

2024/2025 Lewis River Aquatic Fund Project Evaluation Questions

No.	Evaluation Question
1	Does the project provide direct benefit(s) to priority species and habitat reaches?
2	Does the project lead to or provide tangible, on the ground benefits?
3	Does the project address a limiting factor(s) to the target species without adversely impacting other species, life history stages, or habitat processes?
4	Does the proposal apply reasonable and proven methods, designs or technologies?
5	Are the project objectives reasonable based on the proposed scope and schedule?
6	Does the project describe and consider long term benefits and influences (e.g., watershed processes, hydro operations, climate change, etc.)?
7	Does the proposal resolve identified or anticipated constraints or contingencies (e.g., permitting, funding, legal, etc.)?
8	Does the project have a high probability of success? (<i>in meeting project objectives?</i>)
9	Do the qualifications and experience of the team support successful completion of the project?
10	Are there other habitat protection or restoration actions in the watershed that would benefit or compliment this project?
11	Does the project include additional funding sources (e.g., grants, matching contributions, in-kind participation, etc.)?
12	Is the project budget reasonable based on the proposed scope of proposal?
13	Is the project budget reasonable based on the anticipated short and long-term benefits to fish?
14	Is the anticipated level of post-project maintenance reasonable given the size and scope of the proposal?
