

Electronically filed October 29, 2021

Kimberly D. Bose, Secretary  
Federal Energy Regulatory Commission  
888 First Street, N.E.  
Washington, D.C. 20426

**Subject: Cutler Hydroelectric Project (FERC Project No. 2420)  
Filing of Draft License Application**

Dear Secretary Bose:

Pursuant to 18 CFR § 5.16(a) and (c), PacifiCorp hereby submits this Draft License Application (DLA) for the Cutler Hydroelectric Project (Project) with the Federal Energy Regulatory Commission (FERC). On August 20, 2020, FERC posted a news release extending a prior waiver of notarization and in-person meeting requirements, due to the ongoing global pandemic caused by the coronavirus disease (COVID-19). For this reason, PacifiCorp will not be filing hard copies of this DLA, as normally required by 18 CFR § 5.17(d)(1) and (2).

This DLA is submitted in accordance with the Integrated Licensing Process (ILP) pursuant to the application content requirements of 18 CFR § 4.51 (Application for License for Major Project – Existing Dam), and consists of draft technical exhibits (Exhibits A, B, C, D, F, G, and H), and a draft environmental report (Exhibit E). Please note that the draft Exhibit F (Design Drawings), one-line diagram, and Supporting Technical Information Document contain Critical Energy Infrastructure Information (CEII).

As outlined in 18 CFR § 5.18, the DLA discusses PacifiCorp's proposal for continued maintenance and operation of the Project. Exhibit E includes the results of studies undertaken in support of the relicensing. Discussion in Exhibit E considers how the information and data collected during the studies addresses issues raised by agencies and other interested parties, and how the information collected addresses PacifiCorp's proposed Project operations. In support of this proposal, Exhibit E evaluates the potential impacts to environmental and social resources that may occur as a result of the proposed Project operations under a new license. As appropriate, Exhibit E includes PacifiCorp's preliminary proposals for protection and mitigation measures to address Project effects (ongoing and proposed) on environmental and social resources.

The DLA includes the following exhibits describing Project resources:

|           |                                       |
|-----------|---------------------------------------|
| Exhibit A | Project Description                   |
| Exhibit B | Project Operation                     |
| Exhibit C | Construction History                  |
| Exhibit D | Statement of Costs and Financing      |
| Exhibit E | Environmental Report                  |
| Exhibit F | Design Drawings (CUI//CEII)           |
| Exhibit G | Project Boundary Maps                 |
| Exhibit H | Project Management and Need for Power |

**CUI//CEII**

Kimberly D. Bose, FERC  
Cutler Hydroelectric Project (FERC Project No. 2420)  
Filing of Draft License Application  
October 29, 2021  
Page 2

There are no portions of Exhibit E which reveal privileged, confidential cultural resources information, or rare, threatened, and endangered (RTE) species. As part of the Initial Study Report filed in February 2021, PacifiCorp submitted sensitive and privileged cultural resource reports under separate cover. These reports contained privileged Controlled Unclassified Information (CUI) regarding cultural resources and were only provided to the State of Utah Historic Preservation Officer, representatives of the area Native American Tribes, and FERC. Additionally, PacifiCorp has developed a Historic Properties Management Plan (HPMP) that is being circulated to the parties identified above during the same DLA review period; the final HPMP will be included with the Final License Application.

In accordance with FERC Order No. 630 (Volume 68 Federal Register 9857), Exhibit F contains information classified as CEII. Exhibit F contains sensitive and detailed engineering information that, if used incorrectly, may compromise the safety of the Project and those responsible for its proper operation. Members of the public requesting CEII information for the Project must comply with FERC's procedures for obtaining access to CEII as required under 18 CFR § 388.113. All public requests for CEII access should be made to FERC's CEII Coordinator.

In accordance with 18 CFR § 5.16(e), relicensing stakeholders and FERC staff may file comments to PacifiCorp regarding the DLA via the FERC eFiling system, including recommendations on whether FERC should prepare an Environmental Assessment (with or without a draft Environmental Assessment) or an Environmental Impact Statement, within 90 days following this filing, but no later than January 31, 2022. Any participant whose comments request new information, studies, or other amendments to the approved Study Plan must include a demonstration of extraordinary circumstances, pursuant to the requirements of 18 CFR § 5.16(f). PacifiCorp will file a Final License Application with FERC, no later than March 31, 2022, two years before the expiration of the existing license on March 31, 2024.

This letter and its enclosures have been filed electronically along with PacifiCorp's Confidential Information Notice. The security classification of each component in this packet is shown in the enclosure table below. Additionally, all enclosed public documents are available on PacifiCorp's Cutler Relicensing website: <https://www.pacificorp.com/energy/hydro/cutler.html>. If you have any questions concerning these documents, please contact Eve Davies, Cutler Relicensing Project Manager, at 801-220-2245.

Sincerely,

  
Mark Sturtevant
