### OEIS-C-WMP-2026-PC-100 Data Request 1

Electrical corporations conduct asset inspections as a result of WMP initiatives and outside of (or in addition to) WMP initiatives. This data request (DR) is asking for information on both.

As a follow up on OEIS-P-WMP-2026-PC-080 data request sent February 19, 2026, please provide the total number of asset inspections performed, asset conditions found, and asset conditions resolved in 2015 through 2025 (prior data request was from 2024 to 2025). Asset conditions are inspection findings that lead to a work order. Conditions resolved totals should include conditions found from all prior years but were resolved in the year in question. The units for the table should be like those used in WMP inspection initiative definitions. For example, an WMP initiative might have a target of performing 1,000 inspections. The table below should use the same units.

Year	Number of Asset Inspections Performed	Number of Asset Conditions Found	Number of Asset Conditions Resolved
2015			
2016			
2017			
2018			
2019			
2020			
2021			
2022			
2023			
2024			
2025
