

APPENDIX 5B

FISH MOVEMENT IN RELATION TO MEAN DAILY STREAM TEMPERATURE

Appendix 5B. Each of the following plots shows fish movement in relation to mean daily stream temperature (C°) recorded at different locations in the study area. Dashed lines represent the breaks in the Klamath River study area. From top to bottom, the breaks define: J.C. Boyle reservoir, J.C. Boyle bypass reach, upper peaking reach, lower peaking reach, Copco reservoir and Copco bypass.
