

# PacifiCorp - Stakeholder Feedback Form

## 2019 Integrated Resource Plan

PacifiCorp (the Company) requests that stakeholders provide feedback to the Company upon the conclusion of each public input meeting and/or stakeholder conference calls, as scheduled. PacifiCorp values the input of its active and engaged stakeholder group, and stakeholder feedback is critical to the IRP public input process. PacifiCorp requests that stakeholders provide comments using this form, which will allow the Company to more easily review and summarize comments by topic and to readily identify specific recommendations, if any, being provided. Information collected will be used to better inform issues included in the 2019 IRP, including, but not limited to the process, assumptions, and analysis. In order to maintain open communication and provide the broader Stakeholder community with useful information, the Company will generally post all appropriate feedback on the IRP website unless you request otherwise, below.

Date of Submittal 12/6/2018

\*Name: Jon Nicolaysen

Title: [Click here to enter text.](#)

\*E-mail: marnicol@aol.com

Phone: 307 266 1599

\*Organization: Individual Stakeholder

Address: PO Box 2945

City: Casper

State: Wyoming

Zip: 82602

Public Meeting Date comments address: [Click here to enter date.](#)  Check here if not related to specific meeting

List additional organization attendees at cited meeting: Not many yet

**\*IRP Topic(s) and/or Agenda Items:** List the specific topics that are being addressed in your comments.

Demand growth, Conclusions from the IRA, Stacked Retirement cases, Need for base Capacity, Carbon Sequestration, Natural Gas Prices

Check here if any of the following information being submitted is copyrighted or confidential.

Check here if you do **not** want your Stakeholder feedback and accompanying materials posted to the IRP website.

**\*Respondent Comment:** Please provide your feedback for each IRP topic listed above.

1. It seems that Electrical Demand growth will continue to increase on an annual basis. What is the projected amount of Growth on an annual basis ? Is is approximately 9%. Whatever the increase, has this been properly accounted for in the IRP ?

2. Conclusions from the Initial Reliability Assessment do not consider the reliability of Battery Storage or the potential environmental dangers and impacts thereof.

3. Stacked Retirement Cases: The Planned Retirements of the Coal Fired Power Plants are too closely bunched to allow and provide for adequate security for the Power Requirements of the Consumers.

4. There is a need for Base Load Capacity for future power needs. Solar and Wind can not be relied upon at this time to allow then to be considered as Base Load Capacity.

5. Carbon Sequestration as provided by the Petra Nova Plant near Houston Texas has not been mentioned in the IRP and therefore has not adequately considered. Plants such as Petra Nova CAN Make COAL Fired Power Plants Environmentally Carbon Neutral. "Carbon Zero" Selected Plants in the Pacific Corp Portfolio can be Utilized for Enhanced Oil Recovery and other economically sound projects. The IRP must consider this alternative before it can be finalized.

6. Converting Power Plants from COAL to Natural Gas has Already caused the price of natural Gas to rise dramatically. While we have discovered vast deposits of Natural Gas recently, the Huge Volume of Natural Gas needed to run Power

\* Required fields

Plants will eventually drive Natural Gas Prices higher. Has this potential impact of HIGH Natural Gas prices been considered in the IRP ? What will this mean for consumers ?

---

**Data Support:** If applicable, provide any documents, hyper-links, etc. in support of comments. (i.e. gas forecast is too high - this forecast from EIA is more appropriate). If electronic attachments are provided with your comments, please list those attachment names here.
