressed by rural fire protection districts (RFPD), that were reported by USFS as having been caused by power lines.

> "…Fire managers have now determined that at least 13 new fires were started between Detroit and Mehama from downed powerlines during the peak of Monday's wind event and then on Tuesday a large front of wind-driven fire ran through the city of Detroit from the east." **(Section F, Pg. F60 USFS press release 09/10/2020**)

ODF Prevention Section/Investigations, 2600 State Street, Salem, OR 97310

ODF investigators did not find any evidence that reported powerline ignitions had contributed to the overall spread of the fire in the Santiam Canyon.

ODF's investigation was impeded and delayed because the USFS would not allow their employees to be interviewed by ODF. The investigators were only provided with written statements from USFS employees (the last of which was received in July 2024), and the investigators were not allowed to interview them in person.

ODF was unable to analyze electrical equipment and powerline hardware in the Gates/Mill City area. This was due to PacifiCorp and their contract crews work of repairing and restoring power, including the removal of damaged electrical equipment. The specific items and quantity of hardware removed is unknown; the potential evidentiary value of this equipment is unknown as well.

Additionally due to the fires spread of over 190,000 acres, and the unprecedented wind event that occurred, finding reliable witness accounts of potential origin areas and determining the cause, was time consuming and laborious. The investigation team reviewed thousands of pages of documents and conducted over 180 interviews with 105 witnesses.

The spread of the fires through the Santiam Canyon was primarily affected by the east wind event which occurred on the evening of September 7th and morning of September 8th, 2020. Over 1,500 structures were damaged or destroyed, and 4 lives were lost in the fire.

The final acreage of the Santiam Canyon Fires was estimated at over 193,000 acres.

Fire Weather Information

The fire weather conditions for the North Cascades District (NCAS) were warm and dry. Fire season for NCAS was in effect **(Section F, Pg. F42, Declaration of Fire Season)**, and the fire danger rating forecast for that area on September 7 was very high for Fire Danger Rating Area 606 and 608. **(Section F, Pg. F96, National Fire Danger Rating System)** There was a red flag warning for strong east winds and low relative humidity issued by National Weather Service (NWS). **(Section F, Pg. F97, Fire Weather Planning Forecast)**

Weather Information is from the closest weather stations: Boulder Creek Remote Automated Weather Station (RAWS) and Jordan RAWS. The Boulder Creek RAWS station is located 4 miles ENE of Idanha, OR, and is situated at 3750 feet elevation. The Jordon RAWS station is located 10.7 miles WSW of Mill City and is situated at an elevation of 738 ft. It would be more representative of the weather conditions in the Gates/Mill City area on the night of September 7th and morning of the 8th, 2020. **(Section B, Pg. B1, Weather Station Locations Map)**

The Beachie Creek Fire was burning northeast of the Santiam Canyon, prior to the historic east winds event of September 7, 2020.

ODF Prevention Section/Investigations, 2600 State Street, Salem, OR 97310

On Wednesday, September 9, 2020, the Santiam Fire Update provided by the NWIMT13 states that “originally listed at 469 acres, the fire has grown overnight to over 131,000 acres driven by high winds and extremely dry fuels”. **(Section F, Pg. F59 USFS press release 09/09/2020)** Please note that on September 10, 2020, the NWIMT13 updated the name of the fire back to Beachie Creek Fire. **(Section F, Pg. F60 USFS press release 09/10/2020)**

According to the Collective Timeline prepared by Team 13, “Winds were fairly steady at 20-30 mph, with one gust that fire personnel thought might be closer to 50. Jordan Valley RAWS station in the local area recorded winds up to 39.” **(Section F, Pg. F77, USFS Collective Timeline)**

According to InciWeb information about the Beachie Creek Fire which was downloaded on March 25, 2022, “The unique wind event on September 7th created an extreme environment in which the fire was able to accelerate. The winds were 50-75 miles per hour, and the fire growth rate was about 2.77 acres per second in areas of the Beachie Creek fire. This allowed the fire to reach over 130,000 acres in one night”. **(Section F, Pg F80 InciWeb Information Incident Overview)**

The peak gust weather readings for the Boulder Creek RAWS on September 8, 2020 at 01:00 am.

Boulder Creek (RAWS)
Temp: .....59°
RH(low):.....15%
Wind: 9-G32
Wind Dir:....NE
(Section F, Pg. F104-106 RAWS)

The peak gust weather readings for the Jordan RAWS on September 7, 2020 at 11:00 pm.

Jordan (RAWS)
Temp: .....72°
RH: 12%
Wind: 22-G39
Wind Dir:....E
(Section F, Pg. F107-109 RAWS)

ODF Fire Fighter Observations

No official on-site weather observations were reported to have been taken during the initial attack of the fire, however, several ODF fire personnel were on site and have shared their observations of the weather and fire environment, as recapped below:

Confidential-Work product protected under ORCP and OEC status.
Not for public release...requests for copies must be made in writing to:
ODF Prevention Section/Investigations, 2600 State Street, Salem, OR 97310

From Little North Fork Canyon the following observations were made while the fire was advancing:

- Eric Perkins **(Section E, Pg. E2, Perkins ODF Interview)**
  - Strong winds
  - Trees down on the road
  - 10:00pm - softball sized embers
  - Ember shower above tree level
  - …the first powerline we saw wasn't until Elkhorn substation. There was not fire there. Never saw an arc or spark.
- Scott West **(Section E, Pgs. E4, E5,& E7, West ODF Interview)**
  - Debris flying across the road
  - No fire coming over the ridge to Gates, OR
  - Trees in the road
  - Slow road travel 20-25 mph
  - Debris was hitting the top of the truck
  - "Don said, 'man this is spooky', it felt like we were in hyper-speed with the stuff coming at us and the smoke and stuff. Wind was blowing and stuff was coming down"
  - Did not observe any arcing of powerlines

From Potato Hill the following observations were made on the night of September 7, 2020:

- Scott West **(Section H, Video 20200907_222759)**
  - Shared video which shows active fire, strong winds and ember showers
- Levi Hopkins **(Section E, Pg. E9, Hopkins ODF Interview)** and **(Section H, Video HopkinsIMG-0811, HopkinsIMG-0814, and HopkinsIMG-0815)**
  - Trying to get to Potato Hill and there were trees blocking the way
  - There were fire brands and ember casts in the field area northwest of Potato Hill causing spot fires
  - Shared video from HopkinsIMG-0811 and HopkinsIMG-0814 showed high winds, embers and a spot fire
  - Video HopkinsIMG-0815 was taken while driving north on Mad Creek Road and showed wind blowing embers across the road

From Horse Camp the following observations were made on the night of September 7, 2020:

- Don Everingham **(Section E, Pg. E11, Everingham ODF Interview)**
  - After 10:00 pm arrived at Horse Camp
  - Saw ten small unstaffed fires on both sides of the road driving back to Gates, OR
  - Unknown cause of the fires
- Scott West **(Section E, Pg. E6, West ODF Interview)**
  - Had to get out of the truck to get debris out of the road

From Gates ICP the following observations were made on the night of September 7, 2020:

- Don Everingham **(Section E, Pg. E11, Everingham ODF Interview)**
  - Hotshots (firefighters) were putting out spot fires

Confidential-Work product protected under ORCP and OEC status.
Not for public release...requests for copies must be made in writing to:
ODF Prevention Section/Investigations, 2600 State Street, Salem, OR 97310

- Power lines were down in the area

Fire Behavior Modeling

Fire Behavior Analyst (FBAN) Boone Zimmerlee, ODF

"Beachie Creek fire started Aug 16, 2020. The fire remained on the landscape with little growth until September 8, 2020 when a significant weather event impacted the geographic region and brought unseasonable high temps, low RH's and strong east winds. This weather event with high temps and strong east winds that enhanced the spread was being referred to as a 1 in 50 to a 1 in 100-year event. The weather event, combined with the dry available fuels and terrain that aligned with the winds, resulted in erratic and extreme fire behavior with rapid rates of spread to the west.

Attempting to model the fire behavior using current readily available modeling programs is possible but has limits in accuracy and reliability. Accuracy in the models decline as weather input parameters reach extremes. These models were designed under peak normal fire season conditions and not 1 in 50 to 100-year events.

Rothermel's surface fire spread equation is the basis for fire modeling in readily available modeling programs. Rothermel indicated that the accuracy of his spread model output, given average season conditions, is somewhere between .5 and 2 times the observed behavior. This difference between outputs and observed behavior, alone can be seen as wide range when predicting fire behavior. With respect to the Beachie Creek fire, much of the observed spread rates when compared to modeled fire exceeded the .5-2 times range of accuracy by multiple magnitudes and emphasizes the decreased accuracy and increased error due to the extreme weather parameter inputs.

While a map can be created that could reasonably match the final perimeter, however the observed fire behavior including the source(s) of the fire spread that led to the final perimeter are not likely to be accurately reflected or represented. This is largely due to limitations within the models (surface, crown, and spotting) and their ability to handle the extremities of the weather input parameters.

These limitations are further compounded by the models in-ability to account for external influences such as stability in the atmosphere (convective lift), influences and interaction of multiple fires caused by spots and other sources, and the unpredictable nature of when and where new fires are/were started by spots and other causes. Modeling produced under these extreme weather conditions and without accounting for external influences would produce results that would be considered unreliable." **(Section F, Pg. F51, Santiam Fires FBAN Report)**

ODF Prevention Section/Investigations, 2600 State Street, Salem, OR 97310

Scene Protection

Due to the size of the impacted area and numerous reports of ignition sites; scene protection was not feasible.

Investigation Narrative

ODF is authorized, by Oregon Revised Statute (ORS) chapter 477, to investigate all fires that originate on ODF protected land. This authority requires that ODF investigates to determine origin, cause and responsible party. The Beachie Creek Fire initially was not in the jurisdiction of ODF. The original reports coming from USFS were that the cause of ignition was lightning strikes in Opal Creek Wilderness. Due to the unprecedented Labor Day Fire events, emerging reports of new ignitions, and with the complexity of the incidents; ODF determined that it was necessary to begin investigating reported ignitions in the Santiam Canyon. The historic number of fires burning at the same time throughout Oregon put a tremendous strain on the ODF resources and contributed to a delay in investigative response.

The Executive Summary of Team 13, covering September 4 through September 16, 2020, states that “a significant East wind event occurred causing numerous new fire starts in the Highway 22 corridor, many of these fires are believed to be caused by downed power lines”. **(Section F, Pg. F62 USFS Executive Summary)** ODF made two Freedom of Information Act (FOIA) requests to the USFS, on December 17, 2022 and September 6, 2024. The requests asked, “for all investigative reports, memoranda of interviews and other documents related to the USFS investigation of the Beachie Creek Fire that started on or about August 16, 2020 in the Opal Creek wilderness and spread though the Santiam Canyon, Oregon, on or about September 7 and 8, 2020”. On November 26, 2024, the USFS released a redacted Report of Investigation of the Beachie Creek Fire, which was dated on April 20, 2023.

ODF was prevented from conducting face to face interviews of USFS employees, who were direct witnesses to the Beachie Creek Fire. The USFS only provided written answers from eight USFS employees. ODF investigators were unable to ask follow-up questions of these employees.

The Beachie Creek Fire was discovered on August 16, 2020, at 11:18 AM burning in the Willamette National Forest, Detroit Ranger District, Marion County, Oregon. The fire was reported by the Coffin Mountain Lookout. The fire was burning approximately 2 miles south of Jawbone Flats. The specific latitude and longitude listed on the official USFS Incident Status Summary (ICS209) as Latitude 44°49’16” N, Longitude 122°11’17” W. This location, according to the USFS, is within the Opal Creek Wilderness. Further it was reported to be burning in heavy timber on steep slopes. The size was estimated at 10 acres. **(Section F, Pg. F55 ICS209 08/21/2020)**

Confidential-Work product protected under ORCP and OEC status.
Not for public release...requests for copies must be made in writing to:
ODF Prevention Section/Investigations, 2600 State Street, Salem, OR 97310

A team of ODF investigators were first mobilized to the Santiam Canyon on Monday, September 14, 2020. They were asked to respond to the ODF incident command post at the Department of Public Safety Standards and Training (DPSST) facility in Aumsville, OR for assignment to the fire at Gates School.

While onsite at the Gates School, investigators were informed of reports of other ignitions throughout the canyon. The span of the investigation was expanded to determine which, if any, of the reported ignitions, investigated by ODF, contributed to the fire that burned through the Santiam Canyon. A number of reported ignitions were investigated by ODF.

Investigation of Reported Ignitions

The information summarized below is inclusive of ignitions that were discovered during the investigative process. The information compiled by ODF came from 911 calls, PacifiCorp customer call records and statements from local residents and responding fire department personnel.

9/07/2020:

1. 6:52 pm - 11006 WinStanley Rd. SE, Lyons OR - The transformer blew and the debris burning on the ground under the power lines. Reported fire suppressed by locals. The investigation concluded that this fire did not contribute to the fire that burned through the Santiam Canyon. **(Section F, Pg. F84-86, National Fire Incident Reporting System (NFIRS) 770 Stayton FD)**

2. 7:04 pm - 11263 Fir Grove Ln. NE, Stayton OR - This was a separate fire caused by a branch blown into a power line and then off the power line and into the field to the west. The fire was reported originally at 11263 Fir Grove Lane, ODF and local municipal fire departments responded to the location and contained the fire at approximately 3-5 acres. This fire scene was examined by ODF investigators. The investigation concluded that this fire did not contribute to the fire that burned through the Santiam Canyon. **(Section F, Pg. F87-89, NFIRS 771 Stayton FD)**

3. 8:37 pm - 51330 Gates Bridge East, Gates OR - A tree branch broke off, fell into a powerline causing arcing, which ignited the grass under the powerline. The fire was suppressed by the Gates RFPD. The investigation concluded that this fire did not contribute to the fire that burned through the Santiam Canyon. **(Section F, Pg. F31-36, METCOM CFS 5548)**

4. 9:09 pm - Hwy 22 near MP35 and the vicinity of Schroeder Rd., Gates OR - Laura Whitaker saw branches blocking highway, no fire, but sparking on pole. There was also a reported ignition that was examined by ODF investigators, by observation they were able to locate a section of power line near milepost 35 on Hwy 22 which showed signs of recent repair. However, they were not able to locate any evidence of an ignition

Confidential-Work product protected under ORCP and OEC status.
Not for public release...requests for copies must be made in writing to:
ODF Prevention Section/Investigations, 2600 State Street, Salem, OR 97310

below where the line had been repaired. The entire area surrounding this location was burned. The investigation concluded that this incident probably did not contribute to the fire that burned through the Santiam Canyon. **(Section E, Pg. E13, Whitaker interview)** and **(Section F, Pg. F37-39, METCOM CFS 5562)**

5. 9:20 pm - Potato Hill 39969 Mad Creek Rd., Gates OR - This ignition occurred in a recently harvested timber sale unit on Potato Hill. **(Section F, Pg. F43-50, Notification of Operations/Permit to Operate Power-Driven Machinery (NOAP 2017-582-12382C/P200 Timber Sale-ODF))** There was no active logging operation at the time of the fire. There are no power lines within the timber sale unit, and there is no road access to the origin area, this makes it probable that the fire was started by fire brands from the fire that burned through the Santiam Canyon. Randy Walker stated that there were embers falling out of the air, but they were not from the fire on Potato Hill as the wind was blowing toward the west, away from their house. This fire was never suppressed due to the inability of fire apparatus to reach the fire. **(Section E, Pg. E14, Walker interview)**

6. 9:30 pm - 157 Dogwood Dr., Gates OR - Chris Grom, service drop pulled off house, saw arcing, but no fire. The investigation concluded that this fire did not contribute to the fire that burned through the Santiam Canyon. **(Section E, Pg. E15, Grom interview)**

7. 9:49 pm - "Old" Gates School (occupied by Upward Bound Inc.) 40151 Gates School Rd., Gates OR **(Section F, Pg. F90-95, NFRS 2020-176 Mill City FD)** - Brian Gales was the IC for the fire on September 7th. The ICP was located in the field next to the Gates School, Gales stated "He watched a branch from a tree along the perimeter fence fall onto powerlines causing fire along the fence." **(Section E, Pg. E16, Gales interview)** Prior to their evacuation, USFS initially assisted the local municipal fire departments in suppressing the fire. Volunteer fire fighter Breen stated that "at this point the fire at the school grounds was nearly out and seemed well under control… No other structures or equipment at the school had burned as far as I could tell. The only damage I saw inside the school fence was burned grass" and in another statement, "that he was unaware of any other powerline ignitions other than Gates School." **(Section E, Pg. E17, Breen statement and E21, Breen interview)** In an interview with Mill City Fire Chief, Leland Ohrt, he told investigators that "After a time, his department and others fighting the fire brought it under control. The only thing that had burned was grass. When he left there was no active fire and no buildings or tents had been lost. Several hours later he was driving a tanker by the location as the main fire advanced on the town of Gates. That is when the buildings and the tent city burned. **(Section E, Pg. E22, Ohrt interview**) The investigation concluded that this fire did not contribute to the fire that burned through the Santiam Canyon.

8. 10:00 pm - 33733 Railroad Ave., Gates OR - Shannon Stevens saw and heard transformers "blow", saw a fire at the base of a neighbor's pole, she suppressed it, no other reports of fire at that location. The investigation concluded that this fire did not

Confidential-Work product protected under ORCP and OEC status.
Not for public release...requests for copies must be made in writing to:
ODF Prevention Section/Investigations, 2600 State Street, Salem, OR 97310

contribute to the fire that burned through the Santiam Canyon. **(Section E, Pg. E23, S. Stevens interview)**

9. 10:59 pm - 39781 SE 4th St., Mill City OR - Michelle Sisk reports fire in field to the north of the house, no powerlines in the area. ODF investigators went onsite and confirmed the field had burned but was not contiguous to other fires. The investigators determined that the probable cause was fire brands from the fire that burned through the Santiam Canyon. **(Section E, Pg. E24, Sisk interview)**

10. 11:00 pm - 49925 Kingwood Ave., Mill City OR - This location is just west of the Fairview cemetery. The fire was northeast of the house burning in grass, brush and an old apple orchard. There were no power lines in the vicinity of this fire. The investigators determined that the probable cause was fire brands from the Beachie Creek Fire. This fire was suppressed by Engine 796 from the Mill City Fire Department, which responded to this fire from the Gates School. The investigation concluded that this fire did not contribute to the fire that burned through the Santiam Canyon. **(Section E, Pg. E17, Breen statement)**

11. 11:13 pm - 1090 SW Alder St., Mill City OR - Dane Briock reported numerous spot fires to the south of his house, but no power lines in the vicinity. This was the first of two calls reporting a fire at or near this location. The investigators determined that the probable cause was fire brands from the fire that burned through the Santiam Canyon. **(Section E, Pg. E25, Briock interview)**

12. 11:30 pm - 33613 Railroad Ave., Gates OR - Judy Cram left at 11:30 PM. Power was on when she left. She did not see any fire in the neighborhood when she left. Mount Horeb, 3 miles north of her property, was on fire when she was leaving. **(Section E, Pg. E26, Cram interview)**

13. 11:32 pm - SE Alder St./Hwy 22, Gates OR - While conducting witness interviews, ODF investigators were talking with Nate Acuff, onsite, when he pointed to a spot east of Kelly's lumber, and stated that was where he saw a fire, with no power lines near it. The fire was on the north side of the highway. The investigators determined that the probable cause was fire brands from the fire that burned through the Santiam Canyon. **(Section E, Pg. E27, Acuff interview)**

14. No ignition reported to METCOM 911 - 880 N Santiam Hwy W, Gates OR - Interview with resident Hunter Stroud who stayed to protect his home and identified the fire as coming down the hill from the north. The investigation concluded that this incident did not contribute to the fire that burned through the Santiam Canyon. **(Section E, Pg. E28, Stroud interview)**

15. No ignition reported to METCOM 911 - 814 N Santiam Hwy W, Gates OR - The investigation revealed that Billy Edge had witnessed arcing lines along the highway but

Confidential-Work product protected under ORCP and OEC status.
Not for public release...requests for copies must be made in writing to:
ODF Prevention Section/Investigations, 2600 State Street, Salem, OR 97310

no ground fire. The investigation concluded that this incident did not contribute to the fire that burned through the Santiam Canyon. **(Section E, Pg. E29, Edge interview)**

16. No ignition reported to METCOM 911 - 770 NW Alder St., Mill City OR - Michael Barnhurst reported a fire at the base of a pole, when a fuse blew on a pole near his house, neighbors suppressed the fire. The investigation concluded that this incident did not contribute to the fire that burned through the Santiam Canyon. **(Section E, Pg. E30, Barnhurst interview)**

09/08/2020:

17. 4:00 am - Mad Hatter - Mad Hatter was an active timber sale which was occurring southeast of Gates, OR. ODF investigators interviewed a member of the logging crew that was camping at the timber sale area on September 7th, 2020. He told them that when they went to bed, they could see the fire in Gates to the west of their location. They did not see any fire to the east or south of their location. He told investigators that they were awakened at approximately 4:00 AM on the 8th with fire coming over the ridge from the east which forced them to evacuate their trailers and equipment from the timber sale area. The investigators determined that the probable cause was fire brands from the fire that burned through the Santiam Canyon. **(Section E, Pg. E31, King interview)**

18. 4:07 am - Gates School Bus Barn - Mill City Fire was dispatched to a fire burning at the bus barn. All the power in Gates had been out since 12:09:35 am, when PacifiCorp de-energized the entire town. The investigators determined that the probable cause was fire brands from the fire that burned through the Santiam Canyon. **(Section E, Pg. E32, Mill City Fire interview)** and **(Section F, Pg. F112, PacifiCorp Fusesaver Data document line 66)**

19. 8:00 am - Mount Horeb Baptist Church, Gates OR - Firemen at Mill City Fire responded to a fire at the church and reported spot fires around this time period going from building to building. All the power in Gates had been out since 12:09:35 am, when PacifiCorp de-energized the entire town. The investigators determined that the probable cause was fire brands from the fire that burned through the Santiam Canyon. **(Section E, Pg. E32, Mill City Fire interview)** and **(Section F, Pg. F112, PacifiCorp Fusesaver Data document line 66)**

OSP Dashcam Videos

An investigator with law enforcement telecommunications system security clearance was allowed to review dashcam videos from the OSP units that were in the Santiam Canyon area on the night of the 7th and the morning of the 8th of September, 2020. Over 135 individual segments of dashcam video were reviewed. These recordings varied in length from several minutes to over an hour.

The purpose of the review was to determine if there was any evidence of downed or arcing power lines on any of the recordings. The investigator was not allowed to take any screen shots from the OSP videos.

Only one video showed any possible arcing power lines. That video showed OSP officer(s) directing traffic in front of Kelly Lumber Sales on Hwy 22 in Mill City. Kelly Lumber Sales is located on the north side of Hwy 22. In a Google Maps photo from May of 2018 a power line service drop can be seen stretching from a transformer pole on the south side of Hwy 22 to a service entrance head on the west side of the Kelly Lumber Sales building. In the OSP video

Confidential-Work product protected under ORCP and OEC status.

ODF Prevention Section/Investigations, 2600 State Street, Salem, OR 97310

south bound evacuating civilian vehicles are driving over something which the investigator presumed to be the downed service drop cable. At the time there is clearly already fire well established in the Kelly Lumber Sales building which could have caused the cable to fail, falling onto the roadway. All of the arcing observed was underneath the vehicles and confined to the roadway, not impacting any wildland fuels.

Findings

1. The ignitions in the Santiam Canyon, described above, occurred within the Protection Boundary of the NCAS of ODF. **(Section B, Pg. B3, Protection Boundary Map)**

2. These ignitions originated during declared fire season. **(Section F, Pg. F42, Declaration of Fire Season)**

3. These ignitions originated during declared public regulated use restrictions. **(Section F, Pg. F52-53, Regulated Closure Proclamation)**

4. The area in the Santiam Canyon, where these ignitions occurred, was at very high fire danger level. **(Section F, Pg. F96, NFDR)**

5. The NCAS was in Industrial Fire Precaution Level (IFPL) 3. **(Section F, Pg. F40-41, IFPL 3 Closedown Order)**

6. The power to Gates, OR was completely de-energized at 12:09:35 am on September 8, 2020. **(Section F, Pg. F112, PacifiCorp Fusesaver Data document line 66)**

7. ODF investigators determined seven of the reported ignitions in the Santiam Canyon were caused by powerlines but did not contribute to the spread of the fire in the Santiam Canyon. (Old Gates School, Fir Grove Lane, Schroeder Rd, WinStanley Rd., 51330 Gates Bridge East, 33733 Railroad Ave, 770 NW Alder St).

8. The investigators determined that the remaining ignitions were probably caused by fire brands from the fire in the Santiam Canyon.

9. ODF investigators found no evidence of powerline ignitions contributing to the spread of the fire in the Santiam Canyon.

10. The Beachie Creek Fire originated on property under the jurisdiction of USFS. **(Section F, Pg. F55, ICS209 08/21/2020)**

11. The USFS determined that the Beachie Creek Fire originated at Latitude 44°49’16” W, Longitude 122°11’17” N, also referenced as the legal description of NE ¼ of the

Confidential-Work product protected under ORCP and OEC status.
Not for public release...requests for copies must be made in writing to:
ODF Prevention Section/Investigations, 2600 State Street, Salem, OR 97310

SW ¼ of Section 3, T9S, R5E, Willamette Meridian. **(Section F, Pg. F55 ICS209 08/21/2020)**

12. The fire in the Santiam Canyon burned property of numerous landowners.

13. The Beachie Creek Fire was first reported by the Coffin Mountain Lookout to the Eugene Interagency Dispatch Center (EICC) at 11:18 hours on August 16, 2020. **(Section F, Pg. F1, EICC WildCAD (Computer Aided Dispatch) Incident Card)**

14. Lightning strike reports for the period prior to the detection of these ignitions document that there was no lightning detected within a 30-day period, prior to these ignitions. **(Section B, Pg. B5, Lightning Map)**

15. ODF made two FOIA requests to the USFS, on December 17, 2022 and September 6, 2024. The requests asked, "for all investigative reports, memoranda of interviews and other documents related to the USFS investigation of the Beachie Creek Fire that started on or about August 16, 2020 in the Opal Creek wilderness and spread though the Santiam Canyon, Oregon on or about September 7 and 8, 2020". On November 26, 2024, the USFS released a redacted Report of Investigation of the Beachie Creek Fire, which was dated on April 20, 2023.

The investigation found no evidence that these general human causes were a factor in the spread of the fire in the Santiam Canyon:

- Arson
- Debris and open burning
- Equipment and vehicle
- Firearms and explosives use
- Fireworks
- Misuse of fire by a minor
- Power generation/transmission/distribution
- Railroad operations and maintenance
- Recreation and ceremony (including campfires)
- Smoking
- Other causes
    - Spontaneous combustion
    - Electric fences
    - Glass refraction – reflection/magnification
    - Structures

The ODF investigation found no evidence that these natural causes were a factor in the spread of the fire in the Santiam Canyon:

- Lightning
- Volcano

- Meteorite
- Coal seam

Conclusion

There were wildland fire starts caused by down powerlines in the Gates and Mill City area. All of these ignitions, which were investigated, were suppressed by local residents and/or local municipal fire departments. No evidence was found that these powerline ignitions significantly contributed to the spread of the fire in the Santiam Canyon.

There were other ignitions in areas where no roads or powerlines were present. The most probable explanation for these ignitions is spot fires from the main Beachie Creek Fire, which was burning upwind of the ignitions in the Santiam Canyon.

With a megafire fire, such as those that occurred prior to and through Labor Day weekend 2020, the rising heat and gases can create a large convection column that may carry fire brands away from the fire and start spot fires. A spot fire is a fire that is ignited outside the perimeter of the main fire by a fire brand. These fire brands can be carried miles away by strong winds. According to NWCG's publication:

> "Short-Range Spotting is not generally considered as significant in the growth of wildfires, because the advancing fire usually overruns the developing spot fire. Based on that, the assumption is that short-range spotting is typically accounted for in the spread model outputs. Long-Range Spotting is differentiated from short-range spotting, primarily because firebrands are being lofted by a convection column and carried beyond the immediate fire area." **(Section G, Pg G1, National Wildfire Coordinating Group (NWCG) Printed Material Section (PMS) 437)**

MOODY'S
RATINGS

Rating Action: Moody's Ratings downgrades PacifiCorp to Baa2; outlook stable

09 Jul 2025

Approximately $14.4 billion of debt securities affected

New York, July 09, 2025 -- Moody's Ratings (Moody's) today downgraded PacifiCorp's ratings, including its senior unsecured rating to Baa2 from Baa1, its first mortgage bond rating to A3 from A2, and its junior subordinated notes to Baa3 from Baa2. The company's short-term rating for commercial paper rating was affirmed at P-2. The outlook is stable.

A full list of affected ratings appears towards the end of this press release.

RATINGS RATIONALE

"The downgrade of PacifiCorp follows the Utah Public Service Commission's (UPSC) findings and conclusion on its July 3, 2025 decision to deny the company's petition to reconsider a credit negative rate case decision earlier this year," said Toby Shea, Vice President – Senior Credit Officer. "PacifiCorp's credit profile has been under pressure, driven by rising costs and debt associated with wildfire litigation and mitigation efforts, that the rate case outcome will not sufficiently alleviate, a key reason for the downgrade."

The UPSC issued a rate order in late April that approved an $87.2 million increase to PacifiCorp's Utah base rate, representing only 26.4% of the company's request for a $330.2 million increase. The UPSC also premised its revenue requirement calculation on an authorized return on equity (ROE) of 9.375% and an equity ratio of 44.43%—both well below industry averages.

In particular, the UPSC disallowed, among other things, $106 million of wildfire mitigation capital expenditures, $63 million in excess liability insurance premiums after reconsideration, and $13 million related to the state of Washington's carbon emission allowance requirements. The UPSC may have viewed that some of these costs are related to developments in other states within PacifiCorp's service territory, such as the 2020 Labor Day wildfires in Oregon and policy-driven costs stemming from the state of Washington. The Commission concluded that Utah ratepayers should not bear the financial burden of cost escalations originating in other states.

In addition, PacifiCorp continues to face mounting wildfire-related litigation expenses and liabilities. As of the first quarter of 2025, the company has accrued $2.75 billion in estimated probable losses and has paid $1.33 billion in settlements. To bolster its balance sheet and liquidity, PacifiCorp has suspended annual dividends and reduced capital expenditures, enabling it to retain more cash to help absorb the financial impact of wildfire liabilities. Nevertheless, the strain on its credit metrics remains significant. For example, the company's CFO pre-WC to debt ratio averaged only around 10% in 2023 and 2024, while its debt-to-capitalization ratio rose to 56.7% at the end of Q1 2025, up from 47.4% at year-end 2022.

As a result of these cost pressures and the adverse rate case outcome, we expect the company's CFO pre-WC to debt ratio to stabilize in the 14%–16% range—a level we consider more consistent with a Baa2 senior unsecured rating.

Outlook

PacifiCorp's stable outlook reflects the strength and resilience of its large and diversified operations across the Northwestern U.S. While the company faces headwinds from significant wildfire-related litigation and challenges recovering rising insurance premiums and other costs in Utah, we expect credit supportive regulation to continue in the other five states in which it operates. As a result, PacifiCorp is projected to maintain a CFO pre-WC to debt ratio in the 14% to 16% range—a level consistent with its current rating.

FACTORS THAT COULD LEAD TO AN UPGRADE OR DOWNGRADE OF THE RATINGS

Factors that could lead to an upgrade

We could take a positive rating action if the regulatory environment in Utah improves and the company's CFO pre-working capital to debt ratio rises to 16% or higher on a sustained basis.

A positive action could also be considered should there be additional clarity with regard to PacifiCorp's ultimate financial exposure to wildfire liabilities as settlements occur and pending litigation is resolved, which could take several years.

Factors that could lead to a downgrade

We could take a negative action on PacifiCorp's ratings if the company experiences additional cost disallowances or a deteriorating regulatory environment in its other material regulatory jurisdictions such as Oregon or Wyoming.

A negative rating action could also result if wildfire-related liabilities rise unexpectedly and threaten to deplete the company's cash reserves or result in significant additional debt. Additionally, a downgrade could be considered if PacifiCorp's CFO pre-working capital to debt ratio falls below 13% on a sustained basis.

Company Profile

PacifiCorp is one of the largest and most diversified operating utilities in the U.S. headquartered in Portland, Oregon. According to Energy Information Administration (EIA) data, it sold approximately 58 TWh of electricity to retail customers in 2024, ranking sixth among investor-owned utilities based on bundled sales. The company serves retail customers across six states—more than any other investor-owned utility in the U.S. It is an operating subsidiary of Berkshire Hathaway Energy.

The principal methodology used in these ratings was Regulated Electric and Gas Utilities published in August 2024 and available at https://ratings.moodys.com/rmc-documents/426183. Alternatively, please see the Rating Methodologies page on https://ratings.moodys.com for a copy of this methodology.

The net effect of any adjustments applied to rating factor scores or scorecard outputs under the primary methodology(ies), if any, was not material to the ratings addressed in this announcement.

REGULATORY DISCLOSURES

For further specification of Moody's key rating assumptions and sensitivity analysis, see the sections Methodology Assumptions and Sensitivity to Assumptions in the disclosure form. Moody's Rating Symbols and Definitions can be found on https://ratings.moodys.com/rating-definitions.

For any affected securities or rated entities receiving direct credit support/credit substitution from another entity or entities subject to a credit rating action (the supporting entity), and whose ratings may change as a result of a credit rating action as to the supporting entity, the associated regulatory disclosures will relate to the supporting entity. Exceptions to this approach may be applicable in certain jurisdictions.

For ratings issued on a program, series, category/class of debt or security, certain regulatory disclosures applicable to each rating of a subsequently issued bond or note of the same series, category/class of debt, or security, or pursuant to a program for which the ratings are derived exclusively from existing ratings, in accordance with Moody's rating practices, can be found in

the most recent Credit Rating Announcement related to the same class of Credit Rating.

For provisional ratings, the Credit Rating Announcement provides certain regulatory disclosures in relation to the provisional rating assigned, and in relation to a definitive rating that may be assigned subsequent to the final issuance of the debt, in each case where the transaction structure and terms have not changed prior to the assignment of the definitive rating in a manner that would have affected the rating.

Moody's does not always publish a separate Credit Rating Announcement for each Credit Rating assigned in the Anticipated Ratings Process or Subsequent Ratings Process.

These ratings are solicited. Please refer to Moody's Policy for Designating and Assigning Unsolicited Credit Ratings available on its website https://ratings.moodys.com.

Regulatory disclosures contained in this press release apply to the credit rating and, if applicable, the related rating outlook or rating review.

The Global Scale Credit Rating(s) discussed in this Credit Rating Announcement was(were) issued by one of Moody's affiliates outside the EU and UK and is(are) endorsed for use in the EU and UK in accordance with the EU and UK CRA Regulation.

Please see https://ratings.moodys.com for any updates on changes to the lead rating analyst and to the Moody's legal entity that has issued the rating.

Please see the issuer/deal page on https://ratings.moodys.com for additional regulatory disclosures for each credit rating.

For the purposes of this disclaimer, "PRC" refers to the mainland of the People's Republic of China, excluding Hong Kong, Macau and Taiwan.

Research Update:

PacifiCorp Downgraded To 'BBB' From 'BBB+' On Weaker Expected Financial Measures, Outlook Negative; Debt Ratings Lowered

July 28, 2025

Rating Action Overview

- The Public Service Commission of Utah (PSC) recently authorized a rate increase for PacifiCorp's latest general rate case that was lower than what we previously expected.
- Prior to this rate order, the company's financial measures were already weak for the rating, including funds from operations (FFO) to debt of 11.3% for the 12-months ended March 2025. Given recent regulatory developments and the continued elevated costs stemming from its wildfire litigation, we do not expect PacifiCorp will improve its FFO to debt consistently above 13%.
- Therefore, S&P Global Ratings lowered its long-term issuer credit rating (ICR) on PacifiCorp to 'BBB' from 'BBB+'. At the same time, we lowered our issue-level rating on the company's first-mortgage bonds (FMB) to 'A-' from 'A', our issue-level rating on its junior-subordinated notes (JSN) to 'BB+' from 'BBB-', and our issue-level rating on its senior unsecured debt to 'BBB' from 'BBB+'. We also affirmed our 'A-2' short-term rating.
- The negative outlook reflects the likelihood that we could lower our ratings on PacifiCorp by one or more notches over the next 24 months depending on the legal developments related to the wildfires in its service territory or other regulatory or legislative developments concerning its credit quality. We expect the company's FFO to debt will be in the 10%-13% range over our outlook period.

Rating Action Rationale

The downgrade reflects our expectation that PacifiCorp's financial measures will be weaker than we previously forecast following its rate-case outcome in Utah. The PSC authorized the company to increase its rates by approximately $94 million, which is about a quarter of the approximately $394 million rate increase it requested under its amended rate application from August 2024. We had previously expected a more-favorable outcome. Prior to the order, we

viewed PacifiCorp's forecast FFO to debt as weak for the 'BBB+' rating, given the increased operating expenses related to its ongoing wildfire litigation in Oregon, increased insurance premiums, as well as other inflationary cost pressures. In addition, the company's reported credit measures had been weak, including FFO to debt of 11.3% for the 12-months ended March 2025. We now expect PacifiCorp's FFO to debt will remain between 10% and 13% over our outlook period, assuming no dividends to its parent, capital spending averaging about $2.8 billion over the next five years, protracted litigation regarding the James case, and continued use of existing regulatory mechanisms. To account for our expectation of a continued weakening in the company's financial performance, we revised our stand-alone credit profile to 'bb' from 'bb+'.

We continue to assess PacifiCorp as strategically important to Berkshire Hathaway Energy Co. (BHE). This reflects our expectation that the company would receive extraordinary support from BHE under most foreseeable circumstances, though we have doubts around the extent of such support, which precludes us from assessing a higher support category. Furthermore, this reflects our view that PacifiCorp is unlikely to be sold, is important to BHE's long-term strategy, benefits from a long-term commitment from BHE, and has realistic medium-term prospects for success relative to BHE's expectations. Our assessment of PacifiCorp as strategically important to BHE provides three notches of uplift to the rating. We will continue to monitor BHE's explicit and implicit support for PacifiCorp. If we downwardly revise our assessment of PacifiCorp's group support from BHE, we would likely lower our long-term ICR on the company by more than one notch.

Outlook

The negative outlook reflects the likelihood that we could lower our ratings on PacifiCorp by one or more notches over the next 24 months depending on the legal developments related to the wildfires in its service territory or other regulatory or legislative developments concerning its credit quality. We expect the company's FFO to debt will be in the 10%-13% range over our outlook period.

Downside scenario

We could lower our ratings on PacifiCorp by one or more notches in the next 24 months if:

- The company continues to face legal challenges without receiving commensurate long-term support from its parent;
- Its business risk increases due to adverse legal, regulatory, or legislative developments;
- The estimated damages under the company's wildfire lawsuits, including the James case, expand significantly;
- The company's stand-alone FFO to debt falls consistently below 11%; or
- The company's actions contribute to another significant wildfire.

Upside scenario

We could affirm our ratings on PacifiCorp and revise our outlook to stable in the next 24 months if:

- It achieves further favorable legal outcomes such that its wildfire liabilities remain limited;
- The company is not the cause of a materially significant wildfire; and

- It maintains FFO to debt of more than 11%.

Company Description

PacifiCorp is a regulated electric utility serving approximately 2.1 million retail customers in portions of Utah, Oregon, Wyoming, Washington, Idaho, and California. The utility is an indirect, wholly owned subsidiary of BHE.

Our Base-Case Scenario

Key metrics

PacifiCorp--Forecast summary

Period ending	Dec-31-2021	Dec-31-2022	Dec-31-2023	Dec-31-2024	Dec-31-2025	Dec-31-2026	Dec-31-2027

Liquidity

We assess PacifiCorp's liquidity as adequate, which reflects our expectation its sources of cash will be at least 1.1x its uses over the coming 12 months. Furthermore, we anticipate the company's sources will cover uses even if its consolidated EBITDA declines 10%. We believe PacifiCorp's regulatory framework provides it with manageable cash flow stability even in times of economic stress, which supports our use of slightly lower thresholds to assess its liquidity. In addition, we anticipate the company could absorb high-impact, low-probability events without refinancing, given its access to about $2 billion of committed credit facility availability until June 2028. We believe that PacifiCorp can reduce its capital spending (averaging about $2.8 billion over the next five years) during periods of stress, which indicates a limited need for refinancing under such conditions. Furthermore, our assessment reflects the company's generally prudent risk management, sound relationships with its banks, and satisfactory standing in the credit markets based on its credit-default swap spreads. Overall, we believe PacifiCorp could withstand adverse market circumstances over the next 12 months with sufficient liquidity to meet its obligations. In addition, the company has long-term debt maturities of about $403 million due over next 12 months, which we expect it will proactively address in advance of their due dates.

Principal liquidity sources

- Cash and cash equivalents of about $450 million;
- Committed credit facility availability of about $2 billion; and
- Estimated cash FFO of about $2.6 billion over the next 12 months.

Principal liquidity uses

- Capital spending of about $2.8 billion over the next 12 months;
- Working capital outflows of about $900 million over the next 12 months; and

- Debt maturities of about $400 million due in the next 12 months.

Covenants

PacifiCorp's revolving credit facility features a covenant that requires it to maintain a total debt to capitalization ratio of 65% or below.

We expect the company will remain in compliance with this covenant with sufficient headroom.

Issue Ratings--Subordination Risk Analysis

Capital structure

- PacifiCorp's capital structure comprises about $13.7 billion of FMBs (including current maturities), $850 million of JSNs, and $25 million of unsecured variable rate tax-exempt bonds.

Analytical conclusions

- We rate PacifiCorp's unsecured variable rate tax-exempt bonds at the same level as the long-term ICR because it is the senior unsecured debt of a qualifying investment-grade utility per our criteria.
- We rate the junior subordinated notes two notches below the long-term ICR to reflect the instrument's subordination and the deferability of its interest payments.

Issue Ratings--Recovery Analysis

Key analytical factors

- PacifiCorp's FMBs benefit from a first-priority lien on substantially all of the utility's real property owned or subsequently acquired. Collateral coverage of over 1.5x supports a recovery rating of '1+' and an issue-level rating two notches above the long-term ICR.

Rating Component Scores

Rating Component Scores	
Component	
Foreign currency issuer credit rating	BBB/Negative/A-2
Local currency issuer credit rating	BBB/Negative/A-2
Business risk	Strong
Country risk	Very low risk
Industry risk	Very low risk
Competitive position	Satisfactory

The Content shall not be used for any unlawful or unauthorized purposes. S&P and any third-party providers, as well as their directors, officers, shareholders, employees or agents (collectively S&P Parties) do not guarantee the accuracy, completeness, timeliness or availability of the Content. S&P Parties are not responsible for any errors or omissions (negligent or otherwise), regardless of the cause, for the results obtained from the use of the Content, or for the security or maintenance of any data input by the user. The Content is provided on an "as is" basis. S&P PARTIES DISCLAIM ANY AND ALL EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE, FREEDOM FROM BUGS, SOFTWARE ERRORS OR DEFECTS, THAT THE CONTENT'S FUNCTIONING WILL BE UNINTERRUPTED OR THAT THE CONTENT WILL OPERATE WITH ANY SOFTWARE OR HARDWARE CONFIGURATION. In no event shall S&P Parties be liable to any party for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including, without limitation, lost income or lost profits and opportunity costs or losses caused by negligence) in connection with any use of the Content even if advised of the possibility of such damages.

Some of the Content may have been created with the assistance of an artificial intelligence (AI) tool. Published Content created or processed using AI is composed, reviewed, edited, and approved by S&P personnel.

Credit-related and other analyses, including ratings, and statements in the Content are statements of opinion as of the date they are expressed and not statements of fact. S&P's opinions, analyses and rating acknowledgment decisions (described below) are not recommendations to purchase, hold, or sell any securities or to make any investment decisions, and do not address the suitability of any security. S&P assumes no obligation to update the Content following publication in any form or format. The Content should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. S&P does not act as a fiduciary or an investment advisor except where registered as such. While S&P has obtained information from sources it believes to be reliable, S&P does not perform an audit and undertakes no duty of due diligence or independent verification of any information it receives. Rating-related publications may be published for a variety of reasons that are not necessarily dependent on action by rating committees, including, but not limited to, the publication of a periodic update on a credit rating and related analyses.

To the extent that regulatory authorities allow a rating agency to acknowledge in one jurisdiction a rating issued in another jurisdiction for certain regulatory purposes, S&P reserves the right to assign, withdraw or suspend such acknowledgment at any time and in its sole discretion. S&P Parties disclaim any duty whatsoever arising out of the assignment, withdrawal or suspension of an acknowledgment as well as any liability for any damage alleged to have been suffered on account thereof.

S&P keeps certain activities of its business units separate from each other in order to preserve the independence and objectivity of their respective activities. As a result, certain business units of S&P may have information that is not available to other S&P business units. S&P has established policies and procedures to maintain the confidentiality of certain non-public information received in connection with each analytical process.

S&P may receive compensation for its ratings and certain analyses, normally from issuers or underwriters of securities or from obligors. S&P reserves the right to disseminate its opinions and analyses. S&P's public ratings and analyses are made available on its Web sites, www.spglobal.com/ratings (free of charge), and www.ratingsdirect.com (subscription), and may be distributed through other means, including via S&P publications and third-party redistributors. Additional information about our ratings fees is available at www.spglobal.com/usratingsfees.
