

# PacifiCorp - Stakeholder Feedback Form

## Integrated Resource Plan

PacifiCorp (the Company) requests that stakeholders provide feedback to the Company upon the conclusion of each public input meeting and/or stakeholder conference call, as scheduled. PacifiCorp values the input of its active and engaged stakeholder group, and stakeholder feedback is critical to the IRP public input process. PacifiCorp requests that stakeholders provide comments using this form, which will allow the Company to more easily review and summarize comments by topic and to readily identify specific recommendations, if any, being provided. Information collected will be used to better inform issues included in the IRP, including, but not limited to the process, assumptions, and analysis. In order to maintain open communication and provide the broader Stakeholder community with useful information, the Company will post appropriate feedback on the IRP website based on your selection below.

Date of Submittal 2024-09-20

\*Name: Nathan Strain

Title:

\*E-mail: nathanv.strain@gmail.com

Phone: (435) 200 - 5963

\*Organization: Citizen

Address: 259 East 4800 South Apt. 4

City: Murray

State: UT

Zip: 84107

Public Meeting Date comments address: 08-15-2024

Check here if related to specific meeting

List additional organization attendees at cited meeting:

**\*IRP Topic(s) and/or Agenda Items:** List the specific topics that are being addressed in your comments.

Existing Thermal Resource Options

Check here if you want your Stakeholder feedback and accompanying materials posted to the IRP website.

**\*Respondent Comment:** Please provide your feedback for each IRP topic listed above.

With the volatility of coal supply and the environmental concerns associated with coal has Pacificorp placed a heightened interest in conventional Nuclear? I am aware that suel for SMRs is more scarce and expensive, perhaps a large conventional Nuclear plant at the site of the Hunter Power Plant or a purchase of the stalled Blue Castle Nuclear Project is warranted. Construction of conventional nuclear in Utah is likely to be politically and socially popular. Pacificorp should also accelerate development of Geothermal in Utah.

**Data Support:** If applicable, provide any documents, hyper-links, etc. in support of comments. (i.e. gas forecast is too high - this forecast from EIA is more appropriate). If electronic attachments are provided with your comments, please list those attachment names here.

**Recommendations:** Provide any additional recommendations if not included above - specificity is greatly appreciated.

Explore a large conventional Nuclear plant in Utah at the site of Hunter Plant or the Blue Castle Project. More aggressively pursue geothermal.

### PacifiCorp Response:

PacifiCorp's supply-side resource table for the 2025 IRP includes nuclear and geothermal resource options and was recently posted to the Company's website:

[https://www.pacificorp.com/content/dam/pcorp/documents/en/pacificorp/energy/integrated-resource-plan/2025-irp/2025-irp-support-studies/Public\\_SSR\\_Database\\_Summary\\_Tab\\_2025.xlsx](https://www.pacificorp.com/content/dam/pcorp/documents/en/pacificorp/energy/integrated-resource-plan/2025-irp/2025-irp-support-studies/Public_SSR_Database_Summary_Tab_2025.xlsx)

\* Required fields

The IRP generally does not evaluate specific projects but can identify general locations that might be favorable for different resource types. PacifiCorp would note that the inclusion or exclusion of different resource types in the preferred portfolio is an indication of the relative performance based on the supply-side resource assumptions. PacifiCorp is also planning to prepare sensitivity studies based on “advanced” nuclear and geothermal costs, which start lower than the baseline cost forecast and decline faster through time. The decision to move forward with particular resource offerings is based on bids for specific projects, which can vary widely, along with consideration of a variety of less tangible risks related to both the existing resource mix and potential resource additions.

Please submit your completed Stakeholder Feedback Form via email to [IRP@PacifiCorp.com](mailto:IRP@PacifiCorp.com)

Thank you for participating.
