

# PacifiCorp - Stakeholder Feedback Form

## 2021 Integrated Resource Plan

PacifiCorp (the Company) requests that stakeholders provide feedback to the Company upon the conclusion of each public input meeting and/or stakeholder conference calls, as scheduled. PacifiCorp values the input of its active and engaged stakeholder group, and stakeholder feedback is critical to the IRP public input process. PacifiCorp requests that stakeholders provide comments using this form, which will allow the Company to more easily review and summarize comments by topic and to readily identify specific recommendations, if any, being provided. Information collected will be used to better inform issues included in the 2021 IRP, including, but not limited to the process, assumptions, and analysis. In order to maintain open communication and provide the broader Stakeholder community with useful information, the Company will generally post all appropriate feedback on the IRP website unless you request otherwise, below.

Date of Submittal 2020-08-28

\*Name: Brian Muir

Title: City Administrator

\*E-mail: bmuir@kemmerer.org

Phone: (307) 466 - 3128

\*Organization: City of Kemmerer

Address: City Hall

City: Kemmerer

State: WY

Zip: 83101

Public Meeting Date comments address: \_\_\_\_\_  Check here if not related to specific meeting

List additional organization attendees at cited meeting: \_\_\_\_\_

**\*IRP Topic(s) and/or Agenda Items:** List the specific topics that are being addressed in your comments.

IRP Resources

Check here if any of the following information being submitted is copyrighted or confidential.

Check here if you do **not** want your Stakeholder feedback and accompanying materials posted to the IRP website.

**\*Respondent Comment:** Please provide your feedback for each IRP topic listed above.

IRP Resources: We request that in addition to your plan to put the smaller nuclear reactors into your IRP, that given the proven technology to make coal even cleaner (carbon capture and coal gasification) that you also put coal-fired power back into your IRP. We would like you to put a picture of the Petra Nova coal-fired power plant on the cover of your IRP documents in place of or into the picture of the thermostat to create a new image for coal-fired power so that it has a fair chance to compete with the other power resources.

**Data Support:** If applicable, provide any documents, hyper-links, etc. in support of comments. (i.e. gas forecast is too high - this forecast from EIA is more appropriate). If electronic attachments are provided with your comments, please list those attachment names here.

**Recommendations:** Provide any additional recommendations if not included above - specificity is greatly appreciated.

Rather than talking about speeding up the retirement of the coal-fired plants, instead study speeding up embracing the integration of proven technologies of carbon capture and coal gasification to address your customers who are concerned about having more affordable, reliable, clean technology. Given the uncertainty and unproven technology of battery storage for baseload power, new proven clean coal technologies should be given a fair consideration with your data analysis.

\* Required fields

**PacifiCorp Response:**

Thank you for your feedback. The Company will evaluate your suggestion as the supply side resource table and cases are developed and discussed as part of the 2021 Integrated Resource Plan public input meeting series.
