# Bear River Hydroelectric Project

## 2021 Draft Annual Report

---

*Summary of License Implementation and Compliance*

### **1.0 Introduction**

Located on the Bear River in southeastern Idaho, the Bear River hydroelectric developments consist of three reservoirs and powerhouses that together have a total installed capacity of 77 megawatts of electrical generation: the Soda, Grace, and Oneida developments. Construction of these developments, known collectively as the Bear River Hydroelectric Project (FERC Project No. P-20) was authorized by the U.S. Secretary of Interior in 1907 for irrigation, flood control, and hydroelectric generation. Construction of the dams began in 1909 and was completed in 1927, during which time they were originally licensed. A fourth hydroelectric development, Cove, was part of the original hydroelectric project and was decommissioned in 2006.

The company acquired water rights from various holders during the development years of these projects in exchange for perpetual contracts to deliver irrigation water from Bear Lake. Water rights were further defined by court decrees, the Bear River Compact (as revised), and other subsequent agreements. The Bear River Project is largely dependent on irrigation water pumped from Bear Lake into the river system to generate power.

Between 1976 and 1981, the Federal Energy Regulatory Commission (FERC) issued new licenses for the Soda, Grace-Cove, and Oneida projects. These FERC licenses expired in October 2001.

In the late 1990s, as the expiration of the licenses approached, PacifiCorp initiated the relicensing process. After extensive studies and agency consultation, this process culminated in the signing of the Bear River Settlement Agreement (Settlement Agreement) August 28, 2002.

The FERC approved the Settlement Agreement and issued a new 30-year license (the License) for the Bear River Project December 22, 2003. The Settlement Agreement and new license requires the provision of recreation enhancements, minimum instream flows to benefit aquatic resources, funds to conserve and benefit natural resources within a defined action area, and other measures related to land management, protection of cultural resources, and restoration of Bonneville cutthroat trout (BCT). The Environmental Coordination Committee (ECC), a stakeholder group comprised of signatories to the Settlement Agreement, was formed to consult and make decisions regarding the use of funding, and implementation of the License and Settlement Agreement requirements.

The Settlement Agreement (Section 4.6) and License Article 401 specify that a detailed annual report on the activities of the ECC and implementation of protection, mitigation, and enhancement (PM&E) measures be prepared yearly throughout the term of the license.

This annual report fulfills these requirements for the report period of calendar year 2021.

## **1.1 Background**

On September 27, 1999, PacifiCorp filed applications for new licenses for the continued operation of the Soda, Grace, Cove, and Oneida hydroelectric developments, now known collectively as the Bear River Hydroelectric Project in Caribou and Franklin counties, Idaho.

A number of motions to intervene in the relicensing proceedings were filed by state and federal agencies, non-governmental agencies, and individuals. On February 13, 2002, the FERC issued a “Ready for Environmental Analysis” notice for the Bear River Hydroelectric Project.

On September 25, 2002, PacifiCorp filed an Offer of Settlement pursuant to the FERC Rule 602, 18 Code of Federal Regulations § 385.602 to resolve issues concerning the relicensing of the Bear River Hydroelectric Project.

Parties to the Settlement Agreement include PacifiCorp, U.S. Fish and Wildlife Service (USFWS), Bureau of Land Management (BLM), National Park Service (NPS), USDA-Forest Service (USFS), Shoshone-Bannock Tribes (Tribes), Idaho Department of Environmental Quality (IDEQ), Idaho Department of Fish and Game (IDFG), Idaho Department of Parks and Recreation (IDPR), Idaho Council of Trout Unlimited (TU), Idaho Rivers United (IRU), Greater Yellowstone Coalition (GYC), and American Whitewater (AW).

A draft environmental impact statement (EIS) was prepared and issued for public comment November 1, 2002. The final EIS was issued April 11, 2003. Both the draft and final EISs recommended adoption of the Settlement Agreement terms.

A FERC order approving the Settlement Agreement and issuing a new 30-year license for the Bear River Project was issued December 22, 2003. Copies of the Settlement Agreement and the License are available from the FERC upon request or on PacifiCorp’s website at:  
<https://www.pacificorp.com/energy/hydro/bear-river.html>.

The License required study of alternatives, including decommissioning, for the Cove hydroelectric development near Grace, Idaho. After alternative analysis, an agreement was reached with stakeholders and regulators to decommission Cove. PacifiCorp signed the Cove Settlement Agreement July 20, 2005. FERC issued the Cove Decommissioning Order May 23, 2006, and the dam and water conveyance structures were removed during the summer of 2006. Reclamation of the Cove project area, including the former dam and flume sites, was completed by late fall of 2006.

## **1.2 Environmental Coordination Committee**

Section 4 of the Settlement Agreement establishes a process to facilitate coordination and decision-making concerning implementation of Settlement Agreement measures, which was adopted in Article 402 of the new license. To accomplish this objective, Section 4.1 of the Settlement Agreement provides for the creation of the ECC consisting of representatives from the signing parties. The purpose of the ECC, discussed in Section 4, is to: 1) facilitate coordination and consultation on plans developed by PacifiCorp for the implementation of PM&E measures; 2) propose and approve appropriate PM&E measures; 3) establish appropriate monitoring criteria to evaluate the effects of PM&E measures; 4) coordinate the implementation of PM&E measures; 5) establish appropriate procedures for conducting activities; and 6) establish subcommittees, as necessary, to accomplish these objectives.

### **1.3 Report Organization**

This annual report provides the following information:

- Section 2.0 - Environmental Coordination Committee Activities
- Section 3.0 - Accomplishments
- Section 4.0 - Funding
- Appendix A: ECC Members, Alternates, and Authorized Signatories
- Appendix B: Grace-Cove Site Plan Compliance Monitoring and Performance Tracking
- Appendix C: Cove Shoreline Buffer Fence Annual Monitoring Report
- Appendix D: Oneida Site Plan Compliance Monitoring and Performance Tracking
- Appendix E: Soda Site Plan Compliance Monitoring and Performance Tracking
- Appendix F: Grace Dam and Last Chance Site Plan Compliance Monitoring and Performance Tracking
- Appendix G: Habitat Enhancement Project Monitoring
- Appendix H: 2022 Implementation Schedule

### **1.4 Reports and Studies Completed in 2021**

- The Oneida Development Water Year 2021 Operation Report was completed during the 2021 reporting period and submitted to the Idaho Department of Environmental Quality. A copy of the report is submitted along with this annual report to the FERC.
- The Historic Properties Management Plan Implementation 2020 Report was completed during 2021 and submitted to FERC, the United States Department of Interior (USDI) Bureau of Land Management, the Shoshone-Bannock Tribe, and the Idaho State Historical Preservation Office.

## **2.0 Environmental Coordination Committee Activities**

This section provides an overview of ECC roles and responsibilities according to the Settlement Agreement and as subsequently implemented in compliance with License Article 402. It also presents a summary of ECC meetings held during the 2021 report period, including major discussion points and decisions made at each meeting.

### **2.1 ECC Roles and Responsibilities**

The purpose and role of the ECC, as defined in Section 4.1 of the Settlement Agreement, is to facilitate coordination and implementation of PM&E measures. Specifically excluded from ECC responsibility and authority is the release of water from Bear Lake for any reason.

The structure and process of the ECC is intended to provide a forum to address time-sensitive matters; provide early warning of problems; and coordinate member organization actions, schedules, and decisions to save time and expense. The ECC strives to make collaborative decisions, based on consensus, while implementing the Settlement Agreement and the License.

The ECC is responsible for the following measures, pursuant to the Settlement Agreement (Section 4.1):

- Identify and prioritize implementation projects (habitat enhancement and land and water acquisition).
- Facilitate coordination and consultation between PacifiCorp and the other parties on plans developed by PacifiCorp for the implementation of PM&E measures.
- Coordinate and monitor implementation of PM&E measures and review ongoing monitoring requirements by PacifiCorp.
- Propose and approve PM&E measures for BCT and other aquatic resources pursuant to the Settlement Agreement.
- Review and comment on the draft annual report of ECC activities and implementation of the PM&E measures.
- Establish appropriate procedures for conducting its activities consistent with the Settlement Agreement, including protocols for public involvement and community outreach.
- Establish subcommittees as necessary for the purpose of achieving objectives described above and determining size, membership, and procedures of such committees.

## 2.2 ECC Members

The parties to the Settlement Agreement have each appointed a member and an alternate to the ECC. Appendix A lists the members, their alternates, and authorized signatories.

During the 2021 reporting period, the ECC held six regular meetings. The May, August, and October meetings were held in Pocatello, Idaho. The January, March, and December meetings were held remotely. The primary purpose of the meetings was to report on and coordinate grant fund projects, to discuss results of studies funded by the ECC, and to remain informed of progress on the BCT conservation hatchery program. Formal ground rules established and adopted by the ECC provide the functional framework for this collaborative work. ECC member participation in meetings during 2021 is shown in Table 1.

**Table 1. ECC Member Meeting Participation during 2021**

ECC Member	Affiliation	ECC Meeting Date					
		1/20	3/17	5/19	8/18	10/20	12/08
Ryan Beatty Michael Kuyper, Alternate	Bureau of Land Management	X	X		X	X	X
Allison Michalski Kathy Rinaldi, Alternate	Greater Yellowstone Coalition			X			
Kevin Lewis	Idaho Rivers United						
Carson Watkins Ryan Hillyard, Alternate	Idaho Department of Fish and Game	X	X	X	X	X	X
Kirk Rich	Idaho Department of Parks and Recreation						
Matt Bringhurst Jeremy Jirak, Alternate	U.S. Fish and Wildlife Service	X		X		X	X
Charlie Vincent Kevin Colburn, Alternate	American Whitewater	X	X	X	X	X	X
Hunter Osborne	Shoshone-Bannock Tribes						
Corey Lyman Lee Mabey, Alternate	USDA-Forest Service	X	X	X	X	X	X
Jim DeRito Warren Colyer, Alternate	Trout Unlimited	X	X	X	X	X	X
Lynn Van Every Matt Schenk, Alternate	Idaho Department of Environmental Quality	X	X	X	X	X	X
Susan Rosebrough Dan Miller, Alternate	National Park Service						
Mark Stenberg Eve Davies, Alternate	PacifiCorp	X	X	X	X	X	X

ECC members also conducted a field review of conservation properties and projects on June 16, 2021. In addition, an ECC subcommittee met to review and rank habitat enhancement fund proposals on April 21, 2021.

## 2.3 Overview of the Meetings

This section summarizes the issues covered and areas of consensus reached during ECC meetings over the 12-month report period.

### ECC Meeting #1 – January 20, 2021

- Reviewed the ECC's 2021 calendar, the draft 2021 whitewater boater flow calendar, ECC fund balances, and the 2021 grant process.
- Discussed possible late season whitewater boater flows during 2021 due to a maintenance outage at Grace.
- Heard updates on habitat enhancement projects, Paris hydroelectric project decommissioning, and IDFG projects.
- Approved funding for Phoslock treatment of the BCT broodstock ponds in the amount of \$1,685 per pond, to be paid from the habitat enhancement fund. IDEQ to provide water quality sampling.
- Heard an update on Sagebrush Steppe Land Trust's (SSLT) long-term stewardship account.
- Heard updates on current land and water projects from SSLT.
- Approved the B&R Ranch Project Scoping Report.

### ECC Meeting #2 – March 17, 2021

- Reviewed the ECC's calendar, fund balances, and the 2021 grant process.
- Heard updates on the 2020 annual report, Paris decommissioning, current habitat enhancement projects, and a landowner project on St. Charles Creek.
- Continued discussion of the 2021 whitewater boater flow calendar.
- Reviewed 2021 habitat enhancement proposals and identified outstanding information needs.
- Heard updates on current land and water projects from SSLT.
- Reviewed potential 2021 projects with SSLT and set priorities for site visits.
- Designated *Boa Ogoi*, Johnson - Stock Valley, and Smith - Bear River as subject properties for conservation easements.
- Heard a presentation from Blue Forest, including an overview of the organization and the concept of environmental bonding.

## **Funding Proposal Subcommittee Meeting – April 21, 2021**

- Reviewed and ranked 2021 habitat enhancement grant proposals. Eleven applications were considered for funding.

## **ECC Meeting #3 – May 19, 2021**

- Reviewed the ECC's calendar, email decisions, and fund balances.
- Set the itinerary for the June 16, 2021 field review of projects/site visits.
- Heard updates on current habitat enhancement projects, 2021 whitewater boater flows, Blue Forest, and Paris decommissioning.
- Reviewed and approved the Funding subcommittee's recommendations for 2021 habitat enhancement projects. Eleven projects were approved, totaling \$360,750.

## **Field Review – June 16, 2021**

- Held site visits with SSLT to three subject properties: *Boa Ogoi*, Smith-Bear River, and Johnson-Stock Valley.

## **ECC Meeting #4 – August 18, 2021**

- Reviewed the ECC's calendar, email decisions, and fund balances.
- Heard updates on habitat enhancement projects, 2021 whitewater boater flows, Blue Forest, Paris decommissioning, and Bear Creek conservation planning.
- Reviewed the ECC's governance and acculturation for new members.
- Heard updates on current land and water projects from SSLT.
- Discussed the June 16 field review of projects/site visits.
- Reviewed and approved funding for the Smith - Bear River and Johnson - Stock Valley conservation easements.
- Reviewed a request to provide funding for a deed correction for the Jensen property.
- Heard information on a proposed update to the Oneida Site Plan by PacifiCorp.

## **ECC Meeting #5 – October 20, 2021**

- Reviewed the ECC's calendar, email decisions, and fund balances.
- Heard updates on 2021 whitewater boater flows, habitat enhancement projects, and Paris decommissioning.
- Heard updates on current land and water projects from SSLT.

- Reviewed and approved a request for funding for a deed correction for the Jensen property in the amount of \$2,500, to be paid from the ECC's land and water fund.
- Continued discussion of the proposed *Boa Ogoi* conservation easement.
- Approved a grant request for the *Boa Ogoi* conservation easement in the amount of \$59,184, to be paid from the ECC's land and water acquisition fund.
- Received an initial briefing on PacifiCorp's Dry Canyon Pumped Storage Hydropower Project Preliminary Permit Application.

### **ECC Meeting #6 – December 8, 2021**

- Reviewed the ECC's calendar, email decisions, and fund balances.
- Reviewed and approved the ECC's 2022 calendar; reviewed and reached consensus on the 2022 whitewater boater flow calendar.
- Heard updates on current habitat enhancement projects and Paris decommissioning.
- Reviewed requests for letters of support from the Northwestern Band of Shoshone and Trout Unlimited for WaterSMART grant applications.
- Conducted a review of conservation easement acquisition steps in the PacifiCorp/SSLT memorandum of agreement.
- Reviewed and approved SSLT's annual maintenance invoice.
- Reviewed potential 2022 conservation easement projects with SSLT.

### **Consensus Decisions Made by E-mail Vote**

In 2006, the ECC agreed to consensus decision-making by email vote. The following consensus decisions were made by ECC members via email vote during 2021:

- 1) Approved a budget increase of \$20,000 for Bear Creek beaver dam analogs to be paid from the habitat enhancement fund. Vote called by Stenberg, April 5, 2021.
- 2) Approved a modified 2021 Black Canyon whitewater boater flow schedule. Vote called by Stenberg, April 5, 2021.
- 3) Approved SSLT's 2021 capacity funding invoice in the amount of \$35,000 to be paid from the ECC's land and water fund. Vote called by Hugentobler, June 18, 2021.
- 4) Approved draft notes from the May 2021 ECC meeting. Vote called Hugentobler, June 29, 2021.
- 5) Approved an ECC letter of support for Trout Unlimited's grant application to the Wildlife Conservation Society. Voted called by Stenberg, July 1, 2021.

- 6) Approved an ECC letter of support for Pheasants Forever's Conservation Innovation Grant entitled Watershed Resilience Bond Development in the Bear River Basin. Vote called by Stenberg, July 19, 2021.

Email voting participation by ECC members during 2021 is shown in Table 2.

**Table 2. ECC Member Participation in Email Voting during 2021**

ECC Member	Affiliation	Email Vote <sup>1</sup>					
		1	2	3	4	5	6
Ryan Beatty Michael Kuyper, Alternate	Bureau of Land Management	Yes	Yes	Yes	Yes	Yes	Yes
Allison Michalski Kathy Rinaldi, Alternate	Greater Yellowstone Coalition	Yes	Yes	Yes	Yes	--	Yes

1 -Email votes are presented chronologically, as listed above. Results of email voting were reviewed at the next regular ECC meeting. A complete record of each email vote was then included in the notes from that meeting.							

### **3.0 Accomplishments**

This section presents the actions taken during 2021 toward requirements in the Settlement Agreement and the License for the Bear River Hydroelectric Project, as defined in the FERC's Order Approving Settlement Agreement and Issuing New License from December 22, 2003. The agreed-upon schedule for implementing PM&E measures is described in Exhibit 1 of the Settlement Agreement. A modified schedule was proposed and approved in the Implementation Plan prepared for the Bear River Project.

The PM&E schedule of measures in the Settlement Agreement was modified due to requirements in the new license. With each annual report, an implementation schedule for the upcoming year will be presented that updates and replaces the implementation schedule filed with the Implementation Plan May 28, 2004, and the schedule included in the previous annual report. The 2022 Implementation Schedule is included in Appendix H of this report.

A discussion of the activities associated with each of the PM&E measures is presented in Table 3 by License Article for the report period January–December 2021. A description of funding amounts deposited and disbursed during 2021 is provided in Section 4.0 - Funding.

**Table 3. Accomplishments during the 2021 Report Period by License Article**

License Article	Accomplishments 2021	Comments	Future Plans 2022
401	2020 Annual Report was filed with the FERC March 1, 2021.	Annual Report preparation and filing. To include studies and reports completed along with accounting for funds.	2021 Annual Report filed before March 1, 2022.
402	Environmental Coordination Committee meetings were conducted on January 20, March 17, May 19, June 16 (field review of projects), August 18, October 20, and December 8, 2021.	ECC meetings were facilitated by PacifiCorp.	Meetings will continue approximately on a bi-monthly schedule through 2022. The main agenda items for regular meetings will be grant administration for the habitat enhancement and land and water acquisition fund, along with the Bonneville cutthroat trout conservation hatchery program.
403	No new actions.	IDFG released the first Bonneville cutthroat trout produced at the hatchery at Kackley Springs April 20, 2011. IDFG provided a final report of broodstock development activities dated January 24, 2012.	This license article is complete.
404	During 2021, IDFG released 25,123 hatchery-produced Bonneville cutthroat trout (BCT) into Trout Creek, Whiskey Creek, Kackley Spring, Kackley Pond, Harris Spring, and the Bear River. Currently there are 22,546 BCT at the Grace Hatchery that will be released in the fall of 2022.	A Conservation Hatchery Agreement was executed with IDFG March 13, 2011. The Conservation Hatchery Program commenced December 22, 2011.	IDFG will continue to produce BCT at the Cove Broodstock Ponds and the Grace Hatchery. Conservation hatchery support payment will be made in 2022.
405	Eleven funding requests were ranked by an ECC subcommittee on April 21 and approved at a May 19 ECC meeting.	Eleven habitat enhancement projects were approved for funding during 2021: <ul style="list-style-type: none"> <li>• Boa Ogoi Battle Creek Habitat Enhancement, Phase 1</li> <li>• Davis Diversion Fish Screen and Road Improvements</li> <li>• Dip Creek Riparian Fencing</li> <li>• Fish Screen Repairs</li> <li>• Fish Screen Tender</li> <li>• Kackley Pond Demolition Design Support</li> <li>• Paris Canyon Livestock Water Pipeline</li> <li>• Stauffer Creek Fish Passage, Riparian, and Aquatic Habitat Improvement Project, Phase 1</li> <li>• Stauffer Creek/Oxborrow Diversion Design</li> <li>• Thomas Fork Diversion Design</li> <li>• USFS Eightmile Creek Water Quality/Habitat</li> </ul>	Subcommittee is scheduled to evaluate new projects April 21, 2022 and will present recommendations to the ECC at its May 19, 2022 meeting.

License Article	Accomplishments 2021	Comments	Future Plans 2022
406	No conservation properties were acquired in 2021. Three conservation easement grant requests were approved in 2021. No property acquisitions were finalized.		<p>Because of the opportunistic nature of Land and Water Acquisition Fund proposals, they are evaluated for funding at any time of the year.</p> <p>The conservation easement acquisition that the ECC obligated match for in 2019 and the NRCS approved a grant for in 2020 is expected to close in 2022. Final schedule for the other three conservation easement projects has not been set at the time of this report.</p>
407	No new actions.	The final report was transmitted to the FERC with the January 31, 2012 report on Boater Flows.	Activities under this license article are complete.
408	Notification of annual maintenance activities and timeframes was given to the ECC by the Environmental Coordinator on April 2, 2021 and October 1, 2021.	<p>The licensee shall maintain continuous minimum bypass flows from the project development as follows:</p> <p>(a) Below the Soda Dam: year-round minimum flow of 150 cfs, or inflow into the Soda reservoir, whichever is less;</p> <p>(b) Grace bypassed reach: a year-round minimum bypass flow of 63 cfs or inflow, whichever is less, in addition to 2 cfs leakage below the Grace Dam;</p> <p>(c) Oneida reach below the powerhouse: a year-round minimum flow of 250 cfs or inflow, whichever is less, in addition to 1 cfs leakage below Oneida Dam.</p>	<p>The minimum stream flow requirements will continue in accordance with procedures described in the Operations and Compliance Plan.</p> <p>Annual maintenance notifications will be given to the ECC before March 31, 2022.</p>
409	No new actions.	On May 18, 2012, the Final Agreement on Boater Flows was filed with the FERC. This agreement included the ECC's recommendation to not reinstate Art. 409. Permanent suspension of Art.409 Fish Stranding Minimization Plan was approved by the FERC October 17, 2012, in an issuance that confirmed that PacifiCorp had complied with Ordering paragraph (b) of the FERC's June 3, 2011, Order Approving Suspension of the Fish Stranding Minimization Plan.	No future action is required.
410	No new actions.	Kackley Springs Reroute Project	This license article is complete. Future land management activities around the springs will be conducted in accordance with the Grace/Cove Site Plan.

License Article	Accomplishments 2021	Comments	Future Plans 2022
411	No new actions.	Dam Leakage Minimization Plan	On-going measurement in compliance with license.
412	Implement ramping rate limitations. Notification of annual maintenance activities and timeframes was given to the ECC by the Environmental Coordinator via email. See Article 408 summary.	Ramping rate limitations are being followed at Grace, Soda, and Oneida. In 2012, the ECC determined that a 1 ft/hr down ramp rate would be used for boater flows (see also summary for Art. 409, above).	The ramping rate limitations will continue in accordance with procedures described in the Operations and Compliance Plan.
413	No new actions.	Compliance with Clean Water Act Section 401 Certification.	Actions required under this license article are complete.
415	Ongoing.	Revised operations and compliance plan was approved by the FERC in Sept. 2014 and includes a description of equipment and methods for compliance with instream flow and ramping requirements.	Continue to operate the project per guidance of Art. 415, Operations and Compliance Plan approved September 16, 2014.
416/417	<ul style="list-style-type: none"> <li>• Park maintenance payment was made to Caribou County for 2021 funding.</li> <li>• Law enforcement payment was made to Franklin County for 2021 funding.</li> <li>• Dust abatement applications were made around the campgrounds and day-use area in the Oneida Canyon in 2021.</li> <li>• Oneida Campground maintenance payment was made to USDI-BLM for 2021 funding.</li> </ul>	Recreation Site Maintenance	<ul style="list-style-type: none"> <li>• Implement annual dust abatement measures</li> <li>• Maintain signs and recreation sites</li> <li>• Make annual payment to Caribou County</li> <li>• Make annual payment to USDI-BLM</li> <li>• Make annual payment to Franklin County Sheriff</li> <li>• Perform Recreation and Traffic Safety Plan and site plan recreation elements annual monitoring as specified.</li> </ul>
418	No new action.	Boating Flow Release Plan	Actions required under this license article are complete.
419	A total of nine boater flow releases were made on four weekends in 2021. During 2021, three two-day events and one three-day event were provided on the following dates: March 27 & 28; April 10 & 11; April 30-May 2; and September 11 & 12.	Boating Flow Release Schedule	Per the "Agreement for Black Canyon Boater Flows: Extended Study Period and Adaptive Management," four weekends of scheduled boater flows will occur, between April 1 and June 5. In 2016, the start of the season was moved forward one week from April 1. A down ramp rate of 1 ft/hr will be used. Schedule for 2022 will be developed in consultation with American Whitewater and PacifiCorp operations.

License Article	Accomplishments 2021	Comments	Future Plans 2022
420	Recreation flows were provided in relation to required irrigation releases. For 63 of 106 possible days (59%) in the goal flow period between May 24 and September 6, high irrigation demand resulted in flows above 900 cfs in the Oneida Narrows reach. Operational regime report was filed with IDEQ in November 2021.	Oneida Development Water Year 2021 Operations Report is submitted to the FERC with this annual report.	When water is available, flows below the Oneida powerhouse will be greater than 900 cfs, as described in the Operations and Compliance Plan.
421	The 2021 flow forecast was provided to American Whitewater. The schedule was developed with American Whitewater and was posted to PacifiCorp's Bear River webpage, the flow phone, and submitted to FERC.	Boating Flow Forecasting Plan	In 2022, PacifiCorp will provide the flow forecast, develop a schedule with American Whitewater, and post the schedule on the Bear River website and Flow Phone. The 2022 schedule is to be submitted to the FERC prior to March 20, 2022.
422	Maintained website and Flow Phone.	PacifiCorp Flow Phone: (800) 547-1501 Bear River Implementation website: <a href="https://www.pacificorp.com/energy/hydro/bear-river.html">https://www.pacificorp.com/energy/hydro/bear-river.html</a>	In addition to river flow information, the website also provides ECC agendas, meeting notes, reports and other documents related to implementation of the license.
423	During 2021 in-person meetings were changed to remote meetings. A self-study cultural resource training presentation was prepared and distributed to Bear River operations staff.  Annual Report of HPMP activities was provided to the FERC.	Historic Properties Management Plan	<ul style="list-style-type: none"> <li>Continue to follow HPMP guidance for project review.</li> <li>Provide HPMP report to the FERC before January 22, 2022 deadline.</li> <li>Provide staff cultural resource training.</li> </ul>

Order Amending License and Revising Annual Charges – 62,205	No new actions.	Cove Decommissioning Order In 2014, the Cove water rights placement into the State Water Bank was renewed with consultation and agreement of the ECC. This renewal will be needed every 5 years going forward.	Required actions are complete.

## **3.1 Work Completed – 2021 Update**

### **3.1.1 Work Completed by License Article**

#### ***Implementation Plan and Annual Reporting (License Article 401)***

This 2021 Annual Report was prepared in consultation with the ECC to: 1) describe activities that PacifiCorp undertook or prepared pursuant to the requirements of the license during the year 2021; 2) describe anticipated activities that will be undertaken in the coming year pursuant to the requirements of the license; and 3) provide a report of all funding accounts, including funds spent, balance of accounts, and available remaining funds.

PacifiCorp's accomplishments in regard to licensing requirements are summarized in Table 3 and are discussed in more detail in the following sections of the report. Anticipated activities for 2022 are listed in Section 3.2 and Appendix H. An accounting of funds is included in Section 4.0.

#### ***Environmental Coordination Committee (Article 402)***

The Environmental Coordination Committee (Table A-1) met six times during the 2021 reporting period. The meetings were facilitated by PacifiCorp's environmental coordinator, Mark Stenberg. ECC members also conducted a field review of conservation properties in June 2021. In addition, the ECC made six consensus decisions via email. A summary of the ECC's activities is provided in Section 2.0. ECC meetings are expected to continue approximately every other month in 2022, or more frequently as determined by the ECC and PacifiCorp's environmental coordinator.

#### ***Bonneville Cutthroat Trout Restoration Study Plan (Article 403)***

The Bonneville Cutthroat Trout (BCT) Restoration Study Plan, prepared in consultation with the ECC, was completed in late 2004. It included study plans for genetic sample analysis, irrigation diversion/barrier mapping and aerial photography, telemetry studies, and broodstock development.

Thermal imaging of the Bear River was completed during 2007 and the images were archived at Utah State University's Water Lab, PacifiCorp's headquarters, and with IDFG and IDEQ. Work on the irrigation diversion/barrier mapping was discontinued by the ECC in 2006 when it was learned that similar information was available from another source. The funding for this study was subsequently transferred by ECC decision and applied to the thermal imaging effort. In 2007 a more intensive and limited area irrigation diversion mapping study was proposed by IDFG. The ECC approved funding for this effort from the land and water acquisition fund under the rationale that the results will assist with project prioritization and funding decisions.

The genetics study was completed by IDFG during 2007. IDFG completed its final report on the Telemetry Study during 2009. Results of these studies were synthesized in a Comprehensive Bonneville Cutthroat Trout Restoration Plan prepared by PacifiCorp in consultation with the ECC during 2008.

A funding agreement for the disbursement of broodstock funds was drafted by PacifiCorp and IDFG during late 2008. IDFG chose to proceed initially with a broodstock program focusing on fish from the Thatcher reach, between Grace Dam and Oneida Reservoir, and is utilizing the state's Grace Fish Hatchery near Grace, Idaho to rear broodstock. Disbursement of broodstock development funding for

2008 and 2009 was made upon completion of the funding agreement in early 2009. A final payment was made in 2010. Funding was used by IDFG to improve the spring source and water supply to the hatchery to better protect the broodstock from the potential for disease and cross contamination within the hatchery. A portion of the funds were used to support collected fish at Kent Clegg's spring-fed fish ponds in Grace, Idaho. In addition, IDFG produced 19,000 BCT fingerlings at the Grace Hatchery during 2010. On April 20, 2011, IDFG released the first BCT produced at the hatchery at the site of the Kackley Springs reroute project. IDFG issued a final report of broodstock development activities on January 24, 2012. This license article is complete; however, the ECC may consider an update to the plan in the future.

#### ***Conservation Hatchery Plan (Article 404)***

The Conservation Hatchery Plan was completed in 2004 as part of the Implementation Plan. This plan describes the use of funding for the purpose of stocking native BCT in the action area. Guidance for stocking BCT was developed over the first seven years of the license as BCT restoration studies were conducted and the Bonneville Cutthroat Trout Restoration Plan was developed. A draft Conservation Hatchery Agreement was prepared by IDFG during 2011 and the Conservation Hatchery Program commenced December 22, 2011. IDFG provided a final report of broodstock development activities on January 24, 2012 and the first conservation hatchery payment was made.

Since 2011, when the first release of fish was made in Kackley Springs, subsequent releases have been made at many locations in the Thatcher Reach of the Bear River. During 2021, IDFG released 25,123 hatchery-produced BCT into Trout Creek, Whiskey Creek, Kackley Spring, Kackley Pond, Harris Spring, and the Bear River. Approximately 22,546 BCT were produced during 2021 for release in the fall of 2022. IDFG will continue to produce BCT at the Grace Fish Hatchery and the recently completed Cove BCT broodstock ponds on PacifiCorp land near the Grace Plant. Hatchery payments of \$100,000 (escalated annually) will be made available each year through the end of the license term for implementation of this article, or acceptable alternative use. With escalation, annual funding provided by PacifiCorp during 2021 was \$142,200.00.

#### ***Habitat Restoration Plan (Article 405)***

The Habitat Restoration Plan was completed in 2004 as part of the Implementation Plan, and a FERC order approving the plan was issued March 22, 2005. This plan describes the use of funding for actions that benefit and restore aquatic and riparian habitat for BCT, as well as other fish and wildlife. Action items implemented by the Habitat Restoration Program are decided upon and prioritized by the ECC. These actions are scheduled and implemented by the ECC on an annual basis. Annual funding of \$167,000.00 (escalated annually) began December 22, 2004 and will continue through the end of the license term. With escalation, annual funding provided by PacifiCorp in 2021 was \$237,474.00

In 2005, the ECC formed a subcommittee to develop proposal and application forms for individuals and organizations seeking funding from the ECC for habitat enhancement projects. The subcommittee also developed evaluation criteria for proposals. A schedule for solicitation of funding proposals was set, and the subcommittee meets yearly in the spring to review and rank projects. The ECC then votes on the subcommittee's recommendations for funding. Projects may also be considered year-round by the ECC at large. PacifiCorp initiates monitoring of the habitat enhancement projects upon completion; the results of the 2021 monitoring efforts are presented in Appendix G.

Prior to the 2021 review period, flyers were distributed to ECC members, local NRCS offices, and previous applicants to announce habitat enhancement funding availability and to request proposals. Application materials were posted to PacifiCorp's website.

The ECC received 12 proposals for habitat enhancement funding during the 2021 spring review period. One was subsequently withdrawn by the applicant. The remaining proposals were reviewed and ranked by subcommittee members April 21, 2021. All were recommended by the subcommittee for funding. The subcommittee's rankings and funding recommendations were presented to the ECC for approval May 19, 2021. The recommended projects were approved by the ECC, for a total of \$360,750. Two additional projects totaling \$23,370 were approved later in the year, bringing total habitat enhancement project funding awarded in 2021 to \$384,120. The 2021 habitat enhancement projects are described below.

#### **Boa Ogoi Battle Creek Habitat Enhancement, Phase 1**

This project, proposed by the Northwestern Band of the Shoshone Nation (NWB), is located on land owned by the tribe near Preston, Idaho. It is the first phase of a larger project aimed at restoring habitat for fish and wildlife, improving water quality in Battle Creek, and educating the public about the tribe. The ECC awarded \$55,000 to the NWB for phase 1 to design and plan a new stream restoration structure on Battle Creek North, a spring water piping system, and a culvert under an existing irrigation canal. The project also includes design and installation of beaver dam analogs, removal of non-native vegetation, and replanting and reseeding of native plants. Total estimated cost of phase 1 is \$201,716. Cost-sharing partners include the NWB, the Wild Utah Project, Utah State University, and the First Nations Development Institute.

#### **Davis Diversion Fish Screen and Road Improvements**

Trout Unlimited was awarded \$2,750 for this project, to improve a problematic road crossing immediately upstream of the Davis diversion fish screen, plant additional willows around the headgate and fish screen to prevent erosion, and to clean out the sediment trap downstream of the headgate. This project supports an existing ECC-funded fish passage project that was completed with the Davis diversion rebuild and fish screen installation in 2014. Additional work was completed in 2015 to install a headgate, upgrade the fish screen, and improve the ford crossing of the canal with gravel. This project will provide further protection for BCT, which are found throughout Cottonwood Creek.

#### **Dip Creek Riparian Fencing**

The ECC awarded \$22,000 to range consultant Taylor Payne for a project aimed at protecting the riparian area along two streams on Caribou-Targhee National Forest from grazing pressure. Project funding was approved to replace a non-functional electric fence with permanent fencing, which is expected to improve habitat for BCT and other native species by allowing for recovery of riparian vegetation and improving to water quality.

#### **Fish Screen Repairs**

The ECC awarded IDFG \$9,000 for maintenance of ECC-funded fish screens. Many of these screens have been in place now for several years and require on-going maintenance and repair to ensure they function properly. The ECC has chosen to set aside habitat enhancement funding for this task annually. The funding will go towards repair or replacement of failing parts. This year's funding also included a \$1,000 award to install a flow measurement device on the lowest fish screen on Fish Haven Creek.

### Fish Screen Tender

The ECC awarded \$30,000 to IDFG during 2021 to help fund an employee responsible for monitoring and maintenance of all fish screens on irrigation diversions within the action area of the license. A few fish screens outside the action area are also monitored (i.e., Thomas Fork and Cub River). Table 4 provides a list of fish screens monitored annually by the screen tender.

**Table 4. Fish Screens Monitored Annually by the Screen Tender**

Stream	Screen Name	Zone	UTM (NAD83)	
			Easting	Northing
Cottonwood Creek	Davis	12T	424785	4698170
	Treasureton	12T	424346	4693377
	Lower	12T	436234	4686935

Georgetown Creek	Alleman Lower	12T	468876	4702717
North Creek	Ovid	12T	461652	4689490

### Kackley Pond Demolition Design Support

PacifiCorp was awarded \$20,000 to prepare a removal plan for the two ponds at Kackley Springs. Removal of the ponds would benefit BCT by increasing channel length and cover, adding spawning gravel, and reducing predation by fishing birds.

### Paris Canyon Livestock Water Pipeline

Range consultant Taylor Payne was awarded \$50,000 for this project for installation of a livestock watering system for cattle to replace stock watering from the Paris Power Canal. The Paris Hydroelectric Project will be decommissioned and this project is one element of flow restoration for Paris Creek. BCT are expected to directly benefit from the project by increasing the amount of water directed back into Paris Creek. Cost sharing partners at this time include PacifiCorp and USFS.

### **Stauffer Creek Fish Passage, Riparian, Riparian, and Aquatic Habitat Improvement Project, Phase 1**

The ECC awarded \$100,000 to USFS for phase 1 of this project, to address a legacy diversion dam and stream channel ditching on private land that negatively affects stream and riparian habitat, stream system connectivity, and water quality in Stauffer Creek. The Idaho BCT Management Plan classifies this as a Priority 1 action on Stauffer Creek, and a multi-faceted project is planned to address both agricultural and fisheries needs by addressing current irrigation and grazing practices. Phase 1 funding will be used to develop new irrigation practices and stock water in uplands.

### **Stauffer Creek Oxborrow Diversion Design**

IDFG was awarded \$40,000 for engineering design for two diversions with fish screens on private land on Stauffer Creek, a stronghold stream for BCT. The project will directly benefit BCT by providing upstream and downstream movement and limiting entrainment into the irrigation canals.

### **Thomas Fork Diversion Design**

IDFG was awarded \$25,000 for engineering design to replace an existing diversion on private land on the Thomas Fork. The new diversion will allow a more direct corridor for upstream and downstream migration of BCT and allow access to spawning grounds in the upper portion of the drainage.

### **USFS Eightmile Creek Water Quality/Habitat**

USFS was awarded \$7,000 for a water quality and habitat improvement project on public land on Eightmile Creek, an important spawning channel for BCT. Funding for the project was used to pilot process-based restoration techniques on Eightmile Creek, install a relief culvert, and use bioengineering to stabilize 150 feet of streambank.

The ECC approved two additional expenditures from its habitat enhancement fund during 2021, including a \$3,370 request from IDFG for treatment of the BCT broodstock ponds to control overgrowth of algae and \$20,000 for a budget increase to complete beaver dam analogs on Bear Creek, an existing habitat enhancement project.

### ***Land and Water Acquisition Plan (Article 406)***

The Land and Water Acquisition Plan was completed in 2004 as part of the Implementation Plan and an order approving the plan was issued by the FERC March 22, 2005. This plan describes the funding provided to acquire available land and water rights in the action area. Actions pursuant to the Land and Water Acquisition Program are decided upon and prioritized by the ECC. Annual funding of \$300,000 (escalated annually) for this purpose began December 22, 2004 and will continue through the end of the license term.

Due to the opportunistic nature of land and water acquisition fund projects, the ECC voted in 2007 to accept and evaluate such proposals year-round. They are approved by consensus agreement among ECC members at large.

In 2006 PacifiCorp entered into a Memorandum of Agreement (MOA) with Sagebrush Steppe Land Trust to acquire properties using the license-required land and water acquisition fund. The 2006 MOA described the process for the trust to acquire properties once approved by the ECC. The MOA was updated by PacifiCorp and SSLT during 2012 and the updated MOA received a vote of support from the ECC at its September meeting that year.

No conservation properties were acquired during 2021. Three conservation easement grant requests were approved. No property acquisitions were finalized.

Table 5 summarizes the acres, type of acquisition, whether conservation easement or fee title, and length of riverbank protected using land and water acquisition funds to date. Complete or partial funding for these projects was provided by grants awarded from the ECC's land and water acquisition fund.

**Table 5. Lands and Easements Acquired with the Land and Water Acquisition Fund**

Parcel	Acreage	Waterbody	Year Acquired	Linear Feet of Riparian Protection*	
				Left Bank	Right Bank
Conservation Easements (CE) held by Sagebrush Steppe Land Trust					
Olsen (N) - Cove Area CE	0.74	Bear River	2006		291

\* Left or right bank designations assume facing downstream.

In early January 2021, flyers announcing land and water acquisition funding availability and requesting proposals were distributed to ECC members, local NRCS offices, and previous applicants. Application materials were also posted to PacifiCorp's website at this time.

### ***Black Canyon Monitoring Plan (Article 407)***

The Black Canyon Monitoring Plan was completed and filed December 23, 2004 with the FERC, which in turn issued an order modifying and approving the plan February 17, 2005. Based on comments received during a subsequent outside peer review of the plan, a revised Black Canyon Monitoring Plan was prepared and circulated to ECC members for approval, then filed with the FERC June 10, 2005. An order approving the plan was issued October 13, 2005.

In 2005, Oasis Environmental was selected to conduct the monitoring study in Black Canyon and the first round of monitoring took place in October of that year. The third year of monitoring was completed in October 2007 and marked the end of baseline studies in the Black Canyon. The sixth and final year of Black Canyon Monitoring was completed during 2010, and a final report on the six-year study of Black Canyon entitled, *"Effects of the Variable Flow Regime on the Ecology of the Black Canyon of the Bear River, Idaho"* was received by the ECC for review and comment April 12, 2011. ECC comments on the plan were addressed and the report was made final September 12, 2011. Activities under this license article are now complete.

### ***Minimum Flow Requirements (Article 408)***

In compliance with section 3.2.1.1 of the Bear River Settlement Agreement, PacifiCorp's environmental coordinator provided notification of annual maintenance activities and time frames to the ECC via email on April 2 and October 1, 2021.

Minimum flow requirements were revised May 23, 2006, when the FERC issued its Cove Decommissioning Order, amending Article 408:

The licensee shall maintain continuous minimum bypass flows from the project development as follows:

1. Below the Soda Dam: year-round minimum flow of 150 cfs, or inflow into the Soda reservoir, whichever is less;
2. Grace bypassed reach: a year-round minimum bypass flow of 63 cfs or inflow, whichever is less, in addition to 2 cfs leakage below the Grace Dam;
3. Oneida reach below the powerhouse: a year-round minimum flow of 250 cfs or inflow, whichever is less, in addition to 1 cfs leakage below Oneida Dam.

These minimum stream flow requirements will continue in accordance with procedures described in the Operations and Compliance Plan.

#### ***Fish Stranding Minimization Plan (Article 409)***

The Fish Stranding Minimization Plan was completed as part of the Implementation Plan filed with the FERC May 28, 2004. An order modifying and approving the plan was issued by the FERC March 7, 2005. The plan describes measures and agency consultation to minimize potential fish stranding resulting from the release of recreation flows from the Grace Development. The Fish Stranding Minimization Plan was to be implemented in 2008, upon commencing scheduled recreation boating releases into Black Canyon, or during other times when high flows result in spill from Grace Dam. However, in 2007, the ECC began working to develop a ramp rate/fish stranding study to measure the direct impacts of downramps after whitewater releases. In 2008, the FERC granted PacifiCorp's request to suspend Article 409 until the fish stranding study was completed. The Boater Flow Ramp Rate Study was completed during 2010 and a final report was submitted to the FERC. The need to implement, change or request removal of Article 409, based on study results, was discussed with the ECC during a series of meetings in 2011. Per the requirements in a June 2, 2011 FERC Order, PacifiCorp prepared a report on the ECC's decision making regarding boater flows and the suspension of Article 409. This report was submitted to the FERC January 31, 2012 and included a recommendation to continue suspension of Article 409. The report also included the ECC's decision to use a down ramp rate of 1 foot per hour following boater flows. On May 18, 2012, the Final Agreement on Boater Flows was filed with the FERC. This agreement included the ECC's recommendation to not reinstate Article 409. Continued suspension of the Article 409 Fish Stranding Minimization Plan was confirmed by the FERC October 17, 2012, in an issuance that confirmed PacifiCorp had complied with Ordering paragraph (b) of the FERC's June 3, 2011 Order Approving Suspension of the Fish Stranding Minimization Plan. There were no new actions in 2021.

#### ***Kackley Springs Plan (Article 410)***

The Kackley Springs Plan was completed as part of the Implementation Plan filed with the FERC May 28, 2004 and an order modifying and approving the Kackley Springs Plan was issued by the FERC March 22, 2005. The Kackley Springs Plan was also discussed by the ECC as part of the Grace-Cove Site Plan. The Kackley Springs Plan proposes studies and monitoring to determine the effects of flow on Bonneville cutthroat trout and other aquatic resources. In 2006, the ECC awarded a habitat enhancement fund grant to a graduate student to investigate options to reconnect the Kackley Springs flow to the channel that crosses the Kackley parcel. The ECC reviewed this report during 2008 and

conducted a field review of the site during its July 2008 meeting. A conceptual plan was agreed to by the ECC to discontinue diversion of the spring directly into the Bear River and send the water down a longer route that can potentially be used by native fish for spawning. Habitat enhancement funding was approved for the project during 2009 (see Article 405, above) and the Kackley Springs Reroute Project was completed later that year.

Idaho Department of Fish and Game's first release of Bonneville cutthroat trout from the Grace Hatchery took place at Kackley Springs in 2011 (see Article 403, above). Noxious weed control took place and additional shrubs and willow stakes were planted during 2009, 2010, and 2012, and the ECC approved a habitat enhancement project in 2012 to raise the elevation in the main pond. This article is now complete. Future land management activities around the springs will be conducted in accordance with the Grace-Cove Site Plan.

### ***Dam Leakage Minimization Plan (Article 411)***

The Dam Leakage Minimization Plan was completed as part of the Implementation Plan filed with the FERC May 28, 2004 and approved December 13, 2004. This plan describes steps to measure leakage from Grace and Oneida dams. The measurement protocol was developed in consultation with the ECC, and dam leakage measurements were taken in October 2004. An order amending Article 408 (Minimum Flow Requirements) was issued by the FERC December 2, 2005 and included dam leakage in minimum flow requirements. No further action was needed during 2021.

### ***Ramp Rate Requirements (Article 412)***

The schedule for implementing new ramp rates, as measured downstream of the Soda and Oneida developments, was modified in the Implementation Plan approved by the FERC December 13, 2004. New ramp rate requirements were implemented December 22, 2004. Ramp rates will continue in accordance with procedures described in the Operations and Compliance Plan filed with the FERC December 22, 2004. Notification of annual maintenance activities and timeframes were given to the ECC by the environmental coordinator via email as reported for Article 408.

As described in the Settlement Agreement, Black Canyon ramp rates have been determined with the ECC, in consultation with PacifiCorp. Discussions regarding ramp rates began in April 2006 and continued through the end of 2007. During 2007, the ECC developed and reached consensus on a study plan to evaluate fish stranding in the Black Canyon following boater flow events, and in 2008 launched a three-year study to evaluate the effect of whitewater boating flow ramping rates on native fish. The third and final year of the study was completed during 2010 and the final report on the Black Canyon Boater Program Ramp Rate Study was submitted to the FERC. This information was used by the ECC—along with Black Canyon Monitoring Study results and the final Boater Flow Water Quality Report—to help determine ramp rates and the future structure of the boater program. In 2011, the ECC determined that a 1-foot-per-hour ramp rate will be used for boater flows. Ramping rate limitations are being followed at Grace, Soda, and Oneida.

Notification of annual maintenance activities was given to the ECC by the environmental coordinator by email as reported under Article 408, above.

### ***Water Quality Monitoring Plans (Article 413)***

The 2007 Water Quality Monitoring Report for the Grace-Cove Development was submitted to IDEQ in January 2008. IDEQ then verbally informed PacifiCorp that water quality monitoring at Grace-Cove could be discontinued, two years before scheduled, as they found no indication of project contribution to exceedances of water quality criteria. A formal letter was received from IDEQ during 2009, signing off on Grace-Cove Water Quality Monitoring and the Oneida Water Quality Study.

A final Oneida Water Quality Monitoring Report was submitted to the IDEQ April 6, 2007. The collection of data for this 18-month study was completed in October of 2005. During 2008, discussions were held between PacifiCorp and IDEQ concerning the ability to determine project contributions to exceedances of water quality at the Oneida Project based on the results of the study. In 2009, agreement was reached with IDEQ that the Oneida Project does not significantly cause or contribute to exceedances of water quality standards.

During 2008, IDEQ requested water quality monitoring during boater flows in the Black Canyon. A study plan was developed by PacifiCorp and the IDEQ. This study plan was used during the 2008, 2009, and 2010 whitewater releases. 2010 Boater Flow water quality measurements were included in a final report with 2008 and 2009 results. This final Boater Flow Water Quality Report was submitted to the FERC. During 2011, the ECC discussed exceedances of state water quality criteria during boater flow events during a series of meetings held to address boater flows. IDEQ continued to collect water quality monitoring data during boater flow events in 2012, 2013, and 2014 to inform potential future management decisions. Findings were discussed by the ECC at a two-day whitewater boater flow meeting in February 2015. At that meeting, IDEQ stated they believed compromise goals for water quality had been met.

### ***Operations and Compliance Plan (Article 415)***

PacifiCorp prepared a draft Operations and Compliance Plan and provided copies to the ECC and US Geological Survey (USGS) for review November 4, 2004. After a 30-day review period, the plan was finalized and filed with the FERC December 22, 2004. An order from the FERC approving the Operations and Compliance Plan was issued April 7, 2005. Subsequently, based on operational issues identified during 2005, PacifiCorp suggested revisions to the plan regarding how minimum flows are measured during low-flow periods. These revisions were presented to the ECC for comment initially in November of 2005, and discussions continued through 2006. In 2007, a modification to the Operations and Compliance Plan regarding publishing of streamflow gage data by the USGS was presented to and accepted by the ECC. During 2008, the compliance point for Black Canyon minimum stream flow measurement was changed from the USGS gage below the Grace Dam to the reservoir elevation gage, a reservoir deadband, and calculated gate opening. A revised Operations and Compliance Plan, which includes updates on new stream flow gaging equipment, the change in compliance point at Grace Dam, operations directions for transition from minimum stream flow at Grace Dam to inflow, and publication of USGS stream flow data, was submitted to the FERC June 20, 2013. The plan was approved by the FERC September 16, 2014 and has now been implemented.

### ***Recreation and Traffic Safety Plan (Articles 416/417)***

The Recreation and Traffic Safety Plan was submitted to the FERC January 31, 2005. An order approving the plan was issued October 11, 2005.

During 2021, annual funding was provided to Caribou County for park maintenance, to Franklin County for law enforcement, and to BLM for Oneida campground maintenance. Annual dust abatement applications were made around the campgrounds and day-use area in Oneida Canyon.

### ***Boating Flow Release Plan (Article 418)***

The Boating Flow Release Plan was completed as part of the Implementation Plan filed with the FERC May 28, 2004. An order modifying and approving the Flow Release Plan was issued August 11, 2005. This plan describes measures to release whitewater boating flows from the Grace Dam for the purpose of whitewater recreation. During 2007, plans to install slide gates to facilitate whitewater releases were completed and submitted to the FERC. In 2008, Grace Dam was modified by the installation of the spill gates, which are used to facilitate whitewater releases. There was no new action during 2021.

### ***Boating Flow Release Schedule (Article 419)***

The ECC developed a Black Canyon Monitoring Plan (Article 407) to document the effects to aquatic resources of flow releases from the Grace Dam for whitewater recreation in the Black Canyon reach of the Bear River. This six-year study started in 2005 and concluded in 2010. It collected data over three baseline years without whitewater releases and for three years with releases. Flow releases during the second three years were triggered by river inflow. In addition to this study, in 2007 the ECC developed a ramp rate study plan to evaluate fish stranding over three years and use this information, along with the six-year Black Canyon Monitoring Study, to make future decisions concerning ramp rates and whitewater boater program structure.

During fall of 2011, a series of three ECC work sessions were held to discuss study results that included the six-year monitoring report, the fish stranding report, water quality, and the timing and schedule of future boater flows. A report of these discussions was submitted to the FERC January 31, 2012. This report included the Draft Agreement for Boater Flows: Extended Study Period & Adaptive Management and a commitment to follow up with the FERC 45 days after the agreement was finalized. According to the terms of the draft agreement, during the extended study period (2012–2014), four weekends of scheduled boater flows were released between April 1 and June 5; a down ramp rate of 1 foot per hour was used; and the Article 409 Fish Stranding Minimization Plan remained suspended. Final ECC approval of the agreement and associated study plans to be implemented by IDFG and IDEQ for monitoring of water quality and fisheries during the extended study period was granted April 18, 2012. The agreement was implemented during the 2012 whitewater boater flow season and continued through the 2014 whitewater boater flow season.

The Final Agreement for Black Canyon Boater Flows: Extended Study Period & Adaptive Management was submitted to the FERC May 18, 2012. The FERC responded October 17, 2012, that PacifiCorp had fulfilled consultation and reporting requirements as required in the FERC's June 3, 2011, Order Approving Suspension of Fish Stranding Minimization Plan under Article 409.

A total of nine boater flow releases were made over four weekends during 2021. Three two-day whitewater boater flow events were provided on the following dates: March 27 & 28, April 10 & 11, April 30–May 2, and September 11 & 12, 2021.

### ***Oneida Operations Regime (Article 420)***

The Oneida Operations Regime was completed as part of the Implementation Plan filed with the FERC May 28, 2004. An order approving the operational regime was issued August 17, 2005. This plan describes the operational regime designed to minimize the frequency of river level fluctuations below the Oneida powerhouse. Under this plan, when water is available, flows below the Oneida powerhouse will be greater than 900 cfs between Memorial Day and Labor Day, as described in the Operations and Compliance Plan filed with the FERC December 22, 2004. During 2021, recreation flows were provided in relation to required irrigation releases. For 63 of the 106 possible days (59 percent) in the goal flow period between May 24 and September 6, high irrigation demand resulted in flows above 900 cfs in the Oneida Narrows reach. The Operational Regime Report was filed with IDEQ in November 2021. The Oneida Development Water Year 2021 Operations Report will be submitted to the FERC with this annual report.

### ***Boating Flow Forecasting Plan (Article 421)***

The Boating Flow Forecasting Plan was completed as part of the Implementation Plan filed with the FERC May 28, 2004. An order modifying and approving Flow Forecasting Plan was issued August 17, 2005. This plan describes measures to forecast and announce whitewater boating flows for each year beginning in 2008. This order also modified License Article 421. The article requires that the forecast plan be submitted to FERC by March 20 if agreement cannot be reached. The order clarifies that regardless of agreement the forecast plan should be submitted to FERC by March 20 of each year.

A 2021 boater flow schedule was developed in consultation with American Whitewater. The schedule was developed in accordance with the terms of the ECC's Agreement for Black Canyon Boater Flows: Extended Study Period and Adaptive Management, with the scheduled window for boater flows moved up one week per 2016 agreement. The 2021 boater flow schedule was provided to the ECC for review and submitted to the FERC. The schedule of flows was posted on the PacifiCorp website and information was provided on the Flow Phone.

### ***Website and Flow Phone Report (Article 422)***

PacifiCorp's existing Flow Phone was updated and a Bear River Implementation website (<https://www.pacificorp.com/energy/hydro/bear-river.html>) was created in 2004. This website and toll-free number (1-800-547-1501) were reported to the FERC in a December 30, 2004 letter. The FERC issued a letter approving the website and Flow Phone January 14, 2005. In addition to river flow information, the website provides ECC meeting notes, reports, and other documents related to implementation of the license. The website and Flow Phone were maintained during 2021.

### ***Historic Properties Management Plan (Article 423)***

The Historic Properties Management Plan (HPMP) was completed in early 2005 and filed with the FERC March 29, 2005. This HPMP was then withdrawn to allow the preparation of a revised plan for submittal to the Idaho State Historic Preservation Office. The revised plan was intended to address the SHPO's comments on the previous draft. Additional comments were received from the SHPO in 2007 and a revised HPMP was submitted to the FERC in July 2007. During 2008, the FERC issued an order accepting the HPMP and directing PacifiCorp to begin implementation. During 2021, in-person meetings were instead held remotely. A self-study cultural resource training presentation was prepared and distributed

to Bear River operations staff. The 2020 annual report on HPMP activities was provided to the FERC as required before January 22, 2021.

***Land Management Plan (Article 424), which includes Shoreline Buffer Zone Plan (Article 425), and Cove Bypass Reach Fencing Plan (Article 426)***

The Land Management Plan (LMP) was filed with the FERC January 31, 2005 and approved April 11, 2006. Included in the LMP are the Shoreline Buffer Zone Plan and the Cove Fencing Plan. The LMP describes the implementation of new land management procedures, as specifically detailed in five site plans. These site plans were to be completed (written) within 5 years after the LMP was approved, and were prioritized as follows: Grace-Cove, Oneida, Soda, Grace Dam, and Last Chance land parcels. During 2008, the ECC agreed to incorporate the Grace Dam and Last Chance site plans into one document, reducing the number of site plans to four. Implementation of the site plans was to be completed within 10 years after LMP approval. All plans were completed as scheduled by 2010.

A minor update of the LMP was completed in consultation with the ECC in 2011, as noted in the original 2005 LMP, Section 2.4. This update was made necessary by the decommissioning of the Cove Project in 2006, completion of the site plans in 2010, and installation of required measures to protect riparian areas within the FERC project boundary at the Oneida development being placed at the outer PacifiCorp property boundaries (and therefore placed well outside the FERC project boundary), collectively. The updated LMP was submitted to the FERC with the 2011 annual report of implementation activities and was implemented upon FERC approval July 17, 2014.

The first site plan, for the Grace-Cove area, was completed and reviewed by the ECC in 2005. Most of the implementation scheduled in the Grace-Cove Site Plan was completed in 2005 and 2006, and the remainder was finished in 2007—including revised leases, final edits to monitoring forms, and revisions based on Cove decommissioning. Some remaining cross-fencing no longer needed in the Grace-Cove Site Plan area was removed in 2012.

The Oneida Site Plan was drafted and reviewed by the ECC in 2006. The plan was finalized in 2007, but revisions were made during 2008. Implementation actions for Oneida were completed in 2007 and 2008 including installation of cattle exclusion fencing and placement of boundary markers along property lines that were not fenced. Remaining interior cross fencing was removed in Oneida Canyon during 2010 and 2011. Given 2014 acceptance of the revised LMP, the Oneida Site Plan was updated in 2015. The updated Oneida Site Plan was submitted to the FERC June 3, 2015. The FERC acknowledged receipt of the plan in a December 7, 2015 letter.

The Soda Site Plan was completed and reviewed by the ECC during 2008 and implementation actions were substantially completed during 2008, including installation of boundary markers and cattle exclusion fencing, marking of expanded reservoir buffer areas, and seeding of approximately 130 acres with native grass in new reservoir buffer areas. Agricultural leases were modified to prohibit grazing and to allow for the expansion of reservoir buffers. The Soda Site Plan was finalized in 2009. Most of the interior abandoned cross fencing was removed from the Soda Site Plan area in 2011. Some remaining cross fencing was removed in 2012. In 2020 and 2021, fencing was installed along South Bridge Road to prevent off-road vehicle use in habitat lands.

The Grace Dam and Last Chance Site Plan was finalized during 2010. Implementation actions completed at Grace Dam and Last Chance include installation of property boundary markers and cattle exclusion

fencing where needed. An agricultural field adjacent to the Grace forebay and former cattle feeding area near the Grace forebay were seeded with native grass, abandoned interior fences were removed from the Grace and Last Chance properties, and two cattleguards were installed on the dirt road at Last Chance to exclude cattle from PacifiCorp property.

Ongoing maintenance of fences, gates, signage, and boundaries was conducted as needed in all site plan areas in 2021. Noxious weed control activities were performed in all areas in 2021, as required in the site plans. Performance tracking and compliance monitoring was completed for all site planning areas. Monitoring reports, both compliance monitoring to indicated compliance with the site plan, and performance tracking to indicate long-term ecological indicator shifts, for the Grace-Cove, Oneida, Soda, and Grace Dam and Last Chance site plans are included in Appendix B, D, E and F of this report, respectively.

The Cove Buffer shoreline fence was monitored as required during 2021. Monitoring forms are included in Appendix C of this report.

### ***Expanded FERC Project Boundary (Article 427)***

Planning for the expanded FERC project boundary was included in the preparation of the Land Management Plan and the Recreation and Traffic Safety Plan. A modified schedule for completion of the survey and preparation of a new Exhibit G was included in the Implementation Plan. New and revised Exhibit G drawings were filed with the FERC August 17, 2005 under Article 202 and 427. An order approving revised Exhibit G Drawings and revising federal acreage was issued October 13, 2005. All requirements under Article 427 were completed at this time. Subsequently updates were made to the Project's Exhibit G to address changes in federal acre reporting in Exhibit A and conformance to Exhibit G preparation requirements. These updates were submitted to FERC in 2015 and approved in 2016. On the 2016 maps, PacifiCorp identified three submerged parcels that it found through additional research that necessary property rights for project operations were not held by the PacifiCorp. Updated Exhibit G maps were submitted to FERC in December of 2019 showing the resolution of property rights on the submerged lands. There were no new actions in 2021.

### **3.1.2 Work Completed for Cove Decommissioning Site (Order Amending License and Revising Annual Charges [62,205])**

The FERC issued the Cove Decommissioning Order May 23, 2006, and the development, including Cove Dam and the mile-long flume, was removed in the summer of 2006. After removal of the structures, work to stabilize and reclaim the area was completed in late fall of 2006, and 2009 was the final year of monitoring required by the US Army Corps of Engineers permit. The Cove water right placement into the State Water Supply Bank was renewed following consultation and agreement with the ECC. All required actions are complete.

## **3.2 Work Anticipated in 2022**

This section outlines work anticipated for license implementation and compliance during 2022. As noted in Section 3.0, an implementation schedule for 2022 is included in Appendix H of this report. The 2022 implementation schedule updates and replaces the implementation schedule filed with the Implementation Plan in 2004, and the schedule included in the previous Annual Report.

- File 2021 Annual Report, including the Oneida Development Water Year 2021 Operations Report.
- Continue collaboration with stakeholders through ECC meetings held every other month (or more frequently, as needed).
- Make conservation hatchery payment to IDFG.
- Continue the Habitat Enhancement Program - Subcommittee to evaluate projects in April 2022 and present recommendations to the ECC for approval in May 2022. Subcommittee may continue to evaluate projects as they are presented during the remainder of the year. Continue to monitor habitat enhancement projects (per Appendix G).
- Continue the Land and Water Acquisition Program – Subcommittee to evaluate projects as they are presented during the year.
- Continue to document required minimum flows.
- Provide PacifiCorp’s annual maintenance schedule to the ECC before April 2022, consult with ECC in emergencies, as practical.
- Per the Agreement for Black Canyon Boater Flows: Extended Study Period and Adaptive Management, four weekends of scheduled boater flows will occur. A 1-foot-per-hour down-ramp rate will be used, and suspension of Article 409 will continue. PacifiCorp will develop a schedule in consultation with American Whitewater and post the schedule on the Bear River website and Flow Phone.
- Continue to document ramp rates.
- Maintain compliance with the updated Operations and Compliance Plan.
- Make annual payments to Caribou County, BLM, and Franklin County Sheriff; implement dust abatement measures on Oneida Road; maintain signs and recreation sites; and perform annual monitoring of Recreation and Traffic Safety Plan and site plan recreation elements, as specified.
- Submit 2022 whitewater boater flow schedule to the FERC.
- Submit annual Oneida Operations Report to IDEQ.
- Maintain website and Flow Phone.
- Continue to follow the Historic Preservation Management Plan (HPMP) guidance.
- Submit annual report on HPMP activities in January 2022.
- Provide annual staff cultural resource training.

- Continue monitoring as required for the Grace-Cove, Oneida, Soda, and Grace Dam and Last Chance site plans. Take corrective actions as needed.
- Treat noxious weeds.
- Conduct ongoing maintenance of fences, gates, signage, and boundaries in all site plan areas.
- Maintain Cove buffer shoreline fence, per Art. 426 requirements.
- Address any other minor compliance issues noted during 2021 monitoring efforts at each of the four planning areas.
- Report on implementation in the Annual Report.

## **4.0 Funding**

This section presents an accounting to the end of calendar year 2021 of the funding obligations for Bear River Settlement Agreement and the License. Funding obligations noted as complete in previous annual reports are not included in this annual report.

<b>PacifiCorp</b> <b>Bear River Implementation Projects</b> <b>Oneida Campground Funding SA 3.4.1.1</b> <b>BRI-ONEIDA</b>					
<b>Posting Date</b>	<b>Invoice Amount (Debit)</b>	<b>Contract</b>	<b>Credits</b>	<b>Balance</b>	<b>Notes</b>

*Cove Shoreline Buffer Fence Annual Monitoring*

## Cove Shoreline 2021 Buffer Fence Annual Monitoring Report

In the fall of 2006, a fenceline was constructed on the west side of the Bear River, essentially running the length of the Grace-Cove project area, as part of the required implementation of the 2003 Federal Energy Regulatory Commission (FERC) Bear River Idaho license (FERC No. 20). The fenceline was constructed on private land not owned by PacifiCorp, between the former Cove forebay and the Cove Plant to fulfill the requirements of the Bear River License Article 426. The new fenceline was constructed to create a buffer zone to protect the river and its banks from livestock grazing and any other agricultural land uses. This project involved PacifiCorp, the United States Fish and Wildlife Service (USFWS), and several private landowners whose property abutted the Bear River. New fence construction, as well as the updating of existing fencelines, resulted in approximately 9,000 feet of continuous fenceline along the Bear River. This fenceline provides protection from livestock grazing and other agricultural uses. Currently 1.5 miles of riparian zone along both sides of the Bear River between the Grace Hydro Plant and the former Cove Plant is now protected by this fenceline (fulfilling in part, License Articles 425 and 426). This protection will help to improve the overall condition of the riparian zone as well as improve bank stabilization, wildlife habitat, and water quality.

Since completion of the fenceline in 2006, Sagebrush Steppe Land Trust (SSLT), in conjunction with the Environmental Coordination Committee (ECC), has purchased 154 acres of land on the east side of the Bear River that is adjacent to the Cove shoreline buffer. To further protect this stretch of the river, SSLT created perpetual conservation easements with the private landowners within the area between the fence and the river for additional protection from future undesired uses.

PacifiCorp is responsible for annual fence monitoring and inspection, as well as any required maintenance for the duration of the FERC license, which will expire in 2033. SSLT will be responsible for all other required land management practices within this buffer.

During this report period, annual monitoring was conducted on November 18, 2021. No cattle were present anywhere in the buffer at the time of monitoring. The overall condition of the buffer areas was good. Noxious weeds in the buffer areas were generally controlled; except in McCurdy I where a large patch of musk thistle was present.

**Olsen I:** Length: 440 feet

**Type:** 4-strand, barbwire on steel posts.

**Baseline Condition:** Fence moved (December 2007) to correct property boundary. Fenceline runs east and west through riparian zone. Fenceline is in good condition. Riparian area is dominated by sedges and wet meadow grasses, and is in good condition.

**2021 Maintenance Required:** No

**2021 Easement Conflict:** No

**2021 Photo taken looking west from fence corner.**

**Olsen I 2021**

**McCurdy I:** Length: 320 feet

**Type:** Existing and upgraded, 6-strand, barbwire on steel and wood posts.

**Baseline Condition:** There has been some confusion regarding the location of the McCurdy fence segment. The actual location is west of Olsen I on the hillside below the canal. The fenceline borders the SSLT property on the west boundary. The photo point used in previous years was looking south through the McCurdy I riparian along the old fenceline. In 2010 a new photo point was established for McCurdy I, looking south from the fence corner below the canal.

**2021 Maintenance Required:** No

**2021 Easement Conflict:** No

**2021 photo looking south on west boundary.**

**McCurdy I 2021**

**Hansen:** Length: 200 feet

**Type:** 5-strand, barbwire on steel posts.

**Baseline Condition:** Fenceline is in good condition, as well as the riparian area. Riparian area is dominated by small stands of willows along with cattails and other emergent marsh-type grasses.

**2021 Maintenance Required:** Possibly, willows and cattails have overtaken the fenceline

**2021 Easement Conflict:** No

**2021 photo looking south through Hansen riparian.**

**Hansen 2021**

**McCurdy II:** Length: 900 feet

**Type:** Field fence, 1-strand barbwire below, 2-strand barbwire above, steel posts.

**Baseline Condition:** Fenceline and riparian zone are in good condition. Riparian zone dominated by dense stands of woody shrubs, including Wood's rose and black hawthorn.

**2021 Maintenance Required:** No

**2021 Easement Conflict:** No

**2021 photo looking south through McCurdy II riparian zone.**

**2021 McCurdy II**

**Olsen II:** Length: 2700 feet

**Type:** Combination of existing, upgraded 7-strand barbwire on steel and wood posts and new 5-strand barbwire on steel posts.

**Baseline Condition:** Fenceline and riparian area in overall good condition. Riparian area dominated by grasses and willow and other shrub stands.

**2021 Maintenance Required:** No

**2021 Easement Conflict:** No

**2021 photo looking south through riparian zone.**

**2021 Olsen II**

**Harris:** Length: 4440 feet

**Type:** Combination of new, 5-strand barbwire on steel posts and new field fence with 2-strand barbwire on top, on steel posts, two soft gates included to provide access to lessees on embedded 40-acre BLM lease.

**Baseline Condition:** The Harris section of fenceline is currently monitored in two parts, Harris Riparian and Harris BLM sections. In previous years the two sections were monitored as one segment, but since 2012 they have been monitored as two separate sections. The Harris BLM section fenceline separates the Harris property from BLM property; a new photo point for this section was established in 2012. This area is dominated by grasses and shrubs and was found in good condition in 2012. The Harris section consists of the riparian area along the river's edge. The riparian area is a very narrow strip along the Bear River with steep banks. The area is dominated by grasses and small stands of willows.

**Harris BLM Section:**

**2021 Maintenance Required:** No

**2021 Easement Conflict:** No

**2021 photo taken looking west along BLM property line.**

**2021 Harris BLM Section**

**Harris Riparian Section:**

**2021 Maintenance Required:** No

**2021 Easement Conflict:** No

**2021 photo taken looking north along riparian/upland area.**

**2021 Harris Riparian Section**

## Oneida Performance Tracking

Oneida Plant Performance Tracking					
Date: 9-8-2021		Technician: Westerberg		Initial Performance Tracking: September 2009	
				<input checked="" type="checkbox"/>	Check if DFCs have been reviewed.
Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments
<b>Public Access</b>	PA1 - Viable recreational uses are maintained and/or improved. (also PA2, PA5, PA6, PA7, VM1, WR1, and WR3.)	<p>Are desired recreation activities occurring without discernible adverse environmental impacts*?</p> <ul style="list-style-type: none"> <li>• Are recreation opportunities, rules, and boating and fishing access evident?</li> <li>• Has litter/debris been removed?</li> <li>• Is the portable toilet maintained?</li> </ul> <p><i>*Applicable to the Oneida Narrows put-in, the Day Use Area, and the Take-Out and the "lawn area".</i></p>	OP1 (located at Oneida Narrows put-in)	YES	Put-in looks good/lots of public use
			OP2 (located at Day Use Area)	YES	Day use area looks good
			OP3 (located at "lawn area")	YES	Lawn area looks good
			OP4 (located at "Oneida take-out")	YES	Take-out looks good.

Eastside Parcel Performance Tracking				<div><input checked="" type="checkbox"/> X</div> Check if DFCs have been reviewed.	
Date: 9-8-2021		Technician: Westerberg			
Initial Performance Tracking: September 2009					
Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments
Public Access	PA2 - Disturbed lands are improved to restore healthy vegetated communities. (also PA5, PA6, PA7, PA8, PA9, PA10, VM1, VM3, WR1, WR2, and WR3.)	Is there noticeable improvement in riparian habitat since fire ring rehabilitation and sign placement?  • <i>Have fire rings been removed and rehabilitated?</i>	EP1	YES	Riparian area looks good. Lots of new growth-both grasses and trees
		• <i>Is trampled vegetation in the area recovering?</i>	EP2	YES	Looks good
Wetland and Riparian Habitat Management	WR2 - Riparian impacts associated with ongoing dispersed camping on PacifiCorp-owned land are eliminated. (also PA2, PA5, PA6, PA7, VM1, VM2, and WR1.)	Are riparian species, especially shrub and woody species, increasing along the shoreline?	EP3	YES	Riparian looks good, lots of new growth.
			EP4	YES	Riparian looks good, lots of new growth
			RP3	YES	Lots of growth, both grass and woody—lots of public use as well—lots of boater launching from RP3—New fire pits removed --Named “RP” but really in Eastside parcel
			RP4	YES	Lots of growth, willows and grasses Named “RP” but really in Eastside parcel

Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments
Wetland and Riparian Habitat Management	WR1 – Wetland and riparian resources, spring complexes, and the river shoreline are buffered and protected. (Also WR3, VM1, VM2.)	Are areas along the reservoir’s edge and waterways formerly impacted by livestock or vehicles minimally affected by invasive plants, and are desired grasses and forbs increasing?  <ul style="list-style-type: none"><li>Are desired plants being reestablished?</li><li>Are weedy species reasonably sparse and being managed appropriately?</li><li>Is there an adequate buffer of healthy riparian vegetation along the water’s edge?</li><li>Are fences established where necessary and are they preventing livestock trespass but not obstructing use by wildlife?</li><li>Are recreation users (fishers) having minimal impact?</li></ul>	MO3  (North of Highway 30 and west of the reservoir inlet)	YES	Looks good, some thistle
			MO4  (South of Highway, south edge of golf course)	YES	Looks good

Bear River Parcel Performance Tracking					
Date: 9-16-21 Technician: Bryan Westerberg		Initial Performance Tracking: Fall 2009		<input checked="" type="checkbox"/>	Check if DFCs
Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments
Public Access	PA2 – Lands disturbed by recreation or public uses are improved to reclaim healthy vegetation communities.  (Also PA3, PA4, PA6, PA7, PA9, VM1, VM2, VM3, WR1, WR2, WR3.)	Are areas formerly impacted by trespassing vehicles and inconsiderate users being accessed only by pedestrians, minimally affected by vandalism, and are weedy and invasive species decreasing? <ul style="list-style-type: none"> <li>Does signage indicate proper use?</li> <li>Is the area minimally affected by flammable material storage?</li> <li>Are vehicles prevented from accessing river and reservoir shorelines?</li> <li>Are sites along the river formerly used by campers returning to a desired state?</li> </ul>	BR 1  (north of Bear River along Big Springs Rd adjacent to cultivated field)	YES	Looks good
			BR2  (along dirt track to communication tower south of BR and east of Reservoir Rd)	YES	Area looks good
Agricultural Uses	AU1- Activities on leased land are consistent with the objectives of the Agreement, the LMP, and other resource management plans and meet lease stipulations.  (Also VM1, VM2, VM3, WR1, and AU4.)	Are agricultural practices appropriate for leased parcels? <ul style="list-style-type: none"> <li>Are agricultural operations limited to the area designated for agriculture?</li> <li>Are areas formerly leased but now designated Conservation Land returning to desired grasses and shrubs, dominated by native species?</li> </ul>	BR3  (between field and steep riparian area in southern-most lease and along east side of Bear River)	YES	Looks good

South Agricultural Parcel Performance Tracking Date: 9-7-21      Technician: Bryan Westerberg      Initial Performance Tracking: Fall 2009 <div> <input checked="" type="checkbox"/> Check if DFCs         </div>					
Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments
Public Access	PA2 – Lands disturbed by recreation or public uses are improved to reclaim healthy vegetation communities.  (Also PA3, PA4, PA6, PA7, PA9, VM1, VM2, VM3, WR1, WR2, WR3.)	Are areas formerly impacted by trespassing vehicles and inconsiderate users being accessed only by pedestrians, minimally affected by vandalism, and are weedy and invasive species decreasing? <ul style="list-style-type: none"> <li>Does signage indicate proper use?</li> <li>Are vehicles prevented from accessing reservoir shorelines?</li> </ul>	SA1  <i>(northeast of the new parking area north of Reservoir Road on the east end of the former 0.8 mile loop)</i>	YES	Looks good
Wetland and Riparian Habitat Management	WR – 1 Wetland and riparian resources, and reservoir shorelines are buffered, posted, and protected. (Also WR2, WR3, WR4.)	Are areas along reservoir edges and waterways formerly impacted by cultivation or recreation users minimally affected by invasive plants and are desired grasses, forbs, and shrubs becoming reestablished? <ul style="list-style-type: none"> <li>Are desired plants being reestablished?</li> <li>Are weedy species reasonably sparse and being managed appropriately?</li> <li>Is there an adequate buffer of healthy riparian vegetation along the water's edge?</li> <li>Are fences established where necessary and are they preventing vehicle trespass but not obstructing use by wildlife?</li> </ul>	SA2  <i>(northwest of Second Bridge Road approximately 0.75 miles from the west end)</i>	YES	Looks good, buffer grass very tall—fencing installed to stop unauthorized camping and motorized travel

South Agricultural Parcel Performance Tracking					
Date: 9-7-21      Technician: Bryan Westerberg		Initial Performance Tracking: Fall 2009		<input checked="" type="checkbox"/> Check if DFCs	
Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments
Agricultural Uses	AU1 – Activities on leased land are consistent with the objectives of the Agreement, the LMP, and Other resource management plans and meet lease stipulations.  (Also AU4)	Are agricultural practices appropriate for leased parcels? <ul style="list-style-type: none"> <li>• <i>Are agricultural operations limited to the area designated for agriculture?</i></li> <li>• <i>Is soil loss minimized during tillage and are weeds appropriately managed?</i></li> </ul>	SA 3  <i>(south side of second bridge road approximately 1 mile west of bridge over Bear River)</i>	YES	Looks good

*Grace Dam and Last Chance Site Plan Compliance Monitoring & Performance Tracking*

## Grace Dam and Last Chance Site Plan Compliance Monitoring

<b>Last Chance Parcel Compliance Monitoring</b> <b>Date: 10-22-2021</b> <b>Technician: Bryan Westerberg</b> <b>Baseline 2010</b>				
Issue	Corrective Action	Timeframe	Completed?	Comments
<b>Public Access</b>	<ul style="list-style-type: none"> <li>Use appropriate methods to determine and demarcate PacifiCorp-owned lands and allowed public access.</li> </ul>	Summer 2009	YES	Boundaries marked
		Annual	YES	Looks good
	<ul style="list-style-type: none"> <li>Ensure gate, fence, and fence post condition on all boundaries where natural features don't provide adequate boundary delineation and protection from livestock and vehicle trespass.</li> </ul>	Summer 2009	YES	Initially completed in 2011
		Annual	YES	Fence good
	<ul style="list-style-type: none"> <li>Establish and maintain gates on unimproved roads unsuitable for public motorized access.</li> </ul>	Fall 2009	YES	NOTE: proposed gates on northwest property were replaced with cattle guards 2010.
<b>Vegetation Management</b>	<ul style="list-style-type: none"> <li>Revise the weed control contract to include backpack spraying and other appropriate techniques.</li> </ul>	Spring 2009	YES	Initially completed
		Annual	YES	Weeds generally controlled
	<ul style="list-style-type: none"> <li>Reseed the upland area where livestock have damaged ground above the ramp leading to the old ford to native grasses and forbs.</li> </ul>	Fall 2009	YES	Initially completed
		Annual	YES	Conditions improving, new native growth, decreasing weeds-Looks good
<b>Wetland and Riparian Habitat Management</b>	<ul style="list-style-type: none"> <li>Secure the ramp leading down to the old ford at the north end of the parcel to prevent trespassing livestock from accessing the river's edge.</li> </ul>	Summer 2009	YES	Property boundary is fenced and cattle guards on road are in place.
	<ul style="list-style-type: none"> <li>Reseed and replant the riparian area where livestock have damaged riparian areas at the old ford.</li> </ul>	Fall 2009	YES	Initially completed
		Annual	YES	Looks good, lots new shrub growth, weeds being controlled
<b>Agricultural Uses</b>	<ul style="list-style-type: none"> <li>Renegotiate leases to limit lessees to one annual cut of alfalfa, leaving the balance for wildlife.</li> </ul>	Spring 2009	YES	Initially completed
		Annual	YES	One cut in 2021

Grace Dam Parcel Compliance Monitoring				
Date: 9-13-2021		Technician: Bryan Westerberg		
Issue	Corrective Action	Timeframe	Completed?	Comments
Public Access	<ul style="list-style-type: none"> <li>Use appropriate methods to determine and demarcate PacifiCorp-owned lands and allowed public uses.</li> </ul>	Summer 2009	YES	Initially complete
		Annual	YES	
	<ul style="list-style-type: none"> <li>Ensure fence and fence post condition on boundaries as necessary to control trespass OHV and livestock grazing.</li> </ul>	Summer 2009	YES	Initially complete
		Annual	YES	Fence is good
	<ul style="list-style-type: none"> <li>Post "No Trespassing" and ownership signs on the west side under the Highway 34 bridge to discourage public access to the Project Operations land west of the bridge and to protect the riparian habitat.</li> </ul>	Summer 2009	YES	Complete
		Annual	YES	No signs but rock barriers placed to stop access.
	<ul style="list-style-type: none"> <li>Complete the signage and facilities at the Black Canyon put-in with: (1) recreational rules signs; (2) "Part 8" signs; (3) a "Stop" sign; (4) "No Fires" signs; (5) "Speed Limit 10 mph" signs; (6) "Pack It In, Pack It Out" signs; (7) a portable toilet placed and maintained spring and summer at the put-in.</li> </ul>	Spring 2009	YES	Complete
		Annual	YES	Signage complete
	<ul style="list-style-type: none"> <li>Maintain the parking areas according to RTSP standards (p. 29).</li> </ul>	Spring 2009	YES	Initially completed
		Ongoing	YES	Good condition-Bare ground treatment in 2020
	<ul style="list-style-type: none"> <li>Provide overflow parking area if boater use exceeds capacity of gravel parking area.</li> </ul>	Future activity	NO	Not needed at this time
		Annual	N/A	N/A
	<ul style="list-style-type: none"> <li>Maintain boat access at the Grace Dam put-in and consider placing rocks in river to create eddy for safer boat launch.</li> </ul>	Spring 2009	YES	Initially completed
		Ongoing	YES	Boat access available. Eddy not necessary
	<ul style="list-style-type: none"> <li>Inspect the recreation site periodically (every 5 years, per LMP and RTSP) for signs of environmental damage to adjacent sensitive habitats designated as Conservation shoreline buffers, and appropriate steps will be taken if damage is detected.</li> </ul>	Spring 2014, initially	YES	Good
	<ul style="list-style-type: none"> <li>Install boulders or other barriers to prevent vehicles from accessing the area under the bridge to reduce loitering and littering.</li> </ul>	Fall 2009	YES	Rock barriers installed

Grace Dam Parcel Compliance Monitoring				
Date: 9-13-2021		Technician: Bryan Westerberg		
Issue	Corrective Action	Timeframe	Completed?	Comments
Vegetation Management	<ul style="list-style-type: none"> <li>Undertake appropriate weed control measures along the riparian zone and project roads as well as in localized, internal areas.</li> </ul>	Spring 2010	YES	Weeds generally controlled.
	<ul style="list-style-type: none"> <li>Discontinue grazing on small (approximately 1-acre) parcel north of residence and east of Grace Dam to allow revegetation of riparian strip.</li> </ul>	Spring 2009	NO	Incomplete
		Annual	NO	Horse grazing, temporary electric fence in place. Grazing continues
Agricultural Uses	<ul style="list-style-type: none"> <li>No agricultural uses.</li> </ul>	Spring 2009	YES	No permitted use; see previous comment (above)

Flowline Parcel Compliance Monitoring				
Date: 9-13-2021		Technician: Bryan Westerberg		
Issue	Corrective Action	Timeframe	Completed?	Comments
Public Access	<ul style="list-style-type: none"> <li>Use appropriate methods to determine and demarcate PacifiCorp-owned lands and allowed public access.</li> </ul>	Summer 2009	YES	Boundaries are marked
		Annual	YES	Consider options for public access signage.
	<ul style="list-style-type: none"> <li>Determine where public will be prohibited from access to Project Operations lands around flowline and surge tank because of unsafe conditions (e.g., ponds, escarpments, and piles of debris). Ensure appropriate signage and fence and fence post condition on all boundaries to prevent unauthorized public access, trespass grazing, and OHV access.</li> </ul>	Spring and Summer 2009	NO	Incomplete
		Annual	YES	No signage or fencing in place to regulate public access or use at surge tank, on 5-ac or 47-ac parcels or along much of flowline. Consideration of "pedestrian access only" and "no shooting" signs in 2013— <b>remains unchanged in 2021, fencing completed in 2015 and is in good condition.</b>
	<ul style="list-style-type: none"> <li>Negotiate easement with Last Chance Canal Company for catch basin at end of canal to require appropriate hazard warnings around the basin, near debris piles, and at the escarpment. Ensure that posted warnings are maintained by the canal company.</li> </ul>	Fall 2009	NO	Incomplete
		Annual	YES	Easement competed with Don Gilbert. Signage TBD

Flowline Parcel Compliance Monitoring				
Date: 9-13-2021		Technician: Bryan Westerberg		
Issue	Corrective Action	Timeframe	Completed?	Comments
	<ul style="list-style-type: none"> <li>Notify party using the 47-acre triangular parcel without a lease for grazing horses to remove livestock.</li> </ul>	Spring 2009	YES	Initially completed
		Annual	YES	No grazing
<b>Vegetation Management</b>	<ul style="list-style-type: none"> <li>Monitor 47-acre triangular parcel previously used by horses; reseed if necessary, to improve wildlife habitat.</li> </ul>	Fall 2009	YES	Initially completed
		Annual	YES	No recent livestock use apparent - wildlife use. Seeding unnecessary at present.
	<ul style="list-style-type: none"> <li>Clean up 5 acres previously used by others as dumping ground; seek opportunities for disposal, including sale or exchange with Caribou County for road maintenance material storage.</li> </ul>	Fall 2009	YES	Cleanup complete, structures still remain
		Annual	YES	Continue to work on this
	<ul style="list-style-type: none"> <li>Where necessary, revegetate the disturbed uplands around the surge tank that are not included in agriculture leases with native upland grasses and forbs.</li> </ul>	Fall 2009	YES	Initially completed
		Annual	YES	No evidence of reseeding around surge tank. Unnecessary at this time.
	<ul style="list-style-type: none"> <li>Undertake appropriate weed control measures along the flowline and in localized, internal areas.</li> </ul>	Spring 2010	YES	Initially completed
		Annual	YES	Weeds are an issue by surge tank
<b>Wetland and Riparian Habitat Management</b>	<ul style="list-style-type: none"> <li>As long as the wet areas under the flowline are not being grazed, no other action is required.</li> </ul>	Spring 2009	YES	No grazing apparent.
<b>Agricultural Uses</b>	<ul style="list-style-type: none"> <li>Dispose of properties east of the current flowline along the old flowline alignment that are in the middle of cultivated fields and owned by a single landowner to that landowner by sale or exchange.</li> </ul>	Summer 2009	<b>NO</b>	<b>Incomplete</b>
		Ongoing	<b>NO</b>	<b>Need to advance this issue</b>
	<ul style="list-style-type: none"> <li>Negotiate updated lease terms with farmers cultivating the narrow strips west of the flowline and near the surge tank.</li> </ul>	Spring 2009	<b>NO</b>	<b>Incomplete</b>
		Ongoing	<b>NO</b>	<b>Need to advance this issue</b>

## Grace Dam and Last Chance Performance Tracking

Last Chance Performance Tracking					
Date: 10-22-2021 Technician: Bryan Westerberg, Initial Performance Tracking: October 8, 2010				<input checked="" type="checkbox"/>	Check if DFCs have been reviewed.
Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments
Public Access	PA2 – Lands disturbed by recreation or other public uses are improved to reclaim healthy vegetation communities. (Also PA3, PA6, VM1, VM2, VM3, WR1, WR2.)	Are areas formerly damaged by trespassing livestock free of invasive plants, and is bare ground being replaced by native grasses and forbs? <ul style="list-style-type: none"> <li>Are native plants being reestablished on the uplands above, the ramp, and the riparian zone adjacent to, the old river ford on the west side of the river?</li> <li>Has the extent of bare ground been reduced enough to minimize soil erosion?</li> <li>Has the fence around the old ford been removed so as not to obstruct use of the riparian zone by wildlife?</li> </ul>	LC1 (at top of ramp leading to old ford)	YES	No grazing, weeds under control, seeded area has new growth of native grasses.
			LC2 (on west side of river at old ford)	YES	Weeds under control, lots of native shrub growth, willows, native grasses increasing, no grazing.
Vegetation Management	VM3 - habitats such as sagebrush-steppe are enhanced and protected. (Also VM1, VM2.)	Are sagebrush-steppe and mountain brush communities healthy, diverse in plant composition, and free of invasive species? <ul style="list-style-type: none"> <li>Are native plants established and free of invasive species?</li> </ul>	LC3 (on western edge of agricultural field at narrowest point in southwest piece)	YES	Sagebrush-steppe community healthy. Weeds still pervasive, especially along edge of fields. Abundance of native vegetation increases away from edge of fields. Musk thistle, Japanese brome, and cheat grass apparent.
			LC4 (on east side of river at old ford)	YES	Looks good, weeds generally controlled

Last Chance Performance Tracking					<input checked="checked" type="checkbox"/> Check if DFCs have been reviewed.	
Date: 10-22-2021 Technician: Bryan Westerberg, Initial Performance Tracking: October 8, 2010						
Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments	
Agricultural Uses	AU1 - Activities on leased land are consistent with the objectives of the Agreement, the LMP, and other resource management plans and meet lease stipulations. (Also AU4.)	Are agricultural practices appropriate for leased parcels and helping to support wildlife? <ul style="list-style-type: none"> <li>• <i>Are agricultural operations limited to the area designated for agriculture?</i></li> <li>• <i>Are crops limited to alfalfa, and is only the first cut removed, leaving the balance for wildlife?</i></li> <li>• <i>Is soil loss minimized during tillage, and are weeds appropriately managed?</i></li> </ul>	<b>LC5</b> <i>(on east side of river within agricultural field)</i>	YES	Agricultural practices appear to be appropriately confined. Crops limited to alfalfa and only one cut per season- overall health of alfalfa field has declined.	
			<b>LC6</b> <i>(on west side of river within agricultural field)</i>	YES	Agricultural practices appear to be appropriately confined. Crops limited to alfalfa and only one cut per season-overall health of alfalfa field has declined, needs crop rotation. Lots of thistle in Ag fields	

Grace Dam Performance Tracking					<input checked="checked" type="checkbox"/> Check if DFCs have been reviewed.	
Date: 9-13-2021 Technician: Bryan Westerberg		Initial Performance Tracking: October 8, 2010				
Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments	
Public Access	PA1 - Viable recreational uses are maintained and/or improved. (Also PA2, PA3, PA4, PA6, PA7, VM1, VM2, VM3, WR1, WR2, WR3, WR4)	Are established recreation areas receiving substantial use, and do these visitors have a minimal impact? <ul style="list-style-type: none"> <li>Is there evidence of boaters taking advantage of the developed recreation site for whitewater boating at appropriate flows?</li> <li>Are soil and vegetation impacts limited to the parking area, put-in ramp, and narrow strips around roadways?</li> </ul>	GD1 (on north side of parking area east of Highway 34 bridge and south of river)	YES	Looks good.	
	PA2 – Lands disturbed by recreation or other public uses are improved to reclaim healthy vegetation communities. (Also PA3, PA6, VM1, VM2, VM3, WR1, WR2.)	Are upland areas formerly damaged by trespassing livestock and OHV use free of invasive plants, and is bare ground being replaced by native grasses and forbs? <ul style="list-style-type: none"> <li>Are native plants being reestablished?</li> <li>Are weedy species reasonably sparse and being managed appropriately?</li> <li>Is the percentage of bare ground small enough to minimize soil erosion?</li> <li>Have fences been established, and are they preventing livestock trespass but not obstructing use by wildlife?</li> </ul>	GD2 (along east side of flowline, south of river, and west of Highway 34 bridge)	YES	Area is improving, less ATV use, weeds decreasing---lots of grass	

<b>Vegetation Management</b>	VM3 - habitats such as sagebrush steppe are enhanced and protected. (Also VM1, VM2.)	<p>Are areas in uplands relatively free of weeds and composed of a healthy mix of native grasses, forbs, and shrubs?</p> <ul style="list-style-type: none"> <li>• <i>Are weedy species reasonably sparse and being managed appropriately?</i></li> <li>• <i>Are native plants being reestablished?</i></li> <li>• <i>Have fences been established, and are they preventing livestock trespass but not obstructing use by wildlife?</i></li> </ul>	<b>GD3</b> (south of road to recreation parking area and east of Highway 34)	YES	Looks good, weeds generally controlled
<b>Wetland and Riparian Habitat Management</b>	WR1 - Wetland and riparian resources, spring complexes, and the river shoreline are buffered and protected. (Also WR2, WR3, WR4.)	<p>Are areas along waterways formerly damaged by livestock free of invasive plants, and is bare ground being replaced by native grasses and forbs?</p> <ul style="list-style-type: none"> <li>• <i>Are native plants being reestablished?</i></li> <li>• <i>Are weedy species reasonably sparse and being managed appropriately?</i></li> <li>• <i>Is there an adequate buffer of healthy riparian vegetation along the water's edge?</i></li> <li>• <i>Have fences been established and are they preventing livestock trespass but not obstructing use by wildlife?</i></li> <li>• <i>Are recreation users (fishers) having minimal impact on the riparian zone north of the river and west of the Highway 34 bridge?</i></li> </ul>	<b>GD4</b> (east of dam and north of residence near water's edge)	NO	North of residence has heavy grazing to water's edge
			<b>GD5</b> (on north side of river and midway between Highway 34 and old RR bridge)	YES	Looks good

Flowline Performance Tracking					<input checked="" type="checkbox"/>	Check if DFCs have been reviewed.
Date: 9-13-2021 Technician: Bryan Westerberg Initial Performance Tracking: October 8, 2010						
Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments	
Public Access	PA1 - Viable recreational uses are maintained and/or improved. (Also PA2, PA3, PA4, PA5, PA6, PA7, VM1, VM2, VM3)	Does public use of the 5- acre and 47-acre Upland Conservation areas have a minimal impact? <ul style="list-style-type: none"> <li>Is there evidence of hunters and others utilizing the conservation areas appropriately?</li> <li>Is there evidence of wildlife taking advantage of the available habitat?</li> <li>Are soil and vegetation impacts minimal and vegetation cover for upland birds and other species adequate?</li> </ul>	FL1 (west edge of 5-acre triangular parcel at junction of One Mile Road and Varley Road)	YES	Little evidence of significant public use.	
			FL2 (within 47-acre triangular parcel along River Road and west of flowline)	YES	Little evidence of significant public use. Wildlife use includes scat from marmots and coyote, badger cadaver, grouse scat. Deer can be observed year round on the 47 acre parcel	
Vegetation Management	VM3 - habitats such as sagebrush steppe are enhanced and protected. (Also VM1, VM2.)	Are areas in uplands relatively free of weeds and composed of a healthy mix of native grasses, forbs, and shrubs? <ul style="list-style-type: none"> <li>Are weedy species reasonably sparse and being managed appropriately?</li> <li>Are native plants being reestablished?</li> <li>Have fences been established, and are they preventing livestock trespass but not obstructing use by wildlife?</li> </ul>	FL3 (in uplands west of surge tank)	YES	Good	

Flowline Performance Tracking					<div style="border: 1px solid black; display: inline-block; padding: 2px;">X</div> Check if DFCs have been reviewed.	
Date: 9-13-2021    Technician: Bryan Westerberg    Initial Performance Tracking:    October 8, 2010						
Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments	
<b>Agricultural Uses</b>	AU1 - Activities on leased land are consistent with the objectives of the Agreement, the LMP, and other resource management plans. (Also AU4.)	Are agricultural practices appropriate for the leased parcels? <ul style="list-style-type: none"> <li>• <i>Are agricultural operations limited to the area designated for agriculture?</i></li> <li>• <i>Is soil loss minimized during tillage, and are weeds appropriately managed?</i></li> </ul>	<b>FL4</b> <i>(in fields west of flowline and west of River Road)</i>	NO	Very weedy, musk thistle is big issue.

# Appendix G

*Habitat Enhancement Project Monitoring*

## **ECC Habitat Enhancement Project Monitoring**

Habitat Enhancement Projects funded by the ECC are monitored annually or as needed. A standardized form is completed for each site and a photo is taken. This appendix includes a compilation 2021 monitoring efforts.

**Alleman Dam Removal**

## ECC Project Monitoring Form

**Project:** Alleman Dam Removal

**Date:** 11-11-2021

**Observer(s):** Bryan Westerberg

**Project Description and Photo Point:**

**Project Start Date:** 2010

*Remove an irrigation diversion dam on Alleman property on Georgetown Creek, exclude cattle and reclaim*

**Initial Monitor Date:**

**Project Finish Date:** 2010

**Location and Baseline Data:** Georgetown Idaho, in the field just north of where West 4<sup>th</sup> street turns into Narrows road—you can see the red steel hay storage shed that was built next to the project

**Fence line(s) Condition:**

**Structure(s) Condition:** Overall good

**Visual Water Inspection:** (quality and flow) good

Westerberg  
Trap

**Date:** 10-13-2021

**Observer(s):** Bryan

**Project Description and Photo Point:**

**Project Start Date:** 2010

*Design and build a structure to exclude nonnative fish from Kackley Springs*

**Initial Monitor Date:**

**Project Finish Date:** 2010

**Location and Baseline Data:**

N 42 .5225

W 111. 796 Located where Kackley springs merges with the Bear River below Grace operation area

**Fence line(s) Condition:**

**Structure(s) Condition:** Good condition

**Success of Reclamation Efforts:** good, seeded areas have reestablished

**Visual Water Inspection:** (quality and flow) flow good, quality good

**Road and /or Trail Condition:**

**Signage:**

**Agricultural Uses:**

**Problems or trespass, and any necessary corrective actions:**

**Wildlife Observations:**

Fish visible around trap, signs of beaver

**Kackley Springs Reroute**

## ECC Project Monitoring Form

**Project:** Kackley Springs Reroute  
**Westerberg**

**Date:** 10-13-2021

**Observer(s):** Bryan

**Project Description and Photo Point:**

**Project Start Date:** 2009

*Redirect current spring flow to a longer route through Kackley property. Remove dikes and other water control structures*

**Initial Monitor Date:**

**Project Finish Date:** 2010

**Location and Baseline Data:** Just south of Grace operations and power plant.

**Fence line(s) Condition:**

**Structure(s) Condition:**

**Success of Reclamation Efforts:** Looks great, grasses reestablishing, native veg good, willow growth—new work around pound area—looks good

**Visual Water Inspection: (quality and flow)**

Flow is good, quality good

**Road and /or Trail Condition:**

**Signage:**

**Agricultural Uses:**

**Problems or trespass, and any necessary corrective actions:**

**Wildlife Observations:**

**Aquatic Nuisance Signage**

## ECC Project Monitoring Form

**Project:** Aquatic Nuisance signs

**Date:** 10-26-2021

**Observer(s):** Bryan Westerberg

**Project Description and Photo Point:**

**Project Start Date:** 2009

*Install interpretive signage at high use boating and fishing areas warning of aquatic nuisance species*

**Initial Monitor Date:**

**Project Finish Date:** 2009

**Location and Baseline Data:**

PacifiCorp boating ramps and rec sites along the Bear River

**Fence line(s) Condition:**

**Structure(s) Condition:** Signs good, some are somewhat weathered, but still readable

**Success of Reclamation Efforts:**

**Visual Water Inspection:** (quality and flow)

**Road and /or Trail Condition:**

**Signage:** Signs good, present

**Agricultural Uses:**

**Problems or trespass, and any necessary corrective actions:**

**Wildlife Observations:**

**Keetch Fish Screen**

## ECC Project Monitoring Form

**Project:** Keetch Fish Screen

**Date:** 11-5-2021

**Observer(s):** Bryan Westerberg

**Project Description and Photo Point:**

**Project Start Date:** 2005

*Convert 198 acres of cropland from flood irrigation to sprinkler. Pumping plant and water control system and screen*

**Initial Monitor Date:**

**Project Finish Date:** 2008

**Location and Baseline Data:**

W-111.2884

N42.2517

**Fence line(s) Condition:**

**Structure(s) Condition:** Pumping plant and screen good condition

**Success of Reclamation Efforts:**

**Visual Water Inspection:** (quality and flow)

**Road and /or Trail Condition:**

**Signage:**

**Agricultural Uses:**

**Problems or trespass, and any necessary corrective actions:**

**Wildlife Observations:**

**Bailey Creek Fencing**

## ECC Project Monitoring Form

**Project:** Bailey Creek Fencing

**Date:** 11-11-2021

**Observer(s):** Bryan Westerberg

**Project Description and Photo Point:**

**Project Start Date:** 2010

*Build 500 ft of riparian fence at the headwaters of Bailey Creek*

**Initial Monitor Date:**

**Project Finish Date:** 2010

**Location and Baseline Data:**

W-111.6003      N42.5595

Trailhead is located along old Oregon Road in the Bailey Creek subdivision-fencing is about 3 miles up ATV trail

**Fence line(s) Condition:** Site visited in 2021 but photo was lost, lower fence section below spring needs repair

**Structure(s) Condition:**

**Success of Reclamation Efforts:**

**Visual Water Inspection:** (quality and flow)

**Eight Mile Canyon #10**

## ECC Project Monitoring Form

**Project:** Eight Mile Canyon #10

**Date:**11-11-2021

**Observer(s):** Bryan Westerberg

**Project Description and Photo Point:**

**Project Start Date:**2007

- Boulders placed at two campsites to define camp area, restrict ATV access to riparian

**Initial Monitor Date:**

**Project Finish Date:**2008

**Location and Baseline Data:**

**Fence line(s) Condition:**

**Structure(s) Condition: (diversions, fish screens, buildings)**

- Boulders still present, vegetation looks good, some camping taking place far end

**Success of Reclamation Efforts:**

Good

**Visual Water Inspection: (quality and flow)**

**Road and /or Trail Condition:**

**Signage:**

**Agricultural Uses:**

**Problems or trespass, and any necessary corrective actions:**

**Coop Trail Crossing Bridge**

## ECC Project Monitoring Form

**Project:** Coop Crossing and Trail 308 Improvements **Date:** 9-6-2020 **Observer(s):** Bryan Westerberg

**Project Description and Photo Point:** **Project Start Date:** 2/27/204  
Install bridge at coop creek trail crossing, improve trail

**Initial Monitor Date:** **Project Finish Date:** 9/2015

**Location and Baseline Data:**

USFS motorized trail 308 is located eight miles west of Georgetown, Idaho. Trailhead access is via Skinner Canyon Road (FSR 403) and FSR 985. Trail 308 crosses the headwaters of Coop, Beaver, North Stauffer, and South Stauffer creeks. The proposed trail bridge location on Coop Creek is 0.3 miles from the trailhead at these coordinates:

Existing ford; CONUS NAD83 Zone 12T 457565E, 4700523N

New Bridge Location: CONUS NAD83 Zone 12T 457517E, 4700506N

**Fence line(s) Condition:** : Good, 2021 photo was lost, but site was visited in 2021

**Structure(s) Condition:** (diversions, fish screens, buildings)  
Good condition

**Success of Reclamation Efforts:**  
• Good overall condition

**Visual Water Inspection:** (quality and flow)

**Road and /or Trail Condition:**

**Signage:**

**Agricultural Uses:**

**Problems or trespass, and any necessary corrective actions:**

**Wildlife Observations:**

**Smith Bear River Fencing and Alternate Water Source**

## ECC Project Monitoring Form

**Project:** Smith Fencing and Water source      **Date:** 9-16-2021      **Observer(s):** Bryan Westerberg

**Project Description and Photo Point:**

**Project Start Date:** 2013

- Fence Bear River/Create 35ft buffer-build alternate water source for livestock

**Initial Monitor Date:**

**Project Finish Date:** 2015

**Location and Baseline Data:**

- Caribou National Forest/8 Mile Canyon Road

**Fence line(s) Condition:**

**Structure(s) Condition:** (diversions, fish screens, buildings)

- Good Condition
- 

**Success of Reclamation Efforts:**

**Visual Water Inspection:** (quality and flow)

**Road and /or Trail Condition:**

**Signage:**

**Agricultural Uses:**

**Problems or trespass, and any necessary corrective actions:**

**Wildlife Observations:**

**Oneida Narrows Boater Take Out**

## ECC Project Monitoring Form

**Project:** Oneida Narrows Boater Take Out

**Date:**10-12-2021

**Observer(s):** Bryan Westerberg

**Project Description and Photo Point:**

**Project Start Date:**2014

- Construct non motorized boater take out

**Initial Monitor Date:**

**Project Finish Date:**2015

**Location and Baseline Data:**

- Oneida Narrows boater take out

**Fence line(s) Condition:**

**Structure(s) Condition: (diversions, fish screens, buildings)**

- Good Condition
- 

**Success of Reclamation Efforts:**

**Visual Water Inspection: (quality and flow)**

**Road and /or Trail Condition:**

**Signage:**

**Agricultural Uses:**

**Problems or trespass, and any necessary corrective actions:**

**Wildlife Observations:**

**Albert Moser Fish Screen**

## ECC Project Monitoring Form

Cub River

<b>Project:</b>	<b>Date:</b>	<b>Observer(s):</b>
Albert Moser Fish Screen	1/4/22	Zane Stephenson

<b>Project Description and Photo Point:</b>	<b>Project Start Date:</b>
---	----------------------------

Irrigation screen to limit fish entrainment.

Photo taken from head gate looking downstream at screen structure.

<b>Initial Monitor Date:</b>	<b>Project Finish Date:</b>
------------------------------	-----------------------------

**Location and Baseline Data:** (NAD 83) 12T 0442563 4665374

Four water wheel powered drums.

**Fence line(s) Condition:**

N/A

**Structure(s) Condition (diversions, fish screens, buildings):**

All structures are in good condition, but some of the mesh footing is starting to sag in some places.

**Success of Reclamation Efforts:**

N/A

**Visual Water Inspection (quality and flow):**

N/A

**Road and /or Trail Condition:**

N/A

**Signage:**

N/A

**Agricultural Uses:**

N/A

**Problems or trespass, and any necessary corrective actions:**

All rubber stripping was replaced this year once again. All of the rubber stripping had noticeable cracking and was coming apart on some of the drums. Rubber was mounted slightly looser to try and prevent weather cracking again.

**Alleman Lower**

## ECC Project Monitoring Form

Georgetown Creek

<b>Project:</b>	<b>Date:</b>	<b>Observer(s):</b>
Alleman Lower	1/4/22	Zane Stephenson

<b>Project Description and Photo Point:</b>	<b>Project Start Date:</b>
---	----------------------------

Irrigation screen to limit fish entrainment.

Photo taken from downstream looking upstream at screen structure.

<b>Initial Monitor Date:</b>	<b>Project Finish Date:</b>
------------------------------	-----------------------------

**Location and Baseline Data:** (NAD 83) 12T 0468876 4702717

Single internal paddle wheel powered drum.

**Fence line(s) Condition:**

N/A

**Structure(s) Condition (diversions, fish screens, buildings):**

Structures are in good condition, cables are getting worn out.

**Success of Reclamation Efforts:**

N/A

**Visual Water Inspection (quality and flow):**

N/A

**Road and /or Trail Condition:**

N/A

**Signage:**

N/A

**Agricultural Uses:**

N/A

**Problems or trespass, and any necessary corrective actions:**

No problems with this screen this year. This screen requires dam board adjustments to maintain smooth operation. The pulley system needs new wire. Given low water conditions, the wheel was difficult to keep turning this year.

**Cub River Fish Ladder**

## ECC Project Monitoring Form

Cub River

<b>Project:</b>	<b>Date:</b>	<b>Observer(s):</b>
Cub River Fish Ladder	1/4/22	Zane Stephenson

<b>Project Description and Photo Point:</b>	<b>Project Start Date:</b>
---	----------------------------

Fish ladder to allow fish passage.

Photo taken from top of ladder looking downstream.

<b>Initial Monitor Date:</b>	<b>Project Finish Date:</b>
------------------------------	-----------------------------

**Location and Baseline Data:** (NAD 83) 12T 0436748 4657555

Knapp diversion and fish screen.

**Fence line(s) Condition:**

N/A

**Structure(s) Condition (diversions, fish screens, buildings):**

Good

**Success of Reclamation Efforts:**

N/A

**Visual Water Inspection (quality and flow):**

N/A

**Road and /or Trail Condition:**

N/A

**Signage:**

N/A

**Agricultural Uses:**

N/A

**Problems or trespass, and any necessary corrective actions:**

Other than detritus removal, there were no issues with the ladder this year.

**Davis Fish Screen**

## ECC Project Monitoring Form

Cottonwood Creek

<b>Project:</b>	<b>Date:</b>	<b>Observer(s):</b>
Davis Fish Screen	1/3/22	Zane Stephenson

<b>Project Description and Photo Point:</b>	<b>Project Start Date:</b>
Irrigation screen to limit fish entrainment. Photo from top of screen looking down canal.	
<b>Initial Monitor Date:</b> At least once a week during irrigation season.	<b>Project Finish Date:</b>

**Location and Baseline Data:** (NAD 83) 12T 0424785 4698170  
Two water wheel powered drum screens.

**Fence line(s) Condition:**

Good

**Structure(s) Condition (diversions, fish screens, buildings):**

Good

**Success of Reclamation Efforts:**

N/A

**Visual Water Inspection (quality and flow):**

N/A

**Road and /or Trail Condition:**

N/A

**Signage:**

N/A

**Agricultural Uses:**

N/A

**Problems or trespass, and any necessary corrective actions:**

This screen fills with sediment quickly and does not run well in low flows.

No Photo Available

**Georgetown Fish Ladder**

## ECC Project Monitoring Form

Georgetown Creek

**Project:** Georgetown Fish Ladder      **Date:** 1/4/22      **Observer(s):** Zane Stephenson

**Project Description and Photo Point:** Fish ladder to allow fish passage.      **Project Start Date:**

**Initial Monitor Date:**      **Project Finish Date:**

**Location and Baseline Data:** (NAD 83) 12T 0474326 4704924

**Fence line(s) Condition:**

N/A

**Structure(s) Condition (diversions, fish screens, buildings):**

Filled with sediment

**Success of Reclamation Efforts:**

N/A

**Visual Water Inspection (quality and flow):**

N/A

**Road and /or Trail Condition:**

N/A

**Signage:**

N/A

**Agricultural Uses:**

N/A

**Problems or trespass, and any necessary corrective actions:**

This fish ladder would take a considerable amount of maintenance to become fully functional again.

**Knapp Fish Screen**

## ECC Project Monitoring Form

Cub River

**Project:** Knapp Fish Screen      **Date:** 1/4/22      **Observer(s):** Zane Stephenson

**Project Description and Photo Point:**      **Project Start Date:**

Irrigation screen to limit fish entrainment.

Photo is top of screen looking down.

**Initial Monitor Date:** At least once a week during irrigation season.      **Project Finish Date:**

**Location and Baseline Data:** (NAD 83) 12T 0436740 4657563

Two electric powered drum screens.

**Fence line(s) Condition:**

N/A

**Structure(s) Condition (diversions, fish screens, buildings):**

Fish Screen needs some repairs.

**Success of Reclamation Efforts:**

N/A

**Visual Water Inspection (quality and flow):**

N/A

**Road and /or Trail Condition:**

N/A

**Signage:**

N/A

**Agricultural Uses:**

N/A

**Problems or trespass, and any necessary corrective actions:**

Future Repairs: Repair golf ball sized hole on one drum and replace rubber stripping on the other drum.

When too much debris gets into the first screen, it throws its chain. Weekly removal of debris was required to keep this from happening.

**Lower Cottonwood Diversion**

## ECC Project Monitoring Form

Cottonwood Creek

**Project:** Lower Cottonwood Diversion      **Date:** 1/3/22      **Observer(s):** Zane Stephenson

**Project Description and Photo Point:**      **Project Start Date:**

Irrigation screen to limit fish entrainment.

Fish ladder to allow fish passage.

**Initial Monitor Date:** At least once a week during irrigation season.      **Project Finish Date:**

**Location and Baseline Data:** (NAD 83) 12T 0436234 4686935

Single water wheel powered drum and fish ladder.

**Fence line(s) Condition:**

N/A

**Structure(s) Condition (diversions, fish screens, buildings):**

Good

**Success of Reclamation Efforts:**

N/A

**Visual Water Inspection (quality and flow):**

N/A

**Road and /or Trail Condition:**

N/A

**Signage:**

N/A

**Agricultural Uses:**

N/A

**Problems or trespass, and any necessary corrective actions:**

There were no major issues with this screen this year just normal preventative maintenance and cleaning. Although, screen gets clogged with small gravel and needs to be pressure washed at least once a month. Perforated plate with larger mesh size is being considered and plans to replace the mesh have been made. The boards for the fish ladder need adjusted weekly to keep that operational.

**Ovid Fish Screen**

## ECC Project Monitoring Form

Ovid Creek

<b>Project:</b>	<b>Date:</b>	<b>Observer(s):</b>
Ovid Fish Screen	1/4/22	Zane Stephenson

<b>Project Description and Photo Point:</b>	<b>Project Start Date:</b>
Irrigation screen to limit fish entrainment. Photo is a view of screen structure looking downstream.	
<b>Initial Monitor Date:</b> At least once a week during irrigation season.	<b>Project Finish Date:</b>

**Location and Baseline Data:** (NAD 83) 12T 0461652 4689490  
Single water wheel powered drum screen.

**Fence line(s) Condition:**

N/A

**Structure(s) Condition (diversions, fish screens, buildings):**

Good

**Success of Reclamation Efforts:**

N/A

**Visual Water Inspection (quality and flow):**

N/A

**Road and /or Trail Condition:**

N/A

**Signage:**

N/A

**Agricultural Uses:**

N/A

**Problems or trespass, and any necessary corrective actions:**

This screen has a problem with entraining fish that make it into the top end of the screen and have a hard time finding the bypass pipe to make it back to the creek. I believe that the necessary corrective action for this problem is to completely rebuild this structure. The reason that the bypass pipe is hard for the fish to find is because it is just below the waterline and it is very small. The bypass pipe is in this position because this screen structure was originally built to be a Goobi bubbler and later retrofitted to be a drum screen.

**Treasureton Fish Screen**

## ECC Project Monitoring Form

Cottonwood Creek

**Project:** Treasureton Fish Screen      **Date:** 1/4/22      **Observer(s):** Zane Stephenson

**Project Description and Photo Point:**      **Project Start Date:**

Irrigation screen to limit fish entrainment.  
Photo from top of screen looking down canal.

**Initial Monitor Date:** At least once a week during irrigation season.      **Project Finish Date:**

**Location and Baseline Data:** (NAD 83) 12T 0424346 4693377  
Three water wheel powered drum screens.

**Fence line(s) Condition:**

Some rails need welded back up into position.

**Structure(s) Condition (diversions, fish screens, buildings):**

Good

**Success of Reclamation Efforts:**

N/A

**Visual Water Inspection (quality and flow):**

N/A

**Road and /or Trail Condition:**

N/A

**Signage:**

N/A

**Agricultural Uses:**

N/A

**Problems or trespass, and any necessary corrective actions:**

There were no major problems with this screen this year. Just normal preventative maintenance and cleaning. Low water levels made it difficult to keep enough flow to turn the paddle wheels. Landowner was shutting escape at start of year but stopped when talked to about blocking fish passage.

# Appendix H

*2022 Implementation Schedule*

Table H-1. Bear River Hydroelectric Project - 2022 Implementation Schedule						
License Article	Action	Deliverable	Start Date	End Date	Next Deliverable Date	Comments
Art. 401	Annual Report of License Implementation	Report in consultation with ECC	1-Jan-05	22-Dec-33	1-March-22	Includes results of studies/monitoring, description of anticipated activities, report of funding accounts, and compliance with operational requirements. Draft report to ECC for 30-day review prior to the FERC submittal.
Art. 402	ECC participation/oversight	Up to 1 FTE and normal administration	1-Jan-05	22-Dec-33	Ongoing	Provide admin support, point of contact for ECC, some grant writing, attempt to identify willing landowners, apply for permits as necessary for actions; annual report and grant fund administration.
Art. 403	Bonneville Cutthroat Trout (BCT) Restoration Plan	Restoration Plan in Consultation with ECC.	1-Jan-07	1-Nov-08	23-Dec-08	This project was completed in 2008.
Art. 403	Genetic Sampling Study	Bonneville Cutthroat Trout genetic data collection and analysis	1-Sep-04	22-Dec-11	1-Sep-07	This project was completed in 2007.
Art. 403	Aerial Photography	Thermal images of Bear River	1-Jun-05	22-Dec-11	27-Jan-07	This project was completed in 2007.
Art. 403	Telemetry Study	Bonneville Cutthroat Trout Telemetry Report	1-May-05	22-Dec-11	11-Feb-09	This project was completed in 2009.
Art. 403	Broodstock Development	Develop a Bonneville cutthroat trout broodstock at the Grace Hatchery in Grace Idaho.	22-Dec-08	22-Dec-10	22-Dec-10	This project was completed in 2010.
Art. 404	Conservation Hatchery Program	Fund Bonneville cutthroat trout hatchery operations	22-Dec-10	22-Dec-33	22-Dec-22	\$100K/yr, for remaining term of license; funds may also be used for habitat restoration, land & water, or fish passage; may carry over to subsequent years.
Art. 405	Habitat Restoration Program	Funding for habitat and water quality enhancements	22-Dec-04	22-Dec-33	22-Dec-22	\$167K/yr; funds may also be used for land and water acquisition or fish passage; may carry over to subsequent years. Annual grant cycle begins with release of funding flyer in January. Projects are typically ranked at March subcommittee meeting and approved at April ECC meeting.
Art. 406	Land and Water Acquisition Program	Funding land (fee title and conservation easements) and water acquisition	22-Dec-04	22-Dec-33	22-Dec-22	\$300K/yr; funds may also be used for habitat restoration or fish passage; may carry over to subsequent years. Funds may only be used for habitat restoration on lands acquired under this fund or for fish passage if it is for one of the PacifiCorp facilities and fish passage is prescribed by USFWS. Ongoing grant cycle throughout year.

Table H-1. Bear River Hydroelectric Project - 2022 Implementation Schedule						
License Article	Action	Deliverable	Start Date	End Date	Next Deliverable Date	Comments
Art. 407	Monitoring in Black Canyon	Funding for surveys, studies, reports, six-year study term	1-Apr-05	1-Apr-11	2-May-11	This project was completed in 2011.
Art. 408 (Grace MSF modified by Cove Decommissioning Order)	Implement minimum flows	Documented annually to the FERC	2-Dec-05	22-Dec-33	1-March-22	Soda - 150 cfs downstream; Grace - 65 cfs; Oneida - 251 cfs downstream.
Art. 408	Maintenance schedule consultation	Documented annually to the FERC	1-Apr-04	22-Dec-33	31-March-22	Consult annually (prior to April 1) with ECC to minimize drawdowns and coordinate maintenance activities; consult with ECC in emergencies if practicable.
Art. 409	Fish Stranding Minimization Plan	Documentation of plan compliance in Annual Report.	30-Sept-04	22-Dec-33	Suspended	Continued suspension of Art. 409 Fish Stranding Minimization Plan was confirmed by the FERC on October 17, 2012, in an issuance that confirmed that PacifiCorp had complied with Ordering paragraph (b) of the FERC's June 3, 2011 Order Approving Suspension of the Fish Stranding Minimization Plan.
Art. 410	Kackley Springs	Implement flow redirection plan.	22-Dec-08	22-Dec-09	22-Dec-09	This project was completed in 2009.
Art. 412	Implement ramp rates	Documented annually to the FERC in the annual report.	22-Dec-04	22-Dec-33	1-Mar-22	Soda - 1.2 ft/hr, ascending and descending measured at USGS gage 10079500; Oneida - 2.0 ft/15 min on the descending arm at USGS gage 10086500. Black Canyon Boater Flow – 1 ft/hr on the descending arm.
Art. 413	Water quality monitoring and reporting	Bear River Project 401 Clean Water Act Certification.	1-May-04	30-Sep-09	1-Mar-09	This project was completed in 2009.
Art. 415	Operations and Compliance Plan Implementation	Documented annually to the FERC	22-Dec-04	22-Dec-33	1-March-22	On-going; provides proper functioning equipment used to meet minimum flow and ramping requirements, reporting requirements, and reasonable tolerances.
Art. 415	Operations and Compliance Plan	Document changes/updates	1- Oct-05	28-Feb-06	Ongoing	On-going compliance will be maintained per Operations Compliance Plan approved by the FERC September 10, 2014.
Art. 416	Oneida campground funding	Reimbursement to BLM	1-May-05	22-Dec-33	1-Oct-22	Annual \$10K reimbursement to BLM upon invoice; funds do not carry over.

Table H-1. Bear River Hydroelectric Project - 2022 Implementation Schedule						
License Article	Action	Deliverable	Start Date	End Date	Next Deliverable Date	Comments
Art. 416	Maintain recreation sites	Maintain constructed facilities	1-May-05	22-Dec-33	Ongoing	Maintain sites as described in Recreation and Traffic Safety Plan and Site Management Plans.
Art 416	Assistance to Caribou County	Reimbursement to County	1-May-05	22-Dec-33	1-Oct-22	Annual \$3K reimbursement to county; does not carry over.
Art. 417	Maintain signs along Oneida road	Review, repair and replace signs as needed.	1-May-05	22-Dec-33	15-May-22	Annually replace or repair traffic signs along the Oneida road (\$1K).
Art. 417	Oneida Road Improvements	Complete Road Work	1-Aug-06	1-Jul-07	1-Oct-08	This project was completed in 2008. Annual maintenance continues.
Art. 417	Law enforcement	Reimbursement to Franklin County Sherriff's Department	1-May-05	22-Dec-33	1-Oct-22	Annual \$3K funding to law enforcement agency and use of company's radio frequency, does not carry over.
Art. 417	Dust abatement	Dust Abatement	1-May-05	22-Dec-33	Summer-22	Up to twice annually, on the Oneida Project road 100 ft. on either side of Maple Grove and Redpoint Campgrounds.
Art. 418	Grace Spill Gate	Gates installed and functioning	1-Apr-06	22-Dec-33	1-Oct-08	This project was completed in 2008.
Art.419	Whitewater flows in Black Canyon	Documentation in Annual Report	1-May-05	22-Dec-33	1-Mar-22	Revised program will be administered and reported on per Boater Flow Agreement approved by ECC and the FERC in 2012.
401 Cert.	Oneida Operations Report	Annual Report to IDEQ in November.	30-Nov-05	30-Nov-33	30-Nov-22	Record of water releases for power, irrigation, or flood control. Submit to IDEQ
Art. 420	Boatable flows in Oneida reach	Documentation in annual report	1-May-05	22-Dec-33	Ongoing	With available water, target is 900 cfs below powerhouse between Memorial Day and Labor Day.
Art. 421	Black Canyon Boatable flow release schedule	Develop annual schedule and submit to the FERC.	5-Mar-08	22-Dec-33	20-March-22	Starting in 2012, all releases will be scheduled between April 1 and June 5. Four weekend releases to be scheduled: three two-day events and one three-day event. Schedule to be coordinated between American Whitewater, PacifiCorp and ECC.

Table H-1. Bear River Hydroelectric Project - 2022 Implementation Schedule						
License Article	Action	Deliverable	Start Date	End Date	Next Deliverable Date	Comments
Art. 422	Flow Phone and website	Maintain website, flow phone and prepare annual schedule of whitewater flows.	1-May-05	22-Dec-33	Ongoing	Website will present whitewater calendar dates; flows for current and prior 6 days in hourly averages, and 7-day forecast; gages linked to Flow Phone (daily) and website (4-hour intervals). Whitewater release calendar posting will be reported on website.
Art. 423	Protect historical resources	Continue to implement Interpretation and Education Plan, review of project activities and annual site monitoring.	2-Jan-05	22-Dec-33	22-Jan-22	The FERC Order approving HPMP was received in 2008. Implementation of plan to be reported annually to the FERC prior to January 22 of each year.
Art. 424 and 425	Land Management	Land Management Plan and site plan implementation. Monitoring of all lands and noxious weed control.	2-Jan-05	22-Dec-33	Ongoing	Site plans developed in consultation with the ECC; buffer zone management through modified leases. Maintenance of exclusion fences, treatment of noxious weeds and monitoring of user or trespass impacts. An updated Land Management and Buffer Zone Plan was approved by the FERC July 17, 2014. An updated Oneida Site Plan was submitted to the FERC June 3, 2015, receipt was acknowledged by the FERC December 7, 2015.
Art. 426	Fencing in Cove Bypass Reach	Fences	1-Apr-05	22-Dec-33	Initial construction complete (maintenance ongoing).	Fencing of selected riparian areas in Cove bypass reach, while allowing landowners to exercise stock watering rights. This project is complete. Maintenance of fences to be completed by PacifiCorp through life of license. Annual monitoring is conducted along with fence maintenance.
Art. 428	Interests in project lands	Report to the FERC	22-Dec-04	22-Dec-33	31-Jan-22	Annually file with the FERC a report of any easement or rights-of-way granted in the previous year no later than January 31. Sixty days before conveying any interest in project lands a letter must be submitted to the FERC.
Art. 429	Report on Cove Decommissioning Expenses	Report to ECC and the FERC	1-May-06	31-Mar-07	31-Mar-07	This requirement was completed in 2007.
