Subject: Huntington CCR Landfill Assessment Monitoring Appendix IV Ground Water Protection Standard Notification

Dear Mr. Anderson,

In accordance with 40 CFR 257.95(g) the results of ground water assessment monitoring indicate that a notification is required for the coal combustion residual unit CCR Landfill at the Huntington Power Plant in Huntington, Utah. PacifiCorp has completed the assessment monitoring initial and subsequent ground water sampling and established ground water protection standards required by 40 CFR 257.95(d). A statistical analysis was then performed which indicate that the Appendix IV constituents of chromium, cobalt, lithium, molybdenum and selenium have exceeded the ground water protection standards for the CCR Landfill. PacifiCorp is currently characterizing the nature and extent of the release and any site conditions that may affect the remedy ultimately selected as required in 40 CFR 257(g)(1).

If you have any questions regarding the notification please contact Russ Willson Environmental Analyst 435.687.4331.

Sincerely,

Darrell Cunningham
Managing Director, Huntington Power Plant
