

PacifiCorp - Stakeholder Feedback Form

2023 Integrated Resource Plan

PacifiCorp (the Company) requests that stakeholders provide feedback to the Company upon the conclusion of each public input meeting and/or stakeholder conference calls, as scheduled. PacifiCorp values the input of its active and engaged stakeholder group, and stakeholder feedback is critical to the IRP public input process. PacifiCorp requests that stakeholders provide comments using this form, which will allow the Company to more easily review and summarize comments by topic and to readily identify specific recommendations, if any, being provided. Information collected will be used to better inform issues included in the 2023 IRP, including, but not limited to the process, assumptions, and analysis. In order to maintain open communication and provide the broader Stakeholder community with useful information, the Company will generally post all appropriate feedback on the IRP website unless you request otherwise, below.

Date of Submittal 2022-06-14

*Name: Hunter Holman

Title: _____

*E-mail: hholman12@gmail.com

Phone: (801) 244 - 9227

*Organization: Utah Clean Energy; Western Resources Advocates; Sierra Club; Interwest Energy Alliance; Powder River Basin Resource Council; NW Energy Coalition; Salt Lake City

Address: _____

City: _____

State: _____

Zip: _____

Public Meeting Date comments address: _____

***IRP Topic(s) and/or Agenda Items:** List the specific topics that are being addressed in your comments.

How IIJA programs may affect IRP portfolio outcomes

Check here if you do **not** want your Stakeholder feedback and accompanying materials posted to the IRP website.

***Respondent Comment:** Please provide your feedback for each IRP topic listed above.

Organizations in support of this feedback form: Utah Clean Energy Western Resources Advocates; Sierra Club; Interwest Energy Alliance; Powder River Basin Resources Council; NW Energy Coalition; Salt Lake City. The stakeholders listed above request that PacifiCorp include time and materials in an upcoming 2023 IRP stakeholder presentation to discuss the benefits and opportunities that may be available through the Infrastructure Investment and Jobs Act (\u001CIIJA\u001D) programs, and how they may affect resource and transmission planning. We also request information on how these potential benefits and opportunities are being included in the 2023 IRP modeling. Specifically, we are interested in the following programs and opportunities under the category of Grid Infrastructure and Resiliency (Title I, Subtitle A: <https://www.congress.gov/117/plaws/publ58/PLAW-117publ58.pdf>): Transmission facilitation program (Section 40106); Electric grid reliability and resilience research, development, and demonstration (Section 40103); Deployment of technologies to enhance grid flexibility (Section 40107); Preventing outages and enhancing the resilience of the electric grid (Section 40101). However, we are interested in information related to any IIJA program and opportunity that may affect cost and reliability assumptions for transmission, DSM, DR, and supply side resources in resource planning. Also, in accordance with items in the 2019 IRP Action Plan, e.g., items from Action Item 1D, we also request any information on planned or ongoing collaborations with labor or community leaders impacted by coal unit closure. Specifically, what IIJA programs has PacifiCorp identified as beneficial to community and worker transition planning, and how is the company working with local officials to access that funding? Finally, we request information on what PAC

* Required fields

has done to date to apply for funding, or to prepare an application for funding, through any of the IIJA program, and which programs PAC is prioritizing.

PacifiCorp Response (7/11/22)

The Company expects that IIJA funds will help to build out a fast-charging network to support the deployment of electric vehicles across our six-state service territory. The connection of these actions/investments to the IRP would be reflected/captured through the load forecast used to inform the IRP planning process.

At this time, the processes by which these funds will be distributed is in the early stages of development and not fully known. For example, the Department of Energy (DOE) has not developed specific programs and funding opportunities (or the rules and conditions) yet. However, PacifiCorp has had productive discussions with DOE and are planning a subsequent discussion in July 2022. PacifiCorp is in the early phases of actively collaborating with our state jurisdictions, as a majority of IIJA funds for grid projects will be allocated to each state. We are closely monitoring the release of any new information on the IIJA programs to make sure we fully understand expectations and program details before finalizing our plans to seek IIJA funds.

Data Support: If applicable, provide any documents, hyper-links, etc. in support of comments. (i.e. gas forecast is too high - this forecast from EIA is more appropriate). If electronic attachments are provided with your comments, please list those attachment names here.

Recommendations: Provide any additional recommendations if not included above - specificity is greatly appreciated.

Please submit your completed Stakeholder Feedback Form via email to IRP@PacifiCorp.com

Thank you for participating.
