

PacifiCorp - Stakeholder Feedback Form

2019 Integrated Resource Plan

PacifiCorp (the Company) requests that stakeholders provide feedback to the Company upon the conclusion of each public input meeting and/or stakeholder conference calls, as scheduled. PacifiCorp values the input of its active and engaged stakeholder group, and stakeholder feedback is critical to the IRP public input process. PacifiCorp requests that stakeholders provide comments using this form, which will allow the Company to more easily review and summarize comments by topic and to readily identify specific recommendations, if any, being provided. Information collected will be used to better inform issues included in the 2019 IRP, including, but not limited to the process, assumptions, and analysis. In order to maintain open communication and provide the broader Stakeholder community with useful information, the Company will generally post all appropriate feedback on the IRP website unless you request otherwise, below.

***IRP Topic(s) and/or Agenda Items:** List the specific topics that are being addressed in your comments.

Model - Emergin Technologies. Requested a list of technologies considered for model inputs (Slide 86 of .ppt)
Model Customer Stock Demographics. RMP and Modeling group were requested to provide a State-by-State breakdown similar to Slides 94 and 95 do for Washington.
Granular data regarding the the 94/95 Slides as to customer segments in the respective categories (Heating, Cooling, Water heating, etc. Was also requested by Utah Clean Energy.

Session leader indicated that this data could go out and then a conference call set up to go over said data.

Check here if any of the following information being submitted is copyrighted or confidential.

***Respondent Comment:** Please provide your feedback for each IRP topic listed above.

The meeting was interesting and informative. I am interested in making sure that I am on the e-mail distribution list for this information. I also serve on the National BOD of the International Ground Source Heat Pump Association. We have been working with other utilities to advance Beneficial Electrification. We have also commented on EPRI's latest white paper on heat pump technology adoption.

The use state-by-state use data will be informative in determining what sectors can be targeted for demand reduction and increased winter kWh consumption.

Sectors using Power for Heating/cooling/hot water assist in identifying potential marketing.

Technologies considered gives us a better understanding of how well the Model is representing both the local RMP market and what is happening in other States.

PacifiCorp Response:

PacifiCorp provided requested material.

* Required fields

Data Support: If applicable, provide any documents, hyper-links, etc. in support of comments. (i.e. gas forecast is too high - this forecast from EIA is more appropriate). If electronic attachments are provided with your comments, please list those attachment names here.
