Closing the Loop from Past Meetings

July Focus:

- Engagement opportunities for the Clean Energy Engagement series, scheduled every other month through 2023. For more information and meeting cadence, visit the [Oregon Clean Energy Plan](#).
- A call for Oregon Community feedback on Community-Based Renewable Energy, continued development of a survey plan, and continued development of materials to support community engagement.
- An update to Distribution System Planning and continued community engagement.

Closing the Loop from Past Meetings

September Focus:

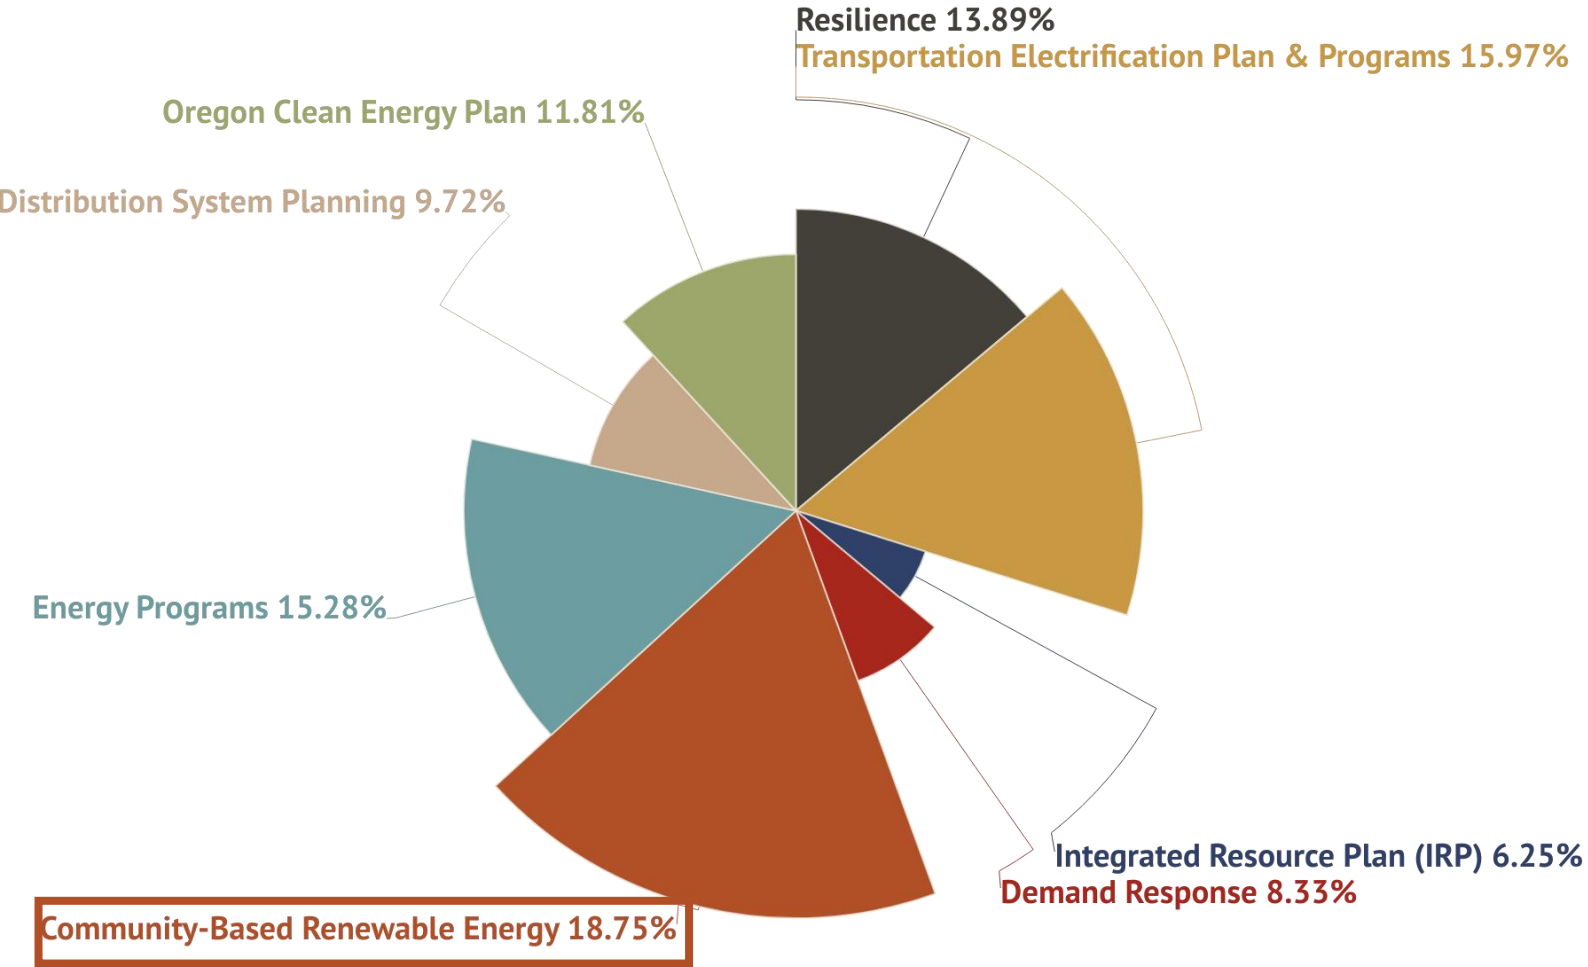

- Oregon Department of Energy Overview and Resources for Tribes. State programs available to support resilience, renewable energy, and energy efficiency for Tribal Communities and members.
- Small Scale Renewable Procurement concept introduction; integrated resource planning process and the request for proposal process overview. Including Small Scale Procurement Timeline.
- Elevating Engagement input results and review as well as the results of the Community Based Renewable Energy surveys.

Elevating Engagement

Christina Medina |
Stakeholder Policy & Engagement

Kathleen.Hawley@pacificorp.com

POWERING YOUR GREATNESS

Transportation Electrification

Transportation Electrification Phase 1: Needs Assessment

- Conduct a comprehensive needs assessment within tribal communities to understand transportation challenges, preferences, and potential barriers to EV adoption.
- Learn about what program elements may be desired by Tribes to accelerate Transportation Electrification learning, adoption, and practice.
- Determine what barriers may exist to participation to address and/or rank.
- Engage to gather input on their preferred forms of support-to-support capacity building for these communities.

Energy Efficiency

Kari Greer | Sr Community Relations Mgr.
Customer Solutions
O: 541-308-2242 | M: 503-816-9032

POWERING YOUR GREATNESS

Energy-Efficiency Workshops

Partner with Oregon Tribal communities to co-design workshops that connect community members with relevant programs, rebates and tools that can help them reduce energy costs, improve comfort and support a healthy environment.

Goals:

- Build/strengthen relationships
- Engage more community members
- Increase access to and participation in Pacific Power and Energy Trust of Oregon programs

Co-Design Process

Define shared goals

Hear what outcomes Tribal Nations, and members would like to see from the collaboration and what values guide them.

Document shared goals and refer back to them to ensure the collaboration is fulfilling its purpose.

Co-create content

Identify content that aligns with shared goals and work together to adapt information in culturally relevant ways.

Develop format

Listen to partners' guidance on how members of their community tend to gather and plan an event that follows their guidelines.
