

# PacifiCorp - Stakeholder Feedback Form

## 2023 Integrated Resource Plan

PacifiCorp (the Company) requests that stakeholders provide feedback to the Company upon the conclusion of each public input meeting and/or stakeholder conference calls, as scheduled. PacifiCorp values the input of its active and engaged stakeholder group, and stakeholder feedback is critical to the IRP public input process. PacifiCorp requests that stakeholders provide comments using this form, which will allow the Company to more easily review and summarize comments by topic and to readily identify specific recommendations, if any, being provided. Information collected will be used to better inform issues included in the 2023 IRP, including, but not limited to the process, assumptions, and analysis. In order to maintain open communication and provide the broader Stakeholder community with useful information, the Company will generally post all appropriate feedback on the IRP website unless you request otherwise, below.

**\*Respondent Comment:** Please provide your feedback for each IRP topic listed above.

In its May 12, 2022 IRP Public Input Meeting, PacifiCorp requested stakeholder feedback on its greenhouse gas (\u001CGHG\u001D) price policy scenarios. WIEC is requesting PacifiCorp provide greater transparency into its GHG scenarios, including the following specific information: 1. How did PacifiCorp develop their methodology for calculating GHG costs? 2. Please describe in detail the third-party resources PacifiCorp uses to develop its GHG costs. 3. Please describe all cost assumptions included within the GHG costs? 4. Were PacifiCorp\u0019s medium and high GHG costs benchmarked with other utilities in the region? Other utilities across the country? If so, please describe which utilities and how PacifiCorp benchmarked those costs. 5. Why did PacifiCorp use 2025 as the starting point for costs in the medium and high GHG scenarios? 6. Are GHG costs factored into any early retirement scenarios of PacifiCorp\u0019s current resources? 7. Please describe the level and extent of information PacifiCorp plans to include in its 2023 IRP regarding developing its methodology for GHG costs.

### **PacifiCorp Response (08/05/2022):**

PacifiCorp appreciates the request and will provide this information as part of an upcoming public-input meeting. In addition, the source and derivation of its assumptions around the social cost of greenhouse gas and assumptions on price of CO2 are detailed in the company's IRP.

In the 2021 IRP, the societal cost of greenhouse gas (SCGHG) emissions price was developed based on the State of Washington emission pricing rules under the Washington Clean Energy Transformation Act (CETA), which relied on the

Federal government's Technical Update of the Social Cost of Carbon for Regulatory Impact Analysis Under Executive Order 12866 Interagency Working Group on Social Cost of Greenhouse Gases published in August of 2016.

For the 2023 IRP, the Company will update its SCGHG assumptions using the July 28, 2022 update. The Company will use an updated view of this data in the 2023 IRP as specified in recent Washington Utilities and Transportation Commission U-190730 Order 03: [website](#).
