The Bear River Hydroelectric Project is located in southeastern Idaho and includes facilities owned and operated by PacifiCorp Energy at Soda, Grace and Oneida.

Bear River Hydroelectric Project

2012 Annual Report

Summary of License Implementation and Compliance

1.0 Introduction

Located on the Bear River in southeastern Idaho, the Bear River hydroelectric developments consist of three dams and powerhouses that together have a total installed capacity of 77 megawatts of electrical generation: the Soda, Grace, and Oneida developments. Construction of these developments, known collectively as the Bear River Hydroelectric Project (FERC Project No. 20) was authorized by the U.S. Secretary of Interior in 1907 for irrigation, flood control and hydroelectric generation. Construction of the dams began in 1909 and was completed in 1927, during which time they were originally licensed. A fourth hydroelectric development, Cove, was part of the original hydroelectric project and was decommissioned in 2006.

The company acquired water rights from various holders during the development years of these projects in exchange for perpetual contracts to deliver irrigation water from Bear Lake. Water rights were further defined by court decrees, the Bear River Compact (as revised), and other subsequent agreements. The Bear River Project is largely dependent on irrigation water pumped from Bear Lake into the river system to generate power.

Between 1976 and 1981, the Federal Energy Regulatory Commission (FERC) issued new licenses for the Soda, Grace-Cove, and Oneida projects. These FERC licenses expired in October 2001.

In the late 1990s, as the expiration of the licenses approached, PacifiCorp initiated the relicensing process. After extensive studies and agency consultation, this process culminated in the signing of the Bear River Settlement Agreement (Settlement Agreement) on August 28, 2002.

FERC approved the Settlement Agreement and issued a new 30-year license for the Bear River Project on December 22, 2003. The Settlement Agreement and new license requires the provision of recreation enhancements, minimum instream flows to benefit aquatic resources, funds to conserve and benefit natural resources within a defined action area, and other measures related to land management, protection of cultural resources, and restoration of Bonneville cutthroat trout. The Environmental Coordination Committee (ECC), a stakeholder group comprised of signatories to the Settlement Agreement, was formed to consult and make decisions regarding the use of funding, and implementation of license and Settlement Agreement requirements.

The Settlement Agreement (Section 4.6) and License Article 401 specify that a detailed annual report on the activities of the ECC and implementation of protection, mitigation, and enhancement (PM&E) measures be prepared yearly throughout the term of the license.

This annual report fulfills these requirements for the report period of calendar year 2012.

1.1 Background

On September 27, 1999, PacifiCorp filed applications for new licenses for the continued operation of the Soda, Grace, Cove and Oneida hydroelectric developments, now known collectively as the Bear River Hydroelectric Project in Caribou and Franklin counties, Idaho.

A number of motions to intervene in the relicensing proceedings were filed by state and federal agencies, non-governmental agencies, and individuals. On February 13, 2002, FERC issued a “Ready for Environmental Analysis” notice for the Bear River Hydroelectric Project.

On September 25, 2002, PacifiCorp filed an Offer of Settlement pursuant to FERC Rule 602, 18 Code of Federal Regulations § 385.602 to resolve issues concerning the relicensing of the Bear River Hydroelectric Project.

Parties to the Settlement Agreement include PacifiCorp, U.S. Fish and Wildlife Service (USFWS), Bureau of Land Management (BLM), National Park Service (NPS), USDA-Forest Service (USFS), Shoshone-Bannock Tribes (Tribes), Idaho Department of Environmental Quality (IDEQ), Idaho Department of Fish and Game (IDFG), Idaho Department of Parks and Recreation (IDPR), Idaho Council of Trout Unlimited (TU), Idaho Rivers United (IRU), Greater Yellowstone Coalition (GYC), and American Whitewater (AW).

A draft environmental impact statement (EIS) was prepared and issued for public comment on November 1, 2002. The final EIS was issued April 11, 2003. Both the draft and final EISs recommended adoption of the Settlement Agreement terms.

A FERC order approving the Settlement Agreement and issuing a new 30-year license for the Bear River Project was issued December 22, 2003.

Copies of the Settlement Agreement and the FERC license are available from FERC upon request or on PacifiCorp’s website at: <http://www.pacificorp.com/es/hydro/hl/br.html#>

The license required study of alternatives, including decommissioning, for the Cove hydroelectric development near Grace, Idaho. After alternative analysis, an agreement was reached with stakeholders and regulators to decommission Cove. PacifiCorp signed the Cove Settlement Agreement on July 20, 2005. The FERC issued the Cove Decommissioning Order on May 23, 2006, and the dam and water conveyance structures were removed during the summer of 2006. Reclamation of the Cove project area, including the former dam and flume sites, was completed by late fall of 2006.

1.2 Environmental Coordination Committee

Section 4 of the Settlement Agreement establishes a process to facilitate coordination and decision-making concerning implementation of Settlement Agreement measures, which was adopted in Article 402 of the new license. To accomplish this objective, Section 4.1 of the Settlement Agreement provides for the creation of the ECC consisting of representatives from the signing parties. The purpose of the ECC, discussed in Section 4, is to: 1) facilitate coordination and consultation on plans developed by PacifiCorp for the implementation of PM&E measures; 2) propose and approve appropriate PM&E measures; 3) establish appropriate monitoring criteria to evaluate the effects of PM&E measures; 4) coordinate the implementation of PM&E measures; 5) establish appropriate procedures for conducting activities; and 6) establish subcommittees, as necessary, to accomplish these objectives.

1.3 Report Organization

The 2012 Bear River Hydroelectric Project Annual Report provides the following information:

- Section 2.0 - Environmental Coordination Committee Activities
- Section 3.0 - Accomplishments
- Section 4.0 - Funding
- Appendix A: ECC Members, Alternates and Authorized Signatories
- Appendix B: Grace-Cove Site Plan Compliance Monitoring and Performance Tracking
- Appendix C: Cove Shoreline Buffer Fence Annual Monitoring Report
- Appendix D: Oneida Site Plan Compliance Monitoring and Performance Tracking
- Appendix E: Soda Site Plan Compliance Monitoring and Performance Tracking
- Appendix F: Grace Dam and Last Chance Site Plan Compliance Monitoring and Performance Tracking
- Appendix G: Habitat Enhancement Project Monitoring
- Appendix H: 2013 Implementation Schedule

1.4 Reports and Studies Completed in 2012

The Oneida Development Water Year 2012 Operation Report was completed during the 2012 reporting period and has been submitted along with this annual report to the FERC.

Idaho Department of Fish and Game field crew sampling as part of the Bonneville cutthroat trout conservation hatchery evaluation.

2.0 Environmental Coordination Committee Activities

This section provides an overview of ECC roles and responsibilities according to the Settlement Agreement and as subsequently implemented in compliance with Article 402. It also presents a summary of ECC meetings held during the 2012 report period, including major discussion points and decisions made at each meeting.

2.1 ECC Roles and Responsibilities

The purpose and role of the ECC, as defined in Section 4.1 of the Settlement Agreement, is to facilitate coordination and implementation of PM&E measures. Specifically excluded from ECC responsibility and authority is the release of water from Bear Lake for any reason.

The structure and process of the ECC is intended to provide a forum to address time-sensitive matters; early warning of problems; and coordination of member organization actions, schedules, and decisions to save time and expense. The ECC strives to make collaborative decisions, based on consensus, while implementing the Settlement Agreement.

The ECC is responsible for the following measures, pursuant to the Settlement Agreement (Section 4.1):

- Identify and prioritize (habitat enhancement and land and water acquisition) implementation projects.
- Facilitate coordination and consultation between PacifiCorp and the other parties on plans developed by PacifiCorp for the implementation of PM&E measures.
- Coordinate and monitor implementation of PM&E measures and review ongoing monitoring requirements by PacifiCorp.
- Propose and approve PM&E measures for Bonneville cutthroat trout and other aquatic resources pursuant to the Settlement Agreement. Review and comment on the draft annual report of ECC activities and implementation of the PM&E measures.
- Establish appropriate procedures for conducting its activities consistent with the Settlement Agreement, including protocols for public involvement and community outreach.
- Establish subcommittees as necessary for the purpose of achieving objectives described above and determining size, membership, and procedures of such committees.

2.2 ECC Members

The parties to the Settlement Agreement have each appointed a member and an alternate to the ECC. Appendix A lists the members, their alternates and authorized signatories.

During the 2012 reporting period, the ECC met seven times. The primary purposes of the meetings were to discuss implementation strategies for PM&E measures, to discuss results of studies funded by the ECC, and to report on and coordinate grant fund projects. In addition, the ECC conducted business by conference call three times during 2012. Formal ground rules established and adopted by the ECC provided the functional framework for this collaborative work. ECC member participation in the meetings during 2012 is shown in Table 2-1.

Table 2-1. ECC Member Meeting Participation during 2012.

2.3 Overview of the Meetings

This section summarizes the issues covered and areas of consensus reached during ECC meetings over the 12-month report period.

ECC Meeting #1 – January 18, 2012

- Heard updates on current grant projects and reviewed the ECC's 2012 calendar.
- Reviewed proposed changes to the conceptual agreement for boater flows and adaptive management in the Black Canyon as well as study plans for additional monitoring in the Black Canyon.
- Heard updates on land acquisition fund projects from Sagebrush Steppe Land Trust (SSLT).
- Reviewed updates to PacifiCorp's Memorandum of Agreement (MOA) with SSLT.
- Discussed conservation easement criteria/standards and the ECC's process for approving them.

ECC Meeting #2 – February 15, 2012

- Heard updates on current grant projects, the 2011 Annual Report, the whitewater boater flow submittal to FERC, and IDFG's Bonneville Cutthroat Trout Broodstock Report.
- Deferred approval of the Black Canyon Boater Flow Agreement and associated study plans pending further discussion of comments on the fisheries study plan via conference call.
- Reviewed the 2012 grant fund review calendar, the status of grant funds, and proposals received, assigning ECC sponsors as needed.
- Heard updates on land acquisition fund projects from SSLT.
- Expressed interest by consensus in pursuing a conservation easement on a property on Cottonwood Creek.

Funding Proposal Subcommittee Meeting – March 21, 2012

- Reviewed and ranked 2012 grant proposals.

ECC Meeting #3 – April 18, 2012

- Heard updates on current grant projects, the 2011 Annual Report, and IDFG's BCT broodstock release plan for 2012.
- Heard information on US Fish and Wildlife Service's Bear River watershed conservation area proposal and the new State Water Plan.
- Approved recommendations on proposed 2012 habitat enhancement projects from the Funding Subcommittee and heard a proposal for a clean-up effort in the Black Canyon.

- Heard an update on the whitewater boater flow submittal to FERC, reviewed revisions to the fisheries study plan included in the boater flow agreement, and approved the 2012 Agreement for Black Canyon Boater Flows: Extended Study Period and Adaptive Management.
- Heard updates on land acquisition projects from SSLT.
- Reviewed and approved the purchase and sale agreement and conservation easements on the Christensen property.

ECC Meeting #4 – June 20, 2012

- Heard updates on current grant projects and 2012 whitewater boater flows and extended Black Canyon monitoring studies. Discussed outside grant management pertaining to ECC habitat enhancement projects that also receive USFWS Partners Program funding.
- Heard concerns regarding whitewater boater flows from irrigation company representatives.
- Approved two additional 2012 habitat enhancement projects recommended by the Funding subcommittee.
- Discussed Idaho water rights and water banking with guest speaker Roger Chase of the Idaho Water Resources Board.
- Heard updates on land acquisition fund projects from SSLT.
- Approved a subject property on Cottonwood Creek and approved the estimated budget. Agreed to fund appraisal in the amount of \$15,000 and begin email discussion of terms and conditions.
- Designated two properties on Eightmile Creek as subject properties and allocated budget for appraisals for both. Future pursuit will require agreement on riparian protections on both properties. Agreed to develop future conditions via email.
- Reviewed proposed changes to PacifiCorp's Memorandum of Agreement with SSLT.
- Approved an annual funding request from SSLT in the amount of \$25,000.
- Participated in a field trip to Kackley Springs.

ECC Meeting #5 – July 25, 2012

- Heard updates on current grant projects and the monitoring of fish in the Gentile Canal.
- Heard information on a proposed change to IDFG regulations regarding Bonneville cutthroat trout harvest in Bear River tributaries.

- Heard updates on land acquisition fund projects from SSLT.
- Reviewed PacifiCorp's Memorandum of Agreement with SSLT.

ECC Meeting #6 – September 19, 2012

- Heard updates on current grant projects, the monitoring of fish in the Gentile Canal, and IDFG's plans for BCT production and stocking for 2012.
- Reviewed proposed changes to the ECC's ground rules.
- Approved funding for a new habitat enhancement project on Trout Creek.
- Heard an update on PacifiCorp's Operations and Compliance Plan for the Bear River Hydroelectric Project.
- Heard updates on land acquisition fund projects from SSLT.
- Adjusted the stewardship funding amount for the Christensen/Mink Creek Conservation Easement.
- Supported the budget for a proposed conservation easement on Eightmile Creek as detailed in the September 17, 2012 scoping report project estimate and based on what is currently known.
- Agreed to have SSLT move forward and granted approval to commission a consultant to prepare a riparian improvement plan for a proposed conservation easement on Eightmile Creek and incorporate this cost into the budget, bringing the ECC's total cost to approximately \$705,000.
- Agreed to support PacifiCorp's Memorandum of Agreement with SSLT.

ECC Meeting #8 – November 14, 2012

- Heard updates on current grant projects, the 2012 Annual Report, the revised Operations and Compliance Plan, USFWS's Refuge Easement Program, Twin Lakes Canal Company's proposed Bear River Dam, and PacifiCorp's Bear Lake water year 2012 operations.
- Reviewed and ranked a new proposed habitat enhancement project.
- Endorsed changes to the ECC's ground rules to clarify "duly noticed" meetings.
- Heard updates on land acquisition fund projects from SSLT, including a report from Biota, the consultant preparing a riparian improvement plan for a proposed conservation easement on Eightmile Creek.

- Approved \$8,000 in additional funding for a high-level assessment of the Bear River on the same property as a proposed conservation easement on Eightmile Creek.
- Approved continued support of a proposed conservation easement on Cottonwood Creek.
- Approved payment of monitoring and management fees to SSLT in the amount of \$125,000.

Conference Calls

In addition to the regular meetings described above, the ECC conducted business by conference call three times during 2012. The ECC discussed comments on IDFG's fisheries study plan included in the 2012 Agreement for Black Canyon Boater Flows: Extended Study Period and Adaptive Management on February 29. A conference call with SSLT was held October 2 to review consultants' bids to prepare a riparian improvement plan for a proposed conservation easement on Eightmile Creek. ECC members provided input on methods used to develop the riparian improvement plan during a December 2 conference call with SSLT and Biota, the consultant selected to prepare the plan. The Funding subcommittee conducted business by conference call twice during 2012, on May 9 and August 22. Both calls were to discuss proposed habitat enhancement projects.

Consensus Decisions Made by E-mail Vote

In 2006, the ECC agreed to consensus decision-making by email vote. The following consensus decisions were made by ECC members via email vote during 2012:

- Approved the April 2012 draft meeting notes (vote taken May 3, 2012).
- Approved the June 2012 draft meeting notes (vote taken July 9, 2012).
- Reaffirmed funding for riparian fencing on the Christensen easement (vote taken August 1, 2012).
- Approved selection of consultant Biota to prepare a riparian improvement plan on a proposed conservation easement on Eightmile Creek and support the use of Multiple Indicator Monitoring (MIM) (votes taken October 15 and 17, 2012).
- Approve a habitat enhancement project to seed approximately 15 acres of SSLT's Kackley Preserve with native grasses (vote taken November 15, 2012).
- Approve the November 2012 draft meeting notes (vote taken December 18, 2012).

3.0 Accomplishments

This section presents the actions taken during 2012 toward requirements in the Settlement Agreement and PacifiCorp's 30-year license for the Bear River Hydroelectric Project, as defined in FERC's Order Approving Settlement Agreement and Issuing New License from December 22, 2003. The agreed-upon schedule for implementing PM&E measures is described in Exhibit 1 of the Settlement Agreement. A modified schedule was proposed and approved in the Implementation Plan prepared for the Bear River Project.

The PM&E measures schedule in the Settlement Agreement was modified due to requirements in the new license. With each annual report, an implementation schedule for the upcoming year will be presented that updates and replaces the implementation schedule filed with the Implementation Plan on May 28, 2004, and the schedule included in the previous annual report. The 2013 Implementation Schedule is included in Appendix H of this report.

A discussion of the activities associated with each of the PM&E measures is presented in Table 3.1-1 by License Article for the report period January - December 2012. A description of funding amounts deposited and disbursed during 2012 is provided in Section 4.0 - Funding.

The Oneida Narrows riparian protection project, funded by the ECC in 2010, excludes cattle from the Oneida Narrows Boater take-out on BLM land along the Bear River.

Table 3.1-1 Accomplishments During the 2012 Report Period			
License Article	Accomplishments 2012	Comments	Future Plans 2013
401	2011 Annual Report was filed with FERC.	Annual Report preparation and filing. To include studies and reports completed along with accounting for funds.	2012 Annual Report filed before March 1, 2013.
402	Environmental Coordination Committee meetings were conducted on January 18, February 15, April 18, June 20, July 25, September 19, and November 14.	ECC meetings were facilitated by PacifiCorp.	Meetings are expected to continue on approximately a bi-monthly schedule through 2013. The main agenda items for regular meetings will be grant administration for the habitat enhancement and land and water acquisition fund, along with the Bonneville cutthroat trout conservation hatchery program.
403	No new actions.	IDFG released the first Bonneville cutthroat trout produced at the hatchery at Kackley Springs on April 20, 2011. IDFG provided a final report of broodstock development activities dated January 24, 2012.	This license article is complete.
404	IDFG released 8,000 Bonneville cutthroat trout that were raised in 2011. Approximately 20,000 were produced during 2012 and will be released in 2013.	A Conservation Hatchery Agreement was executed with IDFG March 13, 2011. The Conservation Hatchery Program commenced December 22, 2011.	IDFG will continue to produce Bonneville cutthroat trout at the Grace Hatchery. Approximately 20,000 Bonneville cutthroat trout will be released in the Thatcher Reach in 2013. Conservation hatchery support payment will be made in 2013.
405	Funding requests were rated and ranked by subcommittee at a March 21 meeting and approved by the ECC at the April 18, June 20, and September 19 meetings and by email vote in November 2012.	Thirteen habitat enhancement projects were approved for funding during 2012: Cottonwood Creek Fish Screens Fish Screen Tender Gentile Canal Entrainment Study Hansen Fencing Harris Spring Restoration and Repair Ovid Creek Corral Relocation Sediment Removal on Spring and Stauffer Creek Smith Bear River Fencing and Alternate Water Source	Subcommittee is scheduled to evaluate new projects March 13, 2013, and will present recommendations to the ECC at its April 24, 2013 meeting.

Table 3.1-1 Accomplishments During the 2012 Report Period			
License Article	Accomplishments 2012	Comments	Future Plans 2013
		Stauffer and Spring Creek Fencing Kackley Springs Dike Repair Black Canyon Dump Cleanup Trout Creek Restoration Kackley (Trust Property) Seeding Set Aside of Maintenance/Overruns Monitoring was completed for previous habitat projects.	
406	A 1033-acre conservation easement was closed on Mink Creek in Franklin County. Evaluation of two new conservation easement projects was started in 2012	Land and Water Acquisition Fund	Because of the opportunistic nature of Land and Water Acquisition Fund proposals, they will be evaluated for funding at any time of the year. The two new conservation easement projects that were started in 2012 may close in 2013.
407	No new actions.	The final report was transmitted to FERC with the January 31, 2012, report on Boater Flows.	Activities under this license article are complete.
408	Notification of annual maintenance activities and timeframes were given to the ECC by the Environmental Coordinator on March 23, August 28, September 5, October 8 and October 16.	The licensee shall maintain continuous minimum bypass flows from the project development as follows: (a) Below the Soda Dam: year-round minimum flow of 150 cfs, or inflow into the Soda reservoir, whichever is less; (b) Grace bypassed reach: a year-round minimum bypass flow of 63 cfs or inflow, whichever is less, in addition to 2 cfs leakage below the Grace Dam; (c) Oneida reach below the powerhouse: a year-round minimum flow of 250 cfs or inflow,	The minimum stream flow requirements will continue in accordance with procedures described in the Operations and Compliance Plan. Annual maintenance schedule to be given to ECC before April of 2013.

Table 3.1-1 Accomplishments During the 2012 Report Period			
License Article	Accomplishments 2012	Comments	Future Plans 2013
		whichever is less, in addition to 1 cfs leakage below Oneida Dam.	
409	Continued suspension of Art.409 Fish Stranding Minimization Plan was approved by FERC on October 17, 2012, in an issuance that confirmed that PacifiCorp had complied with Ordering paragraph (b) of FERC's June 3, 2011, Order Approving Suspension of the Fish Stranding Minimization Plan.	On May 18, 2012, the Final Agreement on Boater Flows was filed with FERC. This agreement included the ECC's recommendation to not reinstate Art. 409.	No future action is required.
410	No new actions.	Kackley Springs Reroute Project	This license article is complete. Future land management activities around the springs will be conducted in accordance with the Grace/Cove Site Plan.
411	No new actions.	Dam Leakage Minimization Plan	On-going measurement in compliance with license.
412	Implement ramping rate limitations. Notification of annual maintenance activities and timeframes were given to the ECC by the Environmental Coordinator via email. See Article 408 summary.	Ramping rate limitations are being followed at Grace, Soda, and Oneida. The ECC determined that a 1 FT/HR down ramp rate would be used for boater flows (see also summary for Art. 409, above).	The ramping rate limitations will continue in accordance with procedures described in the Operations and Compliance Plan.
413	On-going.	Compliance with Clean Water Act Section 401 Certification.	Idaho Department of Environmental Quality will continue to collect water quality monitoring data during boater flow events in 2012, 2013 and 2014 to inform potential future management decisions.
415	Operations and compliance issues were handled according to the provisions of the Operations and Compliance Plan issued April 7, 2005.	Includes description of equipment and methods for compliance with instream flow and ramping requirements.	Submit updated Operations and Compliance Plan to FERC in 2013. Updates include new stream flow gaging equipment, change in compliance point at Grace Dam, operations directions for transition from minimum stream flow at Grace Dam to inflow and publication of USGS stream flow data and gage maintenance.

Table 3.1-1 Accomplishments During the 2012 Report Period			
License Article	Accomplishments 2012	Comments	Future Plans 2013
416/417	<ul style="list-style-type: none"> • Park maintenance payment was made to Caribou County for 2012 funding. • Law enforcement payment was made to Franklin County for 2012 funding. • Dust abatement applications were made around the campgrounds and day-use area in the Oneida Canyon. • Oneida Campground maintenance payment was made to USDI-BLM for 2012 funding. 	Recreation Site Maintenance	<ul style="list-style-type: none"> • Implement annual dust abatement measures • Maintain signs and recreation sites • Make annual payment to Caribou County • Make annual payment to USDI-BLM • Make annual payment to Franklin County Sheriff • Perform Recreation and Traffic Safety Plan and Site Plan recreation elements annual monitoring as specified
418	No new action.	Boating Flow Release Plan	Actions required under this license article are complete.
419	A total of nine boater flow releases were made on four weekends in 2012. Three two-day events and one three-day event were provided on the following days: April 28 and 29; May 5 and 6; May 19 and 20; and June 1, 2, and 3.	Boating Flow Release Schedule	Per the new 2012 ECC boater flow agreement, four weekends of scheduled boater flows will be released between April 1 and June 5. A down ramp rate of 1 FT /HR will be used.
420	<p>Recreation flows were provided in relation to required irrigation releases. During the period June 18 - September 8, high irrigation demand resulted in flows above 900 cfs in the Oneida Narrows reach.</p> <p>Operational regime report was filed with IDEQ.</p>	Oneida Development Water Year 2012 Operations Report is submitted to FERC with this annual report.	When water is available, flows below the Oneida powerhouse will be greater than 900 cfs, as described in the Operations and Compliance Plan.

Table 3.1-1 Accomplishments During the 2012 Report Period			
License Article	Accomplishments 2012	Comments	Future Plans 2013
421	In 2012, a boater flow schedule was developed with American Whitewater after PacifiCorp provided the 2012 water year forecast. The schedule was provided to the ECC for review and submitted to FERC. The flow schedule was posted on the PacifiCorp website and information provided on the Flow Phone.	Boating Flow Forecasting Plan	Implement the "Agreement for Black Canyon Boater Flows: Extended Study Period and Adaptive Management." This will provide four weekends of scheduled flows between April 1 and June 5, at 1 FT/HR downramp rate and continue suspension of Art. 409. PacifiCorp will provide the flow forecast, develop a schedule with American Whitewater, and post the schedule on the Bear River website and Flow Phone. 2013 schedule to be submitted to FERC prior to March 20, 2013.
422	Maintained website and Flow Phone.	PacifiCorp Flow Phone: (800) 547-1501 Bear River Implementation website: http://www.pacificorp.com/es/hydro/hl/br.html#	In addition to river flow information, the website also provides ECC agendas, meeting notes, reports and other documents related to implementation of the license.
423	A cultural resource training presentation was prepared and presented to Bear River operations staff. Annual Report of HPMP activities was provided to FERC. Interpretive signs were manufactured and installed for all signs except those covering Native American use of the area. Eight signs total were installed that covered historical information on the Grace, Cove and Oneida developments in addition to Doc Kackley, the Oneida Plant Disaster and Bonneville Cutthroat Trout. A consultation meeting and field trip were held with the Shoshone Bannock Tribe concerning traditional cultural properties and interpretive signs.	Historic Properties Management Plan	<ul style="list-style-type: none"> • Continue to follow HPMP guidance for project review. • Provide HPMP report to FERC before January 22, 2013, deadline. • Continue to work with Tribes on Native American interpretive signs and traditional cultural property consultation • Provide staff cultural resource training.

Table 3.1-1 Accomplishments During the 2012 Report Period			
License Article	Accomplishments 2012	Comments	Future Plans 2013
424/425/426	<ul style="list-style-type: none"> The updated Article 424 Land Management and Buffer Zone Plan was submitted to FERC with the 2011 Annual Report. Remaining interior cross fencing was removed at Alexander Reservoir, Grace, and Cove. Fence repair and maintenance was conducted at Alexander, Grace, Cove, and Oneida. Noxious weed control activities were completed in all site plan areas. Performance tracking and compliance monitoring was completed for all site planning areas. Forms are attached to this annual report. 	<p>The original Land Management Plan was approved by the FERC on April 11, 2006. A revised plan was submitted to FERC with the 2011 Annual Report. The LMP describes development of site plans for five project areas and stipulates the contents of the site plans. Site plans will be implemented no later than 10 years after LMP approval.</p> <p>Site plans and implementation were prioritized into the following order:</p> <ol style="list-style-type: none"> 1) Grace-Cove, (Complete, with exception of evaluating the need for exclusion fencing along the flowline in 2013. Repair these fences if needed. 2) Oneida, (Complete, with exception of one fence line that will be removed and relocated to property line in 2013.) 3) Soda, (Complete) 4) Grace Dam (Complete) 5) Last Chance (Complete) 	<ul style="list-style-type: none"> Continue monitoring as required for Grace-Cove, Oneida, Soda, and Grace and Last Chance site plans. Ongoing maintenance of fences, gates and boundaries in all site plan areas. Monitor compliance with site plan implementation measures and performance of those measures. Take corrective actions as identified. Noxious weed control. Maintain Cove Buffer shoreline fence on non-company lands, per Art 426 requirements. Perform minor updates to the Oneida and Grace-Cove site plans for consistency with 2011 LMP updates. Continue to closely monitor and address as needed off-road trespass issues at Soda. Address various minor issues noted in 2012 Compliance and Performance Tracking monitoring at each of the four planning areas. Evaluate Grace flowline fences and the need to repair them as part of site plan implementation. Report on implementation in the Annual Report.
427	No new actions.	Expanded FERC Project Boundary	Required actions are complete.

Table 3.1-1 Accomplishments During the 2012 Report Period			
License Article	Accomplishments 2012	Comments	Future Plans 2013
Order Amending License and Revising Annual Charges – 62,205	No new actions.	Cove Decommissioning Order	Address with the ECC the final disposition of the Cove water right as stipulated in the July 20, 2005, settlement agreement for decommissioning.

3.1 Work Completed in 2012

3.1.1 Work Completed by License Article

Implementation Plan and Annual Reporting (License Article 401)

This 2012 Annual Report was prepared in consultation with the ECC to: 1) describe activities that PacifiCorp undertook or prepared pursuant to the requirements of the license during the year 2012; 2) describe anticipated activities that will be undertaken in the coming year pursuant to the requirements of the license; and 3) provide a report of all funding accounts, including funds spent, balance of accounts, and available remaining funds.

PacifiCorp's accomplishments in regard to licensing requirements are summarized in Table 3.1-1, and are discussed in more detail in the following sections of the report. Anticipated activities for 2013 are listed in section 3.2 and Appendix H. An accounting of funds is included in Section 4.0.

Environmental Coordination Committee (Article 402)

The Environmental Coordination Committee (Table A-1) met seven times during the 2012 reporting period. The meetings were facilitated by PacifiCorp's environmental coordinator, Mark Stenberg. In addition, the ECC conducted business by conference call three times during 2012 and made six consensus decisions via email. A summary of the ECC's activities is provided in Section 2.0. ECC meetings are expected to continue approximately every other month in 2013, or more frequently as determined by the ECC and PacifiCorp's environmental coordinator.

Bonneville Cutthroat Trout Restoration Study Plan (Article 403)

The Bonneville Cutthroat Trout (BCT) Restoration Study Plan, prepared in consultation with the ECC, was completed in late 2004. It included study plans for genetic sample analysis, irrigation diversion/barrier mapping and aerial photography, telemetry studies, and broodstock development.

Thermal imaging of the Bear River was completed during 2007 and the images were archived at Utah State University's Water Lab, PacifiCorp's headquarters, and with IDFG and IDEQ. Work on the irrigation diversion/barrier mapping was discontinued by the ECC in 2006 when it was learned that similar information was available from another source. The funding for this study was subsequently transferred by ECC decision and applied to the thermal imaging effort. In 2007 a more intensive and limited area irrigation diversion mapping study was proposed by IDFG. The ECC approved funding for this effort from the Land and Water Acquisition fund under the rationale that the results will assist with project prioritization and funding decisions.

The genetics study was completed by IDFG during 2007. IDFG completed its final report on the Telemetry Study during 2009. Results of these studies were synthesized in a Comprehensive Bonneville Cutthroat Trout Restoration Plan prepared by PacifiCorp in consultation with the ECC during 2008.

Idaho Department of Fish and Game field crew sampling the Black Canyon of the Bear River as part of the Bonneville cutthroat trout conservation hatchery evaluation.

A funding agreement for the disbursement of broodstock funds was drafted by PacifiCorp and IDFG during late 2008. IDFG chose to proceed initially with a broodstock program focusing on fish from the Thatcher reach, between Grace Dam and Oneida Reservoir, and utilized the state's Grace Fish Hatchery near Grace, Idaho to rear broodstock. Disbursement of broodstock development funding for 2008 and 2009 was made upon completion of the funding agreement in early 2009. A final payment was made in 2010. Funding was used by IDFG to improve the spring source and water supply to the hatchery to better protect the broodstock from the potential for disease and cross contamination within the hatchery. A portion of the funds were used to support collected fish at Kent Clegg's spring-fed fish ponds in Grace, Idaho. In addition, IDFG produced 19,000 Bonneville cutthroat trout fingerlings at the Grace Hatchery during 2010. On April 20, 2011, IDFG released the first Bonneville cutthroat trout produced at the hatchery at the site of the Kackley Springs reroute project. Approximately 9,000 fish

were produced in 2011 and released in 2012. Also of note in 2012, IDFG ceased stocking rainbow trout in the Thatcher Reach. Approximately 20,000 Bonneville cutthroat trout were produced in 2012 for release in the Thatcher reach during 2013.

Conservation Hatchery Plan (Article 404)

The Conservation Hatchery Plan was completed in 2004 as part of the Implementation Plan. This plan describes the use of funding for the purpose of stocking native Bonneville cutthroat trout in the action area. Guidance for stocking Bonneville cutthroat trout was developed over the first seven years of the license as Bonneville cutthroat trout restoration studies were conducted and the Bonneville Cutthroat Trout Restoration Plan was developed. A draft Conservation Hatchery Agreement was prepared by IDFG during 2011 and the Conservation Hatchery Program commenced December 22, 2011. IDFG provided a final report of broodstock development activities on January 24, 2012 and the first conservation hatchery payment was made. Hatchery payments of \$100,000 will be made available each year through the end of the license term for implementation of this article, or acceptable alternative use.

Habitat Restoration Plan (Article 405)

The Habitat Restoration Plan was completed in 2004 as part of the Implementation Plan, and a FERC order approving the plan was issued on March 22, 2005. This plan describes the use of funding for actions that benefit and restore aquatic and riparian habitat for Bonneville cutthroat trout, as well as other fish and wildlife. Action items implemented by the Habitat Restoration Program are decided upon and prioritized by the ECC. These actions are scheduled and implemented by the ECC on an annual basis. Annual funding of \$167,000 (escalated annually) began on December 22, 2004 and will continue through the end of the license term.

In 2005, the ECC formed a subcommittee to develop proposal and application forms for individuals and organizations seeking funding from the ECC for habitat enhancement projects. The subcommittee also developed evaluation criteria for proposals. A schedule for solicitation of funding proposals was set, and the subcommittee meets yearly in the spring to review and rank projects. The ECC at large then votes on the subcommittee's recommendations for funding. PacifiCorp initiated monitoring for the habitat enhancement projects; the results for the 2012 monitoring effort are presented in Exhibit G.

Prior to the 2012 review period, flyers were distributed to ECC members, local USDA-Natural Resource Conservation Service (NRCS) offices, and previous applicants to announce habitat enhancement funding availability and to request proposals. Application materials were posted to PacifiCorp's website.

The ECC received 10 proposals for habitat enhancement funding during the 2012 spring review period. These proposals were reviewed and ranked by subcommittee members on March 21, 2012. The subcommittee's rankings and funding recommendations were presented to the ECC for approval on April 18, 2012. Nine habitat enhancement projects totaling \$159,759 were approved for funding by the ECC at that meeting. An additional \$20,000 was set aside for potential maintenance/overruns. Four

projects were approved by the ECC later in the year, two at the June meeting, one at the September meeting, and one by email vote in November. Habitat enhancement projects approved by the ECC during 2012 are described below.

Cottonwood Fish Screens

The ECC awarded \$39,000 to Trout Unlimited for an estimated \$168,000 project to fabricate and install rotary drum fish screens for the Davis and Treasureton diversions on upper Cottonwood Creek. The project will eliminate the entrainment of fish in canals at two problematic irrigation diversions on Cottonwood Creek. Upper Cottonwood Creek contains a strong population of resident Bonneville cutthroat trout and has the potential to produce large numbers of juvenile BCT on an annual basis. Shepherding this excess production to the mainstem Bear River is expected to increase numbers of migratory native trout in the Thatcher reach of the Bear River. This project will compliment fish passage and screening efforts taking place downstream, as well as BCT recovery efforts underway throughout the Thatcher reach.

A fish screen on the lower diversion of Cottonwood Creek, funded by the ECC in 2005, prevents fish from being entrained in the irrigation canal.

Fish Screen Tender

Idaho Department of Fish and Game was awarded \$12,000 for an IDFG employee to maintain and adjust fish screens in the action area during the summer of 2012. The goal of this project is to ensure that fish

screens in the action area, including those funded by the ECC, continue to function well during the irrigation season.

Gentile Valley Canal Entrainment Study

The ECC awarded \$8,200 to IDFG for an estimated \$16,500 project to use PIT tagging to determine BCT entrainment loss into the Gentile Valley canal and if screening is necessary to reestablish BCT in the Black Canyon. Three-hundred fingerling BCT from the conservation hatchery program were tagged for this study during 2012, the first year of a three-year study. IDFG deems this information critical in determining the success of the conservation hatchery BCT stocking efforts in this area.

Hansen Fencing

The ECC awarded \$29,000 to private landowner Vincent Hansen to exclude cattle from the mainstem Bear River by installing 1.83 miles of four-strand barbed wire fencing on his property just upstream of Thatcher and the Franklin/Caribou county line. Cattle currently have access to the Bear River from this property and the project is expected to allow riparian vegetation to increase in vigor and diversity and to improve water quality by reducing erosion.

Harris Spring Restoration and Repair

Private landowner Laurie Harris was awarded \$7,500 to repair and enhance a previous ECC-funded project completed in 2007. The 2007 project excluded livestock from numerous springs that originate on the Harris property and provided off-site watering troughs, one of which required the use of a pump. The pump failed, and this project includes replacement of the pump as well as measures to prevent the pump from failing again. Habitat improvements to this spring complex will advance the establishment of a fish community in the spring system and provide the opportunity to reestablish BCT in this tributary to the Bear River through the conservation hatchery program.

Ovid Creek Corral Relocation

The ECC awarded \$34,000 to private landowner Mark Parker for a \$288,000 project to relocate corrals, install containment ponds and berms, fence off Ovid Creek to exclude cattle, and install a stock watering system on a 218-acre grass hayland and winter calving and feeding operation near Ovid, in Bear Lake County, Idaho. The project, which is also receiving funding from the NRCS, is expected to reduce sedimentation and nutrient loads in Ovid Creek and will complement other ECC-funded projects in this watershed.

Sediment Removal on Spring, Stauffer, and Whiskey Creeks

U.S. Geological Survey (USGS) researcher Adam Sepulveda was awarded \$5,059 in 2012 for a project to remove fine sediments from BCT spawning and rearing habitat in Spring, Stauffer, and Whiskey creeks using a sand wand system. This project was approved by the ECC in 2011 but high flows prevented execution of the project that year. The \$5,059 award will cover cost increases beyond the original award and allow the project to move forward. BCT persistence in the Bear River basin is threatened by the high sediment loads that have resulted from poor land use practices. Excessive sediment degrades BCT

spawning and rearing habitat and decreases food quality. This project will benefit resident BCT in the Stauffer Creek drainage and in Whiskey Creek.

Smith Bear River Fencing and Alternate Water Source

The ECC awarded private landowner Dalene Smith \$5,000 for a \$38,000 project to eliminate livestock access to the Bear River on her property, one mile upstream of the Highway 34 bridge in Riverdale, Idaho. The project includes fencing off 2,500 feet of the Bear River, installing an off-stream livestock watering system, and creating a 35-foot buffer to provide wildlife habitat and provide a sediment and nutrient trap. The project, which is also receiving funding from the NRCS and U.S. Fish and Wildlife Service, will reduce streambank erosion and reestablish riparian cover along the bank of the Bear River.

Stauffer and Spring Creek Fencing

USGS researcher Adam Sepulveda was awarded \$20,000 for a \$55,842 project to reduce livestock grazing impacts to BCT in the Stauffer Creek drainage by installing buck and rail fencing, cattle crossings, and bottomless culverts on Spring Creek and replacing several fence sections on Stauffer Creek destroyed during high flows in 2011. The project will reduce sediment loads in the streams, prevent further degradation to cutthroat trout habitat, improve the overall health of native fish and stream invertebrates, and increase the quality and quantity of habitats that can support spawning cutthroat trout.

Kackley Springs Dike Repair

PacifiCorp was awarded \$12,000 to repair the western-most dike on the main pond at Kackley Springs so that water levels in the pond could be increased. The project will improve important rearing habitat for BCT. In particular, it will increase the water depth in the main pond by approximately 18 inches and increase its suitability for rearing of fish. This project continues the work completed in 2009 that removed old water control structures, refilled the ponds and created a 1/3-mile reconnection channel between the pond and the Bear River. In 2010, an upstream migration barrier and fish sorting trap was installed and in 2011 BCT from the Conservation Hatchery Program were released into the reclaimed wetland complex. PacifiCorp has also applied for and received approval of a water right to protect the flows in the complex for instream aquatic benefit.

Black Canyon Dump Cleanup

The ECC awarded Glen Gibson \$10,000 for a project that would remove many tons of debris from the east bank along a mile-long stretch of the mainstem Bear River in the Black Canyon. The work is subsidized significantly by the sale of scrap steel but that revenue does not fully cover operating costs, estimated at \$1,000 per day. Cleanup of the tons of debris that have accumulated in the canyon over the years will allow habitat restoration and result in water quality improvement in an area targeted for BCT recovery.

Trout Creek Restoration

The ECC agreed to fund up to \$15,554 and donate rock for a project that would reshape a channelized reach of Trout Creek on private land owned by project proponent Nathan Hale. The project will restore the stream channel, stream bank, increase cover, and provide spawning habitat for BCT on a relatively short stretch (<0.5 mile) of stream. This project, which is also receiving funding from the NRCS, will complement a recent series of upstream habitat improvements on Trout Creek.

Kackley Springs Reseeding

SSLT was awarded \$2,500 for native reseeding of an approximately 15-acre area west of Kackley Springs. The goal of the project is to plant native seeds on the Kackley property in an effort to reduce undesirable and weedy vegetation.

Land and Water Acquisition Plan (Article 406)

The Land and Water Acquisition Plan was completed in 2004 as part of the Implementation Plan and an order approving the plan was issued by FERC on March 22, 2005. This plan describes the funding provided to acquire available land and water rights in the action area. Actions pursuant to the Land and Water Acquisition Program are decided upon and prioritized by the ECC. Annual funding of \$300,000 (escalated annually) for this purpose began December 22, 2004 and will continue through the end of the license term.

In 2005, the ECC formed a subcommittee to develop proposal and application forms for individuals and organizations seeking funding from the ECC for land and water acquisition projects. The subcommittee also developed evaluation criteria for proposals. Due to the opportunistic nature of land and water acquisition fund projects, the ECC voted in 2007 to accept and evaluate such proposals year-round. They are approved by consensus agreement among ECC members at large.

In 2006 PacifiCorp entered into a Memorandum of Agreement with SSLT to acquire properties using the license-required Land and Water Conservation Fund. The 2006 memorandum described the process for the trust to acquire properties once approved by the ECC. The MOA was updated by PacifiCorp and Sagebrush Steppe during 2012 and the updated MOA received a vote of support from the ECC at its September meeting.

To date, funds expended from the Land and Water Conservation Fund have protected more than 2,000 acres, including a 1033-acre conservation easement which closed in July 2012 that will protect portions of Mink Creek and adjacent upland habitat. Table 3.1-2 summarizes the acres, type of acquisition, whether conservation easement or fee title, and length of river bank protected to date.

Prior to the 2012 review period, flyers were distributed to ECC members, local USDA-Natural Resource Conservation Service offices, and previous applicants to announce land and water conservation funding availability and request proposals. Application materials were posted to PacifiCorp's website. Evaluation of two new conservation easement projects was started in 2012.

Table 3.1.2 Lands and Easements Acquired with the Land and Water Conservation Fund					
Parcel	Acreage	Waterbody	Date	Linear Feet of Riparian Protection*	
				Left Bank	Right Bank
Conservation Easements					
Cove Easement 1 Olsen	0.25	Bear River	2006	342	--
Cove Easement 2 Hansen	0.04	Bear River	2006	29	--
Cove Easement 3 McCurdy	0.68	Bear River	2006	758	--
Cove Easement 4 Olsen	0.24	Bear River	2006	343	--
Cove Easement 5 Harris	1.0	Bear River	2006	740	--
Henderson Preserve	210	Bear River	2008	4,406	4,114
Harris Preserve	116	Bear River	2009	2,899	--
Upper Christensen	767	Mink Creek	2012	3,250	3,250
Lower Christensen	261	Mink Creek	2012	--	2,500
Riparian Christensen	5	Mink Creek	2012	1,250	1,250
Fee Title					
Kackley Preserve	157	Bear River	2006	1,964	3,402
		Kackley Creek	2006	2,661	2,790
Cove Preserve	2.3	Bear River	2006		772
Deep Creek Preserve	435	Bear River	2010	1,767	1,812
Conservation land purchase partially funded by the Bear River Hydroelectric Project Land and Water Conservation Fund and held by the Idaho Department of Fish and Game.					
Fee Title					
McCammon Parcel	77.5	Bear River	2006	--	4,696
* Left or right bank designations assume facing downstream.					

In June 2012, the ECC approved an expenditure of \$25,000 from the Land and Water Conservation Fund for SSLT staff support from June 2012 – June 2013. In November 2012, the ECC approved a payment of \$12,500 to SSLT from the Land and Water Conservation Fund for 2012 management and monitoring fees.

The Lower Christensen conservation easement, which closed in 2012, is located along Mink Creek in Franklin County, Idaho. The conservation easement will permanently protect the property's diverse open space values, including riparian woodlands along Mink Creek, as well as prime agricultural and ranch land.

Black Canyon Monitoring Plan (Article 407)

The Black Canyon Monitoring Plan was completed and filed on December 23, 2004 with FERC, which in turn issued an order modifying and approving the plan on February 17, 2005. Based on comments received during a subsequent outside peer review of the plan, a revised Black Canyon Monitoring Plan was prepared and circulated to ECC members for approval, then filed with FERC on June 10, 2005. An order approving the plan was issued October 13, 2005.

In 2005, Oasis Environmental was selected to conduct the monitoring study in Black Canyon and the first round of monitoring took place in October of that year. The third year of monitoring was completed in October 2007 and marked the end of baseline studies in the Black Canyon. The sixth and final year of Black Canyon Monitoring was completed during 2010, and a final report on the six-year study of Black Canyon entitled, *"Effects of the Variable Flow Regime on the Ecology of the Black Canyon of the Bear River, Idaho"* was received by the ECC for review and comment April 12, 2011. ECC comments on the plan were addressed and the report was made final September 12, 2011. Activities under this license article are now complete.

Minimum Flow Requirements (Article 408)

In compliance with section 3.2.1.1 of the Bear River Settlement Agreement, PacifiCorp's environmental coordinator provided notification of annual maintenance activities and time frames to the ECC via email

on March 23, August 28, September 5, and October 8 and 16, 2012. PacifiCorp's annual maintenance schedule for 2012 was provided to the ECC before April 2012.

Minimum flow requirements were revised May 23, 2006, when FERC issued its Cove Decommissioning Order, amending Article 408:

The licensee shall maintain continuous minimum bypass flows from the project development as follows:

1. Below the Soda Dam: year-round minimum flow of 150 cfs, or inflow into the Soda reservoir, whichever is less;
2. Grace bypassed reach: a year-round minimum bypass flow of 63 cfs or inflow, whichever is less, in addition to 2 cfs leakage below the Grace Dam;
3. Oneida reach below the powerhouse: a year-round minimum flow of 250 cfs or inflow, whichever is less, in addition to 1 cfs leakage below Oneida Dam.

These minimum stream flow requirements will continue in accordance with procedures described in the Operations and Compliance Plan.

In 2011, PacifiCorp installed a low level release valve at Grace Dam to improve the measurement and delivery of the required minimum instream flow in the Black Canyon below Grace Dam.

Fish Stranding Minimization Plan (Article 409)

The Fish Stranding Minimization Plan was completed as part of the Implementation Plan filed with FERC May 28, 2004. An order modifying and approving the plan was issued by FERC on March 7, 2005. The plan describes measures and agency consultation to minimize potential fish stranding resulting from release of recreation flows from the Grace Development. The Fish Stranding Minimization Plan was to be implemented in 2008, upon commencing scheduled recreation boating releases into Black Canyon, or during other times when high flows result in spill from Grace Dam. However, in 2007, the ECC began working to develop a ramp rate/fish stranding study to measure the direct impacts of downramps after whitewater releases. In 2008, FERC granted PacifiCorp's request to suspend Article 409 until the fish stranding study was completed. The Boater Flow Ramp Rate Study was completed during 2010 and a final report was submitted to FERC. The need to implement, change or request removal of Article 409, based on study results, was discussed with the ECC during a series of meetings in 2011. Per the requirements in a June 2, 2011 FERC Order, PacifiCorp prepared a report on the ECC's decision making regarding boater flows and the suspension of Article 409. This report was submitted to FERC on January 31, 2012 and included a recommendation to continue suspension of Article 409. The report also included the ECC's decision to use a down ramp rate of 1 foot per hour following boater flows. On May 18, 2012, the Final Agreement on Boater Flows was filed with FERC. This agreement included the ECC's recommendation to not reinstate Article 409. Continued suspension of the Article 409 Fish Stranding Minimization Plan was confirmed by FERC on October 17, 2012, in an issuance that confirmed PacifiCorp

had complied with Ordering paragraph (b) of FERC's June 3, 2011 Order Approving Suspension of the Fish Stranding Minimization Plan.

Kackley Springs Plan (Article 410)

The Kackley Springs Plan was completed as part of the Implementation Plan filed with FERC May 28, 2004 and an order modifying and approving the Kackley Springs Plan was issued by FERC March 22, 2005. The Kackley Springs Plan was also discussed by the ECC as part of the Grace-Cove Site Plan. The Kackley Springs Plan proposes studies and monitoring to determine the effects of flow on Bonneville cutthroat trout and other aquatic resources. In 2006, the ECC awarded a habitat enhancement fund grant to a graduate student to investigate options to reconnect the Kackley Springs flow to the channel that crosses the Kackley Parcel. The ECC reviewed this report during 2008 and conducted a field review of the site during its July 2008 meeting. A conceptual plan was agreed to by the ECC to discontinue diversion of the spring directly into the Bear River and send the water down a longer route that can potentially be used by native fish for spawning. Habitat enhancement funding was approved for the project during 2009 (see Article 405, above) and the Kackley Springs Reroute Project was completed later that year. Noxious weed control took place and additional shrubs and willow stakes were planted during 2009, 2010 and 2012. This article is now complete; however, the ECC approved a project to raise the elevation in the main pond during the 2012 grant fund cycle. Future land management activities around the springs will be conducted in accordance with the Grace-Cove Site Plan.

Kackley Springs Bonneville cutthroat trout.

Dam Leakage Minimization Plan (Article 411)

The Dam Leakage Minimization Plan was completed as part of the Implementation Plan filed with FERC May 28, 2004 and approved December 13, 2004. This plan describes steps to measure leakage from Grace and Oneida dams. The measurement protocol was developed in consultation with the ECC, and dam leakage measurements were taken in October 2004. An order amending Article 408 (Minimum Flow Requirements) was issued by FERC on December 2, 2005 and included dam leakage in minimum flow requirements. No further action was needed regarding the Dam Leakage Minimization Plan during 2012.

Ramp Rate Requirements (Article 412)

The schedule for implementing new ramp rates, as measured downstream of the Soda and Oneida developments, was modified in the Implementation Plan approved by FERC December 13, 2004. New ramp rate requirements were implemented December 22, 2004. Ramp rates will continue in accordance with procedures described in the Operations and Compliance Plan filed with FERC December 22, 2004. Notification of annual maintenance activities and timeframes were given to the ECC by the environmental coordinator via email as reported for Article 408.

As described in the Settlement Agreement, Black Canyon ramp rates have been determined with the ECC, in consultation with PacifiCorp. Discussions regarding ramp rates began in April 2006, and continued through the end of 2007. During 2007, the ECC developed and reached consensus on a study plan to evaluate fish stranding in the Black Canyon following boater flow events, and in 2008 launched a three-year study to evaluate the effect of whitewater boating flow ramping rates on native fish. The third and final year of the study was completed during 2010 and the final report on the Black Canyon Boater Program Ramp Rate Study was submitted to FERC. This information was used by the ECC—along with Black Canyon Monitoring Study results and the final Boater Flow Water Quality Report—to help determine ramp rates and the future structure of the boater program. In 2011, the ECC determined that a 1 foot per hour ramp rate will be used for boater flows.

Water Quality Monitoring Plans (Article 413)

The 2007 Water Quality Monitoring Report for the Grace-Cove Development was submitted to IDEQ in January 2008. IDEQ then verbally informed PacifiCorp that water quality monitoring at Grace-Cove could be discontinued, two years before scheduled, as they found no indication of project contribution to exceedances of water quality criteria. A formal letter was received from IDEQ during 2009, signing off on Grace-Cove Water Quality Monitoring and the Oneida Water Quality Study.

A final Oneida Water Quality Monitoring Report was submitted to the IDEQ on April 6, 2007. The collection of data for this 18-month study was completed in October of 2005. During 2008, discussions

were held between PacifiCorp and IDEQ concerning the ability to determine project contributions to exceedances of water quality at the Oneida Project based on the results of the study. In 2009, agreement was reached with IDEQ that the Oneida Project does not significantly cause or contribute to exceedances of water quality standards.

During 2008, IDEQ requested water quality monitoring during boater flows in the Black Canyon. A study plan was developed by PacifiCorp and the IDEQ. This study plan was used during the 2008, 2009, and 2010 whitewater releases. 2010 Boater Flow water quality measurements were included in a final report with 2008 and 2009 results. This final Boater Flow Water Quality Report was submitted to FERC. During 2011, the ECC discussed exceedances of state water quality criteria during boater flow events during a series of meetings held to address boater flows. The Idaho Department of Environmental Quality will continue to collect water quality monitoring data during boater flow events in 2012, 2013 and 2014 to inform potential future management decisions.

Operations and Compliance Plan (Article 415)

PacifiCorp prepared a draft Operations and Compliance Plan and provided copies to the ECC and US Geological Survey (USGS) for review November 4, 2004. After a 30-day review period, the plan was finalized and filed with FERC on December 22, 2004. An order from FERC approving the Operations and Compliance Plan was issued April 7, 2005. Subsequently, based on operational issues identified during 2005, PacifiCorp suggested revisions to the plan regarding how minimum flows are measured during low-flow periods. These revisions were presented to the ECC for comment initially in November of 2005, and discussions continued through 2006. In 2007, a modification to the Operations and Compliance Plan regarding publishing of streamflow gage data by the USGS was presented to and accepted by the ECC. During 2008, the compliance point for Black Canyon minimum stream flow measurement was changed from the USGS gage below the Grace Dam to the reservoir elevation gage, a reservoir deadband, and calculated gate opening. An updated Operations and Compliance Plan, which includes updates on new stream flow gaging equipment, the change in compliance point at Grace Dam, operations directions for transition from minimum stream flow at Grace Dam to inflow, and publication of stream flow data and USGS gage maintenance and calibration will be submitted to FERC in 2013.

Recreation and Traffic Safety Plan (Articles 416/417)

The Recreation and Traffic Safety Plan was submitted to FERC on January 31, 2005. An order approving the plan was issued October 11, 2005.

During 2012, annual funding was provided to Caribou County for park maintenance, to Franklin County for law enforcement, and to BLM for Oneida campground maintenance. Annual dust abatement applications were made around the campgrounds and day-use area in Oneida Canyon.

Boaters prepare for a 2012 whitewater boater flow release below Grace Dam.

Boating Flow Release Plan (Article 418)

The Boating Flow Release Plan was completed as part of the Implementation Plan filed with FERC May 28, 2004. An order modifying and approving the Flow Release Plan was issued August 11, 2005. This plan describes measures to release whitewater boating flows from the Grace Dam for the purpose of whitewater recreation. During 2007, plans to install slide gates to facilitate whitewater releases were completed and submitted to FERC. In 2008, Grace Dam was modified by the installation of the spill gates, which are used to facilitate whitewater releases. A schedule of 2012 whitewater boating flows was prepared as required and submitted to the ECC and FERC.

Boating Flow Release Schedule (Article 419)

The ECC developed a Black Canyon Monitoring Plan (Article 407) to document the effects to aquatic resources of flow releases from the Grace Dam for whitewater recreation in the Black Canyon reach of the Bear River. This six-year study started in 2005 and concluded in 2010. It collected data over three baseline years without whitewater releases and for three years with releases. Flow releases during the second three years were triggered by river inflow. In addition to this study, in 2007 the ECC developed a ramp rate study plan to evaluate fish stranding over three years and use this information, along with

the six-year Black Canyon Monitoring Study, to make future decisions concerning ramp rates and whitewater boater program structure.

During fall of 2011, a series of three ECC work sessions were held to discuss study results that included the six-year monitoring report, the fish stranding report, water quality, and the timing and schedule of future boater flows. A report of these discussions was submitted to the FERC on January 31, 2012. This report included the Draft Agreement for Boater Flows: Extended Study Period & Adaptive Management and a commitment to follow up with FERC 45 days after the agreement was finalized. According to the terms of the Agreement for Boater Flows in the Black Canyon: Extended Study Period and Adaptive Management developed at these meetings, during the extended study period (2012 – 2014), four weekends of scheduled boater flows will be released between April 1 and June 5. A down ramp rate of 1 foot per hour will be used. The Article 409 Fish Stranding Minimization Plan will remain suspended. Talks continued during early 2012, resulting in final ECC approval on April 18, 2012 of the agreement and associated study plans to be implemented by IDFG and IDEQ for monitoring of water quality and fisheries during the extended study period. The agreement was implemented for the 2012 boater session. Three two-day whitewater boater flow events and one three-day event were provided on April 28 and 29; May 5 and 6; May 19 and 20; and June 1, 2 and 3, 2012.

The Final Agreement for Black Canyon Boater Flows: Extended Study Period & Adaptive Management was submitted to FERC on May 18, 2012. FERC responded on October 17, 2012, that PacifiCorp had fulfilled consultation and reporting requirements as required in FERC's June 3, 2011, Order Approving Suspension of Fish Stranding Minimization Plan under Article 409.

Oneida Operations Regime (Article 420)

The Oneida Operations Regime was completed as part of the Implementation Plan filed with FERC May 28, 2004. An order approving the operational regime was issued August 17, 2005. This plan describes the operational regime designed to minimize the frequency of river level fluctuations below the Oneida powerhouse. Under this plan, when water is available, flows below the Oneida powerhouse will be greater than 900 cfs between Memorial Day and Labor Day, as described in the Operations and Compliance Plan filed with FERC December 22, 2004. During 2012, recreation flows were provided in relation to required irrigation releases. During the period June 18 to September 8, high irrigation demand resulted in flows above 900 cfs in the Oneida Narrows reach. The Oneida Development Water Year 2012 Operations Report was filed with IDEQ and is being submitted to FERC with this annual report.

Boating Flow Forecasting Plan (Article 421)

The Boating Flow Forecasting Plan was completed as part of the Implementation Plan filed with FERC May 28, 2004. An order modifying and approving Flow Forecasting Plan was issued August 17, 2005. This plan describes measures to forecast and announce whitewater boating flows for each year beginning in 2008.

A boater flow schedule was developed as required in 2012 in consultation with American Whitewater after PacifiCorp provided the 2012 water year forecast. The schedule was provided to the ECC for review and submitted to FERC. The schedule of flows was posted on the PacifiCorp website and information was provided on the Flow Phone. Nine boater flow releases were provided over four weekends in 2012.

The terms of the ECC's Agreement for Black Canyon Boater Flows: Extended Study Period and Adaptive Management will be implemented during 2012 – 2014. The agreement requires four weekends of scheduled flows between April 1 and June 5, a ramp rate of 1 foot per hour, and continued suspension of Article 409. PacifiCorp will provide the flow forecast, develop a schedule with American Whitewater and post the schedule on the Bear River website and Flow Phone. The schedule will be provided to the ECC for review and submitted to the FERC.

Website and Flow Phone Report (Article 422)

PacifiCorp's existing Flow Phone was updated and a Bear River Implementation website (<http://www.pacificorp.com/es/hydro/hl/br.html#>) was created in 2004. This website and toll-free number (1-800-547-1501) was reported to FERC in a December 30, 2004 letter. FERC issued a letter approving the website and Flow Phone on January 14, 2005. In addition to river flow information, the website provides ECC meeting notes, reports, and other documents related to implementation of the license. The website and Flow Phone were maintained during 2012.

Historic Properties Management Plan (Article 423)

The Historic Properties Management Plan (HPMP) was completed in early 2005 and filed with FERC on March 29, 2005. This HPMP was then withdrawn to allow the preparation of a revised plan for submittal to the Idaho State Historic Preservation Office. The revised plan was intended to address the SHPO's comments on the previous draft. Additional comments were received from the SHPO in 2007 and a revised HPMP was submitted to FERC in July 2007. During 2008, FERC issued an order accepting the HPMP and directing PacifiCorp to begin implementation. PacifiCorp prepared and presented cultural resource training to all Bear River operations staff in 2009, 2010, 2011, and 2012. Interpretive panel artwork that was finalized during 2011 was manufactured and installed in 2012, except those covering Native American use of the area. Eight signs total were installed that covered historical information on the Grace, Cove and Oneida developments in addition to Doc Kackley, the Oneida Plant Disaster, and Bonneville cutthroat trout. A consultation meeting and field trip was held with the Shoshone Bannock Tribe concerning traditional cultural properties and interpretive signs. PacifiCorp will continue to work with the tribes on Native American interpretive signs. The 2011 annual report on HPMP activities was submitted to FERC prior to the January 22, 2012 deadline.

Land Management Plan (Article 424), which includes Shoreline Buffer Zone Plan (Article 425), and Cove Bypass Reach Fencing Plan (Article 426)

The Land Management Plan (LMP) was filed with FERC January 31, 2005. Included in the LMP are the Shoreline Buffer Zone Plan and the Cove Fencing Plan. The LMP has specific detail regarding implementation of new land management procedures in five site plans. These site plans were to be completed (written) within 5 years after the LMP is approved, and were prioritized as follows: Grace-Cove, Oneida, Soda, Grace Dam, and Last Chance. During 2008, the ECC agreed to incorporate the Grace Dam and Last Chance site plans into one document, reducing the number of site plans to four. Implementation of the site plans must be completed by 10 years after the LMP is approved.

The first site plan, for the Grace-Cove area, was completed and reviewed by the ECC in 2005. Most of the implementation scheduled in the Grace-Cove Site Plan was completed in 2005 and 2006, the remainder was finished in 2007—including revised leases, final edits to monitoring forms, and revisions based on Cove decommissioning. Some remaining cross fencing no longer needed in the Grace-Cove site plan area was removed in 2012 and fence repair and maintenance was conducted. The Oneida Site Plan was drafted and reviewed by the ECC in 2006. The plan was finalized in 2007, but revisions were made during 2008. Implementation actions for Oneida were completed in 2007 and 2008 including installation of cattle exclusion fencing and boundary markers along property lines not fenced. Remaining interior cross fencing was removed in Oneida Canyon during 2010 and 2011. Fence repair and maintenance was conducted during 2012. The Soda Site Plan was completed and reviewed by the ECC during 2008 and implementation actions were substantially completed during 2008, including installation of boundary markers and cattle exclusion fencing, marking of expanded reservoir buffer areas, and seeding of approximately 130 acres with native grass in new reservoir buffer areas. Agricultural leases were modified to prohibit grazing and to allow for the reduction in areas set aside for reservoir buffers. The Soda Site Plan was finalized in 2009. Most of the interior abandoned cross fencing was removed in 2011 from the Soda Site Plan area. Some remaining cross fencing was removed in 2012. The Grace Dam and Last Chance Site Plan was finalized during 2010. Implementation actions completed at Grace Dam and Last Chance include installation of property boundary markers and cattle exclusion fencing where needed. An agricultural field adjacent to the Grace Forebay and former cattle feeding areas at Grace Forebay and Last Chance were seeded with native grass, abandoned interior fences were removed from the Grace and Last Chance properties, and two cattleguards were installed on the dirt road at Last Chance to exclude cattle from the river. Noxious weed control activities were performed in all areas in 2012 as required in the site plans. The Cove Buffer shoreline fence was monitored as required during 2012. Monitoring forms are included in Appendix C of this report. Maintenance needs were noted and will be completed during 2013. Monitoring reports for Grace-Cove, Oneida, Soda, and Grace Dam and Last Chance site plans are included in Appendix B, D, E and F of this report, respectively. Work planned for 2013 includes continuing to monitor vehicular trespass issues at Soda and address as needed, noxious weed control, and addressing minor issues noted during the 2012 Compliance and Performance Tracking monitoring.

As referenced above, a minor update of the LMP was completed in consultation with the ECC in 2011, as allowed in the original 2005 LMP, Section 2.4. This update was made necessary by the decommissioning of the Cove Project in 2006, completion of the site plans in 2010, and installation of measures to protect lands within the FERC boundary being placed at the outer PacifiCorp property boundaries, collectively. The updated LMP was submitted to FERC with the 2011 annual report of implementation activities.

Expanded FERC Project Boundary (Article 427)

Planning for the expanded FERC project boundary was included in the preparation of the Land Management Plan and the Recreation and Traffic Safety Plan. A modified schedule for completion of the survey and preparation of a new Exhibit G was included in the Implementation Plan. New and Revised Exhibit G drawings were filed with FERC August 17, 2005 under Article 202 and 427. An order approving revised Exhibit G Drawings and revising federal acreage was issued October 13, 2005. No action was taken in regard to the Expanded FERC Project Boundary during 2012, although future actions may be necessary based on the 2011 updated LMP.

3.1.2 Work Completed for Cove Decommissioning Site (Order Amending License and Revising Annual Charges [62,205])

The FERC issued the Cove Decommissioning Order May 23, 2006, and the development, including Cove Dam and the mile-long flume, was removed in the summer of 2006. After removal of the structures, work to stabilize and reclaim the area was completed in late fall of 2006, and 2009 was the final year of monitoring required by the US Army Corps of Engineers permit. All required actions are complete.

3.2 Work Anticipated in 2013

This section outlines work anticipated for license implementation and compliance during 2013. As noted in section 3.0, an implementation schedule for 2013 is included in Appendix H of this report. The 2013 implementation schedule updates and replaces the implementation schedule filed with the Implementation Plan in 2004, and the schedule included in the 2011 annual report.

- File 2013 Annual Report, including the Oneida Development Water Year 2012 Operations Report.
- Continue collaboration with stakeholders through ECC meetings held every other month (or more frequently, as needed).
- Make conservation hatchery payment to IDFG.
- Continue the Habitat Enhancement Program - Subcommittee to evaluate projects in March 2013 and present recommendations to the ECC for approval in April 2013. Continue to monitor habitat enhancement projects (per Appendix G).

- Continue the Land and Water Acquisition Program – Subcommittee to evaluate projects as they are presented during the remainder of the year.
- Continue to document required minimum flows.
- Provide PacifiCorp’s annual maintenance schedule to the ECC before April 2013, consult with ECC in emergencies, as practical.
- Continue to implement the Agreement for Black Canyon Boater Flows: Extended Study Period and Adaptive Management. This will require four weekends of flows between April 1 and June 5, a 1 foot per hour down ramp rate, and continued suspension of Article 409. PacifiCorp will provide the flow forecast, develop a schedule with American Whitewater, and post the schedule on the Bear River website and Flow Phone. IDEQ will continue to collect water quality monitoring data during boater flow events in 2012 through 2014 to inform potential future management decisions. IDFG will implement a fisheries study plan during the 2012 to 2014 timeframe.
- Document proposed changes to the Operations and Compliance Plan and file with FERC after ECC review.
- Make annual payments to Caribou County, BLM, and Franklin County Sheriff; implement dust abatement measures on Oneida Road; and maintain signs and recreation sites.
- Submit 2013 whitewater boater flow schedule to FERC.
- Submit annual Oneida Operations Report to IDEQ.
- Maintain website and Flow Phone.
- Continue to follow the Historic Preservation Management Plan (HPMP) guidance. Continue to work with Tribes on Native American interpretive signs. Submit annual report on HPMP activities in January 2013.
- Update Oneida and Grace-Cove site plans for consistency with the 2011 Revised Land Management and Buffer Zone Plans.
- Continue monitoring as required for the Grace-Cove, Oneida, Soda, and Grace Dam and Last Chance site plans. Take corrective actions as needed.

- Treat noxious weeds.
- Conduct ongoing maintenance of fences, gates, and boundaries in all site plan areas.
- Maintain Cove buffer shoreline fence, per Art. 426
- Continue to monitor vehicle trespass issues at Soda and address as needed. Address any other minor compliance issues noted during 2012 monitoring efforts.

4.0 Funding

This section presents an accounting to the end of calendar year 2012 of the funding obligations for Bear River Settlement Agreement and new license. Funding obligations noted as complete in previous annual reports are not included.

PacifiCorp Bear River Implementation Projects Oneida Campground Funding SA 3.4.1.1 BRI-ONEIDA					
Posting Date	Invoice Amount (Debit)	Contract	Credits	Balance	Notes
Jan 2004 Beginning Balance			\$10,170.00

Cove Shoreline Buffer Fence Annual Monitoring Report

Cove Shoreline 2012 Buffer Fence Annual Monitoring Report

In the fall of 2006 a fence line was constructed on the west side of the Bear River, essentially running the length of the Grace-Cove project area, as part of the required implementation of the 2003 Federal Energy Regulatory Commission (FERC) Bear River Idaho license (FERC No. 20). The fence line was constructed on private land not owned by PacifiCorp, between the former Cove Forebay and the Cove plant to fulfill the requirements of the Bear River License Article 426. The new fence line was constructed to create a buffer zone to protect the river and its banks from livestock grazing and any other agricultural land uses. This project involved PacifiCorp Energy, the United States Fish and Wildlife Service (USFWS), and several private land owners whose property abutted the Bear River. New fence construction, as well as the updating of existing fence lines, resulted in approximately 9,000 feet of continuous fence line along the Bear River. This fence line provides protection from livestock grazing and other agricultural uses. Currently 1.5 miles of riparian zone along both sides of the Bear River between the Grace Hydro Plant and the former Cove Plant is now protected by this fence line (fulfilling in part, License Articles 425 and 426). This protection will help to improve the overall condition of the riparian zone as well as improve bank stabilization, wildlife habitat and water quality.

Since completion of the fence line in 2006, Sagebrush Steppe Land Trust (SSLT), in conjunction with the Environmental Coordination Committee (ECC), has purchased 154 acres of land on the east side of the Bear River that is adjacent to the Cove shoreline buffer. To further protect this stretch of the river, SSLT created perpetual conservation easements with the private landowners within the area between the fence and the river for additional protection from future undesired uses.

PacifiCorp is responsible for annual fence monitoring and inspection, as well as any required maintenance for the duration of the FERC license, which will expire in 2033. SSLT will be responsible for all other required land management practices within this buffer.

Annual monitoring was conducted in the spring of 2012 and the fence was found to be in overall good condition. There has been some confusion in several previous years as to the photo point location at McCurdy I. In past years the photo has been taken along the old riparian fence looking south. In 2010 a new photo point was established at the corner of the new fence looking south along the west boundary below the channel. During the 2011 monitoring, the photo was taken at the former riparian fence location. In 2012 the correct photo point location was reestablished and the old riparian fence is scheduled to be removed in the fall of 2012 to eliminate confusion and potential obstruction of wildlife use. The McCurdy II sections of the buffer fence are in need of repairs and maintenance is scheduled for fall 2012 as well. In 2010 the Harris section of fence was divided into two separate sections, the Harris BLM and Harris riparian sections. A photo point was established on the BLM section along the property line looking west, while the photo point for the riparian section remained the original photo point which is located on the south end of the Harris section looking north up-river along the narrow riparian area. During the 2011 monitoring the BLM section Harris photo point was missed. In 2012 both photo points were reestablished and monitored separately. Notes and photos from each individual fence segment from the 2012 monitoring are included below.

Olsen I: Length: 440 feet

Type: 4-strand, barbwire on steel posts.

Baseline Condition: Fence moved (December 2007) to correct property boundary. Fence line runs east and west through riparian zone. Fence line is in good condition. Riparian area is dominated by sedges and wet meadow grasses, and is in good condition.

2012 Maintenance required: No maintenance required at time of inspection.

2012 Easement conflict: None

2012 photo taken looking west from fence corner.

Olsen I 2012

McCurdy I: Length: 320 feet

Type: Existing and upgraded, 6-strand, barbwire on steel and wood posts.

Baseline Condition: There has been some confusion of the location of the McCurdy fence segment. The actual location is west of Olsen I on the hillside below the canal. The fence line borders the SSLT property on the west boundary. The photo point used in previous years was looking south through the McCurdy I riparian along the old fence line. In 2010 a new photo point was established for McCurdy I, looking south from the fence corner below the canal.

2012 Maintenance required: None, fence in good working condition. The old riparian fence is scheduled to be removed in fall of 2012.

2012 Easement conflict: None

2012 photo looking south on west boundary.

McCurdy I 2012

Hansen: Length: 200 feet

Type: 5-strand, barbwire on steel posts.

Baseline Condition: Fence line is in good condition, as well as the riparian area. Riparian area is dominated by small stands of willows along with cattails and other emergent marsh-type grasses.

2012 Maintenance required: Wreck out existing, old interior fences that are no longer needed, scheduled for fall 2012.

2012 Easement conflict: None

2012 photo looking south through Hansen riparian.

Hansen 2012

McCurdy II: Length: 900 feet

Type: Field fence, 1-strand barb wire below, 2-strand barb wire above, steel posts.

Baseline Condition: Fence line and riparian zone are in good condition. Riparian zone dominated by dense stands of woody shrubs, including Wood's rose and black hawthorn. In 2012 some trespass grazing occurred due to fence damage.

2012 Maintenance required: The fence is in need of repair, see photos below. The fence is tipping over and needs to be tightened.

2012 Easement conflict: Some trespass grazing, cow trails.

2012 photo looking south through McCurdy II riparian zone.

2012 McCurdy II

McCurdy II fence damage 2012

McCurdy II fence damage 2012

Olsen II: Length: 2700 feet

Type: Combination of existing, upgraded 7-strand barb wire on steel and wood posts and new 5-strand barb wire on steel posts.

Baseline Condition: Fence line and riparian area in overall good condition. Riparian area dominated by grasses and willow and other shrub stands.

2012 Maintenance required: None

2012 Easement conflict: None.

2012 photo looking south through riparian zone.

2012 Olsen II

Harris: Length: 4440 feet

Type: Combination of new, 5-strand barb wire on steel posts and new field fence with 2-strand barb wire on top, on steel posts, two soft gates included to provide access to lessees on embedded 40-acre BLM lease.

Baseline Condition: The Harris section of fence line is currently monitored in two parts, Harris Riparian and Harris BLM sections. In previous years the two sections were monitored as one segment, but starting in 2010 they have been monitored as two separate sections. The Harris BLM section fence line separates the Harris property from BLM property; a new photo point for this section was established in 2010. This area is dominated by grasses and shrubs and was found in good condition in 2010. The riparian area is a very narrow strip along the Bear River with steep banks. The area is dominated by grasses and small stands of willows.

Harris BLM Section:

2012 Maintenance required: None. Notify BLM of Phragmites on both sides of river.

2012 Easement conflict: None

2012 photo taken looking west along BLM property line.

2012 Harris BLM Section

Harris Riparian Section:

2012 Maintenance required: None.

2012 Easement conflict: None

2012 photo taken looking north along riparian/upland area.

Grace Dam and Last Chance Site Plan Compliance Monitoring

Last Chance Parcel Compliance Monitoring				
Date: 8-28-2012		Technician: Bryan Westerberg		Baseline 2010
Issue	Corrective Action	Timeframe	Completed?	Comments
Public Access	<ul style="list-style-type: none"> Use appropriate methods to determine and demarcate PacifiCorp-owned lands and allowed public access. 	Summer 2009	YES	Boundaries marked.
		Annual	YES	Looks good
	<ul style="list-style-type: none"> Ensure gate, fence, and fence post condition on all boundaries where natural features don't provide adequate boundary delineation and protection from livestock and vehicle trespass. 	Summer 2009	YES	Initially completed in 2011
		Annual	YES	Fence good, some repairs scheduled fall 2012
	<ul style="list-style-type: none"> Establish and maintain gates on unimproved roads unsuitable for public motorized access. 	Fall 2009	YES	NOTE: proposed gates on northwest property were replaced with cattle guards 2010.
Vegetation Management	<ul style="list-style-type: none"> Revise the weed control contract to include backpack spraying and other appropriate techniques. 	Spring 2009	YES	Initially completed
		Annual	YES	Weeds generally controlled
	<ul style="list-style-type: none"> Reseed the upland area where livestock have damaged ground above the ramp leading to the old ford to native grasses and forbs. 	Fall 2009	YES	Initially completed
		Annual	YES	Conditions improving, new native growth, decreasing weeds
Wetland and Riparian Habitat Management	<ul style="list-style-type: none"> Secure the ramp leading down to the old ford at the north end of the parcel to prevent trespassing livestock from accessing the river's edge. 	Summer 2009	YES	Property boundary is fenced and cattle guards on road are in place. New fence along river.
	<ul style="list-style-type: none"> Reseed and replant the riparian area where livestock have damaged riparian areas at the old ford. 	Fall 2009	YES	Initially completed
		Annual	YES	Looks good, lots new shrub growth, weeds being controlled
Agricultural Uses	<ul style="list-style-type: none"> Renegotiate leases to limit lessees to one annual cut of alfalfa, leaving the balance for wildlife. 	Spring 2009	YES	Initially completed
		Annual	YES	One cut in 2012

Grace Dam Parcel Compliance Monitoring

Date: 8-21-2012

Technician: Bryan Westerberg

Issue	Corrective Action	Timeframe	Completed?	Comments
Public Access	<ul style="list-style-type: none"> Use appropriate methods to determine and demarcate PacifiCorp-owned lands and allowed public uses. 	Summer 2009	YES	Initially completed
		Annual	YES	
	<ul style="list-style-type: none"> Ensure fence and fence post condition on boundaries as necessary to control trespass OHV and livestock grazing. 	Summer 2009	YES	Initially complete
		Annual	YES	Area recovering, fence is done on the south
	<ul style="list-style-type: none"> Post "No Trespassing" and ownership signs on the west side under the Highway 34 bridge to discourage public access to the Project Operations land west of the bridge and to protect the riparian habitat. 	Summer 2009	NO	Incomplete
		Annual	YES	No signs or other barriers in place, scheduled for fall 2012. Areas that are currently fenced will be maintained in the future.
	<ul style="list-style-type: none"> Complete the signage and facilities at the Black Canyon put-in with: (1) recreational rules signs; (2) "Part 8" signs; (3) a "Stop" sign; (4) "No Fires" signs; (5) "Speed Limit 10 mph" signs; (6) "Pack It In, Pack It Out" signs; (7) a portable toilet placed and maintained spring and summer at the put-in. 	Spring 2009	YES	New rule signs installed – initially complete
		Annual	YES	Signage complete
	<ul style="list-style-type: none"> Maintain the parking areas according to RTSP standards (p. 29). 	Spring 2009	YES	Initially completed
		Ongoing	YES	Appears well maintained.
	<ul style="list-style-type: none"> Provide overflow parking area if boater use exceeds capacity of gravel parking area. 	Future activity	NO	Not needed at this time
		Annual	N/A	N/A
	<ul style="list-style-type: none"> Maintain boat access at the Grace Dam put-in and consider placing rocks in river to create eddy for safer boat launch. 	Spring 2009	YES	Initially completed
		Ongoing	YES	Boat access available. Eddy necessary
	<ul style="list-style-type: none"> Inspect the recreation site periodically (every 5 years, per LMP and RTSP) for signs of environmental damage to adjacent sensitive habitats designated as Conservation shoreline buffers, and appropriate steps will be taken if damage is detected. 	Spring 2014, initially	N/A	Not applicable in 2012.
	<ul style="list-style-type: none"> Install boulders or other barriers to prevent vehicles from accessing the area under the bridge to reduce loitering and littering. 	Fall 2009	NO	Incomplete. Barriers in place on the east side, no barriers on west side, scheduled for fall 2012

Grace Dam Parcel Compliance Monitoring				
Date: 8-21-2012		Technician: Bryan Westerberg		
Issue	Corrective Action	Timeframe	Completed?	Comments
Vegetation Management	<ul style="list-style-type: none"> Undertake appropriate weed control measures along the riparian zone and project roads as well as in localized, internal areas. 	Spring 2010	YES	Weeds generally controlled.
	<ul style="list-style-type: none"> Discontinue grazing on small (approximately 1-acre) parcel north of residence and east of Grace Dam to allow revegetation of riparian strip. 	Spring 2009	NO	Incomplete
		Annual	NO	Horse grazing, temporary electric fence in place. Additional followup needed in 2012
Agricultural Uses	<ul style="list-style-type: none"> No agricultural uses. 	Spring 2009	YES	No permitted use; see previous comment (above)

Flowline Parcel Compliance Monitoring				
Date: 8-21-2012		Technician: Bryan Westerberg		
Issue	Corrective Action	Timeframe	Completed?	Comments
Public Access	<ul style="list-style-type: none"> Use appropriate methods to determine and demarcate PacifiCorp-owned lands and allowed public access. 	Summer 2009	YES	Boundaries are marked
		Annual	YES	Consider options for public access signage.
	<ul style="list-style-type: none"> Determine where public will be prohibited from access to Project Operations lands around flowline and surge tank because of unsafe conditions (e.g., ponds, escarpments, and piles of debris). Ensure appropriate signage and fence and fence post condition on all boundaries to prevent unauthorized public access, trespass grazing, and OHV access. 	Spring and Summer 2009	NO	Incomplete
		Annual	YES	No signage or fencing in place to regulate public access or use at surge tank, on 5-ac or 47-ac parcels or along much of flowline. Consideration of "pedestrian access only" and "no shooting" signs in 2012.
	<ul style="list-style-type: none"> Negotiate easement with Last Chance Canal Company for catch basin at end of canal to require appropriate hazard warnings around the basin, near debris piles, and at the escarpment. Ensure that posted warnings are maintained by the canal company. 	Fall 2009	NO	Incomplete
		Annual	YES	Easement competed with Don Gilbert. Signage TBD in 2012
	<ul style="list-style-type: none"> Notify party using the 47-acre triangular parcel 	Spring 2009	YES	Initially completed

Flowline Parcel Compliance Monitoring				
Date: 8-21-2012		Technician: Bryan Westerberg		
Issue	Corrective Action	Timeframe	Completed?	Comments
	without a lease for grazing horses to remove livestock.	Annual	YES	No grazing 2012
Vegetation Management	<ul style="list-style-type: none"> Monitor 47-acre triangular parcel previously used by horses; reseed if necessary to improve wildlife habitat. 	Fall 2009	YES	Initially completed
		Annual	YES	No recent livestock use apparent - wildlife use. Seeding unnecessary at present.
	<ul style="list-style-type: none"> Clean up 5 acres previously used by others as dumping ground; seek opportunities for disposal, including sale or exchange with Caribou County for road maintenance material storage. 	Fall 2009	YES	Clean up complete, structures still remain
		Annual	YES	Continue to work on this
	<ul style="list-style-type: none"> Where necessary, revegetate the disturbed uplands around the surge tank that are not included in agriculture leases with native upland grasses and forbs. 	Fall 2009	YES	Initially completed
		Annual	YES	No evidence of reseeding around surge tank. Unnecessary at this time.
	<ul style="list-style-type: none"> Undertake appropriate weed control measures along the flowline and in localized, internal areas. 	Spring 2010	YES	Initially completed
		Annual	YES	Weeds generally controlled
Wetland and Riparian Habitat Management	<ul style="list-style-type: none"> As long as the wet areas under the flowline are not being grazed, no other action is required. 	Spring 2009	YES	No grazing apparent.
Agricultural Uses	<ul style="list-style-type: none"> Dispose of properties east of the current flowline along the old flowline alignment that are in the middle of cultivated fields and owned by a single landowner to that landowner by sale or exchange. 	Summer 2009	NO	Incomplete
		Ongoing	NO	Need to advance this issue
	<ul style="list-style-type: none"> Negotiate updated lease terms with farmers cultivating the narrow strips west of the flowline and near the surge tank. 	Spring 2009	NO	Incomplete
		Ongoing	NO	Need to advance this issue

Grace Dam and Last Chance Performance Tracking

Last Chance Performance Tracking					
Date: 8-30-2012 Technician: Bryan Westerberg, Initial Performance Tracking: October 8, 2010					
<div style="float: right; border: 1px solid black; padding: 2px;">X</div> Check if DFCs have been reviewed.					
Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments
Public Access	PA2 – Lands disturbed by recreation or other public uses are improved to reclaim healthy vegetation communities. (Also PA3, PA6, VM1, VM2, VM3, WR1, WR2.)	Are areas formerly damaged by trespassing livestock free of invasive plants, and is bare ground being replaced by native grasses and forbs? <ul style="list-style-type: none"> Are native plants being reestablished on the uplands above, the ramp, and the riparian zone adjacent to, the old river ford on the west side of the river? Has the extent of bare ground been reduced enough to minimize soil erosion? Has the fence around the old ford been removed so as not to obstruct use of the riparian zone by wildlife? 	LC1 (at top of ramp leading to old ford)	YES	No grazing, weeds under control. Seeded area has new growth of native grasses.
			LC2 (on west side of river at old ford)	YES	Weeds under control, lots of native shrub growth. Willows, native grasses increasing. No grazing. Looks very good compared to previous years
Vegetation Management	VM3 - habitats such as sagebrush-steppe are enhanced and protected. (Also VM1, VM2.)	Are sagebrush-steppe and mountain brush communities healthy, diverse in plant composition, and free of invasive species? <ul style="list-style-type: none"> Are native plants established and free of invasive species? 	LC3 (on western edge of agricultural field at narrowest point in southwest piece)	YES	Sagebrush-steppe community healthy. Weeds still pervasive, especially along edge of fields. Abundance of native vegetation increases away from edge of fields. Musk thistle, Japanese brome, and cheat grass apparent.
			LC4 (on east side of river at old ford)	YES	Weeds still present, but decreasing in size and density, lots of native growth

Last Chance Performance Tracking					
Date: 8-30-2012 Technician: Bryan Westerberg, Initial Performance Tracking: October 8, 2010					
				<input checked="" type="checkbox"/> X	Check if DFCs have been reviewed.
Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments
Agricultural Uses	AU1 - Activities on leased land are consistent with the objectives of the Agreement, the LMP, and other resource management plans and meet lease stipulations. (Also AU4.)	Are agricultural practices appropriate for leased parcels and helping to support wildlife? <ul style="list-style-type: none"> • <i>Are agricultural operations limited to the area designated for agriculture?</i> • <i>Are crops limited to alfalfa, and is only the first cut removed, leaving the balance for wildlife?</i> • <i>Is soil loss minimized during tillage, and are weeds appropriately managed?</i> 	LC5 <i>(on east side of river within agricultural field)</i>	YES	Agricultural practices appear to be appropriately confined. Crops limited to alfalfa and not cut recently. Minimal soil loss evident.
			LC6 <i>(on west side of river within agricultural field)</i>	YES	Agricultural practices appear to be appropriately confined. Crops limited to alfalfa and not cut recently. Minimal soil loss evident.

Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments
Public Access	PA1 - Viable recreational uses are maintained and/or improved. (Also PA2, PA3, PA4, PA6, PA7, VM1, VM2, VM3, WR1, WR2, WR3, WR4)	Are established recreation areas receiving substantial use, and do these visitors have a minimal impact? <ul style="list-style-type: none"> <i>Is there evidence of boaters taking advantage of the developed recreation site for whitewater boating at appropriate flows?</i> <i>Are soil and vegetation impacts limited to the parking area, put-in ramp, and narrow strips around roadways?</i> 	GD1 <i>(on north side of parking area east of Highway 34 bridge and south of river)</i>	YES	Boaters did take advantage of the launch site during spring and summer of 2012. Soil and vegetation impacts appear to be minimal. ATV use from the south, trail being established to river, more fencing scheduled in fall 2012
	PA2 – Lands disturbed by recreation or other public uses are improved to reclaim healthy vegetation communities. (Also PA3, PA6, VM1, VM2, VM3, WR1, WR2.)	Are upland areas formerly damaged by trespassing livestock and OHV use free of invasive plants, and is bare ground being replaced by native grasses and forbs? <ul style="list-style-type: none"> <i>Are native plants being reestablished?</i> <i>Are weedy species reasonably sparse and being managed appropriately?</i> <i>Is the percentage of bare ground small enough to minimize soil erosion?</i> <i>Have fences been established, and are they preventing livestock trespass but not obstructing use by wildlife?</i> 	GD2 <i>(along east side of flowline, south of river, and west of Highway 34 bridge)</i>	YES	Area is improving, less ATV use, weeds decreasing---lots of grass

Grace Dam Performance Tracking					
Date: 8-30-2012 Technician: Bryan Westerberg		Initial Performance Tracking: October 8, 2010		<input checked="checked" type="checkbox"/> Check if DFCs have been reviewed.	
Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments
Vegetation Management	VM3 - habitats such as sagebrush steppe are enhanced and protected. (Also VM1, VM2.)	Are areas in uplands relatively free of weeds and composed of a healthy mix of native grasses, forbs, and shrubs? <ul style="list-style-type: none"> • Are weedy species reasonably sparse and being managed appropriately? • Are native plants being reestablished? • Have fences been established, and are they preventing livestock trespass but not obstructing use by wildlife? 	GD3 (south of road to recreation parking area and east of Highway 34)	YES	Looks good, weeds generally controlled, ATV use through cut fence, trail to river—consider more fencing
Wetland and Riparian Habitat Management	WR1 - Wetland and riparian resources, spring complexes, and the river shoreline are buffered and protected. (Also WR2, WR3, WR4.)	Are areas along waterways formerly damaged by livestock free of invasive plants, and is bare ground being replaced by native grasses and forbs? <ul style="list-style-type: none"> • Are native plants being reestablished? • Are weedy species reasonably sparse and being managed appropriately? • Is there an adequate buffer of healthy riparian vegetation along the water's edge? • Have fences been established and are they preventing livestock trespass but not obstructing use by wildlife? • Are recreation users (fishers) having minimal impact on the riparian zone north of the river and west of the Highway 34 bridge? 	GD4 (east of dam and north of residence near water's edge)	NO	East of residence has heavy grazing to water's edge—weeds are an issue
			GD5 (on north side of river and midway between Highway 34 and old RR bridge)	NO	Trespass grazing most of the summer, lots of weeds, ongoing working with adjacent landowner to deal with trespass grazing

Flowline Performance Tracking					
Date: 9-5-2012 Technician: Bryan Westerberg Initial Performance Tracking: October 8, 2010					
<div style="float: right; border: 1px solid black; padding: 2px;">X</div> Check if DFCs have been reviewed.					
Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments
Public Access	PA1 - Viable recreational uses are maintained and/or improved. (Also PA2, PA3, PA4, PA5, PA6, PA7, VM1, VM2, VM3)	Does public use of the 5- acre and 47-acre Upland Conservation areas have a minimal impact? <ul style="list-style-type: none"> <i>Is there evidence of hunters and others utilizing the conservation areas appropriately?</i> <i>Is there evidence of wildlife taking advantage of the available habitat?</i> <i>Are soil and vegetation impacts minimal and vegetation cover for upland birds and other species adequate?</i> 	FL1 (west edge of 5-acre triangular parcel at junction of One Mile Road and Varley Road)	YES	Little evidence of significant public use.
			FL2 (within 47-acre triangular parcel along River Road and west of flowline)	YES	Little evidence of significant public use. Wildlife use includes scat from marmots and coyote, badger cadaver, grouse scat. Deer can be observed year round on the 47- acre parcel.
Vegetation Management	VM3 - habitats such as sagebrush steppe are enhanced and protected. (Also VM1, VM2.)	Are areas in uplands relatively free of weeds and composed of a healthy mix of native grasses, forbs, and shrubs? <ul style="list-style-type: none"> <i>Are weedy species reasonably sparse and being managed appropriately?</i> <i>Are native plants being reestablished?</i> <i>Have fences been established, and are they preventing livestock trespass but not obstructing use by wildlife?</i> 	FL3 (in uplands west of surge tank)	YES	Looks good, weeds generally controlled.

Flowline Performance Tracking Date: 9-5-2012 Technician: Bryan Westerberg Initial Performance Tracking: October 8, 2010					
				<input checked="checked" type="checkbox"/>	Check if DFCs have been reviewed.
Issue	Desired Future Condition	Performance Tracking	GPS/ Photo Pt.	YES/NO	Comments
Agricultural Uses	AU1 - Activities on leased land are consistent with the objectives of the Agreement, the LMP, and other resource management plans. (Also AU4.)	Are agricultural practices appropriate for the leased parcels? <ul style="list-style-type: none"> • <i>Are agricultural operations limited to the area designated for agriculture?</i> • <i>Is soil loss minimized during tillage, and are weeds appropriately managed?</i> 	FL4 <i>(in fields west of flowline and west of River Road)</i>	YES	Looks good.

Appendix G

Habitat Enhancement Project Monitoring

ECC Habitat Enhancement Project Monitoring

Habitat Enhancement Projects funded by the ECC are monitored yearly. A standardized form is completed for each site and a photo is taken. This appendix includes a compilation 2012 monitoring efforts.

Alleman Dam Removal

ECC Project Monitoring Form

Project: Alleman Dam Removal

Date: 8-17-2012

Observer(s): Bryan Westerberg

Project Description and Photo Point:

Project Start Date: 2010

Remove an irrigation diversion dam on the Alleman property on Georgetown Creek, exclude cattle and reclaim.

Initial Monitor Date:

Project Finish Date: 2010

Location and Baseline Data: Georgetown, Idaho, in the field just north of where West 4th Street turns into Narrows Road—you can see the red steel hay storage shed that was build next to the project.

Fence line(s) Condition:

Structure(s) Condition: Overall good. However, the drum and screen does not turn correctly, especially at lower water flows. Bearings may be bad, noise coming from left side when it turns.

Visual Water Inspection (quality and flow): Good

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Fish visible throughout the project

Bunderson Fish Bypass

ECC Project Monitoring Form

Project: Max Bunderson Irrigation
Structure Fish Bypass

Date: 9-27-2012

Observer(s): Bryan Westerberg

Project Description and Photo Point:

Project Start Date: 2010

Replace wooden irrigation diversion on Paris Creek with rock drop structures to allow fish passage/install fish screen

Initial Monitor Date:

Project Finish Date: 2010

Location and Baseline Data:

N 42 13' 45.5"

W 111 22' 13.5"

Fence line(s) Condition:

Structure(s) Condition: Good condition, working

Visual Water Inspection (quality and flow): Good

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions: N/A

Wildlife Observations:

Roy Bunderson Irrigation Structure

ECC Project Monitoring Form

Project: Roy Bunderson **Date:** 9-27-2012 **Observer(s):** Bryan Westerberg
Irrigation Structure

Project Description and Photo Point: **Project Start Date:** 2010
Install fish ladder on irrigation structure on Paris Creek

Initial Monitor Date: **Project Finish Date:** 2010

Location and Baseline Data:

N 42° 13' 30.1"
W 111° 22' 28.1"

Fence line(s) Condition:

Structure(s) Condition: Good

Success of Reclamation Efforts:

Visual Water Inspection (quality and flow): Flow good/quality good

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations: Lots of fish in Cottonwood Creek

Whiskey Creek Habitat Restoration

ECC Project Monitoring Form

Project: Whiskey Creek Habitat Restoration

Date: 9-17-2012

Observer(s): Bryan Westerberg

Project Description and Photo Point:

Project Start Date: 2010

Improve habitat for BCT in Whiskey Creek by narrowing channel and planting riparian vegetation

Initial Monitor Date:

Project Finish Date: 2010

Location and Baseline Data:

East of Highway 34 where highway crosses Whiskey Creek

Fence line(s) Condition:

Structure(s) Condition:

Success of Reclamation Efforts: Looks great, area beginning to reestablish

Visual Water Inspection (quality and flow): Good flow and quality

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Several ducks, pheasant

Oneida Narrows Riparian Protection

ECC Project Monitoring Form

Project: Oneida Narrows Riparian Protection **Date:** 9-17-2012 **Observer(s):** Bryan Westerberg

Project Description and Photo Point: **Project Start Date:** 2010
Exclude cattle from the Oneida Narrows boater takeout on Bear River by installing fence and providing water source

Initial Monitor Date: **Project Finish Date:** 2010

Location and Baseline Data:
N 42.2125
W 111.7807 Across from Oneida Narrows boater take out

Fence line(s) Condition: Fence is in good condition, buck rail fence

Structure(s) Condition: Alternative water source is in good working condition

Success of Reclamation Efforts:

Visual Water Inspection (quality and flow):

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Alexander North Planting Location

Alexander North

ECC Project Monitoring Form

Project: Alexander Shrub Plantings **Date:** 9-17-2012 **Observer(s):** Bryan Westerberg

Project Description and Photo Point: **Project Start Date:** 2009
Native shrub planting in Alexander Reservoir shoreline buffer

Initial Monitor Date: **Project Finish Date:** 2010

Location and Baseline Data:

Two locations N 42 39' 08.7" W 111 40' 19.7" N 42 38' 57.3" W 111 39' 30.7"
Around the peninsula and east side reservoir

Fence line(s) Condition:

Structure(s) Condition:

Success of Reclamation Efforts: There are some shrubs at both planting locations. Survival rates are low but surviving shrubs look good and vigorous .

Visual Water Inspection (quality and flow):

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations: Geese

Alexander South Planting Location

Alexander South

Midnight Mountain

ECC Project Monitoring Form

Project: Midnight Mtn.
Fencing

Date: 10-23-2012

Observer(s): Bryan Westerberg

Project Description and Photo Point:
Build fencing around sensitive stream source

Project Start Date: 2010

Initial Monitor Date:

Project Finish Date: 2010

Location and Baseline Data:

N 42 16' 37"

W111 32' 36"

Fence line(s) Condition: Did not visit the site this season, but spoke to Forest Service. The fence was in need of repairs mid season. Several new poles as well as large lag bolts were added to the fence. Fence in good condition this fall when cattle were removed from the area.

Structure(s) Condition:

Success of Reclamation Efforts:

Visual Water Inspection (quality and flow):

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Kackley Springs Fish Trap

ECC Project Monitoring Form

Project: Kackley Springs Fish Trap **Date:** 9-17-2012 **Observer(s):** Bryan Westerberg

Project Description and Photo Point: **Project Start Date:** 2010
Design and build a structure to exclude nonnative fish from Kackley Springs

Initial Monitor Date: **Project Finish Date:** 2010

Location and Baseline Data:

N 42 .5225
W 111. 796 Located where Kackley Springs merges with the Bear River below Grace operation area

Fence line(s) Condition:

Structure(s) Condition: Good condition

Success of Reclamation Efforts: Good, seeded areas have reestablished

Visual Water Inspection (quality and flow): Flow good, quality good

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Fish visible around trap, signs of beaver

Kackley Springs Reroute

ECC Project Monitoring Form

Project: Kackley Springs Reroute

Date: 9-17-2012

Observer(s): Bryan Westerberg

Project Description and Photo Point:

Project Start Date: 2009

Redirect current spring flow to a longer route through Kackley property. Remove dikes and other water control structures

Initial Monitor Date:

Project Finish Date: 2010

Location and Baseline Data: Just south of Grace operations and power plant.

Fence line(s) Condition:

Structure(s) Condition:

Success of Reclamation Efforts: Looks great, grasses reestablishing, native vegetation good, willow growth—new work around pound area—looks good

Visual Water Inspection (quality and flow): Flow is good, quality good

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

CLEAN, DRAIN, DRY.

ECC Project Monitoring Form

Project: Aquatic Nuisance signs

Date: 10-17-12

Observer(s): Bryan Westerberg

Project Description and Photo Point:

Project Start Date: 2009

Install interpretive signage at high-use boating and fishing areas warning of aquatic nuisance species

Initial Monitor Date:

Project Finish Date: 2009

Location and Baseline Data:

PacifiCorp boating ramps and recreation sites along the Bear River

Fence line(s) Condition:

Structure(s) Condition: Signs good, some are somewhat weathered, but still readable

Success of Reclamation Efforts:

Visual Water Inspection (quality and flow):

Road and /or Trail Condition:

Signage: Signs good, present

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Keetch Fish Screen

ECC Project Monitoring Form

Project: Keetch Fish Screen **Date:** 9-27-2012 **Observer(s):** Bryan Westerberg

Project Description and Photo Point: **Project Start Date:** 2005
Convert 198 acres of cropland from flood irrigation to sprinkler. Install pumping plant and water control system and screen.

Initial Monitor Date: **Project Finish Date:** 2008

Location and Baseline Data:
W-111.2884 N42.2517

Fence line(s) Condition:

Structure(s) Condition: Pumping plant and screen in good condition

Success of Reclamation Efforts:

Visual Water Inspection (quality and flow):

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Bailey Creek Fencing

ECC Project Monitoring Form

Project: Bailey Creek Fencing

Date: 9-21-2012

Observer(s): Bryan Westerberg

Project Description and Photo Point:

Project Start Date: 2010

Build 500 ft of riparian fence at the headwaters of Bailey Creek

Initial Monitor Date:

Project Finish Date: 2010

Location and Baseline Data:

W-111.6003 N42.5595

Trailhead is located along Old Oregon Road in the Bailey Creek subdivision, Caribou County, ID Fencing is about 3 miles up an ATV trail.

Fence line(s) Condition: Good condition, no cattle present

Structure(s) Condition:

Success of Reclamation Efforts:

Visual Water Inspection (quality and flow):

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Mule deer, grouse

Battle and Mink Creek

ECC Project Monitoring Form

Project: Battle and Mink Creek

Date: 9-27-2012

Observer(s): Bryan Westerberg

Project Description and Photo Point:

Project Start Date: 2010

Relocate six corrals from the Battle and Mink Creek watersheds

Initial Monitor Date:

Project Finish Date: 2010

Location and Baseline Data:

N 42° 12' 18.3"

W111° 45' 35.6"

Fence line(s) Condition:

Structure(s) Condition: Good condition

Success of Reclamation Efforts:

Visual Water Inspection (quality and flow):

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Bailey Creek Culvert

ECC Project Monitoring Form

Project: Bailey Creek Culvert **Date:** 9-17-2012 **Observer(s):** Bryan Westerberg

Project Description and Photo Point: **Project Start Date:** 2007
Replace culvert to remove aquatic barrier

Initial Monitor Date: **Project Finish Date:** 2008/ Lower culvert not complete

Location and Baseline Data:
Bailey Creek Road, Caribou County, ID

Fence line(s) Condition:

Structure(s) Condition (diversions, fish screens, buildings): Structure in good condition, bridge good condition

Success of Reclamation Efforts:

Visual Water Inspection (quality and flow): Flow is good

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Laurie Harris Spring

ECC Project Monitoring Form

Project: Laurie Harris Spring

Date: 9-12-2012

Observer(s): Bryan Westerberg

Project Description and Photo Point:

Project Start Date: 2007

Winter feedlot relocation-alternate water source-stream reclamation-grazing removal

Initial Monitor Date:

Project Finish Date: 2008

Location and Baseline Data:

Laurie Harris, 667 Gentile Road, Grace, Idaho

Fence line(s) Condition: Good working condition

Structure(s) Condition (diversions, fish screens, buildings): Work performed on spring boxes

Vegetation and Success of Reclamation Efforts: Vegetation looks good. Willows planted fall 2009.
Willows growing

Visual Water Inspection (quality and flow): Water quality improving

Road and /or Trail Condition:

Signage:

Reclamation of Trout Creek

Initial Monitor Date: **Project Finish Date:** 2008

Location and Baseline Data:
-111.7019 42.4596
Lago Road, Caribou County, ID

Fence line(s) Condition:

Structure(s) Condition (diversions, fish screens, buildings):

Vegetation and Success of Reclamation Efforts: Vegetation in good condition

Visual Water Inspection (quality and flow): Quality good

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:
Lots of fish in Trout Creek

Whiskey Creek

ECC Project Monitoring Form

Project: Whiskey Creek **Date:** 9-17-2012 **Observer(s):** Bryan Westerberg

Project Description and Photo Point: **Project Start Date:** 2008
Stream reclamation /reroute channel

Initial Monitor Date: **Project Finish Date:** 2009

Location and Baseline Data:

Fence line(s) Condition:

Structure(s) Condition (diversions, fish screens, buildings): Good condition

Success of Reclamation Efforts: Good condition

Visual Water Inspection (quality and flow): Good

Road and /or Trail Condition: Good

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Bunderson Barn

Bunderson Fence

ECC Project Monitoring Form		
Project: Bunderson Fencing	Date: 9-27-2012	Observer(s): Bryan Westerberg
Project Description and Photo Point: <i>Move calving barn/fence stream bank</i>		Project Start Date: 2007
Initial Monitor Date:		Project Finish Date: 2008
Location and Baseline Data: N42 .2304 W111 .3673		
Fence line(s) Condition: Structure(s) Condition (diversions, fish screens, buildings): Barn and fence in good condition Vegetation and Success of Reclamation Efforts: Vegetation is good Visual Water Inspection (quality and flow): Quality good Road and /or Trail Condition: Signage: Agricultural Uses: Problems or trespass, and any necessary corrective actions:		
Wildlife Observations:		

Eightmile Canyon #1

ECC Project Monitoring Form

Project: Eightmile Canyon #1

Date: 9-17-2012

Observer(s): Bryan Westerberg

Project Description and Photo Point:

Realign trail 332 out of riparian area

Project Start Date: 2007

Initial Monitor Date:

Project Finish Date: 2008

Location and Baseline Data:

Caribou National Forest/ Eightmile Canyon

Fence line(s) Condition:

Structure(s) Condition (diversions, fish screens, buildings):

Success of Reclamation Efforts: Old trail not marked, "no travel" sign not present, travel still continuing

Visual Water Inspection (quality and flow):

Road and /or Trail Condition: New trail looks good--old trail still being traveled, needs signage

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Wildlife Observations:

Eightmile Canyon #2

ECC Project Monitoring Form

Project: Eightmile Canyon #2 **Date:** 9-17-2012 **Observer(s):** Bryan Westerberg

Project Description and Photo Point: **Project Start Date:** 2007
Close/obliterate road out of riparian area

Initial Monitor Date: **Project Finish Date:** 2008

Location and Baseline Data:
Caribou National Forest/ Eightmile Canyon

Fence line(s) Condition:

Structure(s) Condition (diversions, fish screens, buildings): Road still closed/no use

Success of Reclamation Efforts: Good. Protected area recovering.

Observer(s): Bryan Westerberg

Project Description and Photo Point:

Project Start Date: 2007

Boulders placed at two campsites to define camp area, restrict ATV access to riparian area

Initial Monitor Date:

Project Finish Date: 2008

Location and Baseline Data:

Fence line(s) Condition:

Structure(s) Condition (diversions, fish screens, buildings): Boulders still present, vegetation looks good, some camping taking place on far end

Success of Reclamation Efforts: Good

Visual Water Inspection (quality and flow):

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Nounan Road Crossing

ECC Project Monitoring Form

Project: Nounan Road Crossing of Skinner Creek **Date:** 9-17-2012 **Observer(s):** Bryan Westerberg

Project Description and Photo Point: *Culvert replacement and stream reclamation* **Project Start Date:** 2006

Initial Monitor Date: **Project Finish Date:** 2008

Location and Baseline Data:
Skinner Road, Montpelier, Idaho

Fence line(s) Condition:

Structure(s) Condition (diversions, fish screens, buildings): Good condition. Someone has cleaned out the silt from under the bridge—large holes on both sides of bridge, 6-8 ft deep.

Success of Reclamation Efforts:

Visual Water Inspection (quality and flow): Quality good

Road and /or Trail Condition:

Signage:

Agricultural Uses:

Problems or trespass, and any necessary corrective actions:

Fenceline(s) Condition:

N/A

Structure(s) Condition: (diversions, fish screens, buildings)

When water flows are low the water wheel wont turn.

Vegetation and/or Revegetation: (condition and species)

N/A

Success of Reclamation Efforts:

N/A

Visual Water Inspection: (quality and flow)

N/A

Road and/or Trail Conditions:

N/A

Signage:

N/A

Agricultural Uses:

N/A

Problems or trespass, and any necessary corrective actions:

Clogs regularly with algae. Also wont run durring times of low water levels.

Wildlife Observations:

Bonneville Cutthroat Trout

ECC Projects Monitoring Form		
Cub River		
Project: Sharp Fish Screen	Date: 10-24-12	Observer(s): Ferrell
Project Description and Photo Point: Irrigation screen to limit fish entrainment.	Project Start Date:	
Initial Monitor Date:	Project Finish Date:	
Location and Baseline Data: (NAD83) 12T 439748 4661532		
Four electric powered drums.		
Fenceline(s) Condition: N/A		
Structure(s) Condition: (diversions, fish screens, buildings) The lower most drum broke in half from too much water pressure and had to be removed and rebuilt.		
Vegetation and/or Revegetation: (condition and species) N/A		
Success of Reclamation Efforts: N/A		
Visual Water Inspection: (quality and flow) N/A		
Road and/or Trail Conditions: N/A		
Signage: N/A		
Agricultural Uses: N/A		
Problems or trespass, and any necessary corrective actions: The inability to control the amount of water flow through each screen was putting too much pressure on the lowest screen causing it to break. They are in process of fixing this.		
Wildlife Observations: Bonneville Cutthroat Trout		

ECC Projects Monitoring Form		
Project: <i>Knapp Fish Screen</i>	Date: <i>10-24-12</i>	Observer(s): <i>Ferrell</i>
Project Description and Photo Point: <i>Irrigation screen to limit fish entrainment.</i>		Project Start Date:
Initial Monitor Date:	Project Finish Date:	
Location and Baseline Data: <i>(NAD83) 12T436740 4657563</i> <i>Two electric powered drums.</i>		
Fenceline(s) Condition: <i>N/A</i>		
Structure(s) Condition: (diversions, fish screens, buildings) <i>Multiple drive chain breaks.</i>		
Vegetation and/or Revegetation: (condition and species) <i>N/A</i>		
Success of Reclamation Efforts: <i>N/A</i>		
Visual Water Inspection: (quality and flow) <i>N/A</i>		
Road and/or Trail Conditions: <i>N/A</i>		
Signage: <i>N/A</i>		
Agricultural Uses: <i>N/A</i>		
Problems or trespass, and any necessary corrective actions: <i>Beavers keep getting caught in the screens and breaking them.</i>		
Wildlife Observations: <i>Bonneville Cutthroat Trout</i> <i>Rainbow Trout</i> <i>Brown Trout</i>		

ECC Projects Monitoring Form

Cub River

Project: Albert Moser Screen Date: 10-24-12 Observer(s): Ferrell

Project Description and Photo Point: Project Start Date:

Irrigation screen to limit fish entrainment.

Initial Monitor Date: Project Finish Date:

Location and Baseline Data: (NAD83) 1270442563 4665374

Two water wheels and four drum screens.

Fenceline(s) Condition:

N/A

Structure(s) Condition: (diversions, fish screens, buildings)

Drum rubber seals had to be replaced. Also had multiple water wheel failures which led to both water wheels being partially rebuilt.

Vegetation and/or Revegetation: (condition and species)

N/A

Success of Reclamation Efforts:

N/A

Visual Water Inspection: (quality and flow)

N/A

Road and/or Trail Conditions:

N/A

Signage:

N/A

Agricultural Uses:

N/A

Problems or trespass, and any necessary corrective actions:

Modify headgate structure to limit gravel transport into screen structure during high flow years. (See Back for additional info.)

Bonneville Cutthroat Trout
Sculpin

ECC Projects Monitoring Form		
Georgetown Ch.		
Project: Allerman Lower	Date: 10-24-12	Observer(s): Ferrell
Project Description and Photo Point: Irrigation screen to limit fish entrainment.		Project Start Date:
Initial Monitor Date:		Project Finish Date:
Location and Baseline Data: (NAD83) 12T 466876 4702717		
Internal water wheel ran down screen.		
Fence/line(s) Condition: N/A		
Structure(s) Condition: (diversions, fish screens, buildings) Good		
Vegetation and/or Revegetation: (condition and species) N/A		
Success of Reclamation Efforts: N/A		
Visual Water Inspection: (quality and flow) N/A		
Road and/or Trail Conditions: N/A		
Signage: N/A		
Agricultural Uses: N/A		
Problems or trespass, and any necessary corrective actions: This design of screen has to be constantly adjusted to water levels and water flow to keep it running right.		
Wildlife Observations: Bonneville Cutthroat Trout Brown Trout Brook Trout		

ECC Projects Monitoring Form <i>Skinner Ck.</i>		
Project: <i>Skinner Lower</i>	Date: <i>10-24-12</i>	Observer(s): <i>Ferrell</i>
Project Description and Photo Point: <i>Irrigation screen to limit fish entrainment.</i>		Project Start Date:
Initial Monitor Date:		Project Finish Date:
Location and Baseline Data: <i>(NAD83) 12T 462949 4703112</i>		
<i>Cowanda Screen</i>		
Fenceline(s) Condition: <i>N/A</i>		
Structure(s) Condition: (diversions, fish screens, buildings) <i>Screening is bent and bolts missing, attempts to fix have been unsuccessful.</i>		
Vegetation and/or Revegetation: (condition and species) <i>N/A</i>		
Success of Reclamation Efforts: <i>N/A</i>		
Visual Water Inspection: (quality and flow) <i>N/A</i>		
Road and/or Trail Conditions: <i>N/A</i>		
Signage: <i>N/A</i>		
Agricultural Uses: <i>N/A</i>		
Problems or trespass, and any necessary corrective actions: <i>Design flaws - when all water is being taken through the screen the fish go down past the screen as designed into a dewatered stream. Redesign screen is the necessary corrective action.</i>		
Wildlife Observations: <i>Bonneville Cutthroat Trout</i>		

ECC Projects Monitoring Form		
Project: Skinner Lower	Date: 10-24-12	Observer(s): Ferrell
Project Description and Photo Point: Irrigation screen to limit fish entrainment.		Project Start Date:
Initial Monitor Date:	Project Finish Date:	
Location and Baseline Data: (NAD83) 12T 462037 4702714		
Single Cowanda Screen		
Fence(s) Condition: N/A		
Structure(s) Condition: (diversions, fish screens, buildings) Good		
Vegetation and/or Revegetation: (condition and species) N/A		
Success of Reclamation Efforts: N/A		
Visual Water Inspection: (quality and flow) N/A		
Road and/or Trail Conditions: N/A		
Signage: N/A		
Agricultural Uses: N/A		
Problems or trespass, and any necessary corrective actions: Land owner constantly opens bypass headgate, which renders screen inoperable. Land owner claims this is needed to prevent bank erosion.

Appendix H

2013 Implementation Schedule

Table H-1. Bear River Hydroelectric Project - 2013 Implementation Schedule						
License Article	Action	Deliverable	Start Date	End Date	Next Deliverable Date	Comments
Art. 401	2012 Annual Report	Report in consultation with ECC	1-Jan-05	22-Dec-33	1-March-13	Includes results of studies/monitoring, description of anticipated activities, report of funding accounts, and compliance with operational requirements. Draft report to ECC for 30-day review prior to FERC submittal.
Art. 402	ECC participation/oversight	1 FTE and normal administration	1-Jan-05	22-Dec-33	Ongoing	Provide admin support, point of contact for ECC, some grant writing, attempt to identify willing landowners, apply for permits as necessary for actions; annual report and grant fund administration.
Art. 403	Bonneville Cutthroat Trout (BCT) Restoration Plan	Restoration Plan in Consultation with ECC	1-Jan-07	1-Nov-08	23-Dec-08	This project was completed in 2008.
Art. 403	Genetic Sampling Study	Bonneville Cutthroat Trout genetic data collection and analysis	1-Sep-04	22-Dec-11	1-Sep-07	This project was completed in 2007.
Art. 403	Aerial Photography	Thermal images of Bear River	1-Jun-05	22-Dec-11	27-Jan-07	This project was completed in 2007.
Art. 403	Telemetry Study	Bonneville Cutthroat Trout Telemetry Report	1-May-05	22-Dec-11	11-Feb-09	This project was completed in 2009.
Art. 403	Broodstock Development	Develop a Bonneville cutthroat trout broodstock at the Grace Hatchery in Grace Idaho.	22-Dec-08	22-Dec-10	22-Dec-10	This project was completed in 2010.
Art. 404	Conservation Hatchery Program	Fund Bonneville cutthroat trout hatchery operations	22-Dec-10	22-Dec-33	22-Dec-13	\$100K/yr, for remaining term of license; funds may also be used for habitat restoration, land & water, or fish passage; may carry over to subsequent years.
Art. 405	Habitat Restoration Program	Funding for habitat and water quality enhancements	22-Dec-04	22-Dec-33	22-Dec-13	\$167K/yr; funds may also be used for land and water acquisition or fish passage; may carry over to subsequent years. Annual grant cycle begins with release of funding flyer in

Table H-1. Bear River Hydroelectric Project - 2013 Implementation Schedule

License Article	Action	Deliverable	Start Date	End Date	Next Deliverable Date	Comments
						January. Projects are typically ranked at March subcommittee meeting and approved at April ECC meeting.
Art. 406	Land and Water Acquisition Program	Funding for purchase of conservation easements and land and water acquisition	22-Dec-04	22-Dec-33	22-Dec-13	\$300K/yr; funds may also be used for habitat restoration or fish passage; may carry over to subsequent years. Funds may only be used for habitat restoration on lands acquired under this fund or for fish passage if it is for one of the PacifiCorp facilities and fish passage is prescribed by USFWS. Ongoing 2012 grant cycle throughout year.
Art. 407	Monitoring in Black Canyon	Funding for surveys, studies, reports, six-year study term	1-Apr-05	1-Apr-11	2-May-11	This project was completed in 2011.
Art. 408 (Grace MSF modified by Cove Decommissioning Order)	Implement minimum flows	Documented annually to the FERC	2-Dec-05	22-Dec-33	1-March-13	Soda - 150 cfs downstream; Grace - 65 cfs; Oneida - 251 cfs downstream.
Art. 408	Maintenance schedule consultation	Documented annually to the FERC	1-Apr-04	22-Dec-33	31-March-13	Consult annually (prior to April 1) with ECC to minimize drawdowns and coordinate maintenance activities; consult with ECC in emergencies if practicable.
Art. 409	Fish Stranding Minimization Plan	Documentation of plan compliance in Annual Report.	30-Sept-04	22-Dec-33	Suspended	Continued suspension of Art.409 Fish Stranding Minimization Plan was confirmed by FERC on October 17, 2012, in an issuance that confirmed that PacifiCorp had complied with Ordering paragraph (b) of FERC's June 3, 2011, Order Approving Suspension of the Fish Stranding Minimization Plan.
Art. 410	Kackley Springs	Implement flow redirection plan.	22-Dec-08	22-Dec-09	22-Dec-09	This project was completed in 2009.

Table H-1. Bear River Hydroelectric Project - 2013 Implementation Schedule

License Article	Action	Deliverable	Start Date	End Date	Next Deliverable Date	Comments
Art. 412	Implement ramp rates	Documented annually to the FERC in the annual report.	22-Dec-04	22-Dec-33	1-Mar-2013	Soda - 1.2 ft/hr, ascending and descending measured at USGS gage 10079500; Oneida - 2.0 ft/15 min on the descending arm at USGS gage 10086500. Black Canyon Boater Flow – 1 FT/HR on the descending arm.
Art. 413	Water quality monitoring and reporting	Bear River Project 401 Clean Water Act Certification.	1-May-04	30-Sep-09	1-Mar-09	IDEQ accepted the Oneida water quality study and supplemental analysis as indicating no significant project contributions to exceedances of water quality criteria. This project was completed in 2009.
Art. 415	Operations and Compliance Plan Implementation	Documented annually to the FERC	22-Dec-04	22-Dec-33	1-March-13	On-going; provides proper functioning equipment used to meet minimum flow and ramping requirements, reporting requirements, and reasonable tolerances.
Art. 415	Operations and Compliance Plan	Document changes/updates	1- Oct-05	28-Feb-06	28-June-13	Provide updated procedures for calibrating equipment and releasing instream flows. Updated plan will be submitted to FERC in 2013 after ECC review.
Art. 416	Oneida campground funding	Reimbursement to BLM	1-May-05	22-Dec-33	1-Oct-13	Annual \$10K reimbursement to BLM upon invoice; funds do not carry over.
Art. 416	Maintain recreation sites	Maintain constructed facilities	1-May-05	22-Dec-33	Ongoing	Maintain sites as described in Recreation and Traffic Safety Plan and Site Management Plans.
Art 416	Assistance to Caribou County	Check to County	1-May-05	22-Dec-33	1-Oct-13	Annual \$3K reimbursement to county; does not carry over.
Art. 417	Maintain signs along Oneida road	Review, repair and replace signs as needed.	1-May-05	22-Dec-33	15-May-13	Annually replace or repair traffic signs along the Oneida road (\$1K).
Art. 417	Oneida Road Improvements	Complete Road Work	1-Aug-06	1-Jul-07	1-Oct-08	This project was completed in 2008.

Table H-1. Bear River Hydroelectric Project - 2013 Implementation Schedule						
License Article	Action	Deliverable	Start Date	End Date	Next Deliverable Date	Comments
Art. 417	Law enforcement	Check to Franklin County Sherriff's Department	1-May-05	22-Dec-33	1-Oct-13	Annual \$3K funding to law enforcement agency and use of company's radio frequency, does not carry over.
Art. 417	Dust abatement	Dust Abatement	1-May-05	22-Dec-33	Summer-13	Twice annually, on the Oneida Project road 100 ft. on either side of Maple Grove and Redpoint Campgrounds.
Art. 418	Grace Spill Gate	Gates installed and functioning	1-Apr-06	22-Dec-33	1-Oct-08	This project was completed in 2008.
Art.419	Whitewater flows in Black Canyon	Documentation in Annual Report	1-May-05	22-Dec-33	1--Mar-13	Report on whitewater releases based on available water; Years 2-4, "Opportunistic Releases" only; Years 5-7, "Scheduled Releases"; Years 8-License term, revised program will be reported on per Boater Flow Agreement approved by ECC and FERC in 2012.
401 Cert.	Oneida Operations Report	Annual Report to IDEQ	30-Nov-05	30-Nov-33	30-Nov-13	Record of water releases for power, irrigation, or flood control. Submit to IDEQ
Art. 420	Boatable flows in Oneida reach	Documentation in annual report	1-May-05	22-Dec-33	Ongoing	With available water, target is 900 cfs below powerhouse between Memorial Day and Labor Day.
Art. 421	Black Canyon Boatable flow release schedule	Develop annual schedule and submit to FERC.	5-Mar-08	22-Dec-33	20-March-13	Starting in 2012, all releases will be scheduled between April 1 and June 5. Four weekend releases to be scheduled: three two-day events and one three-day event. Schedule to be coordinated between American Whitewater, PacifiCorp and ECC.

Table H-1. Bear River Hydroelectric Project - 2013 Implementation Schedule

License Article	Action	Deliverable	Start Date	End Date	Next Deliverable Date	Comments
Art. 422	Flow Phone and website	Maintain website, flow phone and prepare annual schedule of whitewater flows.	1-May-05	22-Dec-33	Ongoing	Website will present whitewater calendar dates; flows for current and prior 6 days in hourly averages, and 7-day forecast; gages linked to Flow Phone (daily) and website (4-hr intervals). Whitewater release calendar posting will be reported on website.
Art. 423	Protect historical resources	Continue to implement Interpretation and Education Plan and annual site monitoring.	2-Jan-05	22-Dec-33	22-Jan-13	FERC Order approving HPMP was received in 2008. Implementation of plan to be reported annually to FERC prior to January 22 of each year.
Art. 424 and 425	Land Management	Land Management Plan and Site Plan implementation. Monitoring of all lands and noxious weed control. Finish removal of interior fences.	2-Jan-05	22-Dec-33	Ongoing	Site Plans developed in consultation with the ECC; buffer zone management through modified leases. Maintenance of exclusion fences, treatment of noxious weeds and monitoring of user or trespass impacts. Updated LMP submitted to FERC in 2012.
Art. 426	Fencing in Cove Bypass Reach	Fences	1-Apr-05	22-Dec-33	Initial construction complete (Maintenance on-going).	Fencing of selected riparian areas in Cove bypass reach, while allowing landowners to exercise stock watering rights. This project is complete. Maintenance of fences to be completed by PacifiCorp through life of license.
Art. 428	Interests in project lands	Report to FERC	22-Dec-04	22-Dec-33	31-Jan-13	Annually file with FERC a report of any easement or rights-of-way granted in the previous year no later than January 31. Sixty days before conveying any interest in project lands a letter must be submitted to FERC.
Art. 429	Report on Cove Decommissioning Expenses	Report to ECC and FERC	5/1/2006	3/31/2007	Complete	This requirement was completed in 2007.
