

# PacifiCorp - Stakeholder Feedback Form

## 2021 Integrated Resource Plan

PacifiCorp (the Company) requests that stakeholders provide feedback to the Company upon the conclusion of each public input meeting and/or stakeholder conference calls, as scheduled. PacifiCorp values the input of its active and engaged stakeholder group, and stakeholder feedback is critical to the IRP public input process. PacifiCorp requests that stakeholders provide comments using this form, which will allow the Company to more easily review and summarize comments by topic and to readily identify specific recommendations, if any, being provided. Information collected will be used to better inform issues included in the 2021 IRP, including, but not limited to the process, assumptions, and analysis. In order to maintain open communication and provide the broader Stakeholder community with useful information, the Company will generally post all appropriate feedback on the IRP website unless you request otherwise, below.

Date of Submittal 2020-08-28

\*Name: Brian Muir

Title: City Administrator

\*E-mail: bmuir@kemmerer.org

Phone: (307) 466 - 3128

\*Organization: City of Kemmerer

Address: City Hall

City: Kemmerer

State: WY

Zip: 83101

Public Meeting Date comments address:  Check here if not related to specific meeting

List additional organization attendees at cited meeting:

---

**\*IRP Topic(s) and/or Agenda Items:** List the specific topics that are being addressed in your comments.

Energy Poverty, Increased costs, and the social cost of Coal

Check here if any of the following information being submitted is copyrighted or confidential.

Check here if you do **not** want your Stakeholder feedback and accompanying materials posted to the IRP website.

---

**\*Respondent Comment:** Please provide your feedback for each IRP topic listed above.

Research shows that wind, solar, and battery power, when exported to developing nations, does not take them out of poverty. Wind and solar and battery, because they are so heavily subsidized by federal taxes and adding to the deficit, are actually increasing costs to the consumer and our customers., and could lead our country to energy poverty if not checked. Hence, it is important to be transparent about what coal-fired and natural gas power actual do to both our wealth and the wealth of impoverished nations. Hence the importance of providing transparent analysis to the consumer showing what is really most affordable to the consumer by taking tax credits out of some of the scenarios for comparative purposes.

### **PacifiCorp Response:**

Thank you for your feedback.

---

**Data Support:** If applicable, provide any documents, hyper-links, etc. in support of comments. (i.e. gas forecast is too high - this forecast from EIA is more appropriate). If electronic attachments are provided with your comments, please list those attachment names here.

---

**Recommendations:** Provide any additional recommendations if not included above - specificity is greatly appreciated.
