RE: Wallowa Falls Hydroelectric Project - pre-filing comments - FERC Docket No. P-308-005

Please accept the following comments from Oregon Wild regarding the proposed new license for the Wallowa Falls Hydroelectric Project. Oregon Wild has around 7,000 members and supporters who support our mission to protect and restore Oregon's wild lands, wildlife, and waters as an enduring legacy.

Given the recent discovery of ESA-listed (threatened) bull trout using the Wallowa Falls Hydroelectric Project Area, we request careful consideration of alternatives including: project decommissioning, providing effective passage for fish-sediment-wood, strictly controlled ramping, and/or other mitigation.
