

# PacifiCorp - Stakeholder Feedback Form

## 2019 Integrated Resource Plan

PacifiCorp (the Company) requests that stakeholders provide feedback to the Company upon the conclusion of each public input meeting and/or stakeholder conference calls, as scheduled. PacifiCorp values the input of its active and engaged stakeholder group, and stakeholder feedback is critical to the IRP public input process. PacifiCorp requests that stakeholders provide comments using this form, which will allow the Company to more easily review and summarize comments by topic and to readily identify specific recommendations, if any, being provided. Information collected will be used to better inform issues included in the 2019 IRP, including, but not limited to the process, assumptions, and analysis. In order to maintain open communication and provide the broader Stakeholder community with useful information, the Company will generally post all appropriate feedback on the IRP website unless you request otherwise, below.

Date of Submittal 5/31/2019

\*Name: Denise Parrish

Title: Deputy Administrator

\*E-mail: Denise.Parrish@wyo.gov

Phone: 307-777-5743

\*Organization: Wyoming Office of Consumer Advocate

Address: 2515 Warren Avenue, Suite 304

City: Cheyenne

State: Wyoming

Zip: 82002

Public Meeting Date comments address: 5/20/2019

Check here if not related to specific meeting

List additional organization attendees at cited meeting:

None that I am aware of

**\*IRP Topic(s) and/or Agenda Items:** List the specific topics that are being addressed in your comments.

Questions Related to the Potential Early Closure of Jim Bridger Units 1 & 2

Check here if any of the following information being submitted is copyrighted or confidential.

Check here if you do **not** want your Stakeholder feedback and accompanying materials posted to the IRP website.

**\*Respondent Comment:** Please provide your feedback for each IRP topic listed above.

Several of the portfolios being analyzed as part of the 2019 IRP development consider an early closure of Jim Bridger Units 1&2. The following questions are in response to this potential outcome of the IRP development.

If Units 1 & 2 at the Jim Bridger Power Plant were to close earlier than previously anticipated, what is the impact of that closure on the Bridger underground and / or the Bridger above ground mines? Is it likely, and does the IRP anticipate, that some or all of these mines located at the Jim Bridger plant site would be closed concurrently or in advance of the closure of Units 1&2? Please explain.

Do the remaining Jim Bridger coal units (Units 3&4) require a blending of the coal from both the underground and overhead mines? If so, and if one of these mines were to close prior to the closure of Units 3&4, what arrangements would need to be made to allow the continued blending of coal or to allow the remaining coal to be burned in these units?

What physical changes would need to be made to Bridger Units 3&4, and at what estimated cost, to address any issues related to the closure of one or both Bridger mines, so that the appropriate quality coal can be burned in the remaining Bridger coal units?

Do any of these circumstances (based on the inquires above) require additional sensitivities to be considered on coal costs for any of the Bridger units?

\* Required fields

Please provide any other comments that would allow for a better context of your responses or would help the reader of your responses better understand the likely future of the Bridger mines in light of the 2019 IRP analysis of early coal plant closures.

---

**Data Support:** If applicable, provide any documents, hyper-links, etc. in support of comments. (i.e. gas forecast is too high - this forecast from EIA is more appropriate). If electronic attachments are provided with your comments, please list those attachment names here.

[Click here to enter text.](#)

---

**Recommendations:** Provide any additional recommendations if not included above - specificity is greatly appreciated.
