

**PacifiCorp
Legacy CCR Surface Impoundment
Non-Applicability Report**

Pursuant to 40 CFR 257.100(f)(1), owners and operators of legacy CCR surface impoundments must prepare an applicability report for each identified legacy CCR surface impoundment no later than Friday, November 8, 2024. EPA defines “legacy CCR surface impoundment” in 40 CFR 257.53 to mean “a CCR surface impoundment that no longer receives CCR but contained both CCR and liquids on or after October 19, 2015, and that is located at an inactive electric utility or independent power producer.” EPA defines “inactive electric utility” as “any electric utility or independent power producer that ceased providing power to electric power transmission systems or to electric power distribution systems before October 19, 2015.”

To ensure compliance with 40 CFR 257.100(f)(1), PacifiCorp conducted a reasonable and diligent evaluation of inactive facilities owned and operated by PacifiCorp for the presence of legacy CCR surface impoundments. Based on information currently available, PacifiCorp reports that none exist as of November 8, 2024.
