

NOTICE TO CUTLER RECREATIONISTS:

PacifiCorp plans to conduct a drawdown of Cutler Reservoir to obtain data to inform the ongoing Federal Energy Regulatory Commission relicensing studies and related decision-making process. The Cutler drawdown is scheduled to begin on **Friday October 25, 2019, and will extend to approximately mid-November 2019**, depending on conditions encountered.

It is likely that access to all Cutler boat ramps will be affected, and access to the Upper Bear River Site will be eliminated during portions of the reservoir drawdown.

Please be observant as new **HAZARDS** may become exposed, and **areas that are usually accessible may become inaccessible**, potentially over a period of hours, particularly during the initial period of the drawdown. **Please also note that removing any archeological or cultural artifacts that may be exposed by the drawdown is illegal and will be prosecuted.**

Updates to the project schedule can be found at the Cutler website (<https://www.pacificorp.com/energy/hydro/cutler.html>) or by calling 801-220-2245. We apologize for any inconvenience this may cause, and thank you in advance for your patience as we undertake these required studies.

Thank you—PacifiCorp Renewable Resources
