Clean Energy Planning Engagement Series for Oregon Tribal Nations

July 26, 2024, 9:00-11:00 a.m., PT

For a Better Meeting Experience

- Use Gallery View (icon at top right) when in group discussion

- For technical support, chat "Tag G-D / E Source" as recipient, and send your message

- Questions are welcome at any time

- Please mute until speaking
- Speak by clicking the "Raise Hand" in the tool bar

	AGENDA
	Check In & Closing the Loop
	Customer Generation Projects
	Biennial Report Discussion
	Final Thoughts
	Next Steps

Collaborators

Christina Medina
Manager, Stakeholder
Policy & Engagement

Robert Meredith
Policy Director,
Pricing & Tariff

Tracy Moreland
Tribal Liaison
Representative

Kimberly Alejandro
Equity Analyst

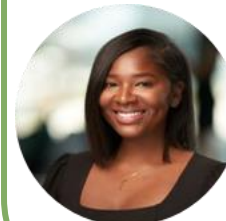

Source Facilitation Team

Morgan Westberry

Jeffrey Daigle

Zanya Morgan

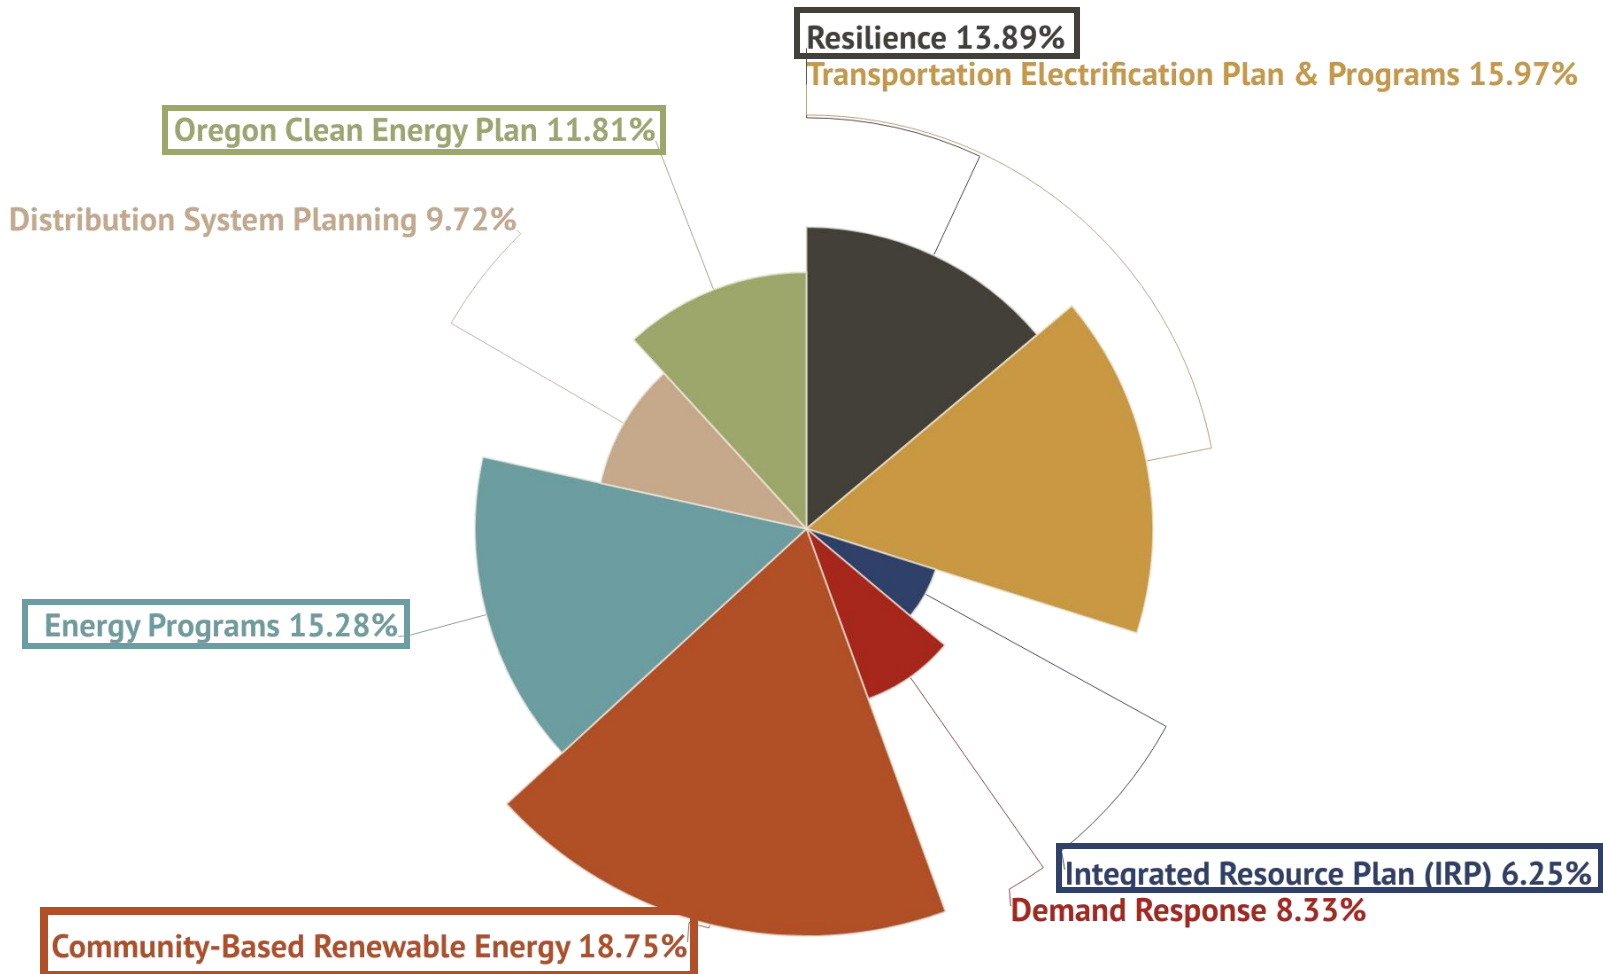

Closing the Loop from Last Meeting

June's Focus:

- Reviewing PacifiCorp's proposed updates to CBI Framework based on the CBI activity feedback to identify impacted Tribal groups and challenges meeting Tribal needs
- Communicating the Biennial reporting process and revisiting discussion considerations
- Highlighting the IRP planning process and approach

Reflecting on what we heard:

Upcoming Discussion Items:

1. Apprenticeships | Rural Mobile Training Units
2. Distribution System Planning Overview
3. Energy Programs & Energy Trust of Oregon Intersectionality
4. Customer Experience
5. Transportation Electrification & Demand Response Background & Opportunities

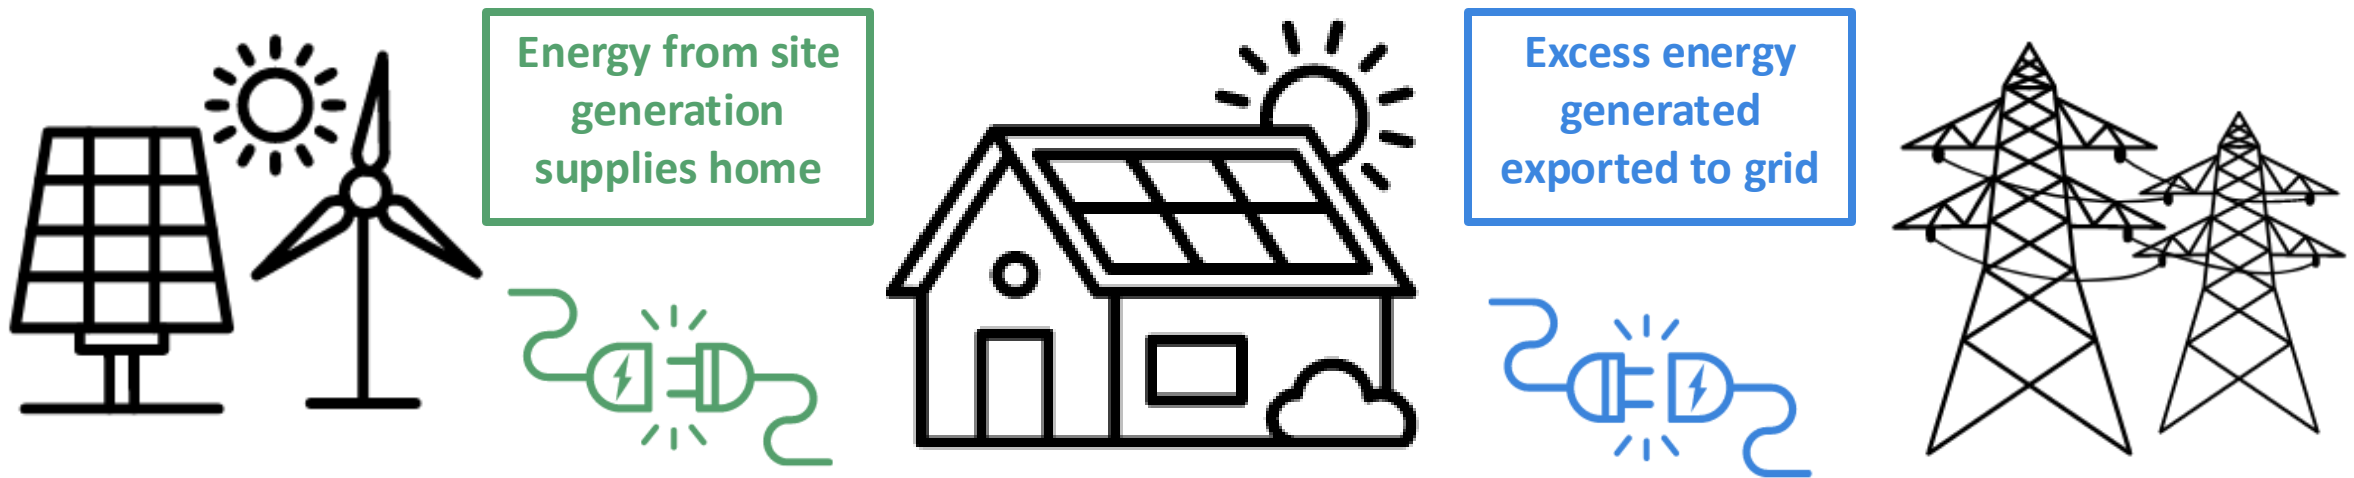

What is something you have recently discovered that you are excited about?

Customer Generation Projects

What is net metering?

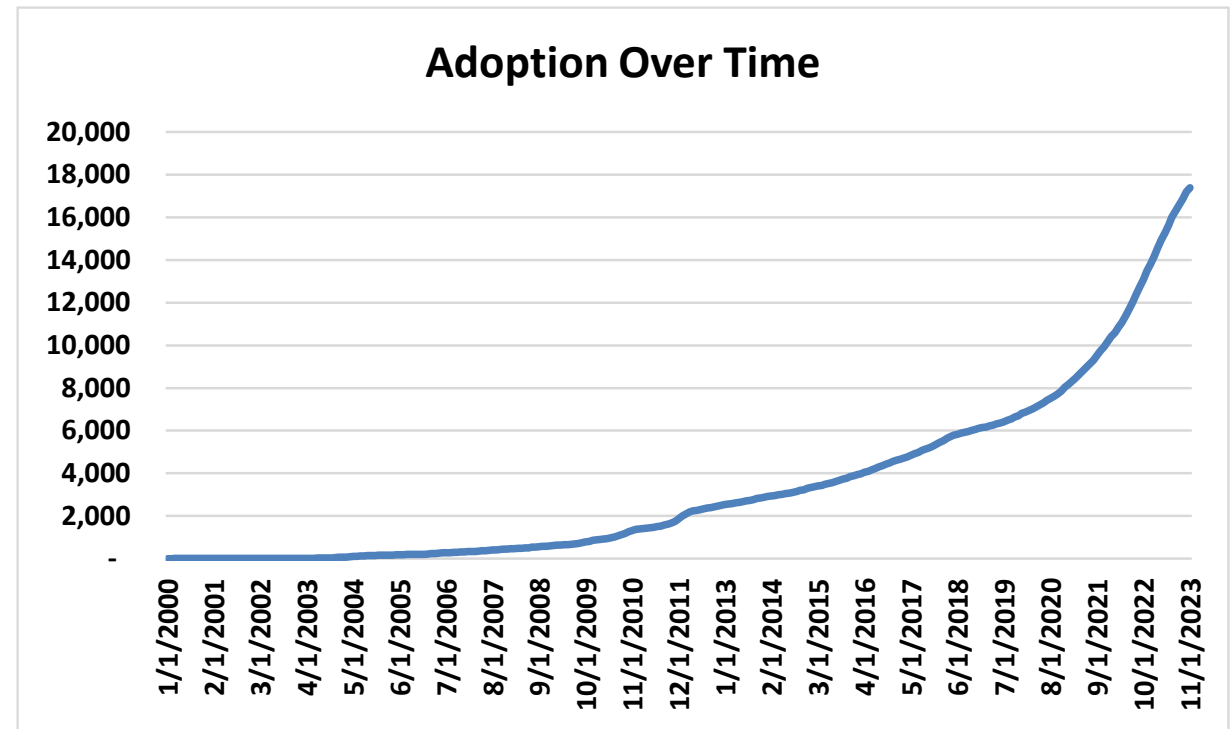

Net Metering: a billing credit from your utility company for power you generate. If your usage exceeds what you generate, you are billed on the "net" - i.e., the difference between what you use and what generate

- Energy exported to grid is offset 1 for 1 with energy charges
- Energy credits can be banked for future use and expire in April

Net Metering

- First interconnection in 2000
- Energy is credited 1 for 1
- Significant growth in adoption
- 18,976 customers participating
- 197 MW of nameplate capacity
- 2.9% of customers on net metering

Oregon Solar Incentive Program

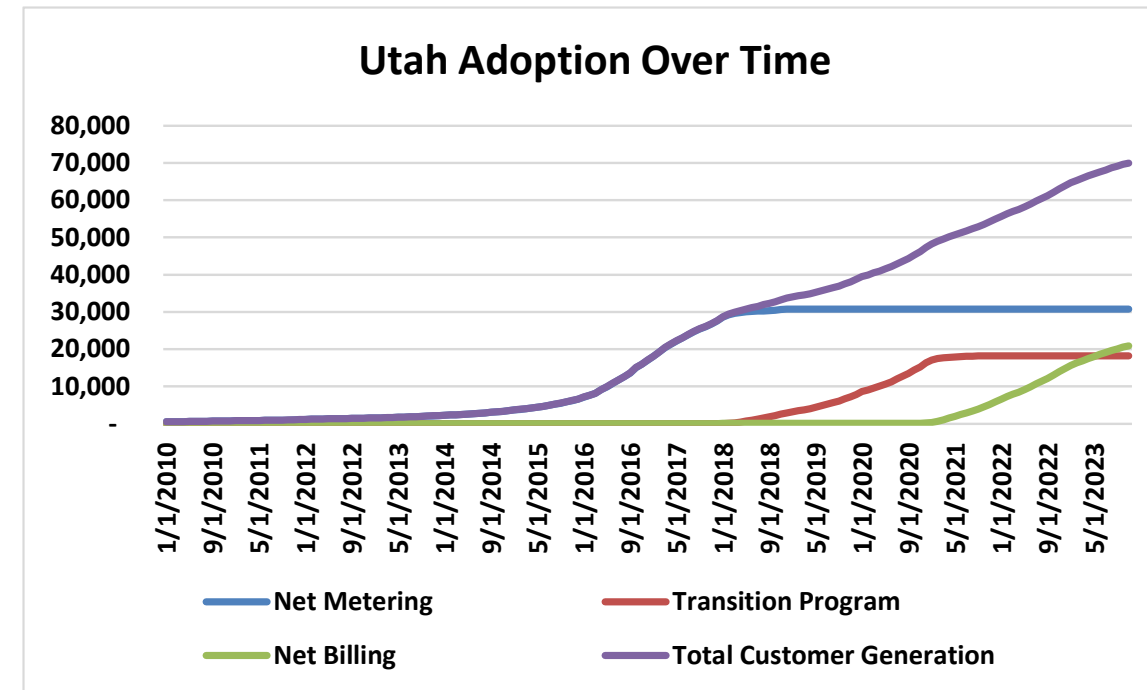

- Authorized by House Bill 3039 in 2009
- Incentive to spur the solar installation market
- 714 participants
- Volumetric Incentive Rate
 - Paid for all solar generation
 - Varies by install date and location
 - Range from 20.7¢ to 65.0¢ per kWh
 - \$5,892 average annual payment
- \$10 per month Solar Meter Charge
- \$3.2 million annual cost to customers
- 15-year contract – first one expires in August 2025

What Other States Have Done

Net Billing in Utah and California

- Both programs began in 2020
- Legacy net metering program closed to new applications
- Exported energy is credited at a value of exports (presently at 6.9¢ per kWh in Utah)
- Adoption has remained stable

Next Steps

- Implementing a successor program for the Oregon Solar Incentive Program by August 2025
- Evaluating Net Metering and exploring alternative customer generation programs
- Continuing and improving upon outreach with interested parties

BREAK

Biennial Report Discussion

Proposed Reporting Timeline

Biennial Report | Community Summary

Our Priorities:

- Community Summary reflects authentic experience and input from communities
- Language is clear in explaining the key components required by HB2021

Achieving Our Priorities:

- Maintaining an open dialogue
- Reaching consensus on input and how input is reflected
- Continuing discussions on upcoming opportunities and asking for feedback to approve upon existing activities

How do you want us to talk about you and your contributions?

Next Steps

Save the Date!

Join us, and our hosts, in person at Warm Springs in September!

Where: Warm Springs Power & Water Enterprises
5180 Jackson Trail Road
Warm Springs, OR 97761

When: 9:00 am – 11:00 am
September 27, 2024

More details coming in August

Want to join us in person? *We can support your travel!*
