PROGRAM ADMINISTRATION

WASHINGTON

LOW INCOME WEATHERIZATION 2025

The Company has established long-term partnerships with four local non-profit agencies to provide weatherization services to income-qualifying households throughout its Washington service territory. These agencies include:

- **Blue Mountain Action Council** in Walla Walla
- **Northwest Community Action Center** in Toppenish
- **Opportunities Industrialization Center of Washington** in Yakima
- **Yakama Nation Housing Authority**

By leveraging Company funding along with Washington Weatherization Plus Health, formally known as Match Maker, Program funds, these agencies can offer energy efficiency services to more households at no cost to participating customers. The Company provides rebates to partnering agencies for 50% of the service costs while Weatherization Plus Health funds are available and cover 100% of costs when state funds are depleted. In 2025, 59 homes were funded at 50% and 1 at 100%. Weatherization Plus Health, formally known as Match Maker Program funding for 2025-2027 was released in the fourth quarter of 2025, allowing agencies to resume billing at 50% of Pacific Power funds, and remained at 50% through 2025 program year.

Participants qualify if they are homeowners or renters residing in single-family homes, manufactured homes, or apartments. Since the program's inception in the mid-1980s, over 8,250 homes have been completed with Pacific Power funding.

By contract with the Company, the agencies are responsible for:

- **Income Verification**: Agencies determine participant income eligibility based on Washington Department of Commerce guidelines. Interested households apply through the agencies. Income guidelines are available on the Washington Department of Commerce website.
- **Energy Audit**: Agencies use a U.S. Department of Energy-approved audit tool or priority list to identify cost-effective measures for participants' homes, ensuring a savings-to-investment ratio of 1.0 or greater.
- **Installation of Measures**: Agencies install the identified energy efficiency measures.
- **Post Inspections**: Agencies inspect 100% of completed homes, with 5-10% inspected by a Pacific Power inspector. See Appendix 2 for verification summary.
- **Billing Notification**: Agencies submit billing to the Company within 90 days of job completion, including a homeowner agreement and invoice form detailing installed measures and associated costs.
