PacifiCorp - Stakeholder Feedback Form

2019 Integrated Resource Plan

PacifiCorp (the Company) requests that stakeholders provide feedback to the Company upon the conclusion of each public input meeting and/or stakeholder conference calls, as scheduled. PacifiCorp values the input of its active and engaged stakeholder group, and stakeholder feedback is critical to the IRP public input process. PacifiCorp requests that stakeholders provide comments using this form, which will allow the Company to more easily review and summarize comments by topic and to readily identify specific recommendations, if any, being provided. Information collected will be used to better inform issues included in the 2019 IRP, including, but not limited to the process, assumptions, and analysis. In order to maintain open communication and provide the broader Stakeholder community with useful information, the Company will generally post all appropriate feedback on the IRP website unless you request otherwise, below.

In IRP stakeholde	er materials released to date B, 2018 will address the Com	e, PacifiCorp has i	ndicated that	the	upcomi	ng IRP st	~

- comments outline Sierra Club's expectations for what should be included in PacifiCorp's public presentation on these topics.
- 1. PacifiCorp should provide a detailed presentation regarding its plans for carrying out unit-specific economic analyses of its existing coal units. This presentation should include the methodological framework, the specific modeling tools to be used, the sources for key analytical assumptions (including, but not limited to, energy price forecasts, new resource construction costs, and unit operating costs), and any major differences between the proposed analytical assumptions and assumptions used in the 2017 IRP and 2017 IRP Update analyses.
- 2. PacifiCorp should address how it plans on determining optimal retirement years in the unit specific economic analyses, and what tradeoffs are assumed in that tradeoff process.
- 3. PacifiCorp should address how it plans to assess its coal units in combination, once it has completed unit-specific analyses, including what assumptions are being made about the avilablity and timing of alternative resources, and if the timing of retirement changes with combinations of resource retirement.
- 4. PacifiCorp should detail how the coal analyses will inform the development of its core scenarios in the 2019 IRP. It is imperative that PacifiCorp provide all of this information at this stage, so that stakeholders have the opportunity to

^{*} Required fields

provide meaningful input prior to the Company undergoing the full effort of carrying out the coal analyses and developing its IRP scenarios.

5. PacifiCorp should provide a timeline for the efficient review of coal retirement results once the coal retirement analysis is completed and prior to the onset of the core 2019 IRP modeling.

Data Support: If applicable, provide any documents, hyper-links, etc. in support of comments. (i.e. gas forecast is too high - this forecast from EIA is more appropriate). If electronic attachments are provided with your comments, please list those attachment names here.
