

PacifiCorp - Stakeholder Feedback Form

2021 Integrated Resource Plan

PacifiCorp (the Company) requests that stakeholders provide feedback to the Company upon the conclusion of each public input meeting and/or stakeholder conference calls, as scheduled. PacifiCorp values the input of its active and engaged stakeholder group, and stakeholder feedback is critical to the IRP public input process. PacifiCorp requests that stakeholders provide comments using this form, which will allow the Company to more easily review and summarize comments by topic and to readily identify specific recommendations, if any, being provided. Information collected will be used to better inform issues included in the 2021 IRP, including, but not limited to the process, assumptions, and analysis. In order to maintain open communication and provide the broader Stakeholder community with useful information, the Company will generally post all appropriate feedback on the IRP website unless you request otherwise, below.

***Respondent Comment:** Please provide your feedback for each IRP topic listed above.

Given the uncertainty in the economy and political climate and the chance that subsidies may be reduced or eliminated, and given that these subsidies are really hidden from the average consumer's understanding of how it is really being paid for directly by their federal taxes and indirectly from the budget deficit, and in the interest to full transparency to the customer, run scenarios where tax credits and subsidies are eliminated and see what the ideal portfolio would be. Assume that coal-fired power and the smaller nuclear modular reactors are a part of the portfolio and not to be eliminated.

PacifiCorp Response:

Thank you for your feedback. The Company will evaluate your suggestion as the supply side resource table and cases are developed and discussed as part of the 2021 Integrated Resource Plan public input meeting series.

Data Support: If applicable, provide any documents, hyper-links, etc. in support of comments. (i.e. gas forecast is too high - this forecast from EIA is more appropriate). If electronic attachments are provided with your comments, please list those attachment names here.

Recommendations: Provide any additional recommendations if not included above - specificity is greatly appreciated.
