

PacifiCorp - Stakeholder Feedback Form

2019 Integrated Resource Plan

PacifiCorp (the Company) requests that stakeholders provide feedback to the Company upon the conclusion of each public input meeting and/or stakeholder conference calls, as scheduled. PacifiCorp values the input of its active and engaged stakeholder group, and stakeholder feedback is critical to the IRP public input process. PacifiCorp requests that stakeholders provide comments using this form, which will allow the Company to more easily review and summarize comments by topic and to readily identify specific recommendations, if any, being provided. Information collected will be used to better inform issues included in the 2019 IRP, including, but not limited to the process, assumptions, and analysis. In order to maintain open communication and provide the broader Stakeholder community with useful information, the Company will generally post all appropriate feedback on the IRP website unless you request otherwise, below.

Date of Submittal 6/11/2019

*Name: Mary Ann Putnam

Title: Mrs.

*E-mail: Lmputnam43@yahoo.com

Phone: 307-877-6210

*Organization: [Click here to enter text.](#)

Address: 1324 Lincoln Heights Dr.

City: Kemmerer

State: Wyoming

Zip: 83101

Public Meeting Date comments address: [Click here to enter date.](#) Check here if not related to specific meeting

List additional organization attendees at cited meeting: [Click here to enter text.](#)

***IRP Topic(s) and/or Agenda Items:** List the specific topics that are being addressed in your comments.
Closure of Rocky Mountain Power Plant and Kemmerer Coal Mine

Check here if any of the following information being submitted is copyrighted or confidential.

Check here if you do **not** want your Stakeholder feedback and accompanying materials posted to the IRP website.

***Respondent Comment:** Please provide your feedback for each IRP topic listed above.

Before you replace the power plant, you need to have a reliable alternative and wind and solar is not the answer. Both would be expensive and unreliable. Closing the power plant and the mine would devastate the town and businesses. It's easy to be swayed by environmentalist who look at coal as dirty but most lack the knowledge of where electricity originates. They base their information from Facebook information and that is what they are doing with immunizations and now look at the measles epidemic. Germany is a good example of a country that closed their mines and only to have to reopen them later because they could not provide adequate energy from wind and solar.

Data Support: If applicable, provide any documents, hyper-links, etc. in support of comments. (i.e. gas forecast is too high - this forecast from EIA is more appropriate). If electronic attachments are provided with your comments, please list those attachment names here.

[Click here to enter text.](#)

Recommendations: Provide any additional recommendations if not included above - specificity is greatly appreciated. Bring in other companies that can support the power plant and mine with skilled mechanics to build and repair parts and other support systems. Interstate 80 is a wonderful transfer point to transport the needed parts and supplies.

Please submit your completed Stakeholder Feedback Form via email to IRP@PacifiCorp.com

Thank you for participating.
