

CalAdvocates Data Request 7.1

2023-2025 WMP submission - Grid Design and Grid Hardening

Please provide an Excel sheet listing of each sustained outage that was caused by equipment failure for the period from 2020 to 2022 in any HFTD area. A sustained outage is an outage that lasts for five or more minutes. The Excel sheet should list each outage as a row, with the following information in columns:

- (a) ID number of the circuit affected.
- (b) Name of circuit affected.
- (c) Date of the outage.
- (d) Cause of the outage.
- (e) Conductor type at the location where the fault occurred (e.g., overhead (OH) bare conductor, overhead covered conductor, underground (UG) cable).
- (f) For all equipment failure outages, please state the specific type of failure (i.e. OH transformers failure, cross arms, UG transformer failure, cable failure, conductor failure etc.).
- (g) The outage duration in minutes.
- (h) Total number of customers impacted.

Response to CalAdvocates Data Request 7.1

Please refer to Attachment CalAdvocates 7.1

ID number of the circuit affected.	Name of circuit affected.	Date of the outage.	Cause of the outage.	Conductor type at the location where the fault occurred (e.g., overhead (OH) bare conductor, overhead covered conductor, underground (UG) cable).	For all equipment failure outages, please state the specific type of failure (i.e. OH transformers failure, cross arms, UG transformer failure, cable failure, conductor failure etc.).	The outage duration in minutes.	Total number of customers impacted.
