

PacifiCorp - Stakeholder Feedback Form

Integrated Resource Plan

PacifiCorp (the Company) requests that stakeholders provide feedback to the Company upon the conclusion of each public input meeting and/or stakeholder conference call, as scheduled. PacifiCorp values the input of its active and engaged stakeholder group, and stakeholder feedback is critical to the IRP public input process. PacifiCorp requests that stakeholders provide comments using this form, which will allow the Company to more easily review and summarize comments by topic and to readily identify specific recommendations, if any, being provided. Information collected will be used to better inform issues included in the IRP, including, but not limited to the process, assumptions, and analysis. In order to maintain open communication and provide the broader Stakeholder community with useful information, the Company will post appropriate feedback on the IRP website based on your selection below.

Date of Submittal 2024-08-13

*Name: Katie Pappas

Title: _____

*E-mail: kpappas56@yahoo.com

Phone: 1801532365

*Organization: Ratepayer

Address: 424 K st

City: Salt Lake City

State: UT

Zip: 84103

Public Meeting Date comments address: _____

Check here if related to specific meeting

List additional organization attendees at cited meeting: _____

***IRP Topic(s) and/or Agenda Items:** List the specific topics that are being addressed in your comments.

Proposed Rocky Mountain Power Rate Increase in Utah

Check here if you want your Stakeholder feedback and accompanying materials posted to the IRP website.

***Respondent Comment:** Please provide your feedback for each IRP topic listed above.

Rocky Mountain Power, with help from the Utah legislature and governor's office, wants all of us in Utah to foot the bill, in a backward attempt to prop up what's left of the Utah coal industry. Rather than move toward a more sustainable, healthier, lower energy cost future, they are hellbent on prolonging dependence on dirty fossil fuels. Why? Ironically, the very issues their rate increases seek to address are made worse by their climate busting practices. Utah has an opportunity to be a leader in the development of several cheaper, greener energy sources that actually cost less, don't pollute our air and won't negatively impact our health. We have never factored in the external costs of burning fossil fuels but now spend billions to mitigate damage caused by climate change. Utahns deserve better. Our energy policies and decisions should be guided by science, not by politicians and corporations. Please oppose this outrageous assault on ratepayers. Katie Pappas Salt Lake City, UT

Data Support: If applicable, provide any documents, hyper-links, etc. in support of comments. (i.e. gas forecast is too high - this forecast from EIA is more appropriate). If electronic attachments are provided with your comments, please list those attachment names here.

Recommendations: Provide any additional recommendations if not included above - specificity is greatly appreciated.

PacifiCorp Response (8/29/2024):

Thank you for your feedback. PacifiCorp uses the Integrated Resource Planning process to select the least-cost, least-risk portfolio given prevailing conditions at the time of planning. Renewable energy is a critical component of PacifiCorp's resource mixture and will make up an increasing proportion of the energy generated by the PacifiCorp system over time.

* Required fields

Pages 6-7 of the 2023 IRP Update report that the preferred portfolio includes 3,749 megawatts of new solar online by 2037, 9,800 megawatts of new wind resources online by 2037, and more than 4,000 megawatts of new storage capacity online by 2037. While renewable energy plays an ever-growing role in PacifiCorp's resource mixture, PacifiCorp's diverse portfolio of resources help to ensure system reliability during critical hours. In the 2023 IRP Update, thermal resources operated at a low-capacity factor in future years but were critical in ensuring system reliability during peak load hours. PacifiCorp is committed to achieving emissions reduction targets as required by state and federal regulatory obligations and welcomes the development of alternative fuel sources that can provide a similar level of system flexibility as traditional thermal resources at reduced emissions rates.

Please submit your completed Stakeholder Feedback Form via email to IRP@PacifiCorp.com

Thank you for participating.
