Art. 410

Kackley Springs

ARTICLE OVERVIEW

- Intended to modify the flow of Kackley Springs to benefit the aquatic resources of the Bear River.
- Total (article project) funding was not expected to exceed \$10,000
- The plan worked in concert with:
 - Conservation Hatchery Program (art. 404)
 - Habitat Enhancement Program (art. 405)
 - Land and Water Fund (art. 406)
 - Grace-Cove Development Plan (Ops. & Mgmt.)

KACKLEY SPRINGS FLOW DIVERTED TO BEAR RIVER

- In 2006 ECC awarded a Habitat Enhancement Fund Grant that investigated reconnection options.
- In 2008 ECC reviewed this report and conducted field study.
- A plan and funding was agreed upon to direct flow from the springs across PacifiCorp Grace-Cove property lands and through the SSLT Kackley Preserve property directly to the Bear River.

This plan was implemented in 2009, which concluded the commitments and requirements of Article 410.

CONTINUED ENHANCEMENTS

- In 2009 ECC funded a fish trap barrier
- In 2010 IDF&G removed non-natives
- In 2011, Idaho Department of Fish & Game made their first release of Bonneville Cutthroat Trout into the renovated Kackley area. These fish came from the Grace Hatchery, supported by Article 404 – Conservation Hatchery Program.
- Annual noxious weed control, monitoring, and vegetation watering to supporting plantings from 2009, 2010, and 2012.
- Maintenance on control structures and berms to contain ponds.

ARTICLE FUTURE

- Roundtable
- Q and A
- Brainstorm
