REQUEST

Q01. Regarding PacifiCorp's Vegetation Management Enterprise Systems:

On page 459 of its 2026-2028 Base WMP R1, PacifiCorp states that it “does not own an enterprise system to track its vegetation management initiatives.¹ PacifiCorp maintains a database used to track production metrics associated with vegetation management activities. This system is separate from the third-party work management system used in the field during inspection and correction of vegetation conditions identified during implementation of activities identified in Sections 9.2 include PacifiCorp Vegetation Management (PVM) and GIS.”

- a. Indicate whether “PVM” as referenced in the statement above is:
 - i. PacifiCorp’s “database used to track production metrics associated with vegetation management activities.”
 - ii. PacifiCorp’s “third-party work management system.”
 - iii. A separate and distinct database or work management system.
 1. If it is, explain.

- b. Describe the process by which data are transferred, integrated, or synchronized among the “third-party work management system,” PacifiCorp’s “database used to track production metrics associated with vegetation management activities,” and PVM (if it is a separate database or management system.). The description should include:
 - i. Whether data transfers are automated or manual.
 - ii. The frequency of data transfers, integration, or synchronization between systems and databases.
 - iii. Explain any data validation or quality-control procedures applied during data transfer or integration.
