

CalAdvocates Data Request 5.2

The following questions relate to your 2023-2025 WMP submission.

If a full response to a given question will be included in your WMP submission, your response to that question of this data request may consist of a citation to the specific page(s) or table(s) of the WMP where the information may be found, a written response to the question, or both.

Risk Modeling:

Provide an Excel table of all distribution circuit-segments that traverse HFTD areas (i.e., the segment has greater than zero circuit-miles in HFTD) existing as of January 1, 2023. The Excel table should list each such circuit-segment as a row and include the following information in separate columns:

For items (n) and (r), please include all relevant risk scores. For example, include vegetation risk score, conductor risk score, and any other driver-specific risk scores you have developed. Please insert additional columns as needed to accommodate this.

- (a) Circuit name for the circuit that each segment is part of
- (b) Circuit ID for the circuit that each segment is part of
- (c) Name or ID number of each circuit segment
- (d) Nominal voltage
- (e) Total circuit-miles on the circuit-segment
- (f) Overhead circuit-miles on the circuit-segment in non-HFTD Areas
- (g) Overhead circuit-miles on the circuit-segment in HFTD Tier 2
- (h) Overhead circuit-miles on the circuit-segment in HFTD Tier 3
- (i) Underground circuit-miles on the circuit-segment in non-HFTD Areas
- (j) Underground circuit-miles on the circuit-segment in HFTD Tier 2
- (k) Underground circuit-miles on the circuit-segment in HFTD Tier 3
- (l) Probability of ignition score for the circuit-segment, according to the risk model you used for your 2022 WMP filing
- (m) Consequence of ignition score for the circuit-segment, according to the risk model you used for your 2022 WMP filing
- (n) Total wildfire risk score(s) for the circuit-segment, according to the risk model you used for your 2022 WMP filing
- (o) Power Safety Power Shutoff (PSPS) risk score for the circuit-segment, according to the risk model you used for your 2022 WMP filing
- (p) Probability of ignition score for the circuit-segment, according to the risk model you are using for your 2023-2025 WMP filing
- (q) Consequence of ignition score for the circuit-segment, according to the risk model you are using for your 2023-2025 WMP filing

2023 WMP / PacifiCorp
April 3, 2023
CalAdvocates Data Request 5.2

- (r) Total wildfire risk score(s) for the circuit-segment, according to the risk model you are using for your 2023-2025 WMP filing
- (s) Power Safety Power Shutoff (PSPS) risk score for the circuit-segment, according to the risk model you are using for your 2023-2025 WMP filing.

Response to CalAdvocates Data Request 5.2

Please refer to Attachment CalAdvocates 5.2 which provides the data to requested in subparts (a) through (k) of this data request. PacifiCorp does not have data for subparts (l) through (s) because the risk assessment tools are currently being developed as part of the 2023-2025 Wildfire Mitigation Plan. PacifiCorp does not anticipate having circuit and power safety power shutoff (PSPS) risk scoring components completed until end of 2024year.

Despite PacifiCorp's diligent efforts, certain information protected from disclosure by the attorney-client privilege or other applicable privileges, or law may have been included in its responses to these data requests. PacifiCorp did not intend to waive any applicable privileges or rights by the inadvertent disclosure of protected information, and PacifiCorp reserves its right to request the return or destruction of any privileged or protected materials that may have been inadvertently disclosed. Please inform PacifiCorp immediately if you become aware of any inadvertently disclosed information.
