

Swift No. 1 Hydroelectric Project  
FERC Project No. 935

FINAL LICENSE APPLICATION  
Exhibit E – Environmental Report

PacifiCorp  
Portland, Oregon

April 2004

## EXHIBIT E

### ENVIRONMENTAL REPORT

In compliance with the Code of Federal Regulations (18 CFR, Parts 4 and 16), PacifiCorp is applying to the Federal Energy Regulatory Commission (FERC) to relicense the Swift No. 1 Hydroelectric Project (FERC Project No. 2111) on the North Fork Lewis River, in the State of Washington. The current license for the Swift No. 1 Project, which PacifiCorp currently owns and operates, was issued on October 29, 1956 and expires on May 1, 2006. Swift No. 1 is one of 3 PacifiCorp hydro projects on the Lewis River. The other 2 projects are Merwin (FERC Project No. 935) and Yale (FERC Project No. 2071). A fourth project, Swift No. 2 (FERC Project No 2213), is owned by the Cowlitz County Public Utility District No. 1 (Cowlitz PUD) and maintained and operated by PacifiCorp under contract.

The FERC's regulations give the Applicants for original, new or subsequent hydropower licenses the option of using an alternative licensing procedure for conducting the pre-filing consultation process. In 1999, consistent with FERC Order No. 596, PacifiCorp and Cowlitz PUD applied for and received FERC approval to use an alternative, collaborative approach to relicensing the 4 Lewis River hydroelectric projects. Consistent with FERC's regulations, PacifiCorp and Cowlitz PUD have prepared a joint Preliminary Draft Environmental Assessment (PDEA) that is submitted with the license application in lieu of Exhibit E. The PDEA for the 4 Lewis River Hydroelectric Projects is submitted as Volume 2 of this license application.
