

PacifiCorp - Stakeholder Feedback Form

2021 Integrated Resource Plan

PacifiCorp (the Company) requests that stakeholders provide feedback to the Company upon the conclusion of each public input meeting and/or stakeholder conference calls, as scheduled. PacifiCorp values the input of its active and engaged stakeholder group, and stakeholder feedback is critical to the IRP public input process. PacifiCorp requests that stakeholders provide comments using this form, which will allow the Company to more easily review and summarize comments by topic and to readily identify specific recommendations, if any, being provided. Information collected will be used to better inform issues included in the 2021 IRP, including, but not limited to the process, assumptions, and analysis. In order to maintain open communication and provide the broader Stakeholder community with useful information, the Company will generally post all appropriate feedback on the IRP website unless you request otherwise, below.

Date of Submittal [Click here to enter date.](#)

*Name: Ernie Rogers

Title: Vice Chairman

*E-mail: ernie.e.rogers@gmail.com

Phone: 801-899-5867

*Organization: Utah Valley Earth Forum

Address: 2608 E Canyon Crest Drive

City: Spanish Fork

State: Utah

Zip: 84660

Public Meeting Date comments address: 4/16/2020

Check here if not related to specific meeting

List additional organization attendees at cited meeting: _____

Impact of electric vehicles was underestimated in a table provided for the April 16, 2020 Workshop

Check here if any of the following information being submitted is copyrighted or confidential.

Check here if you do **not** want your Stakeholder feedback and accompanying materials posted to the IRP website.

***Respondent Comment:** Please provide your feedback for each IRP topic listed above.

There appears to be an error in the "Single Family Market Profile - Utah" table on page 19 of the 2021 IRP DSM Technical Workshop document, dated April 16, 2020. The percent penetration for electric vehicles should be 0.2%. (There are two vehicles per average Utah household. The average mileage per vehicle is 15,000 miles per year, consuming 4,000 kWh with current technology.)

PacifiCorp Response:

The values represented under the "saturation" column of the table on page 19 are calculated on a per household basis for all measures listed. The result is that although there may be, on average, two vehicles per household, the metric was only calculated based on total households, not total vehicles. This calculation was consistent for all measures, even those that may have more than one instance typically per home. If it were calculated based on total vehicle market the value would be much closer to 0.2% as noted.

Data Support: If applicable, provide any documents, hyper-links, etc. in support of comments. (i.e. gas forecast is too high - this forecast from EIA is more appropriate). If electronic attachments are provided with your comments, please list those attachment names here.
