Figure 1. The Bear River Hydroelectric Project is located in southeastern Idaho and includes facilities owned and operated by PacifiCorp Energy at Soda, Grace and Oneida.

Bear River Hydroelectric Project

2015 Annual Report

Summary of License Implementation and Compliance

1.0 Introduction

Located on the Bear River in southeastern Idaho, the Bear River hydroelectric developments consist of three dams and powerhouses that together have a total installed capacity of 77 megawatts of electrical generation: the Soda, Grace, and Oneida developments. Construction of these developments, known collectively as the Bear River Hydroelectric Project (FERC Project No. P-20) was authorized by the U.S. Secretary of Interior in 1907 for irrigation, flood control and hydroelectric generation. Construction of the dams began in 1909 and was completed in 1927, during which time they were originally licensed. A fourth hydroelectric development, Cove, was part of the original hydroelectric project and was decommissioned in 2006.

The company acquired water rights from various holders during the development years of these projects in exchange for perpetual contracts to deliver irrigation water from Bear Lake. Water rights were further defined by court decrees, the Bear River Compact (as revised), and other subsequent agreements. The Bear River Project is largely dependent on irrigation water pumped from Bear Lake into the river system to generate power.

Between 1976 and 1981, the Federal Energy Regulatory Commission (FERC) issued new licenses for the Soda, Grace-Cove, and Oneida projects. These FERC licenses expired in October 2001.

In the late 1990s, as the expiration of the licenses approached, PacifiCorp initiated the relicensing process. After extensive studies and agency consultation, this process culminated in the signing of the Bear River Settlement Agreement (Settlement Agreement) August 28, 2002.

The FERC approved the Settlement Agreement and issued a new 30-year license for the Bear River Project December 22, 2003. The Settlement Agreement and new license requires the provision of recreation enhancements, minimum instream flows to benefit aquatic resources, funds to conserve and benefit natural resources within a defined action area, and other measures related to land management, protection of cultural resources, and restoration of Bonneville cutthroat trout (BCT). The Environmental Coordination Committee (ECC), a stakeholder group comprised of signatories to the Settlement Agreement, was formed to consult and make decisions regarding the use of funding, and implementation of license and Settlement Agreement requirements.

The Settlement Agreement (Section 4.6) and License Article 401 specify that a detailed annual report on the activities of the ECC and implementation of protection, mitigation, and enhancement (PM&E) measures be prepared yearly throughout the term of the license.

This annual report fulfills these requirements for the report period of calendar year 2015.

1.1 Background

On September 27, 1999, PacifiCorp filed applications for new licenses for the continued operation of the Soda, Grace, Cove and Oneida hydroelectric developments, now known collectively as the Bear River Hydroelectric Project in Caribou and Franklin counties, Idaho.

A number of motions to intervene in the relicensing proceedings were filed by state and federal agencies, non-governmental agencies, and individuals. On February 13, 2002, the FERC issued a “Ready for Environmental Analysis” notice for the Bear River Hydroelectric Project.

On September 25, 2002, PacifiCorp filed an Offer of Settlement pursuant to the FERC Rule 602, 18 Code of Federal Regulations § 385.602 to resolve issues concerning the relicensing of the Bear River Hydroelectric Project.

Parties to the Settlement Agreement include PacifiCorp, U.S. Fish and Wildlife Service (USFWS), Bureau of Land Management (BLM), National Park Service (NPS), USDA-Forest Service (USFS), Shoshone-Bannock Tribes (Tribes), Idaho Department of Environmental Quality (IDEQ), Idaho Department of Fish and Game (IDFG), Idaho Department of Parks and Recreation (IDPR), Idaho Council of Trout Unlimited (TU), Idaho Rivers United (IRU), Greater Yellowstone Coalition (GYC), and American Whitewater (AW).

A draft environmental impact statement (EIS) was prepared and issued for public comment November 1, 2002. The final EIS was issued April 11, 2003. Both the draft and final EISs recommended adoption of the Settlement Agreement terms.

A FERC order approving the Settlement Agreement and issuing a new 30-year license for the Bear River Project was issued December 22, 2003.

Copies of the Settlement Agreement and the FERC license are available from the FERC upon request or on PacifiCorp’s website at: <http://www.pacificorp.com/es/hydro/hl/br.html#>

The license required study of alternatives, including decommissioning, for the Cove hydroelectric development near Grace, Idaho. After alternative analysis, an agreement was reached with stakeholders and regulators to decommission Cove. PacifiCorp signed the Cove Settlement Agreement July 20, 2005. The FERC issued the Cove Decommissioning Order May 23, 2006, and the dam and water conveyance structures were removed during the summer of 2006. Reclamation of the Cove project area, including the former dam and flume sites, was completed by late fall of 2006.

1.2 Environmental Coordination Committee

Section 4 of the Settlement Agreement establishes a process to facilitate coordination and decision-making concerning implementation of Settlement Agreement measures, which was adopted in Article 402 of the new license. To accomplish this objective, Section 4.1 of the Settlement Agreement provides for the creation of the ECC consisting of representatives from the signing parties. The purpose of the ECC, discussed in Section 4, is to: 1) facilitate coordination and consultation on plans developed by PacifiCorp for the implementation of PM&E measures; 2) propose and approve appropriate PM&E measures; 3) establish appropriate monitoring criteria to evaluate the effects of PM&E measures; 4) coordinate the implementation of PM&E measures; 5) establish appropriate procedures for conducting activities; and 6) establish subcommittees, as necessary, to accomplish these objectives.

1.3 Report Organization

The 2015 Bear River Hydroelectric Project Annual Report provides the following information:

- Section 2.0 - Environmental Coordination Committee Activities
- Section 3.0 - Accomplishments
- Section 4.0 - Funding
- Appendix A: ECC Members, Alternates and Authorized Signatories
- Appendix B: Grace-Cove Site Plan Compliance Monitoring and Performance Tracking
- Appendix C: Cove Shoreline Buffer Fence Annual Monitoring Report
- Appendix D: Oneida Site Plan Compliance Monitoring and Performance Tracking
- Appendix E: Soda Site Plan Compliance Monitoring and Performance Tracking
- Appendix F: Grace Dam and Last Chance Site Plan Compliance Monitoring and Performance Tracking
- Appendix G: Habitat Enhancement Project Monitoring
- Appendix H: 2016 Implementation Schedule

1.4 Reports and Studies Completed in 2015

- The Oneida Development Water Year 2015 Operation Report was completed during the 2015 reporting period and has been submitted along with this annual report to the FERC.
- An updated Oneida Site Plan was submitted to the FERC June 3, 2015.

A pair of Extended Black Canyon monitoring studies were completed in early 2015:

- Bonneville Cutthroat Trout Monitoring in the Black Canyon of the Bear River: Responses to Whitewater Boating Flows
- Turbidity and Temperature Changes Associated with Whitewater Boating Flows 2008-2014 Black Canyon Bear River, Idaho

Study results were presented to the ECC at its February 2015 meeting and submitted to the FERC in an April 8, 2015 report.

2.0 Environmental Coordination Committee Activities

This section provides an overview of ECC roles and responsibilities according to the Settlement Agreement and as subsequently implemented in compliance with Article 402. It also presents a summary of ECC meetings held during the 2015 report period, including major discussion points and decisions made at each meeting.

2.1 ECC Roles and Responsibilities

The purpose and role of the ECC, as defined in Section 4.1 of the Settlement Agreement, is to facilitate coordination and implementation of PM&E measures. Specifically excluded from ECC responsibility and authority is the release of water from Bear Lake for any reason.

The structure and process of the ECC is intended to provide a forum to address time-sensitive matters; provide early warning of problems; and coordinate member organization actions, schedules, and decisions to save time and expense. The ECC strives to make collaborative decisions, based on consensus, while implementing the Settlement Agreement.

The ECC is responsible for the following measures, pursuant to the Settlement Agreement (Section 4.1):

- Identify and prioritize (habitat enhancement and land and water acquisition) implementation projects.
- Facilitate coordination and consultation between PacifiCorp and the other parties on plans developed by PacifiCorp for the implementation of PM&E measures.
- Coordinate and monitor implementation of PM&E measures and review ongoing monitoring requirements by PacifiCorp.
- Propose and approve PM&E measures for Bonneville cutthroat trout and other aquatic resources pursuant to the Settlement Agreement. Review and comment on the draft annual report of ECC activities and implementation of the PM&E measures.
- Establish appropriate procedures for conducting its activities consistent with the Settlement Agreement, including protocols for public involvement and community outreach.
- Establish subcommittees as necessary for the purpose of achieving objectives described above and determining size, membership, and procedures of such committees.

2.2 ECC Members

The parties to the Settlement Agreement have each appointed a member and an alternate to the ECC. Appendix A lists the members, their alternates and authorized signatories.

During the 2015 reporting period, the ECC met seven times. The primary purposes of the meetings were to report on and coordinate grant fund projects, to discuss results of studies funded by the ECC and management of the whitewater boater flow program, and to remain informed of progress with the Bonneville cutthroat trout conservation hatchery program. Formal ground rules established and adopted by the ECC provided the functional framework for this collaborative work. ECC member participation in meetings during 2015 is shown in Table 2-1.

Table 2-1. ECC Member Meeting Participation during 2015.								
ECC Member	Affiliation	ECC Meeting Date						
		1/21	2/18-19	4/15	6/17	8/7	10/21	12/9
Blaine Newman Arn Berglund, Alternate	Bureau of Land Management	x	x	x	x	x	x	x

Lynn Van Every Greg Mladenka, Alternate	Idaho Department of Environmental Quality	x	X	x	x	x	x	x
Susan Rosebrough Dan Miller, Alternate	National Park Service							
Mark Stenberg Eve Davies, Alternate	PacifiCorp	x	X	x	x	x	x	x

ECC members also conducted field reviews of conservation properties on February 26, June 17, September 28, November 17 and December 3.

2.3 Overview of the Meetings

This section summarizes the issues covered and areas of consensus reached during ECC meetings over the 12-month report period.

ECC Meeting #1 – January 21, 2015

- Heard updates on current grant projects, potential new grant projects, and the 2014 Annual Report.
- Reviewed the ECC's 2015 calendar and the grant fund budget.
- Heard new information and continued discussion of Trout Unlimited's funding request for the Cub River Irrigation Company water agreement.
- Heard additional information from IDFG regarding water management, fish status, and other limiting factors of the Cub River.
- Heard updates on current and proposed land and water fund projects from Sagebrush Steppe Land Trust (SSLT).

ECC Meeting #2 – February 18 & 19, 2015

- Heard updates on current and proposed new grant projects.
- Heard a process update on Twin Lakes' Bear River Narrows project from FERC representative Shana Murray.
- Reviewed 2015 grant proposals, identified additional information needed, and assigned ECC sponsors as needed. Reviewed grant fund balances.
- Discussed upcoming work associated with updates to the Land Management Plan and a planned update to the Oneida Site Plan.
- Heard updates on current and proposed land and water acquisition fund projects from SSLT, BLM and IDFG.
- Heard results of extended monitoring of whitewater boater flows in the Black Canyon from IDFG (Bonneville cutthroat trout) and IDEQ (temperature and turbidity) followed by group discussion.

- Voted to continue the whitewater boater flow program as described in the Draft Agreement for Boater Flows: Extended Study Period and Adaptive Management, i.e., four weekends of scheduled boater flows between April 1 and June 5, with a down ramp rate of 1 foot per hour.

Funding Proposal Subcommittee Meeting – March 18, 2015

- Reviewed and ranked 2015 grant proposals.

ECC Meeting #3 – April 15, 2015

- Heard updates on current grant projects, 2015 whitewater boater flows, and reviewed the ECC decision-making flow chart. Reviewed fund balances.
- Reviewed and approved the Funding subcommittee's recommendations for 2015 habitat enhancement projects.
- Heard information from IDFG on wildlife friendly fencing and discussed its use on ECC-funded projects.
- Reviewed and approved updates to the Oneida Site Plan.
- Heard information from USFS on Paris Creek and the Nounan Reach Project Prioritization/Coordination Framework.
- Heard updates on current and proposed land and water acquisition fund projects from SSLT, IDFG and information on BCT broodstock ponds from IDFG.
- Reviewed an application for land and water funding from TU for a water agreement with Cub River Irrigation Company. Declined to fund the proposal.

ECC Meeting #4 – June 17, 2015

- Heard updates on current grant projects and PacifiCorp's decision on 2015 habitat enhancement projects outside the action area.
- Discussed the Cub River Irrigation Company's hydro settlement agreement and funding agreement with CRIC representatives and attorney.
- Heard updates on current and proposed land and water acquisition fund projects from SSLT and IDFG.
- Heard information on a flow-swap concept in the Paris bypass reach.
- Held a field review of Dead Horse and Kackley springs.

ECC Meeting #5 – August 7, 2015

- Heard updates on current grant projects, proposed new grant projects, Twin Lakes' Bear River Narrows project, and the FERC's recent environmental inspection of the Bear River Project.
- Discussed overhead charges to the ECC's habitat enhancement projects.
- Heard information on the recent discovery of mussels on a contractor's barge that was stopped at the Utah/Idaho border.
- Reviewed and evaluated new information on Trout Unlimited's land and water funding application for a water agreement with Cub River Irrigation Company. Declined to fund the proposal (second vote).
- Heard updates on current and proposed land and water acquisition fund projects and information on potential new projects from SSLT, USFWS and IDFG.
- Identified a new subject property on Emigration Creek and agreed to schedule a site visit.
- Approved final transactions costs for the Jensen/Mink Creek conservation easement.
- Reviewed annual funding request for SSLT's executive director. Approved land and water funding in the amount of \$30,000 for the executive director's position.

ECC Meeting #6 – October 21, 2015

- Heard an update Twin Lakes Canal Company's Bear River Narrows Draft EIS. Heard updates on current grant projects. Reviewed and approved an addition to the habitat enhancement project ranking form. Reviewed fund balances.
- Heard an update on the Conservation Hatchery program from IDFG.
- Heard an update on a proposed FERC boundary change in the Oneida Site Plan.
- Heard updates on current land and water acquisition fund projects from SSLT and BLM.
- Heard an update from SSLT on its executive director position.
- Heard an update on the settlement agreement between TU, IDFG, GYC and Franklin County Fish and Game Association and the Cub River Irrigation Company.
- Voted to designate a new subject property on Maple Creek and agreed to schedule a site visit.
- Agreed to schedule a field review of the Paris Creek water swap site.

ECC Meeting #7 – December 9, 2015

- Reviewed and approved the ECC's 2016 calendar and edits to the habitat enhancement project forms.
- Reviewed and approved the 2016 whitewater boater flow calendar.
- Heard updates on the Twin Lakes Bear River Narrows project, current grant projects, and the FERC boundary change for Oneida.
- Agreed to form a subcommittee to consider options for BCT broodstock ponds.
- Heard updates on current and proposed land and water projects from SSLT. Discussed and set priorities for projects currently under consideration.
- Agreed to form a subcommittee to develop ranking criteria for land and water projects.
- Voted to designate a new subject property on Hoops and King Creeks.

Consensus Decisions Made by E-mail Vote

In 2006, the ECC agreed to consensus decision-making by email vote. The following consensus decisions were made by ECC members via email vote during 2015:

- Approved draft notes from the December 2014 ECC meeting (voted called January 27, 2015)
- Approved draft notes from the February 2015 ECC meeting (vote called March 9, 2015)
- Approved draft notes from the April 2015 ECC meeting (voted called April 29, 2015)
- Approved final transaction costs for the Jensen/Mink Creek conservation easement in the amount of \$394,974.00 (vote called July 2, 2015)
- Approved draft notes from the June 2015 ECC meeting (voted called September 10, 2015)
- Approved draft notes from the August 2015 ECC meeting (voted called September 10, 2015)

3.0 Accomplishments

This section presents the actions taken during 2015 toward requirements in the Settlement Agreement and PacifiCorp's 30-year license for the Bear River Hydroelectric Project, as defined in the FERC's Order Approving Settlement Agreement and Issuing New License from December 22, 2003. The agreed-upon schedule for implementing PM&E measures is described in Exhibit 1 of the Settlement Agreement. A modified schedule was proposed and approved in the Implementation Plan prepared for the Bear River Project.

The PM&E schedule of measures in the Settlement Agreement was modified due to requirements in the new license. With each annual report, an implementation schedule for the upcoming year will be presented that updates and replaces the implementation schedule filed with the Implementation Plan May 28, 2004, and the schedule included in the previous annual report. The 2016 Implementation Schedule is included in Appendix H of this report.

A discussion of the activities associated with each of the PM&E measures is presented in Table 3.1-1 by License Article for the report period January - December 2015. A description of funding amounts deposited and disbursed during 2015 is provided in Section 4.0 - Funding.

Table 3.1-1 Accomplishments During the 2015 Report Period			
License Article	Accomplishments 2015	Comments	Future Plans 2016
401	2014 Annual Report was filed with the FERC February 24, 2015.	Annual Report preparation and filing. To include studies and reports completed along with accounting for funds.	2015 Annual Report filed before March 1, 2016.
402	Environmental Coordination Committee meetings were conducted on January 21, February 18 & 19, April 15, June 17, August 7, October 21, and December 9.	ECC meetings were facilitated by PacifiCorp.	Meetings are expected to continue on approximately a bi-monthly schedule through 2016. The main agenda items for regular meetings will be grant administration for the habitat enhancement and land and water acquisition fund, along with the Bonneville cutthroat trout conservation hatchery program.
403	No new actions.	IDFG released the first Bonneville cutthroat trout produced at the hatchery at Kackley Springs April 20, 2011. IDFG provided a final report of broodstock development activities dated January 24, 2012.	This license article is complete.
404	In spring of 2015, IDFG released 11,986 Bonneville cutthroat trout that were raised in 2014. An additional 17,365 were released in fall. A total of 29,351 BCT were produced during 2014 for release in 2015.	A Conservation Hatchery Agreement was executed with IDFG March 13, 2011. The Conservation Hatchery Program commenced December 22, 2011.	IDFG will continue to produce Bonneville cutthroat trout at the Grace Hatchery. Conservation hatchery support payment will be made in 2016.
405	Funding requests were rated and ranked by subcommittee at a March 18 meeting and approved by the ECC at the April 15 meeting.	<p>Nine habitat enhancement projects were approved for funding during 2015:</p> <p>Screen Tender 2015 Davis Diversion and Fish Screen Improvements Alleman Exclosure Fencing Springs Alternative Analysis Whiskey Creek Spawning Channel Kackley Creek Renovation Georgetown Summit Corral Relocation SNP Markers for Bear River BCT Additional Funding – Stauffer and Spring Creek Fencing.</p>	Subcommittee is scheduled to evaluate new projects March 18, 2016, and will present recommendations to the ECC at its April 20, 2016 meeting.

Table 3.1-1 Accomplishments During the 2015 Report Period			
License Article	Accomplishments 2015	Comments	Future Plans 2016
406	Two conservation property transactions were completed.	Land and Water Acquisition Funds were used to fund 1) a conservation easement on 200 acres on the Jensen property on Mink Creek, a tributary to the Bear River and 2) to partially fund a purchase of 700 acres of conservation land, the Walker parcel, adjacent to IDFG's McCammon Wildlife Management Area.	Because of the opportunistic nature of Land and Water Acquisition Fund proposals, they will be evaluated for funding at any time of the year. Three land and water fund conservation projects were under consideration at the close of 2015. Of these, one or more could close during 2016.
407	No new actions.	The final report was transmitted to the FERC with the January 31, 2012 report on Boater Flows.	Activities under this license article are complete.
408	Notification of annual maintenance activities and timeframes was given to the ECC by the Environmental Coordinator on February 5, March 25, April 28, and September 9, 2015.	The licensee shall maintain continuous minimum bypass flows from the project development as follows: (a) Below the Soda Dam: year-round minimum flow of 150 cfs, or inflow into the Soda reservoir, whichever is less; (b) Grace bypassed reach: a year-round minimum bypass flow of 63 cfs or inflow, whichever is less, in addition to 2 cfs leakage below the Grace Dam; (c) Oneida reach below the powerhouse: a year-round minimum flow of 250 cfs or inflow, whichever is less, in addition to 1 cfs leakage below Oneida Dam.	The minimum stream flow requirements will continue in accordance with procedures described in the Operations and Compliance Plan. Annual maintenance schedule to be given to ECC before April of 2016.
409	No new actions.	On May 18, 2012, the Final Agreement on Boater Flows was filed with the FERC. This agreement included the ECC's recommendation to not reinstate Art. 409. Permanent suspension of Art.409 Fish Stranding Minimization Plan was approved by the FERC October 17, 2012, in an	No future action is required.

Table 3.1-1 Accomplishments During the 2015 Report Period			
License Article	Accomplishments 2015	Comments	Future Plans 2016
		issuance that confirmed that PacifiCorp had complied with Ordering paragraph (b) of the FERC's June 3, 2011, Order Approving Suspension of the Fish Stranding Minimization Plan.	
410	No new actions.	Kackley Springs Reroute Project	This license article is complete. Future land management activities around the springs will be conducted in accordance with the Grace/Cove Site Plan.
411	No new actions.	Dam Leakage Minimization Plan	On-going measurement in compliance with license.
412	Implement ramping rate limitations. Notification of annual maintenance activities and timeframes was given to the ECC by the Environmental Coordinator via email. See Article 408 summary.	Ramping rate limitations are being followed at Grace, Soda, and Oneida. In 2012, the ECC determined that a 1 ft/hr down ramp rate would be used for boater flows (see also summary for Art. 409, above).	The ramping rate limitations will continue in accordance with procedures described in the Operations and Compliance Plan.
413	Ongoing.	Compliance with Clean Water Act Section 401 Certification. Idaho Department of Environmental Quality continued to collect water quality monitoring data during boater flow events in 2012, 2013 and 2014 to inform potential future management decisions. Findings of extended water quality monitoring in the Black Canyon during whitewater boater flows were presented to the ECC in February 2015.	The whitewater boater flow program will continue as described in the Agreement for Boater Flows: Extended Study Period and Adaptive Management. That is, four weekends of scheduled boater flows between April 1 and June 5, with a down ramp rate of 1 foot per hour. In 2016, the start date for whitewater boater flows has been move forward one week to March 26.

Table 3.1-1 Accomplishments During the 2015 Report Period			
License Article	Accomplishments 2015	Comments	Future Plans 2016
415	Ongoing.	Revised operations and compliance plan was approved by the FERC in Sept. 2014 and includes a description of equipment and methods for compliance with instream flow and ramping requirements.	Continue to operate the project per guidance of Art. 415, Operations and Compliance Plan approved September 16, 2014.
416/417	<ul style="list-style-type: none"> • Park maintenance payment was made to Caribou County for 2015 funding. • Law enforcement payment was made to Franklin County for 2015 funding. • Dust abatement applications were made around the campgrounds and day-use area in the Oneida Canyon. • Oneida Campground maintenance payment was made to USDI-BLM for 2015 funding. 	Recreation Site Maintenance	<ul style="list-style-type: none"> • Implement annual dust abatement measures • Maintain signs and recreation sites • Make annual payment to Caribou County • Make annual payment to USDI-BLM • Make annual payment to Franklin County Sheriff • Perform Recreation and Traffic Safety Plan and site plan recreation elements annual monitoring as specified. • Prepare update to Recreation and Traffic Safety Plan.
418	No new action.	Boating Flow Release Plan	Actions required under this license article are complete.
419	<p>A total of nine boater flow releases were made on four weekends in 2015. Three two-day events and one three-day event were provided on the following days:</p> <p>April 11 and 12; April 24, 25 and 26; May 16 and 17; and May 30 and 31.</p>	Boating Flow Release Schedule	Per the "Agreement for Black Canyon Boater Flows: Extended Study Period and Adaptive Management," four weekends of scheduled boater flows will occur. For the 2016 schedule the ECC has moved the start date from April 1 forward one week to March 26. A down ramp rate of 1 ft/hr will be used.
420	<p>Recreation flows were provided in relation to required irrigation releases. For 71 of 106 possible days (67%) in the goal flow period between May 25 and September 7, high irrigation demand resulted in flows above 900 cfs in the Oneida Narrows reach.</p> <p>Operational regime report was filed with IDEQ in November 2015.</p>	Oneida Development Water Year 2015 Operations Report is submitted to the FERC with this annual report.	When water is available, flows below the Oneida powerhouse will be greater than 900 cfs, as described in the Operations and Compliance Plan.

Table 3.1-1 Accomplishments During the 2015 Report Period			
License Article	Accomplishments 2015	Comments	Future Plans 2016
421	<p>Implement the “Agreement for Black Canyon Boater Flows: Extended Study Period and Adaptive Management.” This provides for four weekends of scheduled flows between April 1 and June 5, at 1 ft/hr downramp rate and continue suspension of Art. 409.</p> <p>In 2015, a boater flow schedule was developed with American Whitewater. The schedule was provided to the ECC for review and submitted to the FERC. The flow schedule was posted on the PacifiCorp website and information provided on the Flow Phone.</p>	Boating Flow Forecasting Plan	In 2016, PacifiCorp will provide the flow forecast, develop a schedule with American Whitewater, and post the schedule on the Bear River website and Flow Phone. The 2016 schedule to be submitted to the FERC prior to March 20, 2016.
422	Maintained website and Flow Phone.	<p>PacifiCorp Flow Phone: (800) 547-1501</p> <p>Bear River Implementation website: http://www.pacificorp.com/es/hydro/hl/br.html#</p>	In addition to river flow information, the website also provides ECC agendas, meeting notes, reports and other documents related to implementation of the license.
423	<p>A cultural resource training presentation was prepared and presented to Bear River operations staff.</p> <p>Annual Report of HPMP activities was provided to the FERC.</p> <p>Installed Native American interpretive signs that were manufactured in 2014.</p>	Historic Properties Management Plan	<ul style="list-style-type: none"> • Continue to follow HPMP guidance for project review. • Provide HPMP report to the FERC before January 22, 2016 deadline. • Provide staff cultural resource training.
424/425/426	<ul style="list-style-type: none"> • Fence repair and maintenance was conducted at Alexander, Grace, Cove, and Oneida. • Noxious weed control activities were completed in all site plan areas. 	The original Land Management Plan was approved by the FERC April 11, 2006. A revised plan was submitted to the FERC with the 2011 Annual Report. This revised plan was approved	<ul style="list-style-type: none"> • Continue monitoring as required for Grace-Cove, Oneida, Soda, and Grace and Last Chance site plans.

Table 3.1-1 Accomplishments During the 2015 Report Period			
License Article	Accomplishments 2015	Comments	Future Plans 2016
	<ul style="list-style-type: none"> Performance tracking and compliance monitoring was completed for all site planning areas. Forms are attached to this annual report. On June 3, 2015, PacifiCorp submitted an updated Oneida Site Plan to the FERC. In a December 7, 2015 letter the FERC acknowledged receipt of the plan. 	<p>July 17, 2014. The LMP describes development of site plans for five project areas and stipulates the contents of the site plans. Site plans will be implemented no later than 10 years after original LMP approval.</p> <p>Site plans and implementation were prioritized in the following order:</p> <ol style="list-style-type: none"> 1) Grace-Cove (Complete) 2) Oneida (Complete) 3) Soda (Complete) 4) Grace Dam (Complete) 5) Last Chance (Complete) <p><i>Note: Grace Dam and Last Chance site plans were subsequently combined into one plan.</i></p>	<ul style="list-style-type: none"> Perform ongoing maintenance of fences, gates and boundaries in all site plan areas. Monitor compliance with site plan implementation measures and performance tracking of those measures. Take corrective actions as identified. Undertake noxious weed control. Maintain Cove Buffer shoreline fence on non-company lands, per Art. 426 requirements. Continue to closely monitor and address as needed off-road trespass issues at Soda. Address various minor issues noted in 2015 Compliance and Performance Tracking monitoring at each of the four planning areas. Report on implementation in the Annual Report.
427	No new actions.	Expanded the FERC Project Boundary	Required actions are complete.
Order Amending License and Revising Annual Charges – 62,205	No new actions.	<p>Cove Decommissioning Order</p> <p>In 2014, the Cove water rights placement into the State Water Bank was renewed with consultation and agreement of the ECC. This renewal will be needed every 5 years going forward.</p>	Required actions are complete.

3.1 Work Completed – 2015 Update

3.1.1 Work Completed by License Article

Implementation Plan and Annual Reporting (License Article 401)

This 2015 Annual Report was prepared in consultation with the ECC to: 1) describe activities that PacifiCorp undertook or prepared pursuant to the requirements of the license during the year 2015; 2) describe anticipated activities that will be undertaken in the coming year pursuant to the requirements of the license; and 3) provide a report of all funding accounts, including funds spent, balance of accounts, and available remaining funds.

PacifiCorp's accomplishments in regard to licensing requirements are summarized in Table 3.1-1, and are discussed in more detail in the following sections of the report. Anticipated activities for 2016 are listed in Section 3.2 and Appendix H. An accounting of funds is included in Section 4.0.

Environmental Coordination Committee (Article 402)

The Environmental Coordination Committee (Table A-1) met seven times during the 2015 reporting period. The meetings were facilitated by PacifiCorp's environmental coordinator, Mark Stenberg. ECC members conducted field reviews of potential conservation properties five times during 2015 and made six consensus decisions via email. A summary of the ECC's activities is provided in Section 2.0. ECC meetings are expected to continue approximately every other month in 2016, or more frequently as determined by the ECC and PacifiCorp's environmental coordinator.

Bonneville Cutthroat Trout Restoration Study Plan (Article 403)

The Bonneville Cutthroat Trout (BCT) Restoration Study Plan, prepared in consultation with the ECC, was completed in late 2004. It included study plans for genetic sample analysis, irrigation diversion/barrier mapping and aerial photography, telemetry studies, and broodstock development.

Thermal imaging of the Bear River was completed during 2007 and the images were archived at Utah State University's Water Lab, PacifiCorp's headquarters, and with IDFG and IDEQ. Work on the irrigation diversion/barrier mapping was discontinued by the ECC in 2006 when it was learned that similar information was available from another source. The funding for this study was subsequently transferred by ECC decision and applied to the thermal imaging effort. In 2007 a more intensive and limited area irrigation diversion mapping study was proposed by IDFG. The ECC approved funding for this effort from the land and water acquisition fund under the rationale that the results will assist with project prioritization and funding decisions.

The genetics study was completed by IDFG during 2007. IDFG completed its final report on the Telemetry Study during 2009. Results of these studies were synthesized in a Comprehensive Bonneville Cutthroat Trout Restoration Plan prepared by PacifiCorp in consultation with the ECC during 2008.

A funding agreement for the disbursement of broodstock funds was drafted by PacifiCorp and IDFG during late 2008. IDFG chose to proceed initially with a broodstock program focusing on fish from the Thatcher reach, between Grace Dam and Oneida Reservoir, and is utilizing the state's Grace Fish Hatchery near Grace, Idaho to rear broodstock. Disbursement of broodstock development funding for 2008 and 2009 was made upon completion of the funding agreement in early 2009. A final payment was made in 2010. Funding was used by IDFG to improve the spring source and water supply to the hatchery to better protect the broodstock from the potential for disease and cross contamination within the hatchery. A portion of the funds were used to support collected fish at Kent Clegg's spring-fed fish ponds in Grace, Idaho. In addition, IDFG produced 19,000 Bonneville cutthroat trout fingerlings at the Grace Hatchery during 2010. On April 20, 2011, IDFG released the first Bonneville cutthroat trout produced at the hatchery at the site of the Kackley Springs reroute project. IDFG issued a final report of broodstock development activities on January 24, 2012. This license article is complete; however, the ECC may consider an update to the plan in 2016.

Conservation Hatchery Plan (Article 404)

The Conservation Hatchery Plan was completed in 2004 as part of the Implementation Plan. This plan describes the use of funding for the purpose of stocking native Bonneville cutthroat trout in the action area. Guidance for stocking Bonneville cutthroat trout was developed over the first seven years of the license as Bonneville cutthroat trout restoration studies were conducted and the Bonneville Cutthroat Trout Restoration Plan was developed. A draft Conservation Hatchery Agreement was prepared by IDFG during 2011 and the Conservation Hatchery Program commenced December 22, 2011. IDFG provided a final report of broodstock development activities on January 24, 2012 and the first conservation hatchery payment was made.

Since 2011 when the first release of fish was made in Kackley Springs, subsequent releases have been made at many locations in the Thatcher Reach of the Bear River. Figure 2 – Status of Bonneville cutthroat trout – was prepared by IDFG to illustrate their distribution prior to the implementation of the Conservation Hatchery Program and the successful increase in their distribution at many locations as of 2015.

In spring 2015, IDFG released approximately 11,986 Bonneville cutthroat trout produced during 2014; an additional 17,365 were released in fall for a total of approximately 29,351 Bonneville cutthroat trout released in 2015. IDFG will continue to produce Bonneville cutthroat trout at the Grace Fish Hatchery. Hatchery payments of \$100,000 will be made available each year through the end of the license term for implementation of this article, or acceptable alternative use.

Conservation Hatchery Program

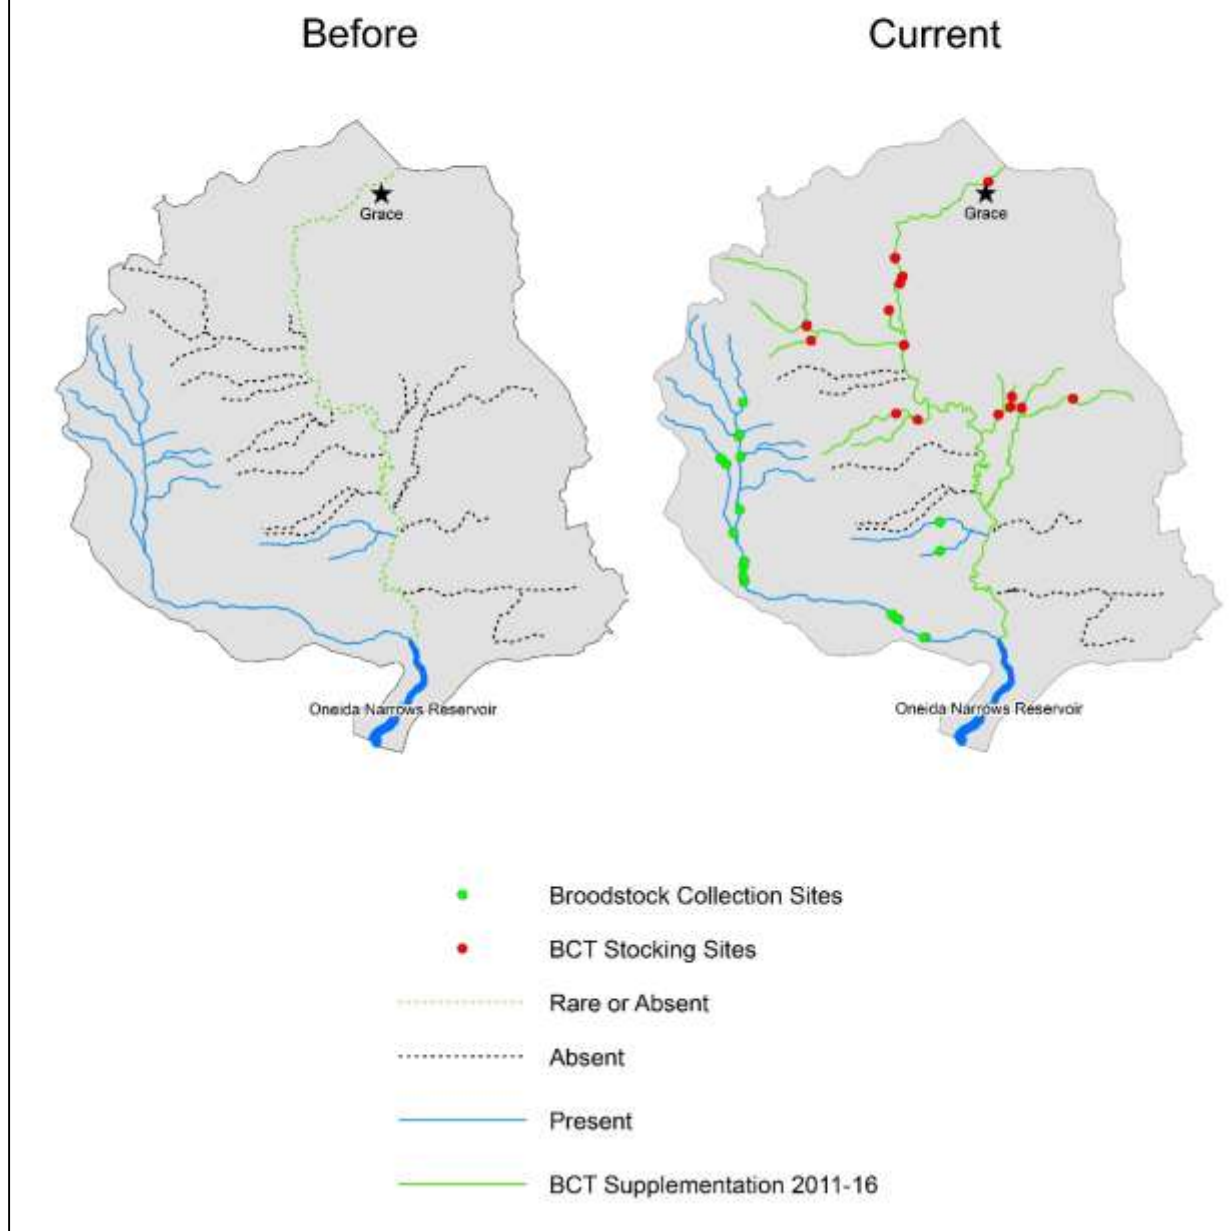

Figure 2. Status of Bonneville cutthroat trout in the Bear River before implementation of the Conservation Hatchery Program and current status, 2015 (Source: Idaho Department of Fish and Game).

Habitat Restoration Plan (Article 405)

The Habitat Restoration Plan was completed in 2004 as part of the Implementation Plan, and a FERC order approving the plan was issued March 22, 2005. This plan describes the use of funding for actions that benefit and restore aquatic and riparian habitat for Bonneville cutthroat trout, as well as other fish and wildlife. Action items implemented by the Habitat Restoration Program are decided upon and prioritized by the ECC. These actions are scheduled and implemented by the ECC on an annual basis. Annual funding of \$167,000 (escalated annually) began December 22, 2004 and will continue through the end of the license term.

In 2005, the ECC formed a subcommittee to develop proposal and application forms for individuals and organizations seeking funding from the ECC for habitat enhancement projects. The subcommittee also developed evaluation criteria for proposals. A schedule for solicitation of funding proposals was set, and the subcommittee meets yearly in the spring to review and rank projects. The ECC at large then votes on the subcommittee's recommendations for funding. PacifiCorp initiated monitoring for the habitat enhancement projects; the results of the 2015 monitoring efforts are presented in Appendix G.

Prior to the 2015 review period, flyers were distributed to ECC members, local NRCS offices, and previous applicants to announce habitat enhancement funding availability and to request proposals. Application materials were posted to PacifiCorp's website.

The ECC received 13 proposals for habitat enhancement funding during the 2015 spring review period. These proposals were reviewed and ranked by subcommittee members March 18, 2015. The subcommittee's rankings and funding recommendations were presented to the ECC for approval April 15, 2015. Nine habitat enhancement projects with funding awards totaling \$200,264.00 were approved by the ECC at that meeting, along with a \$20,000 maintenance reserve. One of those approved projects (funding request of \$20,000 for flow monitoring on the Cub River) was located outside the action area and subsequently was not approved for funding by PacifiCorp. Later in the year, an additional award of \$26,408 was granted to a previous awardee to complete a 2012 fencing project on Stauffer and Spring creeks. Habitat enhancement projects approved by the ECC during 2015 are described below.

Davis Diversion

Trout Unlimited was awarded \$15,000 to improve an existing irrigation structure and fish screen on Cottonwood Creek. Work will include installation of a rock weir diversion structure, head gate, and new fish screen paddlewheel. This will improve the management of irrigation flows into the canal and the performance of the fish screen, as well as improving stream habitat. The current travel way across the canal and creek is a ford just upstream of the fish screen structure. This ford will be removed and the streambanks and canal will be rehabilitated.

Alleman Exclosure Fencing

The ECC awarded \$6,750 to private landowner Paul Alleman to upgrade the commercial grade barbed wire used in an earlier ECC habitat enhancement project. The Alleman Dam Removal and Stream Restoration project was completed in 2010 and included installation of a riparian exclosure fence to protect the stream and riparian corridor from grazing. The landowner was having difficulties with cattle pressure on the fence due to wire stretching. The award will allow replacement with heavier gauge wire.

Springs Alternative Analysis

The ECC awarded \$16,000 to PacifiCorp to produce final construction plans for the development of BCT spawning habitat in the Oneida Bypassed Reach. If successful, the project could contribute to increased Bonneville cutthroat trout populations throughout the Oneida Canyon—a landscape-level change.

Whiskey Creek Spawning Channel

Private landowner Kent Clegg was awarded \$58,054 for design and installation of a spawning channel for Bonneville cutthroat trout in Whiskey Creek. The project includes installation of a head gate structure to divert an average total of 5 cfs from the top of Whiskey Creek. The diverted water will flow over a channel layered with 60 cubic yards of spawning gravel that will be hauled in by IDFG. Some grade control structures will also be installed. The project includes in-kind cost sharing from both IDFG and Clegg. The project is expected to create high quality spawning habitat for BCT in Whiskey Creek, an area where such habitat is currently limited.

Kackley Creek Renovation

The ECC awarded Sagebrush Steppe Land Trust \$20,000 for renovation of Kackley Creek. The project includes removal of Russian olive trees, installation of gravel in the stream for redd opportunities and silt reduction, production of a zoned vegetation plan, and identification of creek enhancement opportunities. The project includes in-kind cost sharing from SSLT and PacifiCorp.

Georgetown Summit Corral Relocation

The ECC awarded private landowner Bryce Crane \$36,460 for a water quality improvement project partially funded by NRCS. Currently, an unnamed stream runs through the existing winter cattle feeding area on this landowner's property, providing water to the livestock. Nutrients and sediment are deposited into the stream, which is a tributary to the Bear River. Cattle also currently graze in pastures along the Bear River. The project will relocate the corral, permanently removing livestock from the area, which would be treated for weeds and replanted. Exclusion fencing will be installed along the Bear River and an alternate stock watering source will be provided.

SNP Markers for Bear River Bonneville Cutthroat Trout

IDFG was awarded \$10,000 to develop a set of 96 single nucleotide polymorphism (SNP) markers for the BCT broodstock program in the Bear River. The current DNA marker set (microsatellite DNA) used for broodstock management is less powerful, takes longer to screen, and is more costly than DNA markers that could be developed and genotyped using next-generation DNA sequencing technologies. This

project will develop a set of SNP DNA markers that will allow faster and increased throughput, better power for detecting hybridization and performing relatedness estimation, and lower costs.

Fish Screen Tender 2015

The ECC awarded \$15,000 to IDFG to help fund an employee responsible for monitoring and maintenance of all fish screens on irrigation diversions within the action area of the license, Bear River drainage, Idaho. A few fish screens outside the action area are also maintained (i.e., Thomas Fork). IDFG will provide \$8,000 in matching funds.

Additional Funding for Stauffer and Spring Creek Fencing

The ECC awarded private landowner John Bushman \$26,408 to complete a 2012 habitat enhancement project aimed at replacing some fence sections on Stauffer Creek, installing hardened crossings and culverts on Spring Creek as well as installing fencing on Spring Creek. However, the original cost estimate for the project included cost for fencing only one side of Spring Creek. The additional funding would cover the cost of fencing the opposite side of Spring Creek as well. The original project also received funding from the USFWS Partners Program.

Land and Water Acquisition Plan (Article 406)

The Land and Water Acquisition Plan was completed in 2004 as part of the Implementation Plan and an order approving the plan was issued by the FERC March 22, 2005. This plan describes the funding provided to acquire available land and water rights in the action area. Actions pursuant to the Land and Water Acquisition Program are decided upon and prioritized by the ECC. Annual funding of \$300,000 (escalated annually) for this purpose began December 22, 2004 and will continue through the end of the license term.

In 2005, the ECC formed a subcommittee to develop proposal and application forms for individuals and organizations seeking funding from the ECC for land and water acquisition projects. The subcommittee also developed evaluation criteria for proposals. Due to the opportunistic nature of land and water acquisition fund projects, the ECC voted in 2007 to accept and evaluate such proposals year-round. They are approved by consensus agreement among ECC members at large.

In 2006 PacifiCorp entered into a Memorandum of Agreement with Sagebrush Steppe Land Trust to acquire properties using the license-required land and water acquisition fund. The 2006 memorandum described the process for the trust to acquire properties once approved by the ECC. The MOA was updated by PacifiCorp and SSLT during 2012 and the updated MOA received a vote of support from the ECC at its September meeting that year.

During 2015, funds expended from the land and water acquisition fund protected an additional 900 acres, for a total to date of more than 3,000 acres. Table 3.1-2 summarizes the acres, type of acquisition, whether conservation easement or fee title, and length of river bank protected to date.

Table 3.1.2 Lands and Easements Acquired with the Land and Water Acquisition Fund					
Parcel	Acreage	Waterbody	Date	Linear Feet of Riparian Protection*	
				Left Bank	Right Bank
Conservation Easements					
Cove Easement 1 Olsen	0.25	Bear River	2006		342
Cove Easement 2 Hansen	0.04	Bear River	2006		29
Cove Easement 3 McCurdy	0.68	Bear River	2006		758
Cove Easement 4 Olsen	0.24	Bear River	2006		343
Cove Easement 5 Harris	1.0	Bear River	2006		740
Henderson Preserve	210	Bear River	2008	4,406	4,114
Harris Preserve	116	Bear River	2009	2,899	--
Upper Christensen	767	Mink Creek	2012	3,250	3,250
Lower Christensen	261	Mink Creek	2012	--	2,500
Riparian Christensen	5	Mink Creek	2012	1,250	1,250
Boyack	67	Bear River	2014	--	4,528
Jensen	200.2	Mink Creek	2015	2270	2270
Fee Title					
Kackley Preserve	157	Bear River	2006	1,964	3,402
		Kackley Creek	2006	2,661	2,790
Cove Preserve	2.3	Bear River	2006		772
Deep Creek Preserve	435	Deep Creek/Cub River	2010	1,767	1,812
Conservation land purchase partially funded by the Bear River Hydroelectric Project Land and Water Conservation Fund and held by the Idaho Department of Fish and Game.					
Fee Title					
McCammon Parcel	77.5	Bear River	2006	--	4,696
Walker Parcel	700	Bear River	2015	9,360	9,360
* Left or right bank designations assume facing downstream.					

Prior to the 2015 review period, flyers were distributed to ECC members, local NRCS offices, and previous applicants to announce land and water acquisition funding availability and request proposals. Application materials were posted to PacifiCorp's website. A new 200.2-acre conservation easement was finalized in 2015, the Jensen easement (see Table 3.1.2). In addition, a conservation land purchase of 700 acres was partially funded by the Bear River ECC and is held by Idaho Department of Fish and Game. Three new conservation easement projects were under consideration at the close of 2015, one or more of which could potentially close in 2016.

Black Canyon Monitoring Plan (Article 407)

The Black Canyon Monitoring Plan was completed and filed December 23, 2004 with the FERC, which in turn issued an order modifying and approving the plan February 17, 2005. Based on comments received during a subsequent outside peer review of the plan, a revised Black Canyon Monitoring Plan was prepared and circulated to ECC members for approval, then filed with the FERC June 10, 2005. An order approving the plan was issued October 13, 2005.

In 2005, Oasis Environmental was selected to conduct the monitoring study in Black Canyon and the first round of monitoring took place in October of that year. The third year of monitoring was completed in October 2007 and marked the end of baseline studies in the Black Canyon. The sixth and final year of Black Canyon Monitoring was completed during 2010, and a final report on the six-year study of Black Canyon entitled, *"Effects of the Variable Flow Regime on the Ecology of the Black Canyon of the Bear River, Idaho"* was received by the ECC for review and comment April 12, 2011. ECC comments on the plan were addressed and the report was made final September 12, 2011. Activities under this license article are now complete.

Minimum Flow Requirements (Article 408)

In compliance with section 3.2.1.1 of the Bear River Settlement Agreement, PacifiCorp's environmental coordinator provided notification of annual maintenance activities and time frames to the ECC via email February 5, March 25, April 28 and September 9, 2015. PacifiCorp's annual maintenance schedule for 2015 was provided to the ECC before April 2015.

Minimum flow requirements were revised May 23, 2006, when the FERC issued its Cove Decommissioning Order, amending Article 408:

The licensee shall maintain continuous minimum bypass flows from the project development as follows:

1. Below the Soda Dam: year-round minimum flow of 150 cfs, or inflow into the Soda reservoir, whichever is less;
2. Grace bypassed reach: a year-round minimum bypass flow of 63 cfs or inflow, whichever is less, in addition to 2 cfs leakage below the Grace Dam;

3. Oneida reach below the powerhouse: a year-round minimum flow of 250 cfs or inflow, whichever is less, in addition to 1 cfs leakage below Oneida Dam.

These minimum stream flow requirements will continue in accordance with procedures described in the Operations and Compliance Plan.

Fish Stranding Minimization Plan (Article 409)

The Fish Stranding Minimization Plan was completed as part of the Implementation Plan filed with the FERC May 28, 2004. An order modifying and approving the plan was issued by the FERC March 7, 2005. The plan describes measures and agency consultation to minimize potential fish stranding resulting from the release of recreation flows from the Grace Development. The Fish Stranding Minimization Plan was to be implemented in 2008, upon commencing scheduled recreation boating releases into Black Canyon, or during other times when high flows result in spill from Grace Dam. However, in 2007, the ECC began working to develop a ramp rate/fish stranding study to measure the direct impacts of downramps after whitewater releases. In 2008, the FERC granted PacifiCorp's request to suspend Article 409 until the fish stranding study was completed. The Boater Flow Ramp Rate Study was completed during 2010 and a final report was submitted to the FERC. The need to implement, change or request removal of Article 409, based on study results, was discussed with the ECC during a series of meetings in 2011. Per the requirements in a June 2, 2011 FERC Order, PacifiCorp prepared a report on the ECC's decision making regarding boater flows and the suspension of Article 409. This report was submitted to the FERC January 31, 2012 and included a recommendation to continue suspension of Article 409. The report also included the ECC's decision to use a down ramp rate of 1 foot per hour following boater flows. On May 18, 2012, the Final Agreement on Boater Flows was filed with the FERC. This agreement included the ECC's recommendation to not reinstate Article 409. Continued suspension of the Article 409 Fish Stranding Minimization Plan was confirmed by the FERC October 17, 2012, in an issuance that confirmed PacifiCorp had complied with Ordering paragraph (b) of the FERC's June 3, 2011 Order Approving Suspension of the Fish Stranding Minimization Plan. There were no new actions in 2014.

Kackley Springs Plan (Article 410)

The Kackley Springs Plan was completed as part of the Implementation Plan filed with the FERC May 28, 2004 and an order modifying and approving the Kackley Springs Plan was issued by the FERC March 22, 2005. The Kackley Springs Plan was also discussed by the ECC as part of the Grace-Cove Site Plan. The Kackley Springs Plan proposes studies and monitoring to determine the effects of flow on Bonneville cutthroat trout and other aquatic resources. In 2006, the ECC awarded a habitat enhancement fund grant to a graduate student to investigate options to reconnect the Kackley Springs flow to the channel that crosses the Kackley parcel. The ECC reviewed this report during 2008 and conducted a field review of the site during its July 2008 meeting. A conceptual plan was agreed to by the ECC to discontinue diversion of the spring directly into the Bear River and send the water down a longer route that can potentially be used by native fish for spawning. Habitat enhancement funding was

approved for the project during 2009 (see Article 405, above) and the Kackley Springs Reroute Project was completed later that year.

Idaho Department of Fish and Game's first release of Bonneville cutthroat trout from the Grace Hatchery took place at Kackley Springs in 2011 (see Article 403, above). Noxious weed control took place and additional shrubs and willow stakes were planted during 2009, 2010 and 2012, and the ECC approved a habitat enhancement project in 2012 to raise the elevation in the main pond. This article is now complete. Future land management activities around the springs will be conducted in accordance with the Grace-Cove Site Plan.

Dam Leakage Minimization Plan (Article 411)

The Dam Leakage Minimization Plan was completed as part of the Implementation Plan filed with the FERC May 28, 2004 and approved December 13, 2004. This plan describes steps to measure leakage from Grace and Oneida dams. The measurement protocol was developed in consultation with the ECC, and dam leakage measurements were taken in October 2004. An order amending Article 408 (Minimum Flow Requirements) was issued by the FERC December 2, 2005 and included dam leakage in minimum flow requirements. No further action was needed during 2015.

Ramp Rate Requirements (Article 412)

The schedule for implementing new ramp rates, as measured downstream of the Soda and Oneida developments, was modified in the Implementation Plan approved by the FERC December 13, 2004. New ramp rate requirements were implemented December 22, 2004. Ramp rates will continue in accordance with procedures described in the Operations and Compliance Plan filed with the FERC December 22, 2004. Notification of annual maintenance activities and timeframes were given to the ECC by the environmental coordinator via email as reported for Article 408.

As described in the Settlement Agreement, Black Canyon ramp rates have been determined with the ECC, in consultation with PacifiCorp. Discussions regarding ramp rates began in April 2006, and continued through the end of 2007. During 2007, the ECC developed and reached consensus on a study plan to evaluate fish stranding in the Black Canyon following boater flow events, and in 2008 launched a three-year study to evaluate the effect of whitewater boating flow ramping rates on native fish. The third and final year of the study was completed during 2010 and the final report on the Black Canyon Boater Program Ramp Rate Study was submitted to the FERC. This information was used by the ECC—along with Black Canyon Monitoring Study results and the final Boater Flow Water Quality Report—to help determine ramp rates and the future structure of the boater program. In 2011, the ECC determined that a 1 foot per hour ramp rate will be used for boater flows. Ramping rate limitations are being followed at Grace, Soda and Oneida.

Water Quality Monitoring Plans (Article 413)

The 2007 Water Quality Monitoring Report for the Grace-Cove Development was submitted to IDEQ in January 2008. IDEQ then verbally informed PacifiCorp that water quality monitoring at Grace-Cove could be discontinued, two years before scheduled, as they found no indication of project contribution to exceedances of water quality criteria. A formal letter was received from IDEQ during 2009, signing off on Grace-Cove Water Quality Monitoring and the Oneida Water Quality Study.

A final Oneida Water Quality Monitoring Report was submitted to the IDEQ April 6, 2007. The collection of data for this 18-month study was completed in October of 2005. During 2008, discussions were held between PacifiCorp and IDEQ concerning the ability to determine project contributions to exceedances of water quality at the Oneida Project based on the results of the study. In 2009, agreement was reached with IDEQ that the Oneida Project does not significantly cause or contribute to exceedances of water quality standards.

During 2008, IDEQ requested water quality monitoring during boater flows in the Black Canyon. A study plan was developed by PacifiCorp and the IDEQ. This study plan was used during the 2008, 2009, and 2010 whitewater releases. 2010 Boater Flow water quality measurements were included in a final report with 2008 and 2009 results. This final Boater Flow Water Quality Report was submitted to the FERC. During 2011, the ECC discussed exceedances of state water quality criteria during boater flow events during a series of meetings held to address boater flows. IDEQ continued to collect water quality monitoring data during boater flow events in 2012, 2013 and 2014 to inform potential future management decisions. Findings were discussed by the ECC at a two-day whitewater boater flow meeting in February 2015. At that meeting, IDEQ stated that they believed goals for water quality had been met.

Operations and Compliance Plan (Article 415)

PacifiCorp prepared a draft Operations and Compliance Plan and provided copies to the ECC and US Geological Survey (USGS) for review November 4, 2004. After a 30-day review period, the plan was finalized and filed with the FERC December 22, 2004. An order from the FERC approving the Operations and Compliance Plan was issued April 7, 2005. Subsequently, based on operational issues identified during 2005, PacifiCorp suggested revisions to the plan regarding how minimum flows are measured during low-flow periods. These revisions were presented to the ECC for comment initially in November of 2005, and discussions continued through 2006. In 2007, a modification to the Operations and Compliance Plan regarding publishing of streamflow gage data by the USGS was presented to and accepted by the ECC. During 2008, the compliance point for Black Canyon minimum stream flow measurement was changed from the USGS gage below the Grace Dam to the reservoir elevation gage, a reservoir deadband, and calculated gate opening. A revised Operations and Compliance Plan, which includes updates on new stream flow gaging equipment, the change in compliance point at Grace Dam, operations directions for transition from minimum stream flow at Grace Dam to inflow, and publication

of USGS stream flow data, was submitted to the FERC June 20, 2013. The plan was approved by the FERC September 16, 2014 and has now been implemented.

Recreation and Traffic Safety Plan (Articles 416/417)

The Recreation and Traffic Safety Plan was submitted to the FERC January 31, 2005. An order approving the plan was issued October 11, 2005.

During 2015, annual funding was provided to Caribou County for park maintenance, to Franklin County for law enforcement, and to BLM for Oneida campground maintenance. Annual dust abatement applications were made around the campgrounds and day-use area in Oneida Canyon.

Boating Flow Release Plan (Article 418)

The Boating Flow Release Plan was completed as part of the Implementation Plan filed with the FERC May 28, 2004. An order modifying and approving the Flow Release Plan was issued August 11, 2005. This plan describes measures to release whitewater boating flows from the Grace Dam for the purpose of whitewater recreation. During 2007, plans to install slide gates to facilitate whitewater releases were completed and submitted to the FERC. In 2008, Grace Dam was modified by the installation of the spill gates, which are used to facilitate whitewater releases. There was no new action during 2015.

Boating Flow Release Schedule (Article 419)

The ECC developed a Black Canyon Monitoring Plan (Article 407) to document the effects to aquatic resources of flow releases from the Grace Dam for whitewater recreation in the Black Canyon reach of the Bear River. This six-year study started in 2005 and concluded in 2010. It collected data over three baseline years without whitewater releases and for three years with releases. Flow releases during the second three years were triggered by river inflow. In addition to this study, in 2007 the ECC developed a ramp rate study plan to evaluate fish stranding over three years and use this information, along with the six-year Black Canyon Monitoring Study, to make future decisions concerning ramp rates and whitewater boater program structure.

During fall of 2011, a series of three ECC work sessions were held to discuss study results that included the six-year monitoring report, the fish stranding report, water quality, and the timing and schedule of future boater flows. A report of these discussions was submitted to the FERC January 31, 2012. This report included the Draft Agreement for Boater Flows: Extended Study Period & Adaptive Management and a commitment to follow up with the FERC 45 days after the agreement was finalized. According to the terms of the draft agreement, during the extended study period (2012 – 2014), four weekends of scheduled boater flows were released between April 1 and June 5; a down ramp rate of 1 foot per hour was used; and the Article 409 Fish Stranding Minimization Plan remained suspended. Final ECC approval of the agreement and associated study plans to be implemented by IDFG and IDEQ for monitoring of water quality and fisheries during the extended study period was granted April 18, 2012. The agreement

was implemented during the 2012 whitewater boater flow season and continued through the 2014 whitewater boater flow season.

The Final Agreement for Black Canyon Boater Flows: Extended Study Period & Adaptive Management was submitted to the FERC May 18, 2012. The FERC responded October 17, 2012, that PacifiCorp had fulfilled consultation and reporting requirements as required in the FERC's June 3, 2011, Order Approving Suspension of Fish Stranding Minimization Plan under Article 409.

A total of nine boater flow releases were made over four weekends during 2015. Three two-day whitewater boater flow events and one three-day event were provided on April 11 & 12; April 24, 25, & 26; May 16 & 17; and May 30 & 31.

Oneida Operations Regime (Article 420)

The Oneida Operations Regime was completed as part of the Implementation Plan filed with the FERC May 28, 2004. An order approving the operational regime was issued August 17, 2005. This plan describes the operational regime designed to minimize the frequency of river level fluctuations below the Oneida powerhouse. Under this plan, when water is available, flows below the Oneida powerhouse will be greater than 900 cfs between Memorial Day and Labor Day, as described in the Operations and Compliance Plan filed with the FERC December 22, 2004. During 2015, recreation flows were provided in relation to required irrigation releases. For 71 of the 106 possible days (67%) in the goal flow period between May 25 and September 7, high irrigation demand resulted in flows above 900 cfs in the Oneida Narrows reach. The Oneida Development Water Year 2015 Operations Report was filed with IDEQ and is being submitted to the FERC with this annual report.

Boating Flow Forecasting Plan (Article 421)

The Boating Flow Forecasting Plan was completed as part of the Implementation Plan filed with the FERC May 28, 2004. An order modifying and approving Flow Forecasting Plan was issued August 17, 2005. This plan describes measures to forecast and announce whitewater boating flows for each year beginning in 2008.

A 2015 boater flow schedule was developed in consultation with American Whitewater. The schedule was developed in accordance with the terms of the ECC's Agreement for Black Canyon Boater Flows: Extended Study Period and Adaptive Management. The schedule was provided to the ECC for review and submitted to the FERC. The schedule of flows was posted on the PacifiCorp website and information was provided on the Flow Phone. Nine boater flow releases were provided over four weekends in 2015.

Website and Flow Phone Report (Article 422)

PacifiCorp's existing Flow Phone was updated and a Bear River Implementation website (<http://www.pacificorp.com/es/hydro/hl/br.html#>) was created in 2004. This website and toll-free

number (1-800-547-1501) was reported to the FERC in a December 30, 2004 letter. The FERC issued a letter approving the website and Flow Phone January 14, 2005. In addition to river flow information, the website provides ECC meeting notes, reports, and other documents related to implementation of the license. The website and Flow Phone were maintained during 2015.

Historic Properties Management Plan (Article 423)

The Historic Properties Management Plan (HPMP) was completed in early 2005 and filed with the FERC March 29, 2005. This HPMP was then withdrawn to allow the preparation of a revised plan for submittal to the Idaho State Historic Preservation Office. The revised plan was intended to address the SHPO's comments on the previous draft. Additional comments were received from the SHPO in 2007 and a revised HPMP was submitted to the FERC in July 2007. During 2008, the FERC issued an order accepting the HPMP and directing PacifiCorp to begin implementation. PacifiCorp has prepared and presented cultural resource training to all Bear River operations staff yearly since 2009, including a 2015 training. Interpretive panel artwork that was finalized during 2011 was manufactured and installed in 2012, except those covering Native American use of the area. Eight signs total were installed that covered historical information on the Grace, Cove and Oneida developments in addition to Doc Kackley, the Oneida Plant Disaster, and Bonneville cutthroat trout. A consultation meeting and field trip were held with the Shoshone Bannock Tribe concerning traditional cultural properties and interpretive signs. Graphics for Native American interpretive signs were finalized during 2014 and the signs were manufactured. These signs were installed during 2015. Copies of three of the signs were provided to the Shoshone-Bannock Tribe for their museum. The 2015 annual report on HPMP activities will be provided to the FERC before January 22, 2016.

Land Management Plan (Article 424), which includes Shoreline Buffer Zone Plan (Article 425), and Cove Bypass Reach Fencing Plan (Article 426)

The Land Management Plan (LMP) was filed with the FERC January 31, 2005 and approved April 11, 2006. Included in the LMP are the Shoreline Buffer Zone Plan and the Cove Fencing Plan. The LMP describes the implementation of new land management procedures, as specifically detailed in five site plans. These site plans were to be completed (written) within 5 years after the LMP was approved, and were prioritized as follows: Grace-Cove, Oneida, Soda, Grace Dam, and Last Chance land parcels. During 2008, the ECC agreed to incorporate the Grace Dam and Last Chance site plans into one document, reducing the number of site plans to four. Implementation of the site plans was to be completed within 10 years after LMP approval. All plans were completed as scheduled by 2010.

A minor update of the LMP was completed in consultation with the ECC in 2011, as noted in the original 2005 LMP, Section 2.4. This update was made necessary by the decommissioning of the Cove Project in 2006, completion of the site plans in 2010, and installation of required measures to protect riparian areas within the FERC project boundary at the Oneida development being placed at the outer PacifiCorp property boundaries (and therefore placed well outside the FERC project boundary), collectively. The

updated LMP was submitted to the FERC with the 2011 annual report of implementation activities and was implemented upon FERC approval July 17, 2014.

The first site plan, for the Grace-Cove area, was completed and reviewed by the ECC in 2005. Most of the implementation scheduled in the Grace-Cove Site Plan was completed in 2005 and 2006, and the remainder was finished in 2007—including revised leases, final edits to monitoring forms, and revisions based on Cove decommissioning. Some remaining cross-fencing no longer needed in the Grace-Cove Site Plan area was removed in 2012 and fence repair and maintenance was conducted in 2014 and 2015. Due primarily to the removal of Cove Dam, the Grace-Cove Site Plan is proposed for an update, potentially as early as 2016, given FERC approval of the revised LMP in 2014.

The Oneida Site Plan was drafted and reviewed by the ECC in 2006. The plan was finalized in 2007, but revisions were made during 2008. Implementation actions for Oneida were completed in 2007 and 2008 including installation of cattle exclusion fencing and placement of boundary markers along property lines that were not fenced. Remaining interior cross fencing was removed in Oneida Canyon during 2010 and 2011. Fence repair and maintenance was conducted during 2015. Given 2014 acceptance of the revised LMP, the Oneida Site Plan was updated in 2015. The updated Oneida Site Plan was submitted to the FERC June 3, 2015. The FERC acknowledged receipt of the plan in a December 7, 2015 letter.

The Soda Site Plan was completed and reviewed by the ECC during 2008 and implementation actions were substantially completed during 2008, including installation of boundary markers and cattle exclusion fencing, marking of expanded reservoir buffer areas, and seeding of approximately 130 acres with native grass in new reservoir buffer areas. Agricultural leases were modified to prohibit grazing and to allow for the expansion of reservoir buffers. The Soda Site Plan was finalized in 2009. Most of the interior abandoned cross fencing was removed from the Soda Site Plan area in 2011. Some remaining cross fencing was removed in 2012.

The Grace Dam and Last Chance Site Plan was finalized during 2010. Implementation actions completed at Grace Dam and Last Chance include installation of property boundary markers and cattle exclusion fencing where needed. An agricultural field adjacent to the Grace forebay and former cattle feeding areas at Grace forebay and Last Chance were seeded with native grass, abandoned interior fences were removed from the Grace and Last Chance properties, and two cattleguards were installed on the dirt road at Last Chance to exclude cattle from the river.

Noxious weed control activities were performed in all areas in 2015, as required in the site plans. Performance tracking and compliance monitoring was completed for all site planning areas. Monitoring reports, both compliance monitoring to indicated compliance with the site plan, and performance tracking to indicate long-term ecological indicator shifts, for the Grace-Cove, Oneida, Soda, and Grace Dam and Last Chance site plans are included in Appendix B, D, E and F of this report, respectively.

The Cove Buffer shoreline fence was monitored as required during 2015. Monitoring forms are included in Appendix C of this report.

Expanded FERC Project Boundary (Article 427)

Planning for the expanded FERC project boundary was included in the preparation of the Land Management Plan and the Recreation and Traffic Safety Plan. A modified schedule for completion of the survey and preparation of a new Exhibit G was included in the Implementation Plan. New and revised Exhibit G drawings were filed with the FERC August 17, 2005 under Article 202 and 427. An order approving revised Exhibit G Drawings and revising federal acreage was issued October 13, 2005. No action was taken in regard to the Expanded FERC Project Boundary actions required under this license article in 2015. PacifiCorp did submit updated Exhibit G maps to FERC in 2015 in order to address Federal acre reporting and conformance to Exhibit G preparation requirements.

3.1.2 Work Completed for Cove Decommissioning Site (Order Amending License and Revising Annual Charges [62,205])

The FERC issued the Cove Decommissioning Order May 23, 2006, and the development, including Cove Dam and the mile-long flume, was removed in the summer of 2006. After removal of the structures, work to stabilize and reclaim the area was completed in late fall of 2006, and 2009 was the final year of monitoring required by the US Army Corps of Engineers permit. The Cove water right placement into the State Water Supply Bank was renewed following consultation and agreement with the ECC. All required actions are complete.

3.2 Work Anticipated in 2016

This section outlines work anticipated for license implementation and compliance during 2016. As noted in Section 3.0, an implementation schedule for 2016 is included in Appendix H of this report. The 2016 implementation schedule updates and replaces the implementation schedule filed with the Implementation Plan in 2004, and the schedule included in the 2014 Annual Report.

- File 2015 Annual Report, including the Oneida Development Water Year 2015 Operations Report.
- Continue collaboration with stakeholders through ECC meetings held every other month (or more frequently, as needed).
- Discuss the need to review priorities listed in the Bonneville Cutthroat Trout Restoration Plan.
- Make conservation hatchery payment to IDFG.

- Continue the Habitat Enhancement Program - Subcommittee to evaluate projects in March 2016 and present recommendations to the ECC for approval in April 2016. Subcommittee may continue to evaluate projects as they are presented during the remainder of the year. Continue to monitor habitat enhancement projects (per Appendix G).
- Continue the Land and Water Acquisition Program – Subcommittee to evaluate projects as they are presented during the remainder of the year.
- Continue to document required minimum flows.
- Provide PacifiCorp’s annual maintenance schedule to the ECC before April 2016, consult with ECC in emergencies, as practical.
- Per the Agreement for Black Canyon Boater Flows: Extended Study Period and Adaptive Management, four weekends of scheduled boater flows will occur. For the 2016 schedule, the ECC has moved the start date from April 1 forward one week to March 26. A 1-foot-per-hour down-ramp rate will be used, and suspension of Article 409 will continue. PacifiCorp will develop a schedule with American Whitewater and post the schedule on the Bear River website and Flow Phone.
- Maintain compliance with the updated Operations and Compliance Plan.
- Make annual payments to Caribou County, BLM, and Franklin County Sheriff; implement dust abatement measures on Oneida Road; maintain signs and recreation sites; and perform annual monitoring of Recreation and Traffic Safety Plan and site plan recreation elements, as specified. Prepare an update to the Recreation and Traffic Safety Plan.
- Submit 2016 whitewater boater flow schedule to the FERC.
- Submit annual Oneida Operations Report to IDEQ.
- Maintain website and Flow Phone.
- Continue to follow the Historic Preservation Management Plan (HPMP) guidance.
- Continue to implement Interpretation and Education Plan, review of project activities and annual site monitoring.
- Submit annual report on HPMP activities in January 2016.
- Provide annual staff cultural resource training.

- Potentially make minor updates to the Grace-Cove site plan for consistency with the 2011 Revised Land Management Plan, as approved by the FERC July 17, 2014.
- Continue monitoring as required for the Grace-Cove, Oneida, Soda, and Grace Dam and Last Chance site plans. Take corrective actions as needed.
- Treat noxious weeds.
- Conduct ongoing maintenance of fences, gates, signage, and boundaries in all site plan areas.
- Maintain Cove buffer shoreline fence, per Art. 426
- Continue to monitor vehicle trespass issues at Soda and address as needed.
- Address any other minor compliance issues noted during 2015 monitoring efforts at each of the four planning areas.
- Address any maintenance needs noted during 2015 monitoring of the Cove shoreline buffer fence.
- Report on implementation in the annual report.

4.0 Funding

This section presents an accounting to the end of calendar year 2015 of the funding obligations for Bear River Settlement Agreement and new license. Funding obligations noted as complete in previous annual reports are not included in this annual report.

Cove Shoreline Buffer Fence Monitoring

Cove Shoreline 2015 Buffer Fence Annual Monitoring Report

In the fall of 2006, a fence line was constructed on the west side of the Bear River, essentially running the length of the Grace-Cove project area, as part of the required implementation of the 2003 Federal Energy Regulatory Commission (FERC) Bear River Idaho license (FERC No. 20). The fence line was constructed on private land not owned by PacifiCorp, between the former Cove Forebay and the Cove plant to fulfill the requirements of the Bear River License Article 426. The new fence line was constructed to create a buffer zone to protect the river and its banks from livestock grazing and any other agricultural land uses. This project involved PacifiCorp, the United States Fish and Wildlife Service (USFWS), and several private land owners whose property abutted the Bear River. New fence construction, as well as the updating of existing fence lines, resulted in approximately 9,000 feet of continuous fence line along the Bear River. This fence line provides protection from livestock grazing and other agricultural uses. Currently 1.5 miles of riparian zone along both sides of the Bear River between the Grace Hydro Plant and the former Cove Plant is now protected by this fence line (fulfilling in part, License Articles 425 and 426). This protection will help to improve the overall condition of the riparian zone as well as improve bank stabilization, wildlife habitat and water quality.

Since completion of the fence line in 2006, Sagebrush Steppe Land Trust (SSLT), in conjunction with the Environmental Coordination Committee (ECC), has purchased 154 acres of land on the east side of the Bear River that is adjacent to the Cove shoreline buffer. To further protect this stretch of the river, SSLT created perpetual conservation easements with the private landowners within the area between the fence and the river for additional protection from future undesired uses.

PacifiCorp is responsible for annual fence monitoring and inspection, as well as any required maintenance for the duration of the FERC license, which will expire in 2033. SSLT will be responsible for all other required land management practices within this buffer.

During this report period, annual monitoring was conducted on August 18, 2015. Overall conditions in the riparian areas were very good. No trespass grazing was observed along the entire buffer fence. Noxious weeds in the buffer areas were generally controlled, except for a large patch of Phragmites located in the Harris BLM section that continues to grow. The McCurdy II section of the Cove fence was in need of repairs, and maintenance was performed later in the fall. At this time the Cove fence was in good condition.

Olsen I: Length: 440 feet

Type: 4-strand, barbwire on steel posts.

Baseline Condition: Fence moved (December 2007) to correct property boundary. Fence line runs east and west through riparian zone. Fence line is in good condition. Riparian area is dominated by sedges and wet meadow grasses, and is in good condition.

2015 Maintenance Required: None

2015 Easement Conflict: None.

2015 Photo taken looking west from fence corner.

Olsen I 2015

McCurdy I: Length: 320 feet

Type: Existing and upgraded, 6-strand, barbwire on steel and wood posts.

Baseline Condition: There has been some confusion regarding the location of the McCurdy fence segment. The actual location is west of Olsen I on the hillside below the canal. The fence line borders the SSLT property on the west boundary. The photo point used in previous years was looking south through the McCurdy I riparian along the old fence line. In 2010 a new photo point was established for McCurdy I, looking south from the fence corner below the canal.

2015 Maintenance Required: None

2015 Easement Conflict: None

2015 photo looking South on West boundary.

McCurdy I 2015

Hansen: Length: 200 feet

Type: 5-strand, barbwire on steel posts.

Baseline Condition: Fence line is in good condition, as well as the riparian area. Riparian area is dominated by small stands of willows along with cattails and other emergent marsh-type grasses.

2015 Maintenance Required: None

2015 Easement Conflict: None

2015 photo looking South through Hansen riparian.

Hansen 2015

McCurdy II: Length: 900 feet

Type: Field fence, 1-strand barbwire below, 2-strand barbwire above, steel posts.

Baseline Condition: Fence line and riparian zone are in good condition. Riparian zone dominated by dense stands of woody shrubs, including Wood's rose and black hawthorn.

2015 Maintenance Required: Yes, several wooden posts were added and wires restrung and tightened

2015 Easement Conflict: None

2015 photo looking South through McCurdy II riparian zone.

2015 McCurdy II

Olsen II: Length: 2700 feet

Type: Combination of existing, upgraded 7-strand barbwire on steel and wood posts and new 5-strand barbwire on steel posts.

Baseline Condition: Fence line and riparian area in overall good condition. Riparian area dominated by grasses and willow and other shrub stands.

2015 Maintenance Required: None

2015 Easement Conflict: None.

2015 photo looking South through riparian zone.

2015 Olsen II

Harris: Length: 4440 feet

Type: Combination of new, 5-strand barbwire on steel posts and new field fence with 2-strand barbwire on top, on steel posts, two soft gates included to provide access to lessees on embedded 40-acre BLM lease.

Baseline Condition: The Harris section of fence line is currently monitored in two parts, Harris Riparian and Harris BLM sections. In previous years the two sections were monitored as one segment, but since 2012 they have been monitored as two separate sections. The Harris BLM section fence line separates the Harris property from BLM property; a new photo point for this section was established in 2012. This area is dominated by grasses and shrubs and was found in good condition in 2012. The Harris section consists of the riparian area along the river's edge. The riparian area is a very narrow strip along the Bear River with steep banks. The area is dominated by grasses and small stands of willows.

Harris BLM Section:

2015 Maintenance Required: None. Notify BLM of *Phragmites* on both sides of river.

2015 Easement Conflict: None

2015 photo taken looking west along BLM property line.

2015 Harris BLM Section

Harris Riparian Section:

2015 Maintenance Required: None.

2015 Easement Conflict: None

2015 photo taken looking north along riparian/upland area.

Grace Dam and Last Chance Site Plan Compliance Monitoring

Last Chance Parcel Compliance Monitoring Date: 9-18-2015 Technician: Bryan Westerberg Baseline 2010				
Issue	Corrective Action	Timeframe	Completed?	Comments
Public Access	<ul style="list-style-type: none"> Use appropriate methods to determine and demarcate PacifiCorp-owned lands and allowed public access. 	Summer 2009	YES	Boundaries marked
		Annual	YES	Looks good
	<ul style="list-style-type: none"> Ensure gate, fence, and fence post condition on all boundaries where natural features don't provide adequate boundary delineation and protection from livestock and vehicle trespass. 	Summer 2009	YES	Initially completed in 2011
		Annual	YES	Fence good
	<ul style="list-style-type: none"> Establish and maintain gates on unimproved roads unsuitable for public motorized access. 	Fall 2009	YES	NOTE: proposed gates on northwest property were replaced with cattle guards 2010.
Vegetation Management	<ul style="list-style-type: none"> Revise the weed control contract to include backpack spraying and other appropriate techniques. 	Spring 2009	YES	Initially completed
		Annual	YES	Weeds generally controlled
	<ul style="list-style-type: none"> Reseed the upland area where livestock have damaged ground above the ramp leading to the old ford to native grasses and forbs. 	Fall 2009	YES	Initially completed
		Annual	YES	Conditions improving, new native growth, decreasing weeds-Looks good –ATV use becoming problem
Wetland and Riparian Habitat Management	<ul style="list-style-type: none"> Secure the ramp leading down to the old ford at the north end of the parcel to prevent trespassing livestock from accessing the river's edge. 	Summer 2009	YES	Property boundary is fenced and cattle guards on road are in place.
	<ul style="list-style-type: none"> Reseed and replant the riparian area where livestock have damaged riparian areas at the old ford. 	Fall 2009	YES	Initially completed
		Annual	YES	Looks good, lots new shrub growth, weeds being controlled
Agricultural Uses	<ul style="list-style-type: none"> Renegotiate leases to limit lessees to one annual cut of alfalfa, leaving the balance for wildlife. 	Spring 2009	YES	Initially completed
		Annual	YES	One cut in 2015

Grace Dam Parcel Compliance Monitoring

Date: 9-18-2015

Technician: Bryan Westerberg

Issue	Corrective Action	Timeframe	Completed?	Comments
Public Access	<ul style="list-style-type: none"> Use appropriate methods to determine and demarcate PacifiCorp-owned lands and allowed public uses. 	Summer 2009	YES	Initially complete
		Annual	YES	
	<ul style="list-style-type: none"> Ensure fence and fence post condition on boundaries as necessary to control trespass OHV and livestock grazing. 	Summer 2009	YES	Initially complete
		Annual	YES	Fence is good
	<ul style="list-style-type: none"> Post "No Trespassing" and ownership signs on the west side under the Highway 34 bridge to discourage public access to the Project Operations land west of the bridge and to protect the riparian habitat. 	Summer 2009	YES	Complete
		Annual	YES	No signs but rock barriers placed to stop access.
	<ul style="list-style-type: none"> Complete the signage and facilities at the Black Canyon put-in with: (1) recreational rules signs; (2) "Part 8" signs; (3) a "Stop" sign; (4) "No Fires" signs; (5) "Speed Limit 10 mph" signs; (6) "Pack It In, Pack It Out" signs; (7) a portable toilet placed and maintained spring and summer at the put-in. 	Spring 2009	YES	Complete
		Annual	YES	Signage complete
	<ul style="list-style-type: none"> Maintain the parking areas according to RTSP standards (p. 29). 	Spring 2009	YES	Initially completed
		Ongoing	YES	Appears well maintained.
	<ul style="list-style-type: none"> Provide overflow parking area if boater use exceeds capacity of gravel parking area. 	Future activity	NO	Not needed at this time
		Annual	N/A	N/A
	<ul style="list-style-type: none"> Maintain boat access at the Grace Dam put-in and consider placing rocks in river to create eddy for safer boat launch. 	Spring 2009	YES	Initially completed
		Ongoing	YES	Boat access available. Eddy not necessary
	<ul style="list-style-type: none"> Inspect the recreation site periodically (every 5 years, per LMP and RTSP) for signs of environmental damage to adjacent sensitive habitats designated as Conservation shoreline buffers, and appropriate steps will be taken if damage is detected. 	Spring 2014, initially	YES	Good
	<ul style="list-style-type: none"> Install boulders or other barriers to prevent vehicles from accessing the area under the bridge to reduce loitering and littering. 	Fall 2009	YES	Rock barriers installed

Grace Dam Parcel Compliance Monitoring				
Date: 9-18-2015		Technician: Bryan Westerberg		
Issue	Corrective Action	Timeframe	Completed?	Comments
Vegetation Management	<ul style="list-style-type: none"> Undertake appropriate weed control measures along the riparian zone and project roads as well as in localized, internal areas. 	Spring 2010	YES	Weeds generally controlled.
	<ul style="list-style-type: none"> Discontinue grazing on small (approximately 1-acre) parcel north of residence and east of Grace Dam to allow revegetation of riparian strip. 	Spring 2009	NO	Incomplete
		Annual	NO	Horse grazing, temporary electric fence in place. Grazing continues
Agricultural Uses	<ul style="list-style-type: none"> No agricultural uses. 	Spring 2009	YES	No permitted use; see previous comment (above)

Flowline Parcel Compliance Monitoring				
Date: 9-18-2015		Technician: Bryan Westerberg		
Issue	Corrective Action	Timeframe	Completed?	Comments
Public Access	<ul style="list-style-type: none"> Use appropriate methods to determine and demarcate PacifiCorp-owned lands and allowed public access. 	Summer 2009	YES	Boundaries are marked
		Annual	YES	Consider options for public access signage.
	<ul style="list-style-type: none"> Determine where public will be prohibited from access to Project Operations lands around flowline and surge tank because of unsafe conditions (e.g., ponds, escarpments, and piles of debris). Ensure appropriate signage and fence and fence post condition on all boundaries to prevent unauthorized public access, trespass grazing, and OHV access. 	Spring and Summer 2009	NO	Incomplete
		Annual	YES	No signage or fencing in place to regulate public access or use at surge tank, on 5-ac or 47-ac parcels or along much of flowline. Consideration of “pedestrian access only” and “no shooting” signs in 2013— remains unchanged in 2015, majority of old fencing was replaced along flowline in 2014-more fencing performed in 2015
	<ul style="list-style-type: none"> Negotiate easement with Last Chance Canal Company for catch basin at end of canal to require appropriate hazard warnings around the basin, near debris piles, and at the escarpment. Ensure that posted warnings are maintained by the canal company. 	Fall 2009	NO	Incomplete
		Annual	YES	Easement competed with Don Gilbert. Signage TBD

Flowline Parcel Compliance Monitoring				
Date: 9-18-2015		Technician: Bryan Westerberg		
Issue	Corrective Action	Timeframe	Completed?	Comments
	<ul style="list-style-type: none"> Notify party using the 47-acre triangular parcel without a lease for grazing horses to remove livestock. 	Spring 2009	YES	Initially completed
		Annual	YES	No grazing
Vegetation Management	<ul style="list-style-type: none"> Monitor 47-acre triangular parcel previously used by horses; reseed if necessary to improve wildlife habitat. 	Fall 2009	YES	Initially completed
		Annual	YES	No recent livestock use apparent - wildlife use. Seeding unnecessary at present.
	<ul style="list-style-type: none"> Clean up 5 acres previously used by others as dumping ground; seek opportunities for disposal, including sale or exchange with Caribou County for road maintenance material storage. 	Fall 2009	YES	Clean up complete, structures still remain
		Annual	YES	Continue to work on this
	<ul style="list-style-type: none"> Where necessary, revegetate the disturbed uplands around the surge tank that are not included in agriculture leases with native upland grasses and forbs. 	Fall 2009	YES	Initially completed
		Annual	YES	No evidence of reseeding around surge tank. Unnecessary at this time.
	<ul style="list-style-type: none"> Undertake appropriate weed control measures along the flowline and in localized, internal areas. 	Spring 2010	YES	Initially completed
		Annual	YES	Weeds generally controlled
Wetland and Riparian Habitat Management	<ul style="list-style-type: none"> As long as the wet areas under the flowline are not being grazed, no other action is required. 	Spring 2009	YES	No grazing apparent.
Agricultural Uses	<ul style="list-style-type: none"> Dispose of properties east of the current flowline along the old flowline alignment that are in the middle of cultivated fields and owned by a single landowner to that landowner by sale or exchange. 	Summer 2009	NO	Incomplete
		Ongoing	NO	Need to advance this issue
	<ul style="list-style-type: none"> Negotiate updated lease terms with farmers cultivating the narrow strips west of the flowline and near the surge tank. 	Spring 2009	NO	Incomplete
		Ongoing	NO	Need to advance this issue

Grace Dam and Last Chance Performance Tracking

Last Chance Performance Tracking					
Date: 9-18-2015 Technician: Bryan Westerberg, Initial Performance Tracking: October 8, 2010				<input checked="" type="checkbox"/>	Check if DFCs have been reviewed.
Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments
Public Access	PA2 – Lands disturbed by recreation or other public uses are improved to reclaim healthy vegetation communities. (Also PA3, PA6, VM1, VM2, VM3, WR1, WR2.)	Are areas formerly damaged by trespassing livestock free of invasive plants, and is bare ground being replaced by native grasses and forbs? <ul style="list-style-type: none"> Are native plants being reestablished on the uplands above, the ramp, and the riparian zone adjacent to, the old river ford on the west side of the river? Has the extent of bare ground been reduced enough to minimize soil erosion? Has the fence around the old ford been removed so as not to obstruct use of the riparian zone by wildlife? 	LC1 (at top of ramp leading to old ford)	YES	No grazing, weeds under control, seeded area has new growth of native grasses.
			LC2 (on west side of river at old ford)	YES	Weeds under control, lots of native shrub growth, willows, native grasses increasing, no grazing, looks very good compared to previous years-some ATV and truck access going down ford, possible fencing in the future
Vegetation Management	VM3 - habitats such as sagebrush-steppe are enhanced and protected. (Also VM1, VM2.)	Are sagebrush-steppe and mountain brush communities healthy, diverse in plant composition, and free of invasive species? <ul style="list-style-type: none"> Are native plants established and free of invasive species? 	LC3 (on western edge of agricultural field at narrowest point in southwest piece)	YES	Sagebrush-steppe community healthy. Weeds still pervasive, especially along edge of fields. Abundance of native vegetation increases away from edge of fields. Musk thistle, Japanese brome, and cheat grass apparent.
			LC4 (on east side of river at old ford)	YES	Weeds still present, but decreasing in size and density, lots of native growth

Last Chance Performance Tracking Date: 9-18-2015 Technician: Bryan Westerberg, Initial Performance Tracking: October 8, 2010					<div style="border: 1px solid black; padding: 2px; display: inline-block;">X</div>	Check if DFCs have been reviewed.
Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments	
Agricultural Uses	AU1 - Activities on leased land are consistent with the objectives of the Agreement, the LMP, and other resource management plans and meet lease stipulations. (Also AU4.)	Are agricultural practices appropriate for leased parcels and helping to support wildlife? <ul style="list-style-type: none"> • <i>Are agricultural operations limited to the area designated for agriculture?</i> • <i>Are crops limited to alfalfa, and is only the first cut removed, leaving the balance for wildlife?</i> • <i>Is soil loss minimized during tillage, and are weeds appropriately managed?</i> 	LC5 <i>(on east side of river within agricultural field)</i>	YES	Agricultural practices appear to be appropriately confined. Crops limited to alfalfa and only one cut per season. Minimal soil loss evident.	
			LC6 <i>(on west side of river within agricultural field)</i>	YES	Agricultural practices appear to be appropriately confined. Crops limited to alfalfa and only one cut per season. Minimal soil loss evident.

Date: 9-18-2015 Technician: Bryan Westerberg		Initial Performance Tracking: October 8, 2010		<input checked="checked" type="checkbox"/>	Check if DFCs have been reviewed.
Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments
Public Access	PA1 - Viable recreational uses are maintained and/or improved. (Also PA2, PA3, PA4, PA6, PA7, VM1, VM2, VM3, WR1, WR2, WR3, WR4)	<p>Are established recreation areas receiving substantial use, and do these visitors have a minimal impact?</p> <ul style="list-style-type: none"> <i>Is there evidence of boaters taking advantage of the developed recreation site for whitewater boating at appropriate flows?</i> <i>Are soil and vegetation impacts limited to the parking area, put-in ramp, and narrow strips around roadways?</i> 	<p>GD1 (on north side of parking area east of Highway 34 bridge and south of river)</p>	YES	Boaters did take advantage of the launch site spring and summer. Vegetation improving-looks good
	PA2 – Lands disturbed by recreation or other public uses are improved to reclaim healthy vegetation communities. (Also PA3, PA6, VM1, VM2, VM3, WR1, WR2.)	<p>Are upland areas formerly damaged by trespassing livestock and OHV use free of invasive plants, and is bare ground being replaced by native grasses and forbs?</p> <ul style="list-style-type: none"> <i>Are native plants being reestablished?</i> <i>Are weedy species reasonably sparse and being managed appropriately?</i> <i>Is the percentage of bare ground small enough to minimize soil erosion?</i> <i>Have fences been established, and are they preventing livestock trespass but not obstructing use by wildlife?</i> 	<p>GD2 (along east side of flowline, south of river, and west of Highway 34 bridge)</p>	YES	Area is improving, less ATV use, weeds decreasing---lots of grass

Grace Dam Performance Tracking					
Date: 9-18-2015 Technician: Bryan Westerberg		Initial Performance Tracking: October 8, 2010		<input checked="" type="checkbox"/>	Check if DFCs have been reviewed.
Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments
Vegetation Management	VM3 - habitats such as sagebrush steppe are enhanced and protected. (Also VM1, VM2.)	<p>Are areas in uplands relatively free of weeds and composed of a healthy mix of native grasses, forbs, and shrubs?</p> <ul style="list-style-type: none"> • Are weedy species reasonably sparse and being managed appropriately? • Are native plants being reestablished? • Have fences been established, and are they preventing livestock trespass but not obstructing use by wildlife? 	GD3 (south of road to recreation parking area and east of Highway 34)	YES	Looks good, weeds generally controlled
Wetland and Riparian Habitat Management	WR1 - Wetland and riparian resources, spring complexes, and the river shoreline are buffered and protected. (Also WR2, WR3, WR4.)	<p>Are areas along waterways formerly damaged by livestock free of invasive plants, and is bare ground being replaced by native grasses and forbs?</p> <ul style="list-style-type: none"> • Are native plants being reestablished? • Are weedy species reasonably sparse and being managed appropriately? • Is there an adequate buffer of healthy riparian vegetation along the water's edge? • Have fences been established and are they preventing livestock trespass but not obstructing use by wildlife? • Are recreation users (fishers) having minimal impact on the riparian zone north of the river and west of the Highway 34 bridge? 	GD4 (east of dam and north of residence near water's edge)	NO	East of residence has heavy grazing to water's edge—weeds are an issue
			GD5 (on north side of river and midway between Highway 34 and old RR bridge)	YES	Weeds becoming an issue

Flowline Performance Tracking					<div style="border: 1px solid black; padding: 2px; display: inline-block;">X</div> Check if DFCs have been reviewed.	
Date: 9-18-2015 Technician: Bryan Westerberg Initial Performance Tracking: October 8, 2010						
Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments	
Public Access	PA1 - Viable recreational uses are maintained and/or improved. (Also PA2, PA3, PA4, PA5, PA6, PA7, VM1, VM2, VM3)	Does public use of the 5- acre and 47-acre Upland Conservation areas have a minimal impact? <ul style="list-style-type: none"> <i>Is there evidence of hunters and others utilizing the conservation areas appropriately?</i> <i>Is there evidence of wildlife taking advantage of the available habitat?</i> <i>Are soil and vegetation impacts minimal and vegetation cover for upland birds and other species adequate?</i> 	FL1 <i>(west edge of 5-acre triangular parcel at junction of One Mile Road and Varley Road)</i>	YES	Little evidence of significant public use.	
			FL2 <i>(within 47-acre triangular parcel along River Road and west of flowline)</i>	YES	Little evidence of significant public use. Wildlife use includes scat from marmots and coyote, badger cadaver, grouse scat. Deer can be observed year round on the 47 acre parcel	
Vegetation Management	VM3 - habitats such as sagebrush steppe are enhanced and protected. (Also VM1, VM2.)	Are areas in uplands relatively free of weeds and composed of a healthy mix of native grasses, forbs, and shrubs? <ul style="list-style-type: none"> <i>Are weedy species reasonably sparse and being managed appropriately?</i> <i>Are native plants being reestablished?</i> <i>Have fences been established, and are they preventing livestock trespass but not obstructing use by wildlife?</i> 	FL3 <i>(in uplands west of surge tank)</i>	YES	Looks good, weeds generally controlled.	

Flowline Performance Tracking					
Date: 9-18-2015 Technician: Bryan Westerberg Initial Performance Tracking: October 8, 2010				<input checked="" type="checkbox"/>	Check if DFCs have been reviewed.
Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments
Agricultural Uses	AU1 - Activities on leased land are consistent with the objectives of the Agreement, the LMP, and other resource management plans. (Also AU4.)	Are agricultural practices appropriate for the leased parcels? <ul style="list-style-type: none"> • <i>Are agricultural operations limited to the area designated for agriculture?</i> • <i>Is soil loss minimized during tillage, and are weeds appropriately managed?</i> 	FL4 <i>(in fields west of flowline and west of River Road)</i>	YES	Looks good.

Appendix G

Habitat Enhancement Project Monitoring

ECC Habitat Enhancement Project Monitoring

Habitat enhancement projects funded by the ECC are monitored yearly. A standardized form is completed for each site and a photo is taken. This appendix includes a compilation of 2015 monitoring efforts.

Alleman Dam Removal

ECC Project Monitoring Form

Project: Alleman Dam Removal

Date: 9-15-2015

Observer(s): Bryan Westerberg

Project Description and Photo Point:

Project Start Date: 2010

Remove an irrigation diversion dam on Alleman property on Georgetown Creek, exclude cattle and reclaim

Initial Monitor Date:

Project Finish Date: 2010

Location and Baseline Data: Georgetown Idaho, in the field just north of where West 4th street turns into Narrows road—you can see the red steel hay storage shed that was built next to the project

Fence line(s) Condition:

Structure(s) Condition: Overall good

Visual Water Inspection: (quality and flow) good

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Fish visible throughout the project

Bunderson Fish Bypass

ECC Project Monitoring Form

Project: Max Bunderson Irrigation
Structure Fish Bypass

Date: 10-28-2015

Observer(s): Bryan Westerberg

Project Description and Photo Point:

Project Start Date: 2010

Replace wooden irrigation diversion on Paris Creek with rock drop structures to allow fish passage/install fish screen

Initial Monitor Date:

Project Finish Date: 2010

Location and Baseline Data:

N 42 13' 45.5"

W 111 22' 13.5"

Fence line(s) Condition:

Structure(s) Condition: Good condition, working

Visual Water Inspection: (quality and flow) Good

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions: N/A

Wildlife Observations:

Roy Bunderson Irrigation Structure

ECC Project Monitoring Form

Project: Roy Bunderson **Date:**10-28-2015 **Observer(s):** Bryan Westerberg
Irrigation Structure

Project Description and Photo Point: **Project Start Date:** 2010
• Install fish ladder on irrigation structure on Paris Creek

Initial Monitor Date: **Project Finish Date:** 2010

Location and Baseline Data:

N 42 13' 30.1"

W 111 22' 28.1"

Fence line(s) Condition:

Structure(s) Condition: Good

Success of Reclamation Efforts:

Visual Water Inspection: (quality and flow)

- Flow good/quality good

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations: Lots of fish in Cottonwood Creek

Whiskey Creek Habitat Restoration

ECC Project Monitoring Form

Project: Whiskey Creek Habitat
Restoration

Date: 9-15-2015

Observer(s): Bryan Westerberg

Project Description and Photo Point:

Project Start Date: 2010

Improve habitat for BCT in Whiskey Creek by narrowing channel and planting riparian vegetation

Initial Monitor Date:

Project Finish Date: 2010

Location and Baseline Data:

East of Highway 34 where highway crosses Whiskey Creek

Fence line(s) Condition:

Structure(s) Condition:

Success of Reclamation Efforts: Looks great, area beginning to reestablish --

Visual Water Inspection: (quality and flow) good flow and quality

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Several ducks, pheasant

Oneida Narrows Riparian Protection

ECC Project Monitoring Form

Project: Oneida Narrows Riparian Protection **Date:** 9-15-2015 **Observer(s):** Bryan Westerberg

Project Description and Photo Point: **Project Start Date:** 2010
Exclude cattle from the Oneida Narrows boater takeout on Bear River by installing fence and providing water source

Initial Monitor Date: **Project Finish Date:** 2010

Location and Baseline Data:
N 42.2125
W 111. 7807 Across from Oneida narrows boater take out

Fence line(s) Condition: Fence is in good condition, buck rail fence

Structure(s) Condition: Alternative water source is in good working condition

Success of Reclamation Efforts:

Visual Water Inspection: (quality and flow)

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Alexander North Planting Location

Alexander South Planting Location

ECC Project Monitoring Form

Project: Alexander Shrub Plantings **Date:** 9-15-2015 **Observer(s):** Bryan Westerberg

Project Description and Photo Point: **Project Start Date:** 2009
Native shrub planting in Alexander Reservoir shoreline buffer

Initial Monitor Date: **Project Finish Date:** 2010

Location and Baseline Data:

Two Locations N 42 39' 08.7" W 111 40' 19.7" N 42 38' 57.3" W 111 39' 30.7"
Around the peninsula and east side reservoir

Fence line(s) Condition:

Structure(s) Condition:

Success of Reclamation Efforts: There are some shrubs at both planting locations/survival rates are low but surviving shrubs look good and vigorous

Visual Water Inspection: (quality and flow)

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations: Geese

Midnight Mountain

ECC Project Monitoring Form

Project: Midnight Mtn.
Fencing

Date:

Observer(s): Bryan Westerberg

Project Description and Photo Point:
Build fencing around sensitive stream source

Project Start Date: 2010

Initial Monitor Date:

Project Finish Date: 2010

Location and Baseline Data:

N 42 16' 37"

W111 32' 36"

Fence line(s) Condition: Did not visit the site this season.

Structure(s) Condition:

Success of Reclamation Efforts:

Visual Water Inspection: (quality and flow)

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Kackley Springs Fish Trap

ECC Project Monitoring Form

Project: Kackley Springs Fish
Trap

Date: 9-15-2015

Observer(s): Bryan Westerberg

Project Description and Photo Point:

Project Start Date: 2010

Design and build a structure to exclude nonnative fish from Kackley Springs

Initial Monitor Date:

Project Finish Date: 2010

Location and Baseline Data:

N 42 .5225

W 111. 796 Located where Kackley springs merges with the Bear River below Grace operation area

Fence line(s) Condition:

Structure(s) Condition: Good condition

Success of Reclamation Efforts: good, seeded areas have reestablished

Visual Water Inspection: (quality and flow) flow good, quality good

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Fish visible around trap, signs of beaver

Kackley Springs Reroute

ECC Project Monitoring Form

Project: Kackley Springs Reroute

Date: 9-15-2015

Observer(s): Bryan Westerberg

Project Description and Photo Point:

Project Start Date: 2009

Redirect current spring flow to a longer route through Kackley property. Remove dikes and other water control structures

Initial Monitor Date:

Project Finish Date: 2010

Location and Baseline Data: Just south of Grace operations and power plant.

Fence line(s) Condition:

Structure(s) Condition:

Success of Reclamation Efforts: Looks great, grasses reestablishing, native veg good, willow growth—new work around pound area—looks good

Visual Water Inspection: (quality and flow)

Flow is good, quality good

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Aquatic Nuisance Signage

ECC Project Monitoring Form

Project: Aquatic Nuisance signs

Date: 9-15-2015

Observer(s): Bryan Westerberg

Project Description and Photo Point:

Project Start Date: 2009

Install interpretive signage at high use boating and fishing areas warning of aquatic nuisance species

Initial Monitor Date:

Project Finish Date: 2009

Location and Baseline Data:

PacifiCorp boating ramps and rec sites along the Bear River

Fence line(s) Condition:

Structure(s) Condition: Signs good, some are somewhat weathered, but still readable

Success of Reclamation Efforts:

Visual Water Inspection: (quality and flow)

Road and /or Trail Condition:

Signage: Signs good, present

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Keetch Fish Screen

ECC Project Monitoring Form

Project: Keetch Fish Screen **Date:** 10-28-2015 **Observer(s):** Bryan Westerberg

Project Description and Photo Point: **Project Start Date:** 2005
Convert 198 acres of cropland from flood irrigation to sprinkler. Pumping plant and water control system and screen

Initial Monitor Date: **Project Finish Date:** 2008

Location and Baseline Data:
W-111.2884 N42.2517

Fence line(s) Condition:

Structure(s) Condition: Pumping plant and screen good condition

Success of Reclamation Efforts:

Visual Water Inspection: (quality and flow)

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Bailey Creek Fencing

ECC Project Monitoring Form

Project: Bailey Creek Fencing

Date: 9-15-15

Observer(s): Bryan Westerberg

Project Description and Photo Point:

Project Start Date: 2010

Build 500 ft of riparian fence at the headwaters of Bailey Creek

Initial Monitor Date:

Project Finish Date: 2010

Location and Baseline Data:

W-111.6003

N42.5595

Trailhead is located along old Oregon Road in the Bailey Creek subdivision-fencing is about 3 miles up ATV trail

Fence line(s) Condition: Good condition, no cattle present

Structure(s) Condition:

Success of Reclamation Efforts:

Visual Water Inspection: (quality and flow)

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Mule deer, grouse

Battle and Mink Creek

ECC Project Monitoring Form

Project: Battle and Mink Creek

Date: 9-15-2015

Observer(s): Bryan Westerberg

Project Description and Photo Point:

Project Start Date: 2010

Relocate six corrals from the Battle and Mink Creek watersheds

Initial Monitor Date:

Project Finish Date: 2010

Location and Baseline Data:

N 42° 12' 18.3"

W111° 45' 35.6"

Fence line(s) Condition:

Structure(s) Condition: good condition

Success of Reclamation Efforts:

Visual Water Inspection: (quality and flow)

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Bailey Creek Culvert

ECC Project Monitoring Form

Project: Bailey Creek Culvert

Date: 9-15-2015

Observer(s): Bryan Westerberg

Project Description and Photo Point:

Project Start Date: 2007

- Culvert replacement to remove aquatic barrier

Initial Monitor Date:

Project Finish Date: 2008/ Lower culvert not complete

Location and Baseline Data:

- Bailey Creek Road

Fence line(s) Condition:

Structure(s) Condition: (diversions, fish screens, buildings)

- Structure in good condition, bridge good condition

Success of Reclamation Efforts:

Visual Water Inspection: (quality and flow)

- Flow is good

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Laurie Harris Spring

ECC Project Monitoring Form

Project: Laurie Harris Spring

Date: 9-15-2015

Observer(s): Bryan Westerberg

Project Description and Photo Point:

Project Start Date: 2007

- Winter feedlot relocation-alternate water source-stream reclamation-grazing removal

Initial Monitor Date:

Project Finish Date: 2008

Location and Baseline Data:

- Laurie Harris, 667 Gentile Road, Grace, Idaho

Fence line(s) Condition:

- Good working condition

Structure(s) Condition: (diversions, fish screens, buildings) work performed on spring boxes

Vegetation and Success of Reclamation Efforts:

- Vegetation looks good/Willows planted fall 2009/Willows growing

Visual Water Inspection: (quality and flow)

- Water quality improving

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Trout Creek Restoration

ECC Project Monitoring Form

Project: Trout Creek Restoration **Date:** 9-15-2015 **Observer(s):** Bryan Westerberg

Project Description and Photo Point: **Project Start Date:** 2007
• Reclamation of Trout Creek

Initial Monitor Date: **Project Finish Date:** 2008

Location and Baseline Data:

-111.7019 42.4596
Lego rd

Fence line(s) Condition:

Structure(s) Condition: (diversions, fish screens, buildings)

Vegetation and Success of Reclamation Efforts:

- Vegetation in good condition

Visual Water Inspection: (quality and flow)

- Quality good

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

- Lots of fish in Trout Creek

Whiskey Creek

ECC Project Monitoring Form

Project: Whiskey Creek **Date:** 9-15-2015 **Observer(s):** Bryan Westerberg

Project Description and Photo Point: **Project Start Date:** 2008
• Stream reclamation /reroute channel

Initial Monitor Date: **Project Finish Date:** 2009

Location and Baseline Data:

Fence line(s) Condition:

Structure(s) Condition: (diversions, fish screens, buildings)
Good condition

Success of Reclamation Efforts:
Good condition

Visual Water Inspection: (quality and flow)
good

Road and /or Trail Condition:
Good

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Lower Trout Creek

ECC Project Monitoring Form

Project: Lower Trout Creek Restoration **Date:** 9-15-2015 **Observer(s):** Bryan Westerberg

Project Description and Photo Point:

- Reclamation of Trout Creek

Project Start Date: 2011

Initial Monitor Date:

Project Finish Date: 2012

Location and Baseline Data:

-111.7019 42.4596

Lego rd

Fence line(s) Condition:

Structure(s) Condition: (diversions, fish screens, buildings)

Vegetation and Success of Reclamation Efforts:

- Vegetation in good condition

Visual Water Inspection: (quality and flow)

- Quality good

Road and /or Trail Condition:

Signage:

Ovid Corral Relocation

ECC Project Monitoring Form

Project: Ovid Corral Relocation

Date: 10-28-2015

Observer(s): Bryan Westerberg

Project Description and Photo Point:

- Relocate corral off waterway

Project Start Date: 2011

Initial Monitor Date:

Project Finish Date: 2013

Location and Baseline Data:

- Landark Rd Ovid, Idaho

Fence line(s) Condition:

Structure(s) Condition: (diversions, fish screens, buildings)

- Good condition,

Success of Reclamation Efforts:

Visual Water Inspection: (quality and flow)

- Quality good

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Eight Mile Canyon #1

ECC Project Monitoring Form

Project: Eight Mile Canyon #1

Date:9-15-2015

Observer(s): Bryan Westerberg

Project Description and Photo Point:

- Realign trail 332 out of riparian area

Project Start Date:2007

Initial Monitor Date:

Project Finish Date:2008

Location and Baseline Data:

- Caribou National Forest/ 8 Mile Canyon

Fence line(s) Condition:

Structure(s) Condition: (diversions, fish screens, buildings)

Success of Reclamation Efforts:

- Old trail not marked, “no travel sign” not present, travel still continuing

Visual Water Inspection: (quality and flow)

Road and /or Trail Condition:

- New trail looks good-old trail still being traveled needs signage

Signage:

Agricultural Uses:

Coop Trail Crossing Bridge

ECC Project Monitoring Form

Project: Coop Crossing and Trail 308 Improvements **Date:** 10-28-2015 **Observer(s):** Bryan Westerberg

Project Description and Photo Point: **Project Start Date:** 2/27/204
Install bridge at coop creek trail crossing, improve trail

Initial Monitor Date: **Project Finish Date:** 9/2015

Location and Baseline Data:

USFS motorized trail 308 is located eight miles west of Georgetown, Idaho. Trailhead access is via Skinner Canyon Road (FSR 403) and FSR 985. Trail 308 crosses the headwaters of Coop, Beaver, North Stauffer, and South Stauffer creeks. The proposed trail bridge location on Coop Creek is 0.3 miles from the trailhead at these coordinates:

Existing ford; CONUS NAD83 Zone 12T 457565E, 4700523N

New Bridge Location: CONUS NAD83 Zone 12T 457517E, 4700506N

Problems or trespass, and any necessary corrective actions:
The screens design makes it very difficult to operate correctly. Water levels and screen positioning have to be constantly adjusted. Because of the need for constant adjustment on this screen most monitoring is done by the water master when he is adjusting his flow. I still check this screen periodically to replace worn out items and make sure it is functioning properly however the water master has been doing a good job of keeping things adjusted correctly.

Cub River Albert Moser Fish Screen

Problems or trespass, and any necessary corrective actions:

Early this summer the main support shafts on both water wheels broke leaving all four screens inoperable. This is the third time this has happened. My suggested course of action is one of two things. The first being to cut out and remove the 1 ½ " shafts on both water wheels and replace them with 2" shafts. In addition to that, cutting off half of the large paddles on each water wheel to reduce weight on these shafts as well as reduce torque. The second option is to get power to the site and convert each of the drums to an electric motor driven system. This would eliminate any and all continuing issues with the water wheel system.

Ovid Fish Screen

ECC Project Monitoring Form

Ovid Creek

Project: Ovid Fish Screen **Date:** 12/16/15 **Observer(s):** Kyle Ferrell

Project Description and Photo Point: Irrigation Screen to limit fish entrainment.
Photo is a view of screen structure looking upstream.

N/A

Agricultural Uses:

N/A

Problems or trespass, and any necessary corrective actions:

This screen has a problem with entrained fish that make it into the top end of the screen and have a hard time finding the bypass pipe to make it back to the creek. I believe that the necessary corrective action for this problem is to completely rebuild this structure. The reason that the bypass pipe is hard for the fish to find is because it is just below the waterline. The bypass pipe is in this position because this screen structure was originally built to be a Goobi bubbler (a type of flat plate screen) and later retrofitted to be a drum screen.

Davis Fish Screen

N/A

Road and /or Trail Condition:

Good

Signage:

Keep out signs have been posted to deal with theft and vandalism due to the close proximity to a camping area.

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

This screen does not operate properly due to very low water velocity in the screen. Preventing the water wheel from turning. However, for the time being this has been manageable because the water users take such a small amount of water. To remedy this problem I suggest installing a much smaller lighter water wheel and possibly lowering the level of the culvert just downstream of the structure. Beavers are also starting to become a problem at this site. May require future trapping and removal.

Appendix H

2016 Implementation Schedule

Table H-1. Bear River Hydroelectric Project - 2016 Implementation Schedule						
License Article	Action	Deliverable	Start Date	End Date	Next Deliverable Date	Comments
Art. 401	2015 Annual Report	Report in consultation with ECC	1-Jan-05	22-Dec-33	1-March-15	Includes results of studies/monitoring, description of anticipated activities, report of funding accounts, and compliance with operational requirements. Draft report to ECC for 30-day review prior to the FERC submittal.
Art. 402	ECC participation/oversight	Up to 1 FTE and normal administration	1-Jan-05	22-Dec-33	Ongoing	Provide admin support, point of contact for ECC, some grant writing, attempt to identify willing landowners, apply for permits as necessary for actions; annual report and grant fund administration.
Art. 403	Bonneville Cutthroat Trout (BCT) Restoration Plan	Restoration Plan in Consultation with ECC. In 2016 the ECC will discuss the need to update the plan.	1-Jan-07	1-Nov-08	23-Dec-08	This project was completed in 2008.
Art. 403	Genetic Sampling Study	Bonneville Cutthroat Trout genetic data collection and analysis	1-Sep-04	22-Dec-11	1-Sep-07	This project was completed in 2007.
Art. 403	Aerial Photography	Thermal images of Bear River	1-Jun-05	22-Dec-11	27-Jan-07	This project was completed in 2007.
Art. 403	Telemetry Study	Bonneville Cutthroat Trout Telemetry Report	1-May-05	22-Dec-11	11-Feb-09	This project was completed in 2009.
Art. 403	Broodstock Development	Develop a Bonneville cutthroat trout broodstock at the Grace Hatchery in Grace Idaho.	22-Dec-08	22-Dec-10	22-Dec-10	This project was completed in 2010.
Art. 404	Conservation Hatchery Program	Fund Bonneville cutthroat trout hatchery operations	22-Dec-10	22-Dec-33	22-Dec-15	\$100K/yr, for remaining term of license; funds may also be used for habitat restoration, land & water, or fish passage; may carry over to subsequent years.

Table H-1. Bear River Hydroelectric Project - 2016 Implementation Schedule						
License Article	Action	Deliverable	Start Date	End Date	Next Deliverable Date	Comments
Art. 405	Habitat Restoration Program	Funding for habitat and water quality enhancements	22-Dec-04	22-Dec-33	22-Dec-15	\$167K/yr; funds may also be used for land and water acquisition or fish passage; may carry over to subsequent years. Annual grant cycle begins with release of funding flyer in January. Projects are typically ranked at March subcommittee meeting and approved at April ECC meeting.
Art. 406	Land and Water Acquisition Program	Funding land (fee title and conservation easements) and water acquisition	22-Dec-04	22-Dec-33	22-Dec-15	\$300K/yr; funds may also be used for habitat restoration or fish passage; may carry over to subsequent years. Funds may only be used for habitat restoration on lands acquired under this fund or for fish passage if it is for one of the PacifiCorp facilities and fish passage is prescribed by USFWS. Ongoing grant cycle throughout year.
Art. 407	Monitoring in Black Canyon	Funding for surveys, studies, reports, six-year study term	1-Apr-05	1-Apr-11	2-May-11	This project was completed in 2011.
Art. 408 (Grace MSF modified by Cove Decommissioning Order)	Implement minimum flows	Documented annually to the FERC	2-Dec-05	22-Dec-33	1-March-15	Soda - 150 cfs downstream; Grace - 65 cfs; Oneida - 251 cfs downstream.
Art. 408	Maintenance schedule consultation	Documented annually to the FERC	1-Apr-04	22-Dec-33	31-March-15	Consult annually (prior to April 1) with ECC to minimize drawdowns and coordinate maintenance activities; consult with ECC in emergencies if practicable.
Art. 409	Fish Stranding Minimization Plan	Documentation of plan compliance in Annual Report.	30-Sept-04	22-Dec-33	Suspended	Continued suspension of Art. 409 Fish Stranding Minimization Plan was confirmed by the FERC on October 17, 2012, in an issuance that confirmed that PacifiCorp had complied with Ordering paragraph (b) of the FERC's June 3, 2011 Order Approving Suspension of the Fish Stranding Minimization Plan.

Table H-1. Bear River Hydroelectric Project - 2016 Implementation Schedule						
License Article	Action	Deliverable	Start Date	End Date	Next Deliverable Date	Comments
Art. 410	Kackley Springs	Implement flow redirection plan.	22-Dec-08	22-Dec-09	22-Dec-09	This project was completed in 2009.
Art. 412	Implement ramp rates	Documented annually to the FERC in the annual report.	22-Dec-04	22-Dec-33	1-Mar-2015	Soda - 1.2 ft/hr, ascending and descending measured at USGS gage 10079500; Oneida - 2.0 ft/15 min on the descending arm at USGS gage 10086500. Black Canyon Boater Flow – 1 ft/hr on the descending arm.
Art. 413	Water quality monitoring and reporting	Bear River Project 401 Clean Water Act Certification.	1-May-04	30-Sep-09	1-Mar-09	This project was completed in 2009.
Art. 415	Operations and Compliance Plan Implementation	Documented annually to the FERC	22-Dec-04	22-Dec-33	1-March-15	On-going; provides proper functioning equipment used to meet minimum flow and ramping requirements, reporting requirements, and reasonable tolerances.
Art. 415	Operations and Compliance Plan	Document changes/updates	1- Oct-05	28-Feb-06	Ongoing	On-going compliance will be maintained per Operations Compliance Plan approved by the FERC September 10, 2014.
Art. 416	Oneida campground funding	Reimbursement to BLM	1-May-05	22-Dec-33	1-Oct-15	Annual \$10K reimbursement to BLM upon invoice; funds do not carry over.
Art. 416	Maintain recreation sites	Maintain constructed facilities	1-May-05	22-Dec-33	Ongoing	Maintain sites as described in Recreation and Traffic Safety Plan and Site Management Plans.
Art 416	Assistance to Caribou County	Check to County	1-May-05	22-Dec-33	1-Oct-15	Annual \$3K reimbursement to county; does not carry over.
Art. 417	Maintain signs along Oneida road	Review, repair and replace signs as needed.	1-May-05	22-Dec-33	15-May-15	Annually replace or repair traffic signs along the Oneida road (\$1K).

Table H-1. Bear River Hydroelectric Project - 2016 Implementation Schedule						
License Article	Action	Deliverable	Start Date	End Date	Next Deliverable Date	Comments
Art. 417	Oneida Road Improvements	Complete Road Work	1-Aug-06	1-Jul-07	1-Oct-08	This project was completed in 2008. Annual maintenance continues.
Art. 417	Law enforcement	Check to Franklin County Sherriff's Department	1-May-05	22-Dec-33	1-Oct-15	Annual \$3K funding to law enforcement agency and use of company's radio frequency, does not carry over.
Art. 417	Dust abatement	Dust Abatement	1-May-05	22-Dec-33	Summer-15	Up to twice annually, on the Oneida Project road 100 ft. on either side of Maple Grove and Redpoint Campgrounds.
Art. 418	Grace Spill Gate	Gates installed and functioning	1-Apr-06	22-Dec-33	1-Oct-08	This project was completed in 2008.
Art.419	Whitewater flows in Black Canyon	Documentation in Annual Report	1-May-05	22-Dec-33	1--Mar-15	Revised program will be administered and reported on per Boater Flow Agreement approved by ECC and the FERC in 2012.
401 Cert.	Oneida Operations Report	Annual Report to IDEQ in November.	30-Nov-05	30-Nov-33	30-Nov-15	Record of water releases for power, irrigation, or flood control. Submit to IDEQ
Art. 420	Boatable flows in Oneida reach	Documentation in annual report	1-May-05	22-Dec-33	Ongoing	With available water, target is 900 cfs below powerhouse between Memorial Day and Labor Day.
Art. 421	Black Canyon Boatable flow release schedule	Develop annual schedule and submit to the FERC.	5-Mar-08	22-Dec-33	20-March-15	Starting in 2012, all releases will be scheduled between April 1 and June 5. Four weekend releases to be scheduled: three two-day events and one three-day event. Schedule to be coordinated between American Whitewater, PacifiCorp and ECC. The ECC and American Whitewater approved an earlier schedule for 2016 that starts on March 26.

Table H-1. Bear River Hydroelectric Project - 2016 Implementation Schedule						
License Article	Action	Deliverable	Start Date	End Date	Next Deliverable Date	Comments
Art. 422	Flow Phone and website	Maintain website, flow phone and prepare annual schedule of whitewater flows.	1-May-05	22-Dec-33	Ongoing	Website will present whitewater calendar dates; flows for current and prior 6 days in hourly averages, and 7-day forecast; gages linked to Flow Phone (daily) and website (4-hr intervals). Whitewater release calendar posting will be reported on website.
Art. 423	Protect historical resources	Continue to implement Interpretation and Education Plan, review of project activities and annual site monitoring.	2-Jan-05	22-Dec-33	22-Jan-15	The FERC Order approving HPMP was received in 2008. Implementation of plan to be reported annually to the FERC prior to January 22 of each year.
Art. 424 and 425	Land Management	Land Management Plan and site plan implementation. Monitoring of all lands and noxious weed control.	2-Jan-05	22-Dec-33	Ongoing	Site plans developed in consultation with the ECC; buffer zone management through modified leases. Maintenance of exclusion fences, treatment of noxious weeds and monitoring of user or trespass impacts. An updated Land Management and Buffer Zone Plan was approved by the FERC July 17, 2014. An updated Oneida Site Plan was submitted to the FERC June 3, 2015, receipt was acknowledged by the FERC December 7, 2015.
Art. 426	Fencing in Cove Bypass Reach	Fences	1-Apr-05	22-Dec-33	Initial construction complete (Maintenance on-going).	Fencing of selected riparian areas in Cove bypass reach, while allowing landowners to exercise stock watering rights. This project is complete. Maintenance of fences to be completed by PacifiCorp through life of license. Annual monitoring is conducted along with fence maintenance.

Table H-1. Bear River Hydroelectric Project - 2016 Implementation Schedule						
License Article	Action	Deliverable	Start Date	End Date	Next Deliverable Date	Comments
Art. 428	Interests in project lands	Report to the FERC	22-Dec-04	22-Dec-33	31-Jan-15	Annually file with the FERC a report of any easement or rights-of-way granted in the previous year no later than January 31. Sixty days before conveying any interest in project lands a letter must be submitted to the FERC.
Art. 429	Report on Cove Decommissioning Expenses	Report to ECC and the FERC	5/1/2006	3/31/2007	Complete	This requirement was completed in 2007.
